

of ninety pounds, on the question of whether or not it would force the gas from the well into the plant of the Louisville Gas & Electric Company at Maytown, and you said that you believed it would not of itself with the present equipment they have there? I wish you would explain what you meant by that?

(Defendants objected)

BY MR. HARKINS: I never made any such query as to the Louisville Gas & Electric Company-

BY MR. MAY: The Pennagrade Oil & Gas Company, then, whatever it was. Go and take the Louisville Gas & Electric Company's name off of it then-

BY MR. HARKINS: We are running our business.

A. The compressors as I understand are too high to take in the low pressure.

Q. Now, is there a method known to modern operators by which gas on a pressure of ninety pounds could be drawn from the well, and even less, by the proper equipment?

A. Yes.

Q. Explain to the jury what it is?

A. A lower compressor would take it.

Q. How low a rock pressure would it take out of the well?

A. Even ten pounds.
