FOREWORD

I am happy to present this bulletin which gives pertinent information concerning the program of secondary education in Kentucky. In it will be found a classified list of all the high schools existing in the state for the school year 1964-65. A companion bulletin is being issued later which gives similar information for the elementary schools.

In presenting this bulletin I am mindful of the fact of the great improvement that is going on in the area of secondary education throughout the state. I want to commend all the personnel on the local level as well as on the state level for giving their efforts toward improving the education for our children and youth.

It is hoped that the materials given in this publication will be useful to the members of the profession as they strive to improve educational opportunities on all levels.

KENTUCKY HIGH SCHOOL-1964-65

Kentucky public and private high schools are classified and accredited by the State Board of Education. This requirement is set forth in the law which requires that each school district in the state provide an approved twelve-grade school service and that rules and regulations be adopted governing the quality of this service. The law also provides that the "Superintendent of Public Instruction shall annually prepare or cause to be prepared and submit for approval and publication by the State Board of Education a list of all public and private high schools or other secondary schools in the state, showing their classifications." Accredited classifications are given each year by official action of the Kentucky State Board of Education on recommendations of the staff in the Division of Instructional Services, Section on Instruction, State Department of Education. The Commission on Secondary Schools of the Kentucky Association of Colleges, Secondary, and Elementary Schools has worked in close cooperation with the staff of the Division of Instructional Services in an advisory capacity on arriving at the recommended ratings.

The number of high schools classified and accredited annually continues to decline. This year, we have 468 high schools of all types of organizations or 15 fewer schools than existed in 1963-64. Table I which follows shows the number of schools classified according to the type of organization and the controlling authority under which they operate.

**TABLE I

Of the 468 schools operating, 415 are high schools offering a Program of Studies through the twelfth grade, and are considered complete high schools. The complete high schools also show a decline

from year to year which means that the high schools are becoming larger making it practicable to offer a broader Program of Studies for the youth of the State.

Table II shows the number of complete high schools and the change in number for a fifteen-year-period from 1950-51 to 1964-65. In this period of time, the number of high schools have decreased from 569 to 415 or 154 fewer schools than existed 15 years ago.

It is the purpose of the Table III to show the breakdown according to the size of the complete high schools and the control under which they are operated. In the county school district it will be seen that only 1 school with an enrollment of 99 pupils or below remain and only 2 such schools remain in the independent districts. This year, there is a total number 155 high schools with an enrollment of 500 and above. Last year, this number was 152 which represents that within the school year, 3 high schools had grown in size to an enrollment of more than 500 pupils.

1,000 and above	33	14	—	3	50
Totals	237	90	10	78	415

Of the 415 complete high schools, it will be noticed that 237 are operated by the county school districts, 90 are under control of independent districts, 10 are state, federal or regional schools and 78 are private schools.

The common type of high school organization conforms to either a six-year high school, grades 7-12; or a four-year high school, grades 9-12. For a number of years, the trend has been moving away from the six-year high school organization to the four-year high school organization. It will be observed, that this year there are 123 six-year high schools and 265 four-year high school organizations. Last year there were 126 six-year high schools and 272 four-year high schools.

The remaining high schools offer programs ranging from the seventh through the eleventh grade. By far the greater number of these schools are organized as separate junior high schools, grades seven, eight, and nine.

In Table IV, there is an accumulation of information concerning the number of high schools representing approximately a half-century of growth. It will be noticed that for twenty years there was a gradual growth from 316 schools in 1915-16 to 848 in 1934-35. Since then there has been a gradual and continuous decrease from 848 to 468 schools which represents 380 fewer schools operating now than 31 years ago. It is interesting to notice the number of discontinued high schools during the 45 year-period represented in Table IV is more than those existing at the beginning of the period by 64 schools.

The number of pupils enrolled in the high schools continues to increase. This year there has been an increase of over 6,000 pupils enrolled in grades 7-12 from 245,905 in 1963-64 to 252,176 in 1964-65. Table VI listed below, reveals that 60% of all the pupils enrolled in grades 7-12 attend county high schools and 40% attend independent high schools.

Table VI which follows gives the enrollment in all types of high schools in the state, grades 7-12 classified according to the type of control under which the school operates.

Ungraded	677	485	13	86	1,261
Totals	153,704	73,051	2,598	22,823	252,176

The greatest increase in the number of pupils enrolled in the high schools this year occurred in the county school districts. This increase in the county school districts numbered 4,877 pupils from 148,827 in 1963-64 to 153,704 in 1964-65. In the independent district there was a smaller increase of 100 pupils from 72,951 in 1963-64 to 73,051 in 1964-65.

Table VII is presented to show the growth and the enrollment in the high schools of the State for 50 years, from 1914-15 to 1964-65, classified according to the white enrollment, the Negro enrollment and the enrollment in the private schools. Since integration of white and Negro pupils has occurred rather rapidly since 1954-55, the State Department of Education has discontinued in keeping separate statistics. Today almost all of the high schools are integrated schools and therefore nearly all of the enrollment for the public schools is represented in the column headed Public White High Schools.
