Lest We Forget!

REPORT ON UNIVERSITY OF KENTUCKY MEN IN SERVICE JULY 19, 1946

Former Men Students in Service	7,127
Former Women Students in Service	371
<hr/>	
Total Students	7,498
Staff Members in Service	203
<hr/>	
	7,701
Duplicates (Staff members-students).....	108
<hr/>	
Total	7,593

CASUALTIES—307—13 since report made May 9, 1946.

Carl, Glenn Wesley	Illinois	Killed in action
Davis, Russell	Williamsport	Finding of Death
Bailey, William Russel	Lexington	FOD—Missing over Germany, 7-4-43
Black, Russell P.	Lexington	Illness, 12-19-43
Shearer, Martin Graves	Susie	Over North Sea, 1943
Zinn, Thomas F.	West Virginia	Killed in action
Gullion, Allen Wyant	Washington, D. C. and New Castle	Heart attack
Bosworth, Charles Clifford	Lexington	Illness
*Lewis, Jackson B.	So. Ft. Mitchell	FOD—Missing in Southwest Pacific
*Powell, Ormond E.	Richmond	FOD—Missing in Southwest Pacific
*Botts, Walter C.	Winchester	FOD—Missing in Southwest Pacific
*Stephens, Eugene L.	Williamsburg	Killed in action, Mediterranean area
*Ginter, Harold	Lexington	Died, non battle

* Given on list recently released by the War Department.

The Kentucky Alumnus

A QUARTERLY MAGAZINE DEVOTED TO THE INTERESTS OF THE ALUMNI AND STUDENTS OF THE UNIVERSITY OF KENTUCKY

Ashland Editor Named Head Of U. K. Alumni

Chauncey Forgey of Ashland, Ky., editor of the Ashland Daily Independent and past president of the Kentucky Press Association and former student of the University was elected president of the University of Kentucky Alumni Association for the year 1946-47.

The announcement was made at the annual meeting of the association, and was the result of a mail ballot sent out by the office to all active members of the association.

Mr. Forgey is past governor of his district of Rotary International and has been active in civic and University affairs for many years. He has been a member of the executive committee of the University of Kentucky Alumni Association since 1945, and is an active member of the association. He was elected chairman of Kentucky members of the Associated Press at a meeting held June 30, in the Lafayette hotel, Lexington.

James S. Shropshire, class of 1929, of Lexington, was elected vice-president of the Alumni Association for the coming year. Mr. Shropshire who entered the service in April, 1941; as a captain in the Reserves, served overseas from April 1942 to July 1943 in the South Pacific with the 147th Infantry of the Thirty-seventh

CHAUNCEY E. FORGEY

Division. He had been promoted to the rank of Lieutenant Colonel and returned to civilian status in the summer of 1945. He is a farmer and owns and operates the Kentuckian Citizen in Paris, Ky. He is a former secretary and also former treasurer of the Alumni Association, a Life Member, and was an appointed member of the Executive Committee of the Alumni Association before his election to the vice-presidency.

Miss Helen King of Lexington, class of 1925, was elected Executive Secretary of the Alumni Association and Editor of the Alumnus at the meeting of members on the Campus at the annual business meeting, June 7. Miss King has been acting treasurer and treasurer during the War years while at the same time filling the posi-

tion of assistant director in the office of Public Relations for the University. She was Associate Editor of the Alumnus and many of her articles appeared in each issue. Representing the University she took an important part in the organization of Boosters Clubs throughout the State during the Spring Quarter when the campaign for funds for the Athletic Association was in progress.

Senator William Blanton, who was elected to the Executive Committee of the Alumni Association was graduated from the University in 1924 and received his LL.B. degree in 1926. He is a native of Richmond, Ky., but for many years has been a practicing attorney in Paris, and was Police Judge of Paris before his election to the State Senate. He is an active member of the Alumni Association, a past president of the organization and a member of the Executive Committee for several years past. He was organization chairman of the Boosters Club of the University last Spring.

G. Lee McClain of Bardstown past secretary, past editor, and past president of the Alumni Association was elected to membership on the Executive Committee in the annual balloting. He is a Life Member of the Association and has been active in his assistance since his graduation in 1914 and has been a member of the Executive Committee since 1931. He is a veteran of World War I and in World War II filled State and Federal positions.

Carillonic Bells A Memorial For Marine Hero

As a memorial to his son, Alexander Bonnyman Jr., who was killed while fighting with the United States Marine Corps Reserves at Tarawa in the Gilbert Islands, Alexander Bonnyman Sr., of Knoxville, Tenn., has presented the University with Carillonic bells for the War Memorial Auditorium Tower. The gift has been accepted by the Board of Trustees and appropriate dedicatory exercises will be planned for a later date.

"Sandy" Bonnyman was about 6 feet 2 inches tall and was strikingly handsome, possessing a graciousness of manner and a smile that was most attractive. He was a first string man in the football team at Princeton from which he was graduated in 1932. He had studied mining engineering and prepared to enter the mining business in which his father was interested. He worked in the coal field in practically every capacity up to assistant superintendent, finally taking up the sales part of the business and locating in Louisville where he covered the territory of Kentucky and Indiana. He was successful in business and social contacts and was very popular.

In 1940 "Sandy" decided to return to the West, with his wife, formerly Miss Josephine Bell of Texas, and their children. With an associate he leased a copper mine near Santa Fe, N. M. and later bought out his partner's interest and operated the mine with tremendous success.

After Pearl Harbor Mr. Bonnyman enlisted in the USNCR and

after his boot training at San Diego he did not wait to go through Officer's Candidate School but went in as a private and by special request was put on the first ship that went from San Diego to Guadalcanal. In the bitter Guadalcanal campaign, for some outstanding feat (of which censorship has so far withheld details) he was nominated in the field for promotion from private to commissioned officer. The young officer was in charge of a group of men who called themselves "Pioneers" and whose job it was to protect landings and blaze trails in the wilderness ahead of the regular engineers and road builders. Sandy loved the out-of-doors. He rode horseback with all the ease and security to be desired and according to one of his superior officers, "he showed great alertness and presence of mind in face of danger. As, when he and two other marines were ambushed by eight Japs, under Sandy's leadership the eight Japs were killed with no serious injury to himself or his companions." He performed out-

standing feats of engineering one of which was to build a bridge across a flooded river after those built by the regular engineers had washed away.

One morning on Tarawa Sandy was in charge of a demolition crew. When the dangerous necessity arose of placing a torpedo where it would do the most damage, he chose to take the risk rather than to assign it to any of his men. A Jap sniper got him but not before he had finished his job. Fatally wounded he turned around, smiled at his men and fell to the ground, dead. His extraordinary heroism, courage and leadership in action has merited him a recommendation for the Congressional Medal of Honor.

The President awarded to Lieutenant Bonnyman the Navy Cross posthumously with the following citation:

The President of the United States takes pleasure in presenting the NAVY CROSS posthumously to FIRST LIEUTENANT ALEXANDER BONNYMAN JR., UNITED STATES MARINE CORPS RESERVE, for service as set forth in the following: "For extraordinary heroism and intrepidity as a member of a shore party serving with the Second Battalion, Eighth Marines, Second Marine Division, during the assault on Japanese-held Tarawa in the Gilbert Islands on November 20, 21, and 22, 1943. Voluntarily organizing members of his party as demolition teams, First Lieutenant Bonnyman boldly led the assault on a huge bomb-proof shelter thirty yards in advance of our forward positions and, with his men, destroyed many of the Japanese troops who had been inflicting heavy casualties on our forces and holding up our ad-

VOL. XVII AUGUST, 1946 No. 3

Five Years

The August Alumnus will seem like a Campus album to its readers for there are stories and friends of long standing in it. Many of them are in new relationships but evidently they are continuing to fill a place in the rapidly changing picture that is here.

Five years ago, it was, that this old grad was drafted into the position of Executive Secretary and editor of the four page bulletin which could be prepared any afternoon. Then came the War. A blue and white banner was hung in the great hall in the Student Union Building because 5590 men and women of the University had signed up to see the thing through. Sixty-eight alumni had paid the price of their patriotism and courage with their lives and the number 68 was placed beside the gold star. Tragedy stalked the way of the land and the Campus seemed deserted. The Government developed other plans and men from every state in the Nation came to Kentucky for training and instruction. Those remaining

HELEN G. KING

on the Campus took another breath, a deep one, and carried on.

The records show that wherever there was a place to be filled, there a Kentuckian was available and the records also show that they were able and honorable. Five years later the number beside the blue star is 7487 and the number beside the gold star is 308. The price was terrific.

E. C. Elliott, G. Lee McClain, H. D. Palmore, Grover Creech, H. C. Robinson and Chauncey Forgey have been inducted into the office of president of the Alumni Association since June 1941. The monthly meetings were held regularly and for the most part the life of the Association was in the hands of the Executive Committee of which the members have been, with few exceptions the aforementioned presidents and Mrs. Tom Underwood, Mrs. Ed Shinnick, Miss Lulie Logan, Miss Helen King, L. K. Frankel, George Wilson, Davis Buckner, William Blanton, Tom Cutler, Bernie Shively, John Whitaker, Gracean Pedley, Chen Everett, Keen Johnson, T. Jere Beam, E.

E. Hubbard, Joe Asher, Marshall Barnes, James Park, Robert Heath, C. C. Carpenter, B. E. Brewer, Earl Clements, W. S. Taylor, Louis Cox, Birket Lee Pribble, Wayland Rhoads, E. C. Wurtele, John Stevenson Jr., Norman Christian Jr., and James Shropshire. Mr. Shropshire and Mr. Rhoads were in the service practically the entire five years and Mr. Rhoads is now awaiting orders back to Germany.

An alumnus of the University, the Honorable Keen Johnson, was governor of Kentucky when this cycle of University history started and at the present time another alumnus, Lt. Gov. Kenneth Tuggle is second in command at the State Capitol. There are four active alumni on the Board of Trustees and the president of the University, Dr. Herman Lee Donovan, is a graduate of the University and an active member of the Association.

The foregoing data is what the writer would say is the reason for the present prosperous condition of the Alumni Association and its right to hope for unlimited progress in the near future.

Five years ago we had very little of anything. That little was badly shaken by the War. Today through the co-operation of former students, graduates and others, we have a spirited organization. We have saved approximately \$6000. June 7, when the new year started for us we had \$4100 invested in Bonds and during the past year had donated \$750 to the Frances Jewell McVey Scholarship Fund and \$500 to the Athletic Association and both of these should be considered investments. In addition to this amount the salary of the Executive Secretary had been paid by the Association and a quarterly

magazine ranging from 16 to 48 pages has been published since February, 1944.

From the other side of the picture we find that the University has grown apace. Its support and financial aid to the Alumni Association has been substantial. By vote of the Board of Trustees the publishing of the Magazine was financed and a fund allowed for supplies, overseas publications for servicemen and office help. The improvement in buildings, enrollment, athletics and academics are such that the long expected 'next Year' seems just around the corner. This outlook is worth waiting a lifetime that the reality may be enjoyed.

For the first time in the history of the Association a graduate of the University has been elected as Executive Secretary on a full time basis.

Miss Helen King, who has taken up the duties of Executive Secretary, and with the next edition will be editor of the *Alumnus*, knows the Campus, the faculty, former student body back about (oh, well that's too long to mention but) long enough to be assuring. She can and will fill the position to your entire satisfaction. What charm, talent, ability, experience and determination to succeed will afford she has. If the Alumni of the University and the former students co-operate with Miss King as they have with the retired secretary she will write a record at the end of the next five years that will delight your souls.

From now on changes will doubtless be made. They should be. The *Alumnus* and the Association must not stand still. They must progress. You can help in all these details very substantially. Do your part and be proud of the results.

"Until the end of the War" was

JAMES S. SHROPSHIRE

the writer's promise as secretary and editor. The pledge has been kept. Thank you all for everything.

Kentucky Alumni Organize In Paducah

Alumni and former students of Paducah, Ky., were called together Wednesday night, May 15, for an organization meeting, at which President Herman Lee Donovan was the guest speaker. Judge Brady Stewart, county judge of McCracken county, presided.

The following officers were elected: Ben LeRoy, 1502½ Broadway, president; Brandon Price, 1915 Broadway, vice president, and Marietta Smith, McCracken county home demonstration agent, secretary.

The group decided to call the organization the University of Kentucky Club, and plans are now underway to broaden the membership to all former students of the University, living in McCracken county.

Pedley Paper K. P. A. Prize Winner

The Princeton Leader of which Gracean M. Pedley is editor received The Lexington-Herald-Leader trophy for the best all-around newspaper in the Kentucky Press Association's state wide contest for weekly and semi-weekly papers. The annual K. P. A. meeting was held June 27-28-29 and the awards were made at the closing meeting on Saturday morning.

The Princeton Leader was also given first prize for the best half page; second prize for best full page and best quarter page; second place for the story, "Soil Erosion Robs Many Caldwell County Farms" written by Mr. Pedley.

Mr. Pedley was graduated from the University in 1916 and is the editor also of the Lyon County Herald. He was the first editor in the State to get the Associated Press news for his weekly papers. He is a former president of the Kentucky Press Association. He is chairman of the University Boosters Club of Caldwell County.

Ballantine Gets Health Post

Appointment of Thomas A. Ballantine, attorney and president of the Louisville Taxicab & Transfer Company, as a member of the Louisville and Jefferson County Board of Health, was announced May 10. The appointment was made jointly by Mayor E. Leland Taylor and County Judge Horace M. Barker.

Mr. Ballantine received an LL.B. from the University of Kentucky in 1925.

Jurists, Physicist, Engineer and Educator To Receive Honorary Degrees at U. K. Finals

JUDGE GREEN
HAYWOOD
HACKWORTH

MERVIN
JOE KELLY

JUDGE WILLIAM
HENRY REES

MISS SARAH
GIBSON
BLANDING
NEAL TRIMBLE
MCKEE

Four native Kentuckians and a Missourian, who is a graduate of the University, received honorary degrees at the 79th annual commencement exercises on the Campus, Friday, June 7.

The Kentuckians were Judge Green Haywood Hackworth, native of Prestonsburg, legal advisor to the Department of State and one of the 15 judges now serving on the International Court of Justice; Judge William Henry Rees of Maysville, chief justice, Kentucky Court of Appeals; Sarah Gibson Blanding of Lexington, dean of the New York State College of

Home Economics at Cornell University and president-elect of Vassar College and Neal Trimble McKee of Mt. Sterling, research engineer and vice president of the Superheater Company, New York City.

The Missourian was Mervin Joe Kelley, physicist and director of research and executive vice president of the Bell Telephone Laboratories in New York, who has just been elected to membership in the National Academy of Science.

Judge Hackworth and Judge Rees received the degree of Doctor of Laws. Miss Blanding received

the LL.D. in Education; Mr. McKee received the Doctor of Science degree in Engineering and Mr. Kelley was awarded the Doctor of Science degree in Applied Physics.

Citations Sarah Gibson Blanding

Daughter of Kentucky and daughter of the University of Kentucky. An admired product of Lexington and of the University, where she developed as a student, a professor and a dean, she has attained high prominence as a humanitarian, a leader in civic af-

fairs, an administrator and a woman of national importance.

As she begins her new duties as president of one of the most famous educational institutions in America, the University of Kentucky adds to its congratulations on her many successes, and its best wishes for her high career in the future, the tangible evidence of recognition by conferring upon her the honorary degree of Doctor of Laws.

Miss Blanding holds a certificate from the New Haven Normal School of Gymnastics, the A.B. degree from the University of Kentucky and the M.A. degree from Columbia University. She was a student at the London School of Economics in 1928 and 1929. Instructor in physical education at the University of Kentucky from 1919 to 1923, Miss Blanding was named acting dean of women in 1923 and later became dean of women and assistant professor of political science, serving in those capacities until 1937 at which time she was promoted to associate professor of political science in addition to her duties as dean of women. In 1941 Miss Blanding went to New York as director of the Cornell College of Home Economics and the following year was named dean.

During the war she served as director of the Human Nutrition division, New York State Emergency Food Commission; member of the committee on College Women Students and the War; and member of the American Council on Education. She was associate director of the Office of War Nutrition Services for New York State from 1942 through 1943 and member of the national board of the Y.W.C.A. This spring Miss Blanding was elected to the presi-

dency of Vassar College, which position she will assume in the late summer.

Green Hawood Hackworth

Son of Kentucky and eminent citizen of the Commonwealth and of the Nation. Recognized for his success as a United States Counselor, in the special mission to Lausanne to draft treaty between the United States and Turkey and to Madrid to negotiate treaty of commerce between the United States and Spain. Member of Court of Arbitration at The Hague; delegate to the International Conference in Peru; delegate to the American Scientific Conference in Washington; adviser to the Secretary of State at the meeting of Ministers of Foreign Affairs in Havana; and now judge of the International Court of Justice.

The University honors a world famous scholar and diplomat by conferring upon him the degree of Doctor of Laws.

Judge Hackworth attended Valparaiso University, Georgetown University Law School and George Washington University. He has served as attorney and assistant solicitor for the State Department; was counsel for the United States from 1922 to 1925 under Boundary Waters Treaty of 1909 between the U. S. and Great Britain; was sent on special mission to Lausanne in 1923 to draft treaty between the United States and Turkey and to Madrid the same year to negotiate treaty of commerce between the United States and Spain. He was solicitor for the Department of State from 1925 to 1931 and legal adviser since 1931. He is a member of the Permanent Court of Arbitration, The Hague; member of the advi-

sory committee on research in international law of Harvard Law School; delegate for the U. S. to the conference for codification of international law, The Hague in 1930; delegate to the eighth International Conference of American States held at Lima in 1938; delegate to the eighth American Scientific Congress in Washington in 1940; and served as adviser to the Secretary of State at the second meeting of Ministers of Foreign Affairs of the American Republics, held in Havana in 1940.

Mervin Joe Kelly

Eminent physicist. Member of the National Academy of Science. Famous for outstanding research at the Western Electric Company and the Bell Telephone laboratories and director of research in the Transmission Institute and Electronics.

The University of Kentucky is glad to welcome back to the campus one of its old students and a former member of the faculty who has brought honor to the institution and to confer upon him the degree of Doctor of Science.

Mr. Kelly is a native of Princeton, Mo., has the B.S. degree from the Missouri School of Mines and Metallurgy, the M.S. degree from the University of Kentucky and a Ph.D. from the University of Chicago as well as the Doctor of Engineering from the University of Missouri. He served as instructor of Physics at the University of Kentucky from 1914-1916 and physicist with the research department, Western Electric Co. from 1918 to 1925. He joined the Bell Telephone laboratory as physicist in 1925 until 1928 when he became director of vacuum tube development. In 1934 he was named director of development

for the Transmission Institute and Electronics and served in that capacity in 1936 when he was named director of research.

Neal Trimble McKee

Son of Kentucky and son of the University of Kentucky. World recognized authority in superheating and inventor of many technical improvements in locomotive superheaters which have saved untold millions of tons of locomotive fuel throughout the world. Member of the Royal Society of Arts of London and of many scientific and railroad societies. A great engineer and an outstanding alumnus of this University which honors itself in conferring upon him the honorary degree of Doctor of Science.

Mr. McKee holds the B.M.E. and M.E. degrees from the University of Kentucky. He has served as vice president of the Superheater Company, director of the Air Preheater Corp., director of the Superheater Co., Ltd., of Canada. In 1920 to 1922 he was director of Marine and Locomotive Superheater Ltd., in London, England and organized superheater Companies and built plants in England and France. Mr. McKee has taken out patents on superheaters and kindred things.

His inventions meant the difference between success and failure of the locomotive superheater and saving untold millions of tons of locomotive fuel throughout the world. He is a Fellow in the Royal Society of Arts (London) and the A.S.M.G. and holds membership in various other scientific and railroad societies. He is listed in Railroad Engineering and Commerce Who's Who.

William Henry Rees

Son of Kentucky. An outstanding citizen of the Commonwealth whose success as a jurist and eminence at the Bar has won for him the honor and respect of his fellow citizens and of the University of Kentucky.

Now the Chief Justice of the Court of Appeals he represents the highest type of leadership in the field of jurisprudence.

The University is proud to recognize a scholar and a statesman in conferring upon him the honorary degree of Doctor of Laws.

Judge Rees is a graduate of Kentucky Wesleyan College and holds the LL.D. degree from the same institution and the LL.B. from the University of Virginia. He was admitted to the Kentucky Bar in 1908 and was named judge of the Kentucky Court of Appeals in 1926, being elected to the same office again in 1934 and 1942. He served as Chief Justice in 1933-'35 and in 1941-'42. He is vice president of the State National Bank and Trust Co., at Maysville.

Standard Oil Company Promotes Kentuckians

The Standard Oil Company (Indiana) has announced the appointment of J. E. Seebold to the position of assistant director of Research. The appointment took effect July 1. Mr. Seebold is a native of Versailles, Ky., was graduated from the University with a B. S. in Chemistry in 1934 and received his M. S. in 1935. His doctor's degree was received from M. I. T. in 1939 and he joined the Indiana research staff after two years on the M. I. T. faculty as assistant professor of chemical engineering and director of the

Parlin Station of the School of Chemical Engineering Practice.

W. L. Webb, formerly of Lexington, was made assistant executive director of the Whiting Research Laboratories and took up his duties July 1. He was graduated from the University with a B. S. degree in 1933 and received his M. S., Chemistry major in both cases, in 1934.

R. J. Austin, whose home address when he was a student on the Campus was Provincetown, Ky., has been promoted to the position of group leader. Mr. Austin, also a Chemistry major, received his B. S. degree in 1933 and his M. S. in 1934.

"These promotions and increases in our supervisory staff are part of the general plan for enlarging our research staff to a total of approximately 1200" said J. K. Roberts, general manager of research in making the announcement. Mr. Roberts, son of Professor George Roberts an alumnus of the University and a member of the faculty of the College of Agriculture since his graduation, received his bachelor of science degree from Kentucky in 1925. He has been with the Standard Oil Company since 1929.

Capt. Sutherland Placed On Leave

Capt. Raymond C. Sutherland, placed on terminal leave recently after serving as an Army chaplain since February, 1944, left July 27 for Christ Episcopal church, Ontario, Calif. Capt. Sutherland, who saw most of his service in the Pacific, returned recently from a trip to Germany as chaplain aboard a hospital ship. He was graduated from the University of Kentucky in 1939 and from General Theological Seminary in 1942.

Distinguished Capitalist Presents Carillonic Bells In Honor Of His Son

Alexander Bonnyman of Knoxville, Tenn., has given a set of twenty-five carillonic bells to the University in memory of his son, and namesake, who died in the line of duty as a United States Marine Corps Reserve officer. The gift will be dedicated at a future date. This type of memorial appealed to Mr. Bonnyman who has travelled extensively and at all times in many countries sought out the valuable, beautiful and interesting arrangements of bells in campaniles, towers and municipal squares. Alexander Bonnyman Jr. was killed on November 22, 1943, on the third day of the battle of Tarawa.

Mr. Bonnyman was born in Edinburg, Scotland, and later came with his parents to Lexington. He was educated in Rome, Georgia, and took his engineering courses at the University of Kentucky. He left the University after he had finished all the mechanical, mathematical and strictly engineering work which the Engineering course, at that time, included, but did not return to finish a few electives. After leaving school he obtained employment with the Chesapeake and Ohio Railroad as assistant to the Division Engineer of Maintenance. Several months later he went with the Kentucky Union Railroad which had just started construction. He was with the South Bound Railroad as Resident Engineer from December 1890 to 1892 and he then went with the transportation service for the same company, headquarters in South Carolina. For two years thereafter he was supervisor of

Track for the Central of Georgia Railroad and for five years following he stayed with the Chattanooga, Rome and Southern Railroad as engineer and road master.

The Spring of 1899 found Mr. Bonnyman in a position of superintendent with the Atlantic, Birmingham and Atlanta Railroad as chief engineer. He had charge of location and construction of all their lines. On March 1, 1905, the Company acquired 350 miles of road and authorized the construction of that many more. On February 15, 1908, he was made general manager of the road which for 9 years he had been building.

It was at this time that Mr. Bonnyman's name was proposed for honorary membership in the Alumni Association. In those days only graduates had the privilege of joining. The nomination was unanimously approved and Mr. Bonnyman has continued as an active member since. He recently became a Life Member of

the Association and his latest evidence of loyalty is his gift of the carillonic bells for the Memorial Hall in honor of his son.

In 1906 Mr. Bonnyman was married to Miss Frances Berry and to that union, besides Alexander Jr., three children were born. Miss Ann Bonnyman of Knoxville; Mrs. Margot Bonnyman McKeon of New York and Major Gordon Bonnyman of Knoxville.

Major Bonnyman, a graduate of Princeton in 1941 with honors in Engineering, immediately entered the Army as a second lieutenant of Artillery. He was selected for advanced technical training in guns and was for a year instructor of gunnery in the Officers Candidate School at Fort Sill, Oklahoma. He was then one of a half dozen specially trained artillerymen, selected from different parts of the U. S. and flown individually to General Stilwell, landing by way of Cairo to India. He was assigned as instructor with the Chinese and soon learned their language and became a liaison officer with General Stilwell. He then went into campaign duty, which was just getting started. His second campaign was with the famous Merrill's Marauders that received a unit citation from the President. Major Bonnyman was commander of the Marauders until he was seriously wounded during the taking of Myitkyina, the northern headquarters in Burma of the Japs. He spent the remainder of the duration, about a year and a half, in hospitals in Burma, India and the United States but was released from the Army, January 15, and is now working for the Blue Diamond Coal Company in the Engineering department. He was

decorated several times, once personally by General Stilwell.

After 1909, Mr. Alexander Bonnyman Sr., grew gradually more and more interested in the coal fields and we find him between 1912 and 1926 with the Campbell Coal Mining Co.; Highclift Coal Co.; Red Feather Coal Co.; Blue Diamond Coal Co.; Blue Diamond Coal Sales Co.; Liberty Coal Co.; Crown Coal Co.; Blue Diamond Virginia Coal Co. and the Sapphire Coal Co.

On the consolidation of the several mining companies recited in the foregoing paragraph with the Blue Diamond Coal Sales Co., Mr. Bonnyman became chairman of the Board of the Consolidated Blue Diamond Coal Co. He is also chairman of the Blue Diamond Coal Sales Co. and president and director of the Blue Diamond Investment Co., and director of the Westbourne Land Co. He is a member of the American Society of Civil Engineers and of Princeton Engineering Association and a Life Member of the Alumni Association of the University. During World War I he was three men who bore the expense of the publication of the *Alumnus* because of the falling off of dues.

While a student in the University Mr. Bonnyman in his senior year taught his own mathematics class and four under classes. After leaving school he led a busy life, as his biography shows. Always being on jobs beyond his age, experience and sometimes knowledge but with a determination to succeed. He was a personal friend of the late Dr. James K. Patterson, then president of the University, and he was chairman of the Patterson Memorial Committee which erected the

memorial to Dr. Patterson, the bronze statue on the middle of the Campus.

Carillonic Bells A Memorial

(Continued from page 25)

vance. Withdrawing only to replenish ammunition, he renewed the assault on the strongly entrenched position, fearlessly exposing himself in order to direct the seizure of the top of the bomb-proof. After gaining his objective, he made a determined stand on the edge of the structure, defending his strategic position in the face of a desperate enemy charge and killing three Japanese before he was mortally wounded. His relentless fighting spirit and his inspiring leadership throughout three days of violent battle were in keeping with the highest traditions of the United State Naval Service. He gallantly gave his life for his country.

For the President.

Frank Knox

Secretary of the Navy.

U.K. Graduate Heads Consolidation Coal

Samuel M. Cassidy, a native of Lexington and a graduate in 1925 of the University of Kentucky, has been elected president of the Consolidation Coal Company of Kentucky, a subsidiary of the Pittsburgh Consolidation Coal Company, it was announced recently. Mr. Cassidy will have his headquarters at Jenkins.

The subsidiary company assumed operation July 1 of the Pittsburgh firm's properties in Kentucky, which include mines at Van Lear, Jenkins, Dunham, McRoberts and Clover Splint.

Gold Star Roster To Be Unveiled

A memorial roster, listing the names of the more than 300 University of Kentucky students, alumni and staff members who lost their lives in World War II, will be presented to the University at 11 a. m. Saturday morning, October 19, by the Alumni Association. The gift will be accepted by President H. L. Donovan in the name of the University.

Invitations to the ceremonies will be mailed by the Alumni Association to the families of the University men who died in service, and all alumni and friends of the University will be welcomed.

The board, decorative in design, lists the names of all former students declared officially dead by the War Department, and is superimposed with an outline sketch, in color, of the University seal. The American Flag is painted at the top of the roster.

Theta Sigma Phi Alumnae Elect Officers

Theta Sigma Phi Alumnae Association met Wednesday night June 12 for a picnic supper at the home of Mrs. A. E. Anna on Cherokee park.

New officers elected for next year were Mrs. Frances Lee McLean, president, class of 1926; Miss Frances Kane, vice president, class of 1925; Miss Norma Weatherspoon, class of 1944, secretary, and Mrs. A. E. Anna treasurer.

For Alumni and Friends

Keen Johnson, President Of Washington Kentuckians

Keen Johnson of Richmond, former governor of the State of Kentucky, was elected president of the Kentucky Society in Washington at the organization's annual meeting on Derby Day. Mr. Johnson is a vice-president of the Reynolds Metals Company, has offices in Washington but was in Kentucky attending the Derby when his associates elected him president for the year 1946-47. The membership of the Society is about 1500.

F. Leland Howard of Hodgenville, a graduate of the University in 1929 is one of the vice-presidents of the Society and Lt. Col. John W. Manning, Lexington, faculty member of the University, who is now attached to the adju-

tant general's office is another vice-president. There is a vice-president elected to represent each of the nine districts.

Mr. Howard is president of the Kentucky Alumni Association of Washington. He has been assistant director of the Mint since 1938 and assists in directing the activities of seven Mint institutions throughout the United States.

President Truman announced on August 1 that he was appointing Keen Johnson, as Undersecretary of Labor, the first Undersecretary of Labor since the department was organized in 1913. The appointment has been approved and Mr. Johnson has been inducted into office.

Camp Hillenmeyer Is In Kunsan, Korea

Colonel Bruce Palmer Jr., commanding the 63rd Infantry has advised Mrs. Henry Hillenmeyer of Winchester that the new camp at Kunsan would be named "Camp Hillenmeyer" in honor and memory of her husband the late Captain Henry Hillenmeyer. Colonel Palmer wrote: "The memory of the gallant act performed by Captain Hillenmeyer will be in our hearts and minds forever." Enclosed with the letter was a copy of the General Orders awarding Captain Hillenmeyer the Soldiers Medal for his gallant act of heroism on November 30, 1945, at Kunsan, Korea.

Captain Hillenmeyer and his three brothers, Lieutenant Donald Hillenmeyer and Majors Walter and Herbert Hillenmeyer all served throughout the entire War and Captain Hillenmeyer was killed after peace was signed as he led his men on ordered investigation.

U. K. Man To Lecture for the American College of Allergists

Dr. Morris Scherago, head of the department of bacteriology at the University of Kentucky, has been elected by the American College of Allergists to give the lecture on "Bacterial Allergy" at the regular fall graduate instructional course of the college. The election was by unanimous vote of the committee on arrangements.

This course will be held in Philadelphia from November 4 to November 9 at the Jefferson Medical College, and Dr. Scherago's lecture is scheduled for Tuesday, November 5. A comprehensive outline of each talk is printed and distributed at the end of the course, to the physicians taking the course.

Graham Changes Position; Terrell Acting Dean

Daniel V. Terrell was named acting dean of the College of Engineering at the University of Kentucky June 6, to succeed Col. James H. Graham, engineering dean since 1935, who requested a change of positions.

Col. Graham was made consultant for the University with industry and government on recommendation of President H. L. Donovan under a University rule which permits a change of status after the age of 65.

Dr. Donovan stated that Col. Graham's request to be relieved of the engineering deanship was received last Friday and had not been expected.

Accomplishments Listed

The University president in submitting the request to the board listed some of the accomplishments of Col. Graham's administration as dean, including the construction of a \$270,000 engineering building; obtaining of \$600,000 for modern scientific equipment in the University laboratories, of which \$300,000 went for engineering equipment; assisted in obtaining \$300,000 worth of surplus war equipment; adoption of a new curriculum for the Engineering College and accrediting of the college by the Engineer Council for Professional Development; establishment of five special laboratories in charge of the college, including the Aeronautical Research Laboratory from the Viking Foundation; creation of an Engineering Experiment Station, and contracts during the war with the War Department for training "many thousands of soldiers on the campus during the

Adam Pepiot Photo
PROF. D. V. TERRELL

war period" which amounted to approximately \$1,500,000.

"For these contributions, the College of Engineering and the University generally will everlastingly be indebted to Col. Graham," Dr. Donovan said, "and I am pleased to record these services in the annals of this institution and to express an appreciation for his good work."

Dr. Donovan pointed out that the aeronautical research laboratory erected by the Viking Foundation was "an object of controversy during the war; nevertheless, it has made a very great contribution to our war effort."

Criticism was directed at the laboratory because the Viking Foundation was financed by the interests of Axel Wenner-Gren, Swedish industrialist who was placed on the United States blacklist after the start of the war and after the laboratory had been constructed.

Colonel Graham, whose title was earned overseas in World

War I, is a resident of Louisville, Ky., and is an author and a Life Member of the Alumni Association. He received a B.S.E. degree in 1900 and a A.B.E. in 1903. He was a member of the football team while on the campus.

Takes Over July 1

Prof. Terrell, who is now assistant engineering dean, will take over the deanship July 1. He has been on the engineering staff since 1912, two years after he was graduated from the college, and has been professor of civil engineering since 1917 and assistant dean since 1942. He received his CE degree at the University in 1914.

Since coming to the University, Prof. Terrell has been active in highway engineering development and is director of the Highway Research Laboratory, which has been operated by the State Highway Department on the campus since 1940. He also has been interested in concrete-construction engineering and designed McLean stadium, which was constructed on Stoll Field in 1925.

He is a member of the American Society of Civil Engineers, Society for Promotion of Engineering Education, American Society of Testing Materials, Tau Beta Pi, Sigma Xi, and past president of the Kentucky Society of Professional Engineers. He is a member of the Lexington Rotary Club, all branches of the Masonic order, including the Shriners, and of the Methodist church. He is an active member of the Alumni Association and was graduated with a B.S.E. in 1910 and a M.S. in 1914. His two sons, Dan V. Jr. and Claude both veterans of World War II, are also graduates of the College of Engineering, U. of K.

COL. JAMES H. GRAHAM

Dean Blanding Gives Convocation Address For Honor Students

Miss Sarah Gibson Blanding, dean of home economics department at Cornell University and president-elect of Vassar College, gave an address to the students of the University of Kentucky at the last convocation of the year honoring the students who have distinguished themselves in leadership and scholarship. The convocation was held in Memorial Hall at 10 a. m. Tuesday, May 14.

Dr. H. L. Donovan, University president, presided, and the invocation and benediction were given by Bart N. Peak, secretary of the University YMCA. Edward Albert Bary gave the student message. Organ prelude and postlude was played by Mrs. Lela W. Cullis.

Mr. Bary gave an exceptionally good message and all those who

heard him respected his opinions. He said "to give honor, is to give honor where honor is due." All honor is due him for the brilliant talk he gave.

Miss Blanding's speech was both interesting and entertaining. Miss Blanding stated that "we must develop a successful system of international control and that we must look forward to promoting understanding, tolerance and good will with other nations. There is no easy road to understanding. It does not come without effort. It is our obligations, college students, to correlate and integrate the knowledge we obtain to successfully bring about the understanding tolerance and good will of other nations. Language is important in our understanding of other nations and since we have the opportunity to learn languages in the University, we should know other nation's tongues in order to be able to understand them better."

Miss Blanding explained that although she was a Doctor, she was still just plain Sarah to people in Lexington. She told a very interesting story about her work during the war. She participated in a series of inspections undertaken to determine the sort of jobs that women in the services were doing. She was being escorted by a Marine in the Women's Corps and when a Marine passes a superior officer, she must say "by your leave sir, may I pass" but on this occasion the Marine came to an Admiral and when she saw who it was she became excited and said, "Sir, let me by."

One of the outstanding qualities of Miss Blanding's speeches is that she makes you feel that each and everyone listening to her is the one she is speaking with

and that there are no heights unconquerable.

Among the students honored for having made a cumulative standing of 2.3 out of a possible 3, were 48 seniors in the College of Arts and Sciences, 8 in the College of Agriculture and Home Economics, 2 in the College of Engineering, 5 in the College of Law, 6 in the College of Education, and 4 in the College of Commerce. There were 32 juniors in the College of Arts and Sciences, 1 in the College of Agriculture and Home Economics, 3 in the College of Engineering, and 3 in the College of Commerce.

Virginia Zinn—1946

Homecoming Set For October 19

A post-war get-together for homecoming alumni and former students of the University will be the closing event of homecoming day, October 19

Planned by the executive committee of the Alumni Association, at its mid-summer meeting in August, the party will be held in the ballroom of Lafayette hotel from eight until 12 p. m. Saturday night, with members of the committee present to greet returning alumni.

An orchestra will furnish music for dancing from nine until 12 p. m.

Homecoming plans include the dedication of the Memorial roster at 11 a. m. Saturday morning, honoring the University's Gold Star men of World War II, the football game between Vanderbilt and Kentucky at two p. m., the reception from four to six p. m. at Maxwell Place to be given by President and Mrs. H. L. Donovan for alumni and friends of the University, and the evening party at the Lafayette.

Henry H. Hornsby Gets Nieman Award

Henry H. Hornsby of Lexington, a graduate of the University in 1938, is one of the 14 American Newspapermen to receive the Nieman Fellowships from Harvard. The Fellowship provided a year of individually selected study at Harvard and were set up by Agnes Wahl Nieman in memory of her husband, Lucius W. Nieman, late publisher of the Milwaukee Journal.

Mr. Hornsby applied for the fellowship to study social and economic problems of the rural South, with particular emphasis of the Appalachian section. He will go to Harvard in September.

The fellowship winner became a reporter on *The Leader* Feb. 8, 1940, and for 17 months before that had worked as correspondent for *The Herald-Leader* in Mt. Sterling. Mr. Hornsby, during his work on *The Leader*, has served as sports editor for 17 months, as state editor one year, and as political reporter during the last session of the legislature. He also is book-

page editor of *The Herald-Leader*.

In its announcement of selections the Nieman Foundation said of Hornsby, "A reporter of exceptional zeal to make journalism a social service, he has led in bringing roads and better school and health services to his mountain people." Hornsby is a native of the Little Sextons Creek section in Clay county and through the years has maintained a steady interest and sympathy for Kentucky-mountain folk.

From President Forgey To U. of K. Alumni

It is most gratifying to see the rapid growth of the Alumni Association during the last few years. It makes us all confident that the future holds much in store—providing we keep up this interest. We cannot rest upon past records, for the past is gone. The future will reveal what you and I and everyone else does during the year and the years to come.

As the Alumni Association expands we are bound to see the results this expansion will have upon the University as a whole. It will not only revive a better spirit in athletics but create a spirit of confidence among all citizens of the state in the purpose of the University—to provide all an opportunity to secure an education.

There are too many of us who think of the University in regard to athletics alone. The athletic program is important of course, but we must not lose sight of the fact that the University must show progress academically. It is up to us to be 100 percent behind the policy of Dr. Donovan and the board of trustees. We should use our influence upon the Legislature to see that the University re-

ceives its share of appropriations. Too often other institutions less deserving have robbed the University of funds which should rightly go to the leading state institution.

To this end let us all pledge to cooperate with all phases of the University program. We can help in many ways. One of the most important is to see that a University of Kentucky Alumni Association is organized in every community. The Executive Committee will start the ball rolling but it is up to you individually to keep it going.

Let's quit knocking. Let's show the administration what real cooperation can mean!

By Chauncey E. Forgey,
President

James Milton Rush a Marine Captain

Miramar, Calif.—Marine Captain James Milton Rush, 32, Versailles, Ky., was promoted to his present rank just before his recent departure for his second overseas tour. He had been stationed at the Marine Corps Air Depot here, where he served as aide to Major General Claude A. Larkin, commanding Marine Fleet Air, West Coast.

Rush returned last March from 12 months overseas, during which time he was stationed at Ewa in the Hawaiian Islands, Espiritu Santo, in the New Hebrides, Guadalcanal and Bougainville in the Solomons, and Leyte in the Philippines. He won a letter of commendation from Major General R. J. Mitchell, then commanding the First Marine Air Wing.

A 1935 graduate of the University of Kentucky, Rush was doing advertising work in New York for the Brown and Williamson Tobacco Co. when he enlisted in 1942.

Unveiling of Portrait of Frances Jewell McVey

An audience that overflowed the reception rooms of Jewell hall, University of Kentucky women's dormitory, Tuesday afternoon, June 14, witnessed the unveiling of a portrait of the late Mrs. Frances Jewell McVey, wife of Dr. Frank L. McVey, president-emeritus of the University. The portrait, painted by Allan Swisher of New York, was presented to the University by women students.

The portrait was unveiled by a niece of Mrs. McVey, Mary Frances Jewell, daughter of Mr. and Mrs. Robert Jewell of Wilmore, and a granddaughter, Frances Jewell Morris, daughter of Mr. and Mrs. James E. Morris of Lexington.

Rebecca Lowe of Paducah, past president of Jewell hall, presented the portrait to the University on behalf of students of the women's residence halls and it was accepted by Mrs. Sarah Bennett Holmes, present dean of women.

Dr. H. L. Donovan, University president, presided at the meeting. In a brief tribute to Mrs. McVey, Dr. Donovan read a letter which she had written to "my girls" of the University just before leaving the deanship.

"As long as a tree grows on the campus and as long as a student attends a class," Dr. Donovan said, "her memory will remain fresh in the hearts of all University people."

At the close of the ceremony, Robert Kuhlman sang "The Pilgrim's Song," by Tschaikowsky. His accompanist was Mrs. Adele Gensemer Dailey.

Dr. Robert Whitfield Miles gave the invocation and benediction.

Miss Anne Worthington Callihan of the University art department supervised the hanging of the portrait and details of the unveiling and reception.

Dr. Sarah Gibson Blanding, president elect of Vassar College, who succeeded Mrs. McVey as dean of women of the University, made the address of the afternoon and said:

"Frances Jewell, and then Frances Jewell McVey! What can I say that will have meaning and significance to this audience? Many of you knew her well and to you, as to me, she was both friend and counselor. To say anything is not easy for me because of all of the hundreds of people who have touched my life and from whom I have gained strength and wisdom, Frances Jewell McVey's influence has been the most profound. And so for a few minutes I am going to reminisce—not with the idea of heightening your appreciation of her rare qualities, but rather that together we may recall that blithe spirit who gave so generously of herself to the thousands of people who knew her and loved her—students, faculty, guests of the university, citizens of this commonwealth, and those from other states and nations.

"How well I remember the first day I met her. When I was growing up in Lexington, I heard of the Jewells; they lived in a fine house on Ashland Avenue; Mr. and Mrs. Jewell were highly respected citizens of the community; their daughter was going to Vassar. Once she rather startled Lexington by bringing home for a

vacation a classmate who was a citizen of Japan. Of these things I had heard.

"Then, I met Miss Jewell on the first day of registration in September, 1919. Like many September registration days, it was hot and sultry. The students milled around the registration decks, thumbing frantically through the gray schedule books. The faculty looked tired, and hot, and badgered.

"At a table over which hung a sign, "English" two people sat, an interesting-looking man with red hair, and a woman who on first sight appeared large. A second glance revealed a face of great mobility, with fine, aristocratic features; keen, alert eyes, with a sparkle in them; a sensitive mouth, and beautiful, strong, white teeth. Her hands were those of a patrician—beautifully shaped, yet strong and expressive.

"The two lines in front of the English table were long, but finally it was I who was standing in front of Miss Jewell. She may have been as tired as were the other members of the faculty—she probably was—but she kept it well hidden. To a rather bewildered, uncomfortable young woman who was both an instructor and a freshman, this first meeting marked the beginning of a new, thrilling adventure. There was something indescribably exciting about beginning college, and there was also something tremendously stimulating about meeting Miss Jewell. Perhaps it was the warmth of greeting; perhaps it was the tone of voice as she talked of the English courses, still open to freshmen; perhaps it was her inbred charm, but in the short interval I stood before her, I knew that I had met a great per-

son who radiated good will and nobility.

"I took her English and I shall always be grateful that I had her as a teacher. She had the capacity to make even composition interesting and alive. She sometimes came into the classroom a little breathless, but who, doing as much as she, would not have been. Besides her teaching she was organizing the young faculty into a dance group; together with Miss Simrall, Miss Stimson, and Mrs. Johnston; she was forming the A.A. U.W.; she was an important figure in the newly organized Junior League. Besides these activities, she taught a large Sunday school class. And when one of its members, my classmate, became ill with a fatal malady, it was Miss Jewell who went regularly to see her and who brought encouragement and hope and a wonderful philosophy of life into that sick room.

"When Miss Simrall resigned as Dean, to go on to the University of Cincinnati, Miss Jewell was Heaven-sent as her successor. I have known many Deans of Women, but Frances outstripped us all in the breadth of her interests, and in the clear wisdom, almost clairvoyant at times, with which she solved tough problems. Her rare qualities of mind and true goodness made students and faculty respect her judgment and strive to meet her ideals.

"Her mother, frankly exasperated at the long hours her daughter spent at the University was known to have said, 'Frances, why don't you move out to the University?' And in repeating this comment, Frances remarked, 'And I did!'

"It was Henry Clay who said: 'No man can call himself a gentleman of Kentucky until he has

watered his horse at Maxwell Springs.'

"As Mistress of Maxwell Place, Mrs. McVey together with the President of the University, made it the center of the social and intellectual life of this community. All over this country people speak reverently of the graciousness and charm, the unlimited hospitality that was shown to them by the President and his wife.

"Mrs. McVey loved people. She had great understanding of them. The quality of hospitality at Maxwell Place to the shyest freshman in the University was no different from that dispensed to Mrs. Roosevelt, to 'A.E.' to Eleanor Mercein Kelley, to Sir William Beveridge, or to any of the other great who crossed its threshold. Young and old felt comfortable and at ease in her presence. She brought out the best in all of us, for she had the habit of lifting life to great heights. I never knew her to try to superimpose her will on others for she considered ideals, philosophies, religious creeds, as something we must find for ourselves. And yet if this makes her sound too sweet, you know as well as I that she could be firm, even tough when she needed to be. But her kind heart, humane and fearless, always tried to help those who needed her help and she was tolerant of all of us, even to the point of suffering many fools gladly. To the President of this University, she was a great help and a grand companion.

"But it was not only as a hostess she was noted. She had the remarkable faculty for pushing along worth while enterprises. This is borne out by the many movements that stand as a monument to her initiative and enterprise—the International Relations

class, the Campus Club, Alma Magna Mater, the Kentucky Committee of the Y.W.C.A., Lexington's USO.

"Her own alma mater was very dear to her and she served with distinction on its Board of Trustees. Only recently, Dr. McCracken told me that she was a tower of strength during a trying period in Vassar's history. And yet it was to the University of Kentucky that she gave most of her time and her strength, for she loved it and believed with all her heart and mind in public co-education.

"At the 1940 commencement, we conferred upon her the honorary degree of Doctor of Laws. The citation read:

"Frances Jewell McVey, native Kentuckian, educated at Vassar College and Columbia University; one-time Assistant Professor of English and Dean of Women at the University of Kentucky; Member and officer of numerous educational and philanthropic institutions; Member of the Board of Trustees of Vassar College; Presiding genius of Maxwell Place which has become renowned as a home where gracious hospitality and the art of high conversation prevail; possessing an extraordinary gift for human relationships; you have warmed the hearts of countless numbers of students, members of the faculty and citizens of the nation and of the world; generous friend, inspiring ideal, it is with pride in your many achievements and with gratitude for your contribution to the intellectual and aesthetic life of this institution that the University of Kentucky confers upon you the degree of Doctor of Laws."

"She liked that citation. I quote from a letter she wrote to me dur-

ing that first summer after the retirement of the President and his wife from Maxwell Place. It began, 'On the first beautiful Elk Lakish morning,' and continued to say, 'The LL.D. Citation is so lovely, so beautifully expressed, so summing up of the kind of woman I should like to be that when I heard it on Stoll Field Commencement night, and when I read it over, I feel grateful and also as if I had deceived you grossly and as if you had blindly and graciously overlooked my many glaring defects and had enlarged and augmented my few good qualities. It is a beautiful citation and I cherish it to live by and to aspire to. I thank you all for doing me up so well, and so proudly 'right out loud before company.' "

"In the same letter, she commented on our naming this residence hall for her. This is what she said, 'I have felt so shy and embarrassed about the name of the new dormitory that I have never spoken to you of my appreciation of the thought and graciousness and generosity that prompted the name. Of course, I still maintain that Mr. Ickes will get us all if we don't watch out. You are breaking the rule and custom of the land in P. W. A. buildings and of the University of Kentucky in naming buildings only for those who are no longer living. However, I hope you know that I do, in spite of my embarrassment and blushing confusion—my face is hot this minute—and in spite of my knowing that I do not deserve it, I do secretly gloat over your wanting to name the new residence hall for me and I am terribly proud of my two namesakes, both born last year—Frances Jewell Hall, and Frances Jewell Morris. I do feel humble

and unworthy when I think of the new women's residence hall being named for me.'

"That was Frances — always generous, always unassuming, with no alloy of selfishness in her nature. In the portrait we are unveiling today, the artist has caught the radiant and charming person she was. It is a good portrait but no painting, however fine, can convey those great qualities of character that we remember in the living person. But the picture will be an inspiration to the young women who live for a while in Jewell Hall. As I think of her, the poem by Stephen Spender entitled, 'I Think Continually of Those Who Were Truly Great' comes to my mind. Let me read to you the final lines of this poem.

'Near the snow, near the sun, in the highest fields

See how these names are feted by the waving grass

And by the streamers of white cloud

And whispers of wind in the listening sky.

The names of those who in their lives fought for life

Who wore at their hearts the fire's centre.

Born of the sun they travelled a short while towards the sun,

And left the vivid air signed with their honour.' "

Testified and Returned

Virgil P. Lary of Winchester, former Army lieutenant who survived the massacre of American troops at Malmedy crossroads Dec. 17, 1944, has returned home by plane from Dachau, Germany, where he testified at the trials of 74 Nazi Elite guardsmen who are charged with the slaying of U. S. prisoners.

Miss Wehle Returns From Duties in Europe

Miss Ruth Dowling Wehle, who was overseas in the service of the Red Cross and State Department of War Information for nearly four years, has returned to her home in Lexington where she plans to remain for several weeks before taking up any formal duties such as she enjoyed before entering the service when she was regularly employed with Columbia Broadcasting System in New York. As a model, which was a sort of hobby, she was designed in many magazine covers and for portraits and other paintings that were shown in many art exhibits in New York.

With the exception of a brief period of Red Cross training in the States and a few weeks of travel on the continent and in Scotland and Ireland, Miss Wehle spent the time she was in service in England. She was in London during most of the buzz-bombing when so much destruction was caused and the loss of life was at its worst. She saw, heard and felt the shock of a great deal of the bombing by aircraft in the latter part of 1942 and 1943.

Miss Wehle made one short visit to the States and to Lexington about a year ago and when all funds were withdrawn for the carrying on of the Office of War Information and its branches she was released from service and after reporting to Washington was free to return to her home. Miss Wehle said that owing to the scarcity of food and uncertainty of transportation there was no reason for one to delay after the time of service expired.

Engineering Experiment Station Studies State's Resources

By J. A. McCauley

Beginning of a new era in the industrial development of Kentucky's natural resources should result from activities of the new Engineering Experiment Station which started its formal existence June 30 at the University of Kentucky.

This is the belief of Dr. H. L. Donovan, University president, who asserts that the engineering station can do as much to stimulate growth of industry in the state as the Agricultural Experiment Station has for agriculture.

"We all know where Kentucky stood in agriculture 50 years ago," he said, "and there is no reason industry can not be developed in the same manner as agriculture."

The Engineering Experiment Station will be a new organizational setup of existing research laboratories on the campus which already have performed and undertaken experiments with exclusive testing equipment that is of state, national and international significance.

For instance, experiments of the Aeronautical Research Laboratory, one of five laboratories of pilot-plant size in the engineering station, helped to make possible long-range flights by fighter escorts for bombing groups which rained destruction on Berlin in raids from Britain during the war.

Research being carried on by the Coal Research Laboratory, the only plant of its kind in the United States, is expected to lead to the production of smokeless fuel and numerous by-products from Kentucky's vast bituminous coal deposits.

Indications are that the station's

Ore Dressing and Metallurgical Research Laboratories may revive an iron industry which thrived in the area between the Tennessee and Cumberland Rivers in Western Kentucky before and after the Civil War.

The Highway Research Laboratory, operated with funds supplied by the State Highway Department, has undertaken numerous experiments designed to develop better highways in the state.

In addition to these five pilot plants just mentioned, the Engineering Station will have access to the regular civil, electrical and mechanical engineering laboratories of the College of Engineering.

Prof. D. V. Terrell, who became acting dean June 30 of the College of Engineering to succeed Col. James H. Graham, says that education of engineers still will be the primary objective of the college and that industrial research will be secondary. However, more and enlarged research facilities will make it possible for the Engineering College to offer better training for student engineers, he pointed out.

Dean Terrell, who will be director of the Engineering Station, said that its general objectives will be:

1. To organize, initiate and promote engineering research of special interest to the state.
2. To aid and consult with industry regarding its research problems.
3. To promote the conservation and utilization of the state's resources.
4. To provide support for research training in the fundamental and applied sciences.

Policies and operations will be controlled by an engineering faculty committee composed of C. S. Crouse, chairman, who is head of the Department of Mining and Metallurgical Engineering; E. B. Penrod, head of the Department of Mechanical Engineering; E. A. Bureau, head of the Department of Electrical Engineering; A. J. Meyer, director of the Aeronautical laboratory, and Dean Terrell.

The station will prepare and publish bulletins to be issued in September, December, March and June. The first bulletin, to be issued about Sept. 1, will contain general information concerning the research facilities of the College of Engineering.

The University requested an appropriation of \$50,000 to operate the Engineering Station at the last session of the General Assembly, but the funds were not provided for in the budget which was adopted. Aside from an allotment of \$8,000 to be received from the University, the station must depend entirely on funds received from research contracts.

Despite failure of Congress during the past 40 years to appropriate funds for engineering experiment stations in land grant colleges, several states have established such stations on their own initiative with state and industrial support. Some of the larger ones are located at Purdue University, Ohio State, Pennsylvania State, University of Illinois and the University of Tennessee.

The University has been looking forward to the establishment of such a station for more than a decade. In the rebuilding program of the College of Engineering completed before the war, laboratories and equipment were included.

During and since the war it has concentrated on a fuel research

program on Pratt and Whitney engines which has resulted in the development of engines and fuel for long-distance flying.

According to Army Air Force officials, these experiments were largely responsible for doubling the flight range of fighter planes, making possible the use of fighters as escorts for bombers on long bombing raids into the interior of Germany from British bases. By developing more powerful fuels and engines which used them more efficiently, experiments at the laboratory also accounted for increasing the range of bombers used in the Pacific campaign.

The fuel-testing program was performed on Pratt and Whitney 1,200 h. p. engines, which were used in a number of military planes, to determine the detonation characteristics of several fuels. Developed as a result of the experiments were aviation fuels with a performance rating of from 160 to 200, as compared to 100 octane which was the standard count for aviation fuel at the beginning of the war. It was consequently possible to get twice as much power out of the same engines as a result of research performed at the laboratory.

Since the beginning of the war, the tests have resulted in the cutting down of fuel consumption of planes by 10 per cent, which means that the "pay load" on a trans-Atlantic flight can be tripled.

Currently the laboratory is engaged in a fuel-testing program on a 2,000 h. p. Pratt and Whitney engine used in the Thunderbolt. In addition, the laboratory is working on a number of research projects under contract and is negotiating for a number of others. Work has started on the development of

an alcohol-burning engine for an industrial firm and on a 65 h. p. engine for a radio-controlled target plane for the Army Air Forces. Extensive work was done on the development of a bi-rotary valve engine for the Mawen Motor Corporation before the company canceled its contract with the University two years ago. Experiments showed that this engine, a radical departure in design, could be developed on a practical basis, Prof. Meyer says.

The laboratory employed as many as 40 engineers and mechanics during the war and it now employs 14. It is operated by the University on a self-sustaining basis, with an effort being made to employ as many engineering graduates and students of the University as possible. It is equipped to design, manufacture or to make tests on almost any type of engine. The National Advisory Council for Aeronautics at Cleveland has the only other laboratory that compares to the one at the University.

Financed by the State Highway Department, the Highway Research Laboratory, of which Dean Terrell is director, was established in 1942, but its activities were restricted during the war. In recent months, however, the staff has been increased by the employment of returning veterans and an extensive testing program, varying from tests on common soil (which offers the most complicated problems in road-building) to equally complex manufactured products, is now under way, according to L. E. Gregg, who is in charge of research.

The laboratory has equipment for testing all types of road-building materials, soils and is setting up a testing track which will permit determination of the effects of

traffic on road structures under all types of simulated weather conditions.

It has 21 concrete research projects under way, eight of which deal with air entrainment for concrete—a type of concrete in which air is trapped to waterproof the material by the use of beef tallow or a resinous compound. Since too much waterproofing weakens concrete, the tests are intended to determine just what degree of air-entrainment is practical under weather conditions prevailing in Kentucky.

Prof. C. S. Crouse, a staff member at the University since 1919 and head of the Mining and Metallurgical Department, is director of three pilot plants which are engaged in work of exploring future industrial possibilities for Kentucky. These are the coal processing, ore dressing and metallurgical research laboratories.

The 25-ton a day coal plant, designed and patented by Prof. Crouse and H. Comer Wolf, consulting engineer of Irvine, after years of study, treats coal at a relatively low temperatures to produce an easily ignited, free burning, solid smokeless fuel and various by-products, including high octane motor fuels, lubricating oils, bases for explosives (toluol and xylo), bases for plastics and all the various products obtained from coal tars. The plant also can be used for processing of carbonaceous shales, sulphides and other minerals.

The plant is expected to be of particular service to the Kentucky coal mining industry because of a legislative trend in many cities to require the use of smokeless fuels. In addition, the use of hydrocarbons in expanding rayon, plastic

and other synthetic industries will call for more and more carbon, the chief source of which is coal.

At present the coal plant is being enlarged in preparation for an extensive research program. Results of research carried on in recent months already have shown that the plant can accomplish its objectives, Prof. Crouse says, and it is expected that the coal industry in the state soon will make active use of its facilities. The Tennessee Valley Authority to date has been the principal financial sponsor of the plant's work.

Coal cleaning and preparation techniques which can be developed in the ore dressing laboratory also are expected to be of much benefit to Kentucky's coal industry.

Preliminary surveys of iron ore deposits in Western Kentucky by the Mining and Metallurgical Engineering Department have shown in analytical tests that the ore is 59 per cent iron, which, according to Prof. Crouse, compares favorably with other ore deposits which now are being worked, such as the Birmingham ores in Alabama.

Final determination of the iron content of the ores won't be made, however, until the Engineering Station is able to smelt 15 or 20 tons of samples in the electric smelting furnace of the Metallurgical Research Laboratory.

The western deposits are close to the Kentucky Dam, making possible cheap power for the electric smelting of the ores. All equipment needed for research toward accomplishing this end is available in pilot plant size at the University. However, additional field work is necessary to determine the extent and value of the deposits.

A large amount of preliminary work has been done by the Min-

ing and Metallurgical Department on the potential value of Central Kentucky deposits of lead, zinc, barite, calcite and fluorspar veins. The extent of the veins in area and depth must be more fully determined and their ore dressing treatment completely worked out, however, before capital can be interested in their economic development.

Much preliminary work also has been done on determining the extent and potential value of the deposits of millions of tons of oil shale in Kentucky amenable to open-cut mining.

Kentucky's clays also offer various possibilities for exploration by the Engineering Station. Many clays in the state have sufficient alumina content to make them possible sources of aluminum. Ceramics industries in Pennsylvania, New Orleans, St. Louis and other points now are importing clays from this state.

A few igneous dykes in Eastern Kentucky, rock asphalt, building stone and glass sands, are other resources of the state which Prof. Crouse believes should be investigated to determine extent of deposits, economic utilization and possible processing and treatment techniques.

The Mining and Metallurgical Engineering Department possesses several pieces of exclusive testing equipment which permits it to conduct research projects on a commercial basis.

The Metallurgical laboratory has an electric smelting furnace which can treat a ton of ore every 24 hours and is the only one possessed by a college.

Scientific evaluation of sands used for mold washes now is being made in a research being carried on by the laboratory for the Steel Founders Society of America. It

is hoped to devise the best possible mold wash for the steel industry as a result of these experiments.

The laboratory did considerable research work for the National Research Council during the war to determine the low-temperature properties of certain steels. Research along this line is expected to increase as military forces develop new rocket-types of equipment.

Research also has been carried on under the direction of Prof. Crouse for the Dutch government on oxide nickels from the Celebes, Dutch East Indies, and for French groups in New Caledonia.

Prof. Crouse for a number of years has been engaged in study of the low-temperature process of treating coals and shales for production of motor fuel, lubricants and tires and has written extensively on the results of his studies. He has been a member and secretary of the State Board of Registration for Engineers since it was founded.

U. K. Will Get More Houses

Delivery of 180 temporary family dwelling units for married veterans and their families and 208 dormitory units for single student veterans at the University of Kentucky has been ordered by the Federal Public Housing Authority, Charles B. Lawrence, FPHA director, announced June 5 at Cleveland, Ohio.

Twenty four-family units will be brought from Camp Campbell at Hopkinsville, 100 family units will be converted from four frame buildings which will be brought from Fort Knox, and 208 dormitory units will be provided by 13 single-story Army buildings now at Camp Campbell, he said.

U. Of Kentucky Man Closes Big War-Time Operation

PARIS, July 1—The final chapter in the military history of the organization which engineered the famous "Hump" operations from India to China during the war, was written high in the skies over Calcutta this week when Lt. Col. William N. Boaz, Jr., Commanding Officer of the India Wing of the Air Transport Command, evacuated his entire headquarters by air to Paris, France, from India Wing Headquarters at Barrachpore, India, thereby closing out ATC's last remaining air operation in India.

Colonel Boaz assumed command of the India Wing in February, 1946, and continued in that capacity until the deactivation of the Wing on June 30, 1946. According to Colonel Boaz, the discontinuance of the India Wing is in line with the Air Transport Command policy of relinquishing all foreign bases which are not absolutely essential for purposes of supplying our occupation forces in the European and Pacific Theaters. Also, he said, the Air Transport Command is streamlining its organization for economical 'peace-time' operation.

Early in the war, and on through the Japanese capitulation, the U. S. and Chinese fighting forces in the India-China-Burma war theater had to depend almost exclusively upon the India Division of ATC for vital military supplies, which were flown over the "Hump" to that fighting front. At its peak operation, airplanes in the India-China Division (later reduced to a Wing) flew more hours and carried more

freight and cargo than all the rest of ATC's air divisions combined.

Shortly after the cessation of hostilities in the Pacific, the India-China Division was reduced to two separate Wings, with greatly lessened personnel strength, due to the extremely rapid demobilization program. The work of the Wings, said Colonel Boaz upon his arrival in Paris, went on with a 'business as usual' efficiency, to supply American Occupation Forces in China and Japan.

Reviewing post-war operations of the India Wing prior to the deactivation of that organization, Colonel Boaz revealed that air bases under his command jurisdiction serviced the world-girdling "Globester" C-54 Skymaster air transport on its weekly earth-circling run. Flying in cargo and mail to American military personnel stationed in the India-Burma Theater, the colonel considered to be one of the more important jobs of the Wing during its postwar lifetime. The organization also evacuated wounded soldiers and others who were eligible to return home under demobilization regulations.

Although the India Wing of the Air Transport Command closed officially on June 30th, all personnel, with the exception of three communications men, had already been withdrawn by June 25th.

A graduate of Lone Oak High School, Colonel Boaz attended the University of Kentucky for three years, majoring in mechanical engineering. Commissioned a second lieutenant in the Army Air Corps in 1939, Colonel Boaz won a regular army commission in 1940. He served overseas in Alaska, China and India and is at present returning home to Lexington, Kentucky where he will spend

a short leave with his family prior to reporting to Headquarters ATC in Washington for his next assignment.

U. K. REGISTERS ALL-TIME HIGH SUMMER ENROLLMENT

A total of 3,464 students, the largest number ever enrolled in the history of University of Kentucky summer terms, were registered Monday, June 23 at the close of the regular registration period for the first term of the 1946 summer quarter.

The number exceeded by 2,160 the total enrolled in the 1945 first summer term, and topped by 1,276 the all-time high figure of 2,188 in 1940.

The second term of the 1946 summer quarter at the University of Kentucky opened July 22 and will continue through August 24. Thursday, July 25 has been set as the last date upon which a student may enter an organized class in the second summer term.

Friday, August 23 is the date for the summer commencement exercises at the University of Kentucky.

Mrs. Connell Heads American Legion Auxillary

Mrs. Raymond Connell of Paris, Ky., a graduate of the University in 1925, was elected president of the American Legion Auxillary at the final session of the State convention held in Lexington July 10. The auxillary now has a membership of 6,380.

Mrs. Connell, formerly Miss Mary Frances Campbell of Paris, is the wife of Mr. Raymond Connell, attorney of Paris and a graduate of the University of Law College in 1921.

Keeneland Foundation Gives Electron Microscope To U. K.

Keeneland Foundation will purchase a \$15,000 electron microscope, which is illuminated by waves of electrons instead of light waves and is 20 times more powerful than a light microscope, and install it at the University of Kentucky.

The offer of the microscope, which is one of the few in the United States and will be the first in Kentucky, was accepted by the University board of trustees. It will be available free to all qualified citizens of Kentucky and to University scientists.

Dr. Fred M. Rankin, chairman of trustees for the Keeneland Foundation, extended the offer of the microscope, to the University in a letter to Dr. H. L. Donovan, University president.

Dr. Donovan stated that the microscope will be set up in the Biological Sciences building under the direction of Dr. M. Scherago, head of the Department of Bacteriology, and that a qualified technician will be selected to be sent away for six months of training on operation and care of the microscope.

The microscope may be used in studies and analyses in bacteriology, metallurgy, chemistry, serology, zoology, botany and other fields of science, medicine and industry, Dr. Scherago said.

"Because of the greatly increased magnifying power of this new instrument, not only is it possible to view tiny objects for the first time, but also the study of the finer details in structure of larger objects becomes possible to an extent not attainable heretofore," he said.

He said it functions similarly to

the transmissible type light microscope, except that it is illuminated by waves of electrons instead of waves of light, the electron stream is bent into focus by the effect of electron-magnetic fields instead of curved glass lens, and, as electrons are invisible to the eye, the image must first be formed on a fluorescent screen or a photographic plate in order to be seen.

Dr. Rankin said in his letter to the University president that "the chief purpose of the Keeneland Foundation is to encourage scientific research in Kentucky. Investigation indicates that in certain instances research lags because of scarcity within our borders of technical and expensive scientific equipment."

He said the trustees had voted to purchase the microscope "in the belief that in so doing Keeneland will make a useful contribution to Kentucky as a whole."

"Because of the deep interest everyone connected in any way with this foundation feels in the true welfare of the University, and also because the University of Kentucky is the natural center of scientific research in Kentucky, we would like, with the permission of your board, to install this electron microscope at the University, and donate its major use to you," he said.

U. K. To Offer Courses In Radio

Beginning with the 1946 Fall Quarter in September, the University of Kentucky will offer for the first time courses in radio through its newly established Department of Radio Arts.

A survey course running through three quarters and titled "Radio Today" will be open to all students in the University and will cover every phase of present-day broadcasting. Visiting lecturers from radio stations and networks will appear before the classes, and several trips to nearby stations will be made.

All students except Freshmen will be eligible to take courses in "Radio Announcing" and "Radio Acting," each of which will run one quarter and will include considerable laboratory work in addition to the conventional classroom recitations. Disk and wire recordings will enable students to hear their own defects and check their progress.

Courses in "Radio Regulations," "Radio Script Writing," and "Radio Production," to be offered on an advanced level, are scheduled for the fall of 1947, at which time a complete major in Radio Arts will be available.

Having a long tradition in radio work, extending back to 1929 when the first programs over WHAS, Louisville were made from the University's remote studios, such broadcasts have been maintained and expanded to include also regular programs over WLAP, Lexington. A Listening Center system for the mountains of Kentucky was established in 1933 which has become world-famous. The University of Kentucky studios won a Peabody award several years ago for pioneer work in venereal disease broadcasts, and more recently the University established WBKY, which is today Kentucky's oldest frequency modulation station. All of these facilities will be available to students enrolled in the Radio Arts courses.

Delta Tau Delta Honors Gold Star Brothers

Hundreds of former students have returned to the campus since the end of the war, resuming studies, renewing friendships and re-forming social groups. Many happy reunions have been held by former service men and women, but in every gathering there has been pause to recall cherished friendships and associations with members who haven't returned and who won't be back.

Typical of this pause was the tribute paid by Delta Epsilon chapter of Delta Tau Delta fraternity to its seven Gold Star heroes during the course of the group's annual Founders' Day celebration, its first such observance since the outbreak of the war.

Inactive during the war years because most of its members had entered military service, the Delta Tau Delta chapter was reorganized last winter, and the Founders' Day program, arranged with the assistance of the fraternity's Lexington Alumni Club, provided the group with its first postwar reunion as well as celebrating the chapter's installation on the U.K. campus on May 10, 1924.

During the banquet program the assembly stood in respectful tribute and fond memory as the roll of war casualties was called. The chapter lost seven active or alumni members killed in action during the war, reported as follows:

Lt. Cecil Kittinger of Owensboro, Class of '41, killed by the explosion of a land mine in Sicily, Aug. 14, 1943; Capt. Oscar (Bosco) Wisner of Danville, '38,

killed while on a bombing mission off the coast of New Guinea, May 5, 1944; Lt. Glen W. Carl of West Chicago, Ill., '40, killed in action in France, July 16, 1944; Lt. John Randall (Scotty) Hudson of Barbourville, '43, killed in plane crash near Agra, India, July 25, 1944; Lt. Robert J. Ammons of Lexington, '43, killed during infantry assault near Brest, France, Aug. 12, 1944; Pvt. Lewis F. Cantrell of Greensburg, '46, killed in action in Belgium, Jan. 7, 1945, and Lt. William W. Hopewell of Providence, '40, killed in action on Okinawa, May 29, 1945.

Bob Odear, a Lexington alumnus who served as toastmaster at the banquet and led the tribute to the war victims, announced that memorial services for the Gold Star members would be held at the chapter house early during the fall term of school.

Delta actives and alumni present for the banquet, most of them ex-servicemen, heard the principal address of the occasion delivered by Clemens R. Frank, prominent Cleveland attorney and at present national secretary of Delta Tau Delta, who joined in a tribute to the Delta Epsilon heroes and extolled the sacrifices and contribution of fraternity men in general to the cause of democracy and humanity.

Others on the banquet program included Everett Elsey, Delta Epsilon president; James S. Shropshire, alumni adviser; Bill Greathouse, president of the Lexington Alumni Club, and Russell Lutes, former alumni president.

Alumni from out of town who returned for the anniversary program and reunion included Penrose T. Ecton of Baton Rouge, La.; Chuck Sweeney of Bridgeport, Conn.; Bill List of Paducah; Jim Bowling of Harlan; Charley

Brooks, Bill Ryan and Jack Crain, all of Louisville; Walter Vest of Walton, Leonard Weakley of Fort Thomas, and Lawton Daly of Covington.

Only three Deltas, all overseas veterans, were back on the campus last winter when Delta Epsilon was re-activated, with the support of the Lexington alumni group. They were Everett Elsey, Bill Karraker and Bill Fulton.

Other veterans who returned to school and became actives in the chapter again during the winter and spring quarters included Homer Crowden, Buddy Barret, Frank F. Davis, Stan Hays, Ed Jones, Fred Kaestner, Jim Keneipp, Bill McCowan, Bill Ogden, Earl Prater, Preston Price, Ray Pugh, Arch Rainey, Kenny Rush, Jim Satterfield, Bob Scott and Dick Stofer. Many other members who have been in service have sent word they will re-enter U.K. for the fall term.

Members of the local alumni group who have returned to Lexington following military service include Denver DeHaven, James Shropshire, Ollie Williamson, Bruce King, Laurence Shropshire, John Crosby, Dan Fowler, Russ Lutes, Coleman Smith, Bill Greathouse, George Skinner, T. C. Endicott, Jim Darnaby, Bruce Davis, Jack Mylor, Sonny Parrish, J. D. Davis, Hoot Combs, Bert Cooper, J. B. Faulconer, Earle Fowler, Dunham Short, Troy Adams, Carter Brumfield. Among the Deltas from nearby Central Kentucky towns who have returned home from service are Warren (Booley) Price, Georgetown; Ralph Kercheval, Paris; C. D. (Windy) Blair, Flemingsburg; Ben Fowler and George Kagin, both of Frankfort; Jim Hagler, Millersburg, and Don Hays, Berea.

Judge Coleman Named To Head UK Alumni Bowling Green Group

Judge Robert M. Coleman was elected president of the Warren County club of the University of Kentucky for alumni and former students at its organization meeting at the Helm hotel July 23.

Judge Coleman served as toastmaster at the dinner meeting at which Miss Helen King, executive secretary of the University of Kentucky Alumni Association, was guest of honor and speaker.

Other officers named were Miss Helen Powell, vice president, and Miss Frances Anderson, secretary and treasurer.

Former students desiring to affiliate with the organization may contact Miss Anderson.

Members attending the dinner were Judge Coleman, Mr. and Mrs. Ernest Gregory, Dr. and Mrs. L. Y. Lancaster, Mr. and Mrs. E. H. Canon, H. B. Gray, W. B. Kerr, Charles L. Taylor, W. J. Craig, Joe Covington, R. M. Parrish, Mrs. Charles H. Moore, Mrs. W. H. Nicholls, Miss Anderson and Miss Powell. Mrs. Coleman, a former student was also enrolled as a member.

Guests were Miss King, Thomas H. Cutler, Frankfort; Mrs. E. D. Shinnick, Lexington; Mrs. John Whitaker, Russelville, and Mrs. Roger Parrish.

Mr. Cutler, a member of the Board of Trustees of the University and Executive Committee of the University Alumni Association and a past president of the Association, spoke informally to the group on the building plans for the University.

At the conclusion of the program every member of the Bowling Green Club joined the Alumni Association.

DR. T. D. CLARK

Clark to Represent Book Concern in Kentucky

Dr. Tom Clark of Lexington, head of the department of History in the University, has been appointed Kentucky representative of the new publishing firm of Farrar, Strauss and Company. Book ideas and manuscripts may be submitted to him at the University, according to the announcement.

Dr. Clark has been on the University faculty 15 years and during that time he has published several books on Kentucky and has kept in contact with every writer of note in the State. His history of Kentucky is a textbook and one of the most important books of its kind in the library of Kentuckiana. Two other well known books are, "The Kentucky" in the Rivers of America series and "The Country Store," an excellent book dealing with one of the most interesting features of the South. Dr. Clark, who has just returned to the University after a leave of absence, is working on a book of the same

type as "The Country Store" and the theme is on country newspaper editors. This record will be additionally valuable because of the fact that the subject will soon be a tradition.

Dr. Best Returns

Dr. Harry Best, of the Sociology department, has returned to the University after a year's leave of absence. He will resume his teaching duties the second term of the summer quarter.

Dr. Best was serving with the Federal Security Agency in Washington.

Carroll Gullion Heads Firm Of Managing and Consulting Engineers

Carroll Gullion of the Class of 1904 with some of his wartime friends and associates recently organized a firm of Management Engineers or Business Consultants to be known as the American Commerce Corporation of Cleveland, Ohio. Mr. Gullion is president of the firm and maintains his home in New Castle, Ky., and spends much time in southern Florida.

Since leaving the University Mr. Gullion has spent his time in Industrial Engineering and business management field. Some years he spent in Europe but many more in American industry. He retired from his work with Swift & Co. in 1939 and enlisted in the Army where he was advanced to the rank of Lieutenant Colonel. When because of his age he retired from the Army he became vice-president and general manager of a company in Dallas, Texas, producing war material. His present interests have developed since his retirement from the business associations in Texas.

Anthony Thomson Appointed "Friend Of The Court"

A social need was satisfied for Fayette County when on July 1, 1946, Anthony Thomson was appointed "friend of the court." Mr. Thomson was appointed under a new state law passed by the last legislature.

While talking to Mr. Thomson, he stated that his chief duties were to supervise and enforce the payment of sums ordered by the court in divorce actions to be paid for the care and maintenance of minor children. He said that he does not declare whether a divorce should or should not be granted but often times is called upon to confer with the county judge as to the merits of the grounds for divorce.

Mr. Thomson stated that his principal duties since his appointment have been in the field of investigating suitable homes for children of divorced parents, procurement of delinquent maintenance payments from the husband and attendance at divorce cases in which children are involved. He reports to the court all cases in which children are not receiving proper care and maintenance or in which the person having custody is failing to furnish proper care.

Since being appointed "friend of the court," Mr. Thomson stated that many fathers had made up back payments rather than be brought before the court. A law such as this is very helpful in making fathers who do not keep up the maintenance payments up to date do so.

Mr. Thomson is a native of Greenup County and is a veteran of World War II. He is a graduate of the University of Kentucky

College of Law and started the practice of law in 1925. His office is located in the Security Trust Building.

Dr. Beaumont's Second Book Off Press

"Psychology Applied to Personnel" by Henry Beaumont, Ph.D., of Lexington, has just come off the press of Longmans, Green and Co., Inc., New York City. The author is Professor of Psychology and Director of the Bureau of Industrial Psychology, University of Kentucky, and is consultant in personnel Psychology.

In September of last year Dr. Beaumont's "Psychology of Personnel" was published. It was translated into several foreign languages and accepted as a text book and reference in many educational institutions and libraries.

"Psychology Applied to Personnel" consists of two parts. In the first is presented an important tool of the industrial psychologist, namely, statistics. The discussion includes those concepts which are useful industrially and of direct practical significance to personnel workers. Assignments made in this part are designed to give students actual experience in the kind of computation which is among the everyday chores of the statistician or psychometrist in the employment or personnel department.

The second part contains notes and references pertaining to "The Psychology of Personnel" arranged under the same chapter headings as in that volume, together with questions and applications designed to test ability to apply the information contained in the text.

The basic data used in the book were obtained in a small plant employed in manufacturing tools for the automotive industry. The Company's product was rated 100% essential and was sold primarily to plants making military vehicles in the Detroit area as well as in England and Russia. Complete personnel records, test scores, and merit ratings were available for 94 individuals, representing the bulk of the company's employees.

John R. Hubbard Representative To Kentucky

T. C. Thompson, telephone sales manager of the Stromberg-Carlson Company, Rochester, N. Y., announced recently that John R. Hubbard had been appointed telephone sales representative to travel the entire state of Kentucky, and parts of Indiana and Tennessee for the 52-year-old communications company.

Mr. Hubbard, a native of Princess, Kentucky, attended the public schools of Princess and Ashland before entering his home state's University of Kentucky. He was graduated from the institution in 1937 with a degree in electrical engineering. Soon after graduation, he was employed in the engineering department of the Lexington Telephone Company of Lexington, Ky., before he rose to the position of plant engineer and construction supervisor in 1941. In 1942, he became a civilian telephone engineer in the Office of the Chief Signal Officer, Plant Engineering Agency. He is a member of the Triangle Fraternity, and the Engineers' Club of Philadelphia, Pa.

Youthful Bon Marche Chief Started Life on Kentucky Farm

By Jim Egan, Seattle Star

Not too many years ago he was milking cows, pitching hay, pushing on plow handles and doing other of the unending, dawn-to-dusk chores which are part of life on a farm. A small farm it was, located in the environs of Birmingham, Kentucky—a community bearing scant resemblance to its metropolitan Alabama namesake, being a thinly populated “boat landing” on the Tennessee river.

That was the Rex Allison of yesterday. Today, at the age of 35, he is just settling down into his new duties as president of the Bon Marche department store, the youngest man ever to be appointed head of the huge Seattle mercantile establishment.

Rex Allison has come a long way from the farm in a couple of brief decades. Personable, affable, easy to meet, the youthful president appears competently at ease amid the urban refinements of his walnut-finished, air-conditioned executive office, from which he now directs policies and personnel of one of the Pacific Northwest's great stores.

Announcement last week by Frank McL. Radford, chairman of the board, that such a comparatively young man had been selected to supervise operations of an institution as complex as the Bon Marche may have caused surprise in some quarters, but it need not. Despite his years, Allison has held other important posts with Allied Stores, the corporation controlling the big Seattle store. When only 25, he was controller of one of Baltimore's largest merchandising establishments.

Evidence that he was a young

man who would make his mark was plainly indicated during his senior year at the University of Kentucky. Then 20 years old, he was awarded the Sullivan medalion, given annually by the New York Southern society, to the outstanding member of his class. Both as a scholastic and campus leader he ranked high at Kentucky.

Born on the Birmingham farm on July 30, 1910, Allison left his home at the age of 13 to attend Teachers' College model high school at Murray, Ky. He still speaks with a trace of Dixie accent, a heritage he brought from the bluegrass state.

After graduating from the University of Kentucky, Allison entered the employ of the General Electric company as a trainee. He soon shifted from this line of work, however, into retail trade. Joining the Quackenbush company of Paterson, N. J., as assistant credit manager in 1931, he became the credit manager within a few months.

Young Allison's progress up the ladder to better positions was rapid. He went to Baltimore in 1936, and two years later was named controller of the Allied Stores corporation in New York.

His first executive connection with the Bon Marche occurred in 1942, when he came west as a vice president of the big concern. He enlisted in the navy early in 1944, and was commissioned a lieutenant, j.g. He was discharged as a senior lieutenant in December last year—in time to celebrate Christmas at home—and rejoined the Bon Marche as vice president.

Most of his service in the navy

was spent with the department in Washington, D. C., and in the Caribbean sector. Requesting sea duty on the Pacific, he was assigned to the carrier USS Bunker Hill too late to see action, the Japs having decided to call it off.

Allison was married, at the age of 21, to the former Alice Bruner of Louisville—pronounced “Looeyville.” The family home here is at Broadmoor, and the couple has three children: Ann, 8, going on 9; Rex Jr., 7, and Kenneth, aged 15 months.

Allison's favorite recreational sports are golf, which he admits he plays badly, and tennis, in which he says his strokes are better. He belongs to the Broadmoor Golf club and the Seattle Tennis club. He is also a member of the Seattle Chamber of Commerce and the Washington Athletic club. His college fraternity is Sigma Alpha Epsilon.

The young president of the Bon Marche is not yet prepared to announce any particular changes in plans or policies for the stores, altho indicating that he believes firmly in serving the public with efficient, courteous personnel. Merchandise shortages will continue to be a problem, he stated, with some relief expected in housewear and women's ready-to-wear garments.

And Rex Allison hasn't lost interest in farming. He currently owns a share in a much larger farm than that at Birmingham, operated by his older brother Selton at Guthrie, Ky., and devoted chiefly to the raising of cattle.

GAME AT 2 P. M.**

Combs New Sports Editor For Wildcats

CARL L. COMBS

Carl L. (Hoot) Combs, former Wildcat athlete who returned last Fall to the University to do graduate work in Journalism, has been appointed full-time sports publicity chief for the University. He is the first writer to hold the position on a full time basis.

"Hoot" Combs was graduated from the University in 1941 and obtained a reserve commission through the R.O.T.C. and five days after graduation reported for active duty in the Army. He served 32 months overseas in the Mediterranean and European theatre during World War II and received the Purple Heart after being wounded while with the First Armored division during the Tunisian campaign. While a patient in an Italian hospital the young Kentuckian sent a Life Membership check to the Alumni Association with the notation, "I have wanted to be a Life Member of the Alumni Association of the University since I first knew anything about it." Later as-

University of Kentucky 1946 Football Schedule

Sept. 21—Mississippi.....	Lexington—Night
Sept. 28—Cincinnati	Cincinnati—Night
Oct. 5—St. Xavier	Lexington—Night
Oct. 11—Georgia	Athens—Night
Oct. 19—Vanderbilt	Lexington—(Homecoming)
Oct. 26—Alabama	Montgomery
Nov. 2—Michigan State	Lexington
Nov. 9—Marquette	Milwaukee
Nov. 16—West Virginia	Lexington
Nov. 23—Tennessee	Knoxville

signed as a public relations officer with the Mediterranean Air Transport Service, he assisted War Correspondents and staff members of the Stars and Stripes, Army newspaper, and handled arrangements for the tours of numerous screen and radio celebrities who were providing entertainment for troupes in the Mediterranean.

In his new position his headquarters are in the offices of the Director of Public Relations but his time is spent with the Wildcats whether they are at basketball or football for he was a star on both sports. Since returning to the Campus he has written for the Alumnus and has contributed five stories for this edition.

Basketball Champs To Play Cuban Series

Coach Adolph Rupp has announced that he will take his University of Kentucky Wildcats, National Invitational Basketball champions, to Cuba for a two-game series with a team sponsored by the Cuban government some time in early November if arrangements can be made satisfactory to both parties.

"The Cuban government has

been after us for several years to come down for a series of games," affable Adolph said, "and I think the boys deserve the trip."

If the arrangements are completed Coach Rupp will start his practice on October 14 but in the event that arrangements are not satisfactory he will start as originally planned, on October 21.

All expenses will be paid by the Cuban government, which has agreed to fly the team both ways.

"Our 1946-47 schedule is the toughest we have ever had at Kentucky," Coach Rupp said, "both from the standpoint of number of games and the competition. We have 26 games on the regular schedule and we hope four in the tournament. Then if we have done a good job, we hope to get another invitation to the invitational Tournament in New York."

The schedule, which includes the best teams in the nation, will be opened November 28, about three weeks earlier than usual.

Bryant, Moseley, Laslie, Balitsaris and Atkinson

Bryant, The Man and Athlete

Coach Paul "Bear" Bryant is a native of Fordyce, Arkansas, where he starred on the high school football and basketball teams. At the University of Alabama he was an end on the 1935 Rose Bowl team which had Don Hutson on the other end and Dixie Howell in the backfield. This was probably the most powerful as well as the most colorful team in Alabama football history. Bryant's room mate was Hutson, the greatest end to ever play the game, and the two remained fast friends through the years.

Following his graduation from the Capstone, Bryant worked as an assistant to Crimson Coach Frank Thomas for four years and it was during this time that he absorbed the Alabama system of offense. The story goes that Thomas had planned for Bryant to suc-

ceed him at Alabama when the call of the easy chair grows too strong.

Hard-working Bryant also served as an assistant at Vanderbilt under Ray Morrison for two years before the war broke out. Entering the navy, Bryant soon found himself back in the coaching business, this time as the Chief Cloudburster at North Carolina Preflight. He had one of the greatest of a group of great service teams.

Discharged with the rank of Lt. Commander, Bryant assumed the head coaching job at the University of Maryland and led that team to six victories, two losses and one tie, the best Maryland season in many years. His team defeated Virginia after the Cavaliers had piled up a string of 16 consecutive impressive victories.

Since his arrival at Kentucky in

the spring of 1946, Bryant has worked hard with holdovers from last year and in getting new football players to come to the University. No one expects him to start knocking off the gridiron Giants which appear annually on the Wildcat schedule this year, or even next year, but if he continues to progress, Kentucky will lose its reservation in the Southeastern conference football cellar.

U. K. Tennis Captain, Mate Win New Jersey Doubles Crown

Al Reynolds, captain of the 1946 Wildcat tennis team, joined Charles Lundgren, Miami, Fla., University player to win the doubles championship in the fourth round of the New Jersey State Tennis Tournament at Orange, N. J.

The University of Kentucky tennis star played outstanding tennis at the state school this spring. He is a native of Orange, N. J.

Summer Football Conflict A Good Show! Fans Pleased

Victory-hungry supporters of the University of Kentucky football team left Stoll field following the recent intra-squad game which rang down the curtain on summer practice in a happy frame of mind. They had seen the best show put on by a Wildcat aggregation in many years.

The exhibition was not a first-class show—nearly all the participants were freshmen—but the way the new Wildcats went about their work indicated that rival teams, including bowl-happy Alabama, Tennessee and Georgia, would receive nothing but a kick in the pants from rugged 'Cats-to-be.

The White team, paced by Lee Truman, 17-year-old pile driving fullback from Owensboro, won the hard-fought tussle 7 to 6 but they had to come from behind to do it. Little Johnny Methaus, Louisville speed merchant, indicated that he has lost none of his zip when he took a long punt from the talented toe of George Blanda, 1945 quarterback from Youngwood, Pa., and sped 90 yards behind vicious blocking for a touchdown to put the Blues in the lead. The Blues threatened several times again in the first half, mainly due to the efforts of smashing Ben Heinzinger, Scarsdale, N. Y. fullback, but could not reach pay dirt.

It was not until the final quarter when Truman, who shows signs of developing into a great fullback, took charge of the show. Starting on their own 20, the Whites used Truman's bulling tactics through the center of the line to advance the ball to midfield where they changed pace

and a pass from Carl Genito, promising Duquesne, Pa. halfback, to Dennis Rice, Belfrey, W. Va., halfback, placed the ball on the eight. On the next play Rice lost five yards but then Truman smashed to the two and on the next play battered a solid wall of players to go over with yards to spare.

If Coach Bryant can field a freshman group every year as capable as this year's group he will have a good football team, one which will be able to hold its own with the gridiron giants which annually appear on the Wildcat schedule.

Harry Ulinski, Ambridge, Pa., and Doug Hodges, Williamson, W. Va., are quarterbacks who could play for any team in the league. Nick Wanchic, Toronto, Ohio, and Jim Stephens, Covington, look promising at end and a brace of backs including Jim Babb, Lebanon, Tenn., Carl and Ralph Genito, Duquesne, Pa., Dick Rager, Conway, Pa., and Rice, Truman and Heinzinger who are outstanding prospects.

But more impressive than the ability of the participants was the way they went about their chores. They tackled hard and when they blocked a man he stayed blocked. Pass defense was weak but spirit was strong and they looked like they want to play the game the hard but successful way.

Rupp Fame Recognized

The Louisville chapter of Toastmasters, International, named Basketball Coach Adolph Rupp of the University of Kentucky to its Kentucky Hall of Fame, it was announced May 28. Rupp, who has coached at U. K. for 16 years, became the second Kentuckian elevated to the post. The other is Harry Schacter, head of the Committee for Kentucky.

Rated one of America's top mentors for many seasons, Coach Rupp this past campaign brought the **National Invitational Championship** as well as the **Southeastern Conference crown** to the university.

In 16 years under Rupp the fast-breaking 'Cats have won 283 games while losing but 64, an average of .816 per cent and probably the best record of any major basketball team in the United States.

Coach Rupp, who divides his time between basketball and farming, started developing winning basketball teams at Kentucky in 1930. In 1944, he was elected to the Helms Foundation Basketball Hall of Fame, an honor then accorded to only nine other coaches.

Since Rupp has been at the University, the Wildcats have lost only eight games on the home floor at Lexington. During one period, overlapping two seasons, the Ruppmen won 24 consecutive victories and, over a five-year period, won 45 straight conference encounters.

DEDICATION OF GOLD STAR ROSTER

at 11 A. M., October 19

Opening Feature of Homecoming Day

New Lights Planned For U.K. Grid; Clinics Will Be Held

Plans for installation of a new lighting system on Stoll Field and for a football and basketball clinic to be held in Lexington August 28-31 were approved May 12 by members of the University of Kentucky Athletic Board.

Paul Bryant, new head football coach at Kentucky, and Frank Thomas, coach of Alabama's 1946 Rose Bowl champions, will conduct the football phase of the clinic with the assistance of two Kentucky high school coaches. Kentucky Coach Adolph Rupp will conduct the basketball school.

A feature of the school will be a basketball game between the Eastern and Western All-Star high school teams Aug. 30. An East-West All-Star football game is planned next year.

1946 Outlook

Paul "Bear" Bryant, new head football coach at the University of Kentucky, faces the toughest assignment in football next fall when he will take an untried group of freshmen and returned war veterans and holdovers from a 1945 squad which could win only two games against ten of the strongest teams in the South and Mid-west.

An Alabama graduate, Bryant comes to Kentucky from Maryland where his 1945 team won six, lost two and tied one game for the best Maryland season in many years. His team defeated the University of Virginia after the Cavaliers had run up a string of 16 consecutive impressive victories.

Following spring practice, Bryant and his staff arranged a summer practice session to look

Kentucky basketball and football players will be used in demonstrations during the clinic and motion pictures of important games will be shown to the student coaches.

The new lighting system will be 10 times as powerful as the present system, having three towers on each side of the field with each tower containing 144 lights. Only a total of 24 lights are used in the present system.

As a result of the new system, additional night games are planned by the University. Two games on the 1946 schedule—with the University of Mississippi Sept. 21 and with Xavier Oct. 5—already have been placed on the nocturnal schedule.

over the new crop of football talent attracted to Kentucky. By their untiring efforts on the scouting trails, several potential good football players did enroll at Kentucky, but it cannot be expected that these untried freshmen and returned war veterans will be able to cope with bowl-happy Alabama, Tennessee and Georgia, not to mention Vanderbilt, Mississippi, Michigan State, West Virginia, Xavier, Cincinnati and Marquette, who round out the schedule.

Kentucky will have an improved team next year but so will every team the Wildcats play. Bryant hoped to lay a solid foundation of capable new men with a view to building for the future. The tackle and fullback positions loom as definite weaknesses next fall and a lack of power in these

positions will be a great handicap.

On the brighter side, it looks as if there will be a few men on hand who have stood the test of fire before. Among these are Ermal Allen and Phil Cutchin who will return from the '42 squad to bolster the left halfback position, Charlie Kuhn, a right halfback from the '42 squad, Leo Yarutis and Roscoe Jones, guards from the '42 squad. There are others who have not been heard from who might show up in September, but the number is pitifully small compared with the number of returnees reported from other schools on the Wildcat schedule.

Coach Bryant is painting no rosy pictures for Wildcat boosters. He would rather they see the true picture of the situation so that a plan for the future can be carried out without too much disappointment on the way.

Kemper Quits Coach's Berth With Purples

Durbin C. (Petey) Kemper, basketball coach at University Training school from 1928 to 1943, has asked to be relieved of his coaching duties when he returns to the school in September after more than three years' service in the Army.

Kemper, granted military leave when he entered the Army in January, 1943, as a second lieutenant, will be assigned as a full-time critic teacher in general science upon his return to the U-High staff. He recently was separated from the service in Maryland.

GET-TOGETHER
Lafayette Hotel Gold Room
8-12 P. M., Oct. 19

VETERAN COACH HONORED—The Downing tennis courts at the University of Kentucky are not only so named officially, but now they are also duly labeled. A plaque contributed by former pupils and other friends of Dr. H. H. Downing, in whose honor they were named, was unveiled at the courts Thursday. The veteran is pictured above holding a gift of 25 "cartwheels," a silver dollar representing each year he has served as coach of UK tennis teams. Also shown are Dr. H. L. Donovan, UK president, and Miss Elizabeth Ragland.

Dr. Downing Honored

A bronze plaque honoring Dr. H. H. Downing, professor of mathematics in charge of astronomy at the University of Kentucky, who has coached the Kentucky tennis team for 25 years, was presented to the University and installed at Downing tennis courts on the campus at 3 o'clock July 20.

The presentation was by Miss Elizabeth Ragland and was accepted for the University by President H. L. Donovan.

Former team members and friends of Dr. Downing presented the plaque.

Dr. Downing, a native of Fayette county, was graduated from UK in 1900, holds a master of science degree from the University of Chicago and a Ph.D. degree from the same institution. He has been a member of the University faculty since his graduation from the institution in 1908, first as as-

sistant professor, later as associate professor and since 1931 as a full professor.

His first team made its debut in 1922, and since that time his Wildcat tennis squads have met 45 different colleges and clubs and have won 140 matches, lost 73 and tied four, a record of 62.2 per cent wins.

About 100 young men have played on Coach Downing's tennis teams, and of these two were lost in World War II—Oscar Wisner of Danville, killed in action, and Walter Botts of Winchester, reported missing. They played on the same team and were doubles partners.

The plaque reads as follows:

DeMoisey Will Travel In Baseball's Interests

John R. (Frenchy) DeMoisey, all-American basketball center at the University of Kentucky in 1934, will be traveling soon in the interests of organized baseball as a member of the staff of Baseball Commissioner Happy Chandler.

The former Wildcat ace, who played several seasons of professional baseball following his graduation from U. K., said May 21 that he would take up his new duties June 1, working out of Chandler's office in Cincinnati but maintaining his home in Lexington. He reported that his work during the off season would be chiefly in the promotional program which the commissioner is instituting, and that he would be assigned other traveling duties by Chandler during the playing season.

After coaching several years in high schools following his graduation, DeMoisey accepted a position at the Kentucky Houses of Reform at Greendale in 1939, and was superintendent at that institution from 1941 to 1944.

**U. K. Golf Captain Wins State Championship
H. L. Davis Congratulates Dick**

Dick Hicks, diminutive captain of the U. K. golf team this past spring, surprised veteran golfers

by winning the state amateur golf championship at the Lexington Country Club course last week.

Military Department Adds Two Instructors

The arrival of two additions to the University military staff was announced July 18 by Lt. Col. John L. Carter, acting head of the military department.

Taking charge of the Signal Corps branch of the ROTC will be Lt. Col. Gerald P. Lerner, regular army officer and wartime supply officer in the China theater. Prior to going overseas in 1944, Lt. Col. Lerner served as an instructor in ROTC at Texas A&M and since his return to this country in April has been taking a

course in Signal Corps training at Ft. Monmouth, N. J. He graduated from the University of Illinois with an electrical engineering degree in 1935.

Lt. Col. Lerner has been awarded the Bronze Star Medal by the War Department. The award was for "expert supervisory and distributive policy" in expediting the establishment and co-ordination of signal supply equipment in China.

Colonel Lerner was signal supply officer of the China Theater.

Major Donald W. Glenn, Inf. AUS, the second new officer, will teach infantry tactics and train-

ing to ROTC students, Lt. Col. Carter stated. From August, 1940, to March 1943, Major Glenn was stationed in the Panama Canal department, with the 5th Infantry. Since 1943, he has been with the Camp Wheeler, Ga., Infantry Replacement Training Center and the Headquarters Replacement School Command at Ft. Bragg, N. C.

Lt. Col. Carter said that the two new officers and an additional one will bring the University military unit to normal peacetime strength.

Col. G. T. Mackenzie, PMS&T and department head, will return to his duties at the University late this month from Ft. Benning, Ga., where he has been taking a refresher training course.

U. K.'s Summer Grid Squad Now Numbers Over 100 Men

"A bevy of bruisers — 101 strong—are reporting to Coach Paul Bryant and his assistants these hot summer afternoons to "try out" for the University of Kentucky's new, streamlined, super-charged, jet-propelled 1946 football team," says a report from Babe Kimbrough, Lexington Herald sports editor.

Making up the Wildeat roster are boys who have just been graduated from high school and former servicemen who have never before "trod the bluegrass," except for about a dozen 1945 U. K. players and former players who have returned from the service.

Bingham Camp Is Dedicated

The Robert Worth Bingham Memorial 4-H Club Camp in Washington county July 17 became headquarters for the service of 26,316 Kentucky farm boys and girls.

The 200-bed camp, formerly the Tatum Springs resort, was bought by the University of Kentucky in 1940 with funds given by Barry Bingham, Louisville newspaper publisher, to establish a memorial to his father, the late Robert Worth Bingham.

Agricultural and educational leaders from throughout the state attended the dedicatory exercises Wednesday.

With Dean Thomas P. Cooper of the University presiding, addresses were made by President H. L. Donovan of the University and Mr. Bingham, and by John Park Jr. of Madison county and Mrs. Joe Burks of Larue county, representing the state organizations of 4-H and Utopia clubs.

A tablet bearing the names of the camp and its donor was unveiled by Barry Bingham Jr. and Worth Bingham, sons of Barry and grandsons of Robert Worth Bingham. Dean Cooper presented to Barry Bingham a citation for distinguished service to 4-H clubs.

Speaking to the 227 boys and girls from 10 counties at the camp this week, Dr. Donovan said the challenge to the present generation included the housing problem, education for all people, outlawing war, and building a better social order.

"Much might be done toward the solution of these problems if there were many camps like the Bingham Memorial camp where boys and girls could assemble

under intelligent directors," he added.

Explaining that a purpose of the camp is to educate boys and girls in leadership within the state, Mr. Bingham declared: "Kentucky's greatest crop is brains." He then emphasized his desire to encourage the development and use of leadership within Kentucky, adding, "We need leadership here at home."

Every farm boy and girl, Mr.

Bingham declared, has the obligation to make the farm and the home a better place to live, and to take part in community life. Building homes and improving farms means a better state, he told the boys and girls.

Stressing the need of more farmers in public life, Mr. Bingham said that of a total of 132 men in the state legislature only 32 were farmers, and of 524 men and women in Congress only 32 are farmers.

VINSON SPEAKING AT UNIVERSITY—Treasury Secretary Fred Vinson is shown here as he addressed University of Kentucky graduates and hundreds of townspeople at University commencement exercises June 7th.

As Secretary of the Treasury, the Honorable Fred M. Vinson of Kentucky and Washington, was invited by President Donovan to address the graduating class of 1946 on June 7 at exercises which were held on the north lawn of the University library. Secretary Vinson graciously accepted and before the appointed time for him to return to his native State for the address he had been nominated by President Truman as Chief Justice of the Supreme Court of the United States. On June 24 he took the oath of office. The occasion was a brilliant one with all the glamour of an inauguration.

Justice Vinson addressed an overflow audience on his visit to Lexington. In point of friends the Justice is a popular man and Kentuckians are loyal to him. Many of the faculty and alumni of the University greeted him personally when he joined the Alumni group for luncheon on the Campus green in front of the College of Engineering, Friday, June 7, at 1 o'clock.

Mr. Vinson received an LL.D from the University of Kentucky in 1944.

Alumni!

Remember the time is now ripe to join the Alumni Association.
Be a Booster!

The University's Alumni

The election of Chauncey Forgey, of Ashland, former president of the Kentucky Press Association, as president of the University of Kentucky Alumni Association, and of James Shropshire as vice president assures the strengthening of the alumni organization which has proved that it is an essential and vital factor in the growth and development of the state's highest institution of learning.

Alumni have counted heavily in the state's life and in the support which the University must have in its football program, presentation of its needs before the governor and legislature and in many other ways.

Miss Helen King, assistant director of publicity, has been elected as secretary of the alumni association to succeed Miss Marguerite McLaughlin, who certainly deserves thanks and credit for the splendid work done by her during the wartime period in which she agreed to serve. The new officers will and should have whole-hearted support of all friends of the University.

Tom Underwood
Lexington Herald

LeRoy Miles Elected By Bankers Group

Members of Group 6, Kentucky Bankers Association, elected LeRoy Miles, of the First National Bank and Trust Company of Lexington, as their president at a meeting Wednesday, June 12, at the Lexington Country Club. Group 6 of the state association includes banks throughout central Kentucky. Mr. Miles was graduated from the University in 1928.

The Gentlemen—

Kyle Whitehead, President Donovan and the stunningly attired lady, whose picture has never appeared in the *Alumnus*, is Mrs. Herman Lee Donovan.

Kyle Whitehead New Republican Publicity Director

Kyle Whitehead, editor of the Harlan Dailey Enterprise for the past four years, has been appointed director of publicity for the Republican party in the State of Kentucky according to an announcement made by Governor Willis on July 18. Mr. Whitehead resigned several weeks ago as editor of the Enterprise and his resignation took effect August 1 when he took up his new duties. He was associated nine years with the Enterprise before becoming editor.

Mr. Whitehead is a native of Wise County, Va., and was gradu-

ated from the University in 1926. He served as instructor in journalism at the University in 1926-27 and then went to Murray State Teachers College where he established a department of journalism. He then became editor of the LaFollette Press, LaFollette, Tenn., where he remained until moving to Harlan. His new offices will be in the McClure building in Frankfort and he and Mrs. Whitehead, formerly Ava J. Cawood also a former student of the University, and their son, Kyle Jr. will move to Frankfort.

Homecoming has been planned for you! Don't miss the fun—October 19.

Stephenson Returns From Greece to Italy

Capt. Everette S. Stephenson, Carlisle, has returned to Italy from Greece, where he was assigned as motor officer of an American Army unit to aid in observing Greek elections.

Captain Stephenson has been overseas 46 months and has two battle participation stars. He has been stationed in Scotland, England, Africa, Sicily, Iran and Italy and was in combat with the First and Third divisions. He is a graduate of the University of Kentucky, 1939, and was an appraiser of the Federal Land Bank of Louisville before entering service.

Future president and former president meet at University June 7. President-elect Sarah Blanding and President Emeritus Frank L. McVey join the luncheon group on graduation day.

Bishop Warns U. K. Graduates To Find Peace

The complex problems involved in maintaining the peace of the world concern the youth of today because "they are the problems of the world into which you are now entering," the 1946 graduating class of the University of Kentucky was told Sunday, June 2, in a baccalaureate sermon delivered by the Rt. Rev. William R. Moody, bishop of the Episcopal Diocese

of Lexington, at Memorial hall.

Bishop Moody said these are not "schoolbook problems, but problems which will enter the very house where you live, and plague you until they are solved."

Dr. H. L. Donovan, University president, presided at the baccalaureate exercises and Dr. T. C. Ecton, pastor of Calvary Baptist church, gave the invocation, Scripture reading and benediction. University Choristers, under the direction of Miss Mildred S. Lewis, sang, and Mrs. Lela W. Cullis played the organ prelude and postlude.

"I believe that we should organize this nation for peace with the completeness, and the determination, and even with the ruthlessness with which we organized it for war," Bishop Moody declared.

"The whole social problem in America is vast, and vexed, and complex; yet to find a solution—not perfect, perhaps, but at least workable—is basic to our peace," he asserted. "We can not maintain our industrial power—which is our security—unless and until we learn how to organize and to settle our social power."

"No matter how urgent, no matter how desperately necessary the art and skill of war at times may be, war is not our real business—not our great urgency," he said. "Peace is our business, and peace is our greatest urgency."

He pointed out that both Germany and Japan were organized for total war and that the United States was organized for peace, but "our organization proved to be more powerful, more flexible and, when aroused, more terrible than theirs."

"Peace is the real business of mankind," he continued, "the only business with hope in it. War is the art of destruction. Peace should be the art of construction. And when it is not that, it is not peace."

T. B. Group Elects Dinning

J. Donald Dinning, Anchorage, was named president of the Louisville Tuberculosis Association yesterday. He succeeds Morton Boyd, Prospect, who has served for the past two years.

Mr. Dinning was graduated from the University in 1921.

Air Medal for Captain Spears

Capt. Lawrence E. Spears, special service and physical training officer of the 349th Troop Carrier Group, received the Air Medal for meritorious achievement in aerial flight from Col. Leonard J. Barrow, Jr., commanding officer of the Group. Captain Spears was graduated from the University of Kentucky in 1940. His wife, formerly Ursula Marshall, also attended the University. Their home is in Covington, Ky. He was cited for action Nov. 7-8, 1942.

Kuhn of Michigan In Public Relations Office

Kenneth L. Kuhn of Haslett, Michigan, has been appointed News Editor in the Department of Public Relations of the University. Mr. Kuhn did his work in Journalism at Michigan State College and was an assistant in public relations there before coming to Kentucky on July 1. He was a reporter on the Michigan State News and was in charge of the Lancing news bureau of the United Press. During the War he served in the Information and Education Branch of the Army.

U. K. One of 16 Schools in Nation Named to Train Clinical Psychologists

The University of Kentucky is one of only 16 schools in the nation which have been named to train clinical psychologists for a new program of the Veterans' Administration, according to an announcement made by Dr. Paul P. Boyd, dean of the University's College of Arts and Sciences.

Selection of the University of Kentucky was made by the American Psychological Association, Dean Boyd said. Veterans' Administration officials recently inaugurated this program to obtain expert clinical psychologists for the agency's neuro-psychiatric hospitals. The national psychological association was asked to designate schools qualified to give complete training in the profession.

Dr. M. M. White, head of the University's psychology department went to Washington, D. C., June 10 to meet with representatives from the other approved schools and to work out final details of the cooperative program.

Designed primarily to benefit veterans, the plan will allow on-the-job training payments to those trainees enrolled under the G.I. Bill or Public Law 16. In addition, the VA will pay for the part-time work required in veterans hospitals where neuro-psychiatric cases are treated.

Candidates for the program must have received a bachelor's degree from a recognized college or university and must have taken certain required courses, Dean Boyd said. They will be under the direction of the psychology department, and if qualified, will receive the doctorate of psychology at the end of four years.

Woodson D. Scott Returns To New York Firm

Lt. Col. Woodson D. Scott of Lexington reverted to inactive duty status as a Reserve Officer on January 2, 1946, and has resumed his law practice with the firm of Lord, Day and Lord in New York City.

Colonel Scott was ordered to active duty on February 13, 1942, and was stationed at the Infantry School at Fort Benning until June 1943 as instructor in tactics. From June 1943 until he was dismissed from the service he was assigned to the 406th Infantry Regiment 102nd Infantry Division, Camp Maxey, Texas and overseas from September 1944 to October 1945. He was wounded in action twice. The first injury was received at Immerdorf, Germany, November 17, 1944 and the second at Rheinhausen, Germany, March 13, 1945. He was decorated with the Purple Heart, the Bronze Star Medal, Silver Star Medal, Russian Order of Alexander Nevsky and the British Distinguished Service Order. He was battalion Commander 1st Battalion 406th Infantry in Rhineland and Central Europe campaigns.

U. K. Students Come From Far And Near

All but one of Kentucky's 120 counties, 30 other states, the District of Columbia, two U. S. territories, and five foreign countries were represented in the University of Kentucky's first summer term enrollment totaling 3,464 students.

An all-time record for this period, the present number exceeds that for a similar period last year by nearly 2,000, and includes a record 2,257 veterans, composing approximately 65 per cent of the total enrollment.

Fayette county again leads the list with a total of 709 students in attendance and also shows the greatest increase over 1945 enrollment with 476 additional enrollments. Second highest is Jefferson county with 197 students, and Franklin county is third with 83. Lyon county is the only Kentucky county not represented.

Leading the out-of-state enrollment are Ohio and West Virginia with 71 and 70 students, respectively. New York state is third with 43.

Foreign students in attendance are from the following countries: Argentina, Canada, Costa Rica, Cuba and Palestine. Hawaii and the Panama Canal Zone are the U. S. territories represented.

Serves in Europe

Capt. Robert N. Welch, son of Mr. and Mrs. S. P. Welch, Cedar Grove farm, Route 5, has been serving in the European theater almost two years. Before entering the service in February, 1942, Capt. Welch attended the University of Kentucky and Louisiana State, where he received B. S. and M. S. degrees in geology. He plans to return to the states upon completion of 30 months overseas duty.

Capt. Alford Gets Commendation Ribbon

Capt. Coleman E. Alford, of Lexington, was awarded the Army Commendation Ribbon Wednesday at Fort Knox. Captain Alford, who has been alerted for shipment overseas, was given the award for meritorious service as officer in charge of the Post Photographic Laboratory and Film Library. Captain Alford was graduated from the University of Kentucky in 1934. Before entering the Army in 1941, he taught at Henry Clay High school and Morton Junior High school for eight years.

Carl Allen On Extension Service

Carl W. Allen, a graduate of the College of Agriculture in 1939 who received his M. S. degree in 1941 is now residing in Benton, Ky. with his family. Mrs. Allen, who was graduated in 1940, was before her marriage Miss Marian Huebler.

Mr. Allen has completed his terminal leave after serving 4½ years with the Army Air Forces. He had the rank of Lieutenant Colonel when he was relieved from duty. His last assignment was assistant adjutant general of the Twentieth Air Force with headquarters on Guam. He is now with the Extension Service working on Land Use and Readjustment in connection with T. V. A. owned land adjacent to the Kentucky Reservoir on the Tennessee River up stream from the Gilbertville dam.

Miss Gifford Elected President of Federation

Miss Chloe Gifford, assistant director of University Extension and secretary of the Woman's Club Service, was elected president of the Kentucky Federation of Women's Club at the closing session of the annual meeting of the Federation delegates in Lexington May 23.

Miss Gifford received her LL.B degree from the University in 1923; an A.B. in 1924 and an M.A. in 1944. She has just completed a term as second vice-president of the K.F.W.C. and has been chairman of the Education Department and also of the Bureau of Information of K.F.W.C. She has served four years as Governor of the Sixth District of K.F.W.C. and was chairman of the Board of Governors. She is president of the Kentucky Division of the American Association of University Women; Chairman of Fellowships for the Southeast Central Region of AAUW; member of the Lexington Council of Girl Scouts, of the Lexington Altrusa Club, of the Women's Club of the University and past president of the Woman's Club of Central Kentucky.

Col. Mackenzie Receives Italian Valor Cross

Col. G. T. Mackenzie, professor of military science and tactics at the University of Kentucky, has received the Italian Military Valor Cross for his services in the Italian campaign in World War II. The University officer was attached to the Second Corps, Fifth Army, and has five bronze service stars for battles in Africa, Sicily and Italy.

PROF. J. W. MARTIN

James W. Martin, Director of the University's Bureau of Business Research, assumed the Presidency of the National Tax Association on July 6.

Early in June at its annual conference at Chicago attended by some 750 members, Mr. Martin was elected to head the Association. Under the by-laws of the Association the president assumes office a month following the date on which the conference adjourns.

The tax organization's new president has served in various capacities as a professional tax investigator. He was formerly Kentucky Commissioner of Revenue and, as such, was responsible for the organization of the state revenue administration following the 1936 legislation. More recently he has been consultant to Colorado, Missouri, Ohio, Illinois, Alabama, and such federal agencies as the Board of Investigation and Research under the Transportation Act of 1940, the Division of Governments of the Bureau of the Census, the Civil Aeronautics

Board, and the Treasury Department.

He wrote two books recently published by the University of Kentucky Press, "Southern State and Local Finance Trends and the War" and, with the collaboration of Miss Vera Briscoe, "The Kentucky State Budget System."

Professor Martin has served as vice-president and as president of the Kentucky Academy of Social Sciences, the Southern Economic Association, the international Tax Research Foundation; and he is currently President of the Tax Institute, the second active national tax society of the United States.

The National Tax Association is a society which includes among its members numerous commercial and industrial corporation executives, tax attorneys, tax accountants, government tax officials and employees, and university and other professional tax students. The Association publishes an annual volume of proceedings and a monthly journal devoted to the financial problems of government.

Richard F. Arnsperger Joins Insurance Firm

Richard F. Arnsperger has joined the firm of R. Arnsperger, 120 North Upper street, and is the third-generation Arnsperger to enter the insurance business in Lexington. The firm, which has been in its present location for 25 years, is operated by his father, Rodes Arnsperger, and was founded in 1872 by his grandfather, Richard Arnsperger.

Young Arnsperger, a former student at the University of Kentucky was released recently from the Army with the rank of first lieutenant. He served 26 months in the European theater of war.

Honors Guy Huguelet Sigma Nu Fraternity

Guy A. Huguelet, class of 1914, president of Southeastern Greyhound Lines, was presented with a plaque in recognition of his selection as the outstanding Sigma Nu alumnus of 1946 at the fraternity's dinner May 31 at the Phoenix hotel.

The presentation, Lance Trigg of Glasgow, president of the University of Kentucky chapter, said marked the inauguration of an annual chapter award to the outstanding alumnus of the year.

James Brown of Durent, Miss., who acted as toastmaster at the dinner, presented the award to Mr. Huguelet and also presented Miss Barbara Allen of Louisville, member of Alpha Delta Pi sorority who was chosen Sigma Nu Girl.

Lt. Wilson Commended For Work in Smashing Dope Ring in Hawaii

First Lt. William A. Wilson of the Marine Corps, son of Mr. and Mrs. W. C. Wilson, 145 Kentucky Avenue, has been commended by federal narcotic authorities for his work in smashing a dope ring in Honolulu, his parents learned Monday.

Lt. Wilson, who is commanding officer of a military-police detachment in Honolulu, was credited in the commendation with playing "a large part in formulating the plans and methods used in this investigation and was at all times, in fact, the driving force behind the entire case."

The commendation, sent by the Bureau of Narcotics in Honolulu to the commandant of the Marine Corps further stated:

"From April 30, 1946, until

May 13, 1946, when this case was successfully brought to a close with the crushing of the narcotics ring in Honolulu and the apprehension of key personnel of the ring, Lt. Wilson displayed outstanding qualities of leadership and initiative."

This commendation was the third received by Lt. Wilson, the first having been for meritorious service in the line of duty on Guam and the second for work in solving a grand-larceny case at Pearl Harbor.

Lt. Wilson, who was graduated from the University of Kentucky in 1943, now holds a permanent commission in the Marine Corps and has passed the following courses given by the training school of the Honolulu police department: Criminal law and police procedures, criminal identification, report writing, traffic-accident investigation and court procedure and demeanor.

Lt. Wilson's parents were both graduated in 1913. His mother was formerly Miss Lucile Gastineau.

Niess Appointed To U. K. Faculty

Dr. Robert J. Niess, former member of the faculties of Washington University, St. Louis, and Mundelein College, Chicago, has been appointed associate professor in the Department of Romance Languages, University of Kentucky, Prof. Hobart Ryland, head of the department, announced June 10.

Dr. Niess, who served four years in the Army Air Forces during World War II, was discharged with the rank of major. During his Army service, he spent two years teaching French and Spanish.

Harold Maines Receives Award

With the 1562d Engineer Depot Co. on Leyte—Cpl. Harold "Nip" Maines, has recently been awarded the Philippines Liberation Ribbon with one campaign star by the Philippines Government for his participation in the Leyte Campaign.

In addition to this ribbon, Cpl. Maines has been awarded the Asiatic-Pacific Theater ribbon with one battle star and the Good Conduct Medal.

With fifteen months in the service and six months of that time served in the Philippines, Cpl. Maines has served in various branches of the Army prior to joining his present organization. Among these were the Ordnance at Aberdeen, Md., and the Engineers at Fort Belvoir, Virginia.

A graduate of Berry High School and later attending the University of Kentucky, Cpl. Maines was employed by the Sheffield Corp, Dayton, Ohio as a precision gage maker when he was inducted into the Army on March 11, 1944, at Fort Thomas, Ky.

A brother, F2/c Elwood is now serving with the Navy somewhere in the Southwest Pacific area.

Alumnus to Minnesota

Dr. and Mrs. William N. Lipscomb Jr., of Pasadena, Calif., are spending several weeks with his parents at 39 Mentelle park, Lexington. Dr. Lipscomb recently received his Ph.D. degree in chemistry from the California Institute of Technology and has been appointed assistant professor of physical chemistry at the University of Minnesota. He was graduated in 1941 from the University of Kentucky.

Dr. Jeffrey Accepts Post In West Africa

Dr. R. N. Jeffrey, who has been engaged in tobacco-curing research at the University of Kentucky Experiment Station, has accepted a position with the Firestone Plantation Company in Liberia, West Africa.

Dr. Jeffrey, who is past president of the Lexington section, American Chemical Society, will be engaged in bio-chemical research work with the Firestone Company, carrying on experiments to determine changes which take place in rubber-plant juice.

A member of the University staff for the past 10 years, he is a graduate of the University of California and holds a Ph.D. degree from the University of Minnesota.

Mrs. Jeffrey, who has been head of the chemistry department at Transylvania for four years, will resign to accompany her husband. She received her bachelor and doctor degrees at Minnesota.

U. K. Married Vets "Village" Will House 1500 by Next Fall

Cooperstown, the University of Kentucky's village for married veterans and the largest project of its kind in the United States, will house 1,500 citizens by next fall, according to estimates from University authorities.

Conceived when it became apparent last fall that a large scale housing program was necessary to care for some of the married veterans desiring to enter the University of Kentucky, the University authorities obtained housing units through the Federal Housing Administration from the war plant towns of Charlestown, Ind., and Willow Run, Mich., and carted them to Lexington by truck.

Streets had to be laid, electric service installed, houses set on posts, utilities connections made and other operations performed before the first units could be occupied.

This little town of prefabricated homes, erected on the University's Experiment Station farm, has 324 housing units, 132 of which are occupied now. Eventually it will have 404 units. Rental fees, set by the FHA, range from \$26.50 to \$37.50 per month, depending on the income of the tenant. Rents are calculated to provide sufficient income to meet operating and maintenance expenses and costs of amortization of the building debt.

Residents of Cooperstown, which was named for Dean Thomas P. Cooper, dean of the College of Agriculture and Home Economics and Director of the Experiment Station, have a town council, which serves as intermediary between residents of the veterans' community and the University committee on housing veterans. A graduate student resident publishes a semi-monthly news-sheet and is a strong booster of Cooperstown.

Penrod Joins U. K. Engineering Staff

Estel B. Penrod has assumed duties as head of the Department of Mechanical Engineering at the University of Kentucky.

Penrod has B. S., M. E. and M. S. degrees from Purdue and a master of mechanical engineering degree from Cornell University.

He has instructed in physics at Purdue and Western Reserve University and was head of the Department of Physics at Hillsdale College in Michigan from 1924 to 1942.

Black Joins Merrill Lynch

Assignment of William R. Black, formerly of Paducah to the Louisville office of Merrill Lynch, Pierce, Fenner & Beane as an account executive was announced June 23 by William J. Conliffe, manager of the Louisville office.

Black recently completed 325 hours of intensive classroom work in the company's investment training school in New York, being among the first 23 men to graduate. He majored in mathematical science at the University of Kentucky, receiving his degree in 1942. Black served three years in the Army, leaving the service in November, 1945.

"Few young men have entered the investment business in the last 15 years," Conliffe said, "because of the depression and the war. Our firm has felt this lack, and the training school was our answer."

Conliffe said the 23 graduates of the school averaged 97 per cent in the New York Stock Exchange examination they recently took, which he termed "a truly remarkable record."

Clements Graduates

Philip L. Clements, son of Mr. and Mrs. Phil Clements, 702 Bullock avenue, was graduated from the United States Military Academy at West Point on June 4. He attended Henry Clay high school, Kavanaugh Preparatory school and the University of Kentucky before going to West Point on an appointment from Congressman Virgil Chapman. Upon graduation, he was commissioned in the Army Air Forces.

Charles E. Tucker Directs Cancer Study

Charles E. Tucker, who was graduated from the University in 1932 and received a masters degree in Science in 1934 and also added a master of science degree in public health in 1943, is educational director for the Kentucky division of the American Cancer Society and under his leadership courses in the study of cancer are being offered in the State.

Though the classes were arranged primarily to give cancer education to teachers, nurses and members of the Field Army others who will desire to attend may do so.

Nazareth College in Louisville was the first to offer the course.

Star Awarded Posthumously

A Silver Star medal awarded posthumously to Maj. Spencer E. Mattingly Jr. of Versailles was presented to his widow, Mrs. Priscilla Smallman Mattingly of Boston, at ceremonies June 10 in the office of Dr. Herman L. Donovan, president of the University of Kentucky.

Col. G. T. Mackenzie of the University military staff made the presentation, and Lt. Joseph P. Rose, also of the military staff, read the citation which accompanied the medal.

The medal was awarded to Major Mattingly for gallantry in action near Luxembourg on Jan. 24, 1945, in an engagement in which he was wounded fatally.

"While attacking an enemy force in the vicinity of Luxembourg Major Mattingly, Third Battalion executive officer, discovered that during the advance

through a wooded area, contact with the battalion on the left had been lost," the citation stated. "He also observed that strong enemy forces near a road junction threatened the exposed flank of the leading rifle elements of his battalion with direct rifle and automatic weapons fire. Thereupon with utter disregard for personal safety, and under continuous enemy machine gun, sniper, mortar and intermittent artillery fire, Major Mattingly personally led a small group from his battalion against the enemy strongpoint at the road section and with the support of mortar fire, which he personally adjusted, the strong enemy threat to his leading elements was destroyed."

The citation stated that Major Mattingly made his way over terrain which had not been cleared of the enemy and personally established contact with the battalion on his left flank. While returning to his post, he was wounded fatally.

Major Mattingly, a former University student, went into service in 1940.

Members of the family who attended the presentation ceremonies were Major Mattingly's wife; their daughter, Priscilla Dianne Mattingly, two and a half years old; his parents, Mr. and Mrs. Spencer E. Mattingly Sr., Versailles, and two brothers, First Lt. Gayle B. Mattingly, who has served four years as a navigator with the Army Air Forces, and First Lt. Dudley W. Mattingly, who has served four years with the Medical Corps.

Clubs

More and more Alumni of Kentucky organizations will strengthen the Association. Write to the Secretary for plans and speakers.

Dimmick Returns

Dr. G. B. Dimmick, director of the Child Guidance Service here who has recently returned from Army duty in Europe and resumed his work with the service, was principal speaker at a luncheon meeting of the board of directors June 10 at the Lafayette hotel.

A professor of psychology at the University of Kentucky, Dr. Dimmick has been on leave approximately a year and rejoined the faculty at the beginning of the first summer term.

Jack Bryan, chairman of the board, presided at the meeting at which reports of work done during the month were made. It was announced that Miss Judith Key, who has been acting director of the service during Dr. Dimmick's absence, will resume her regular work with the group.

Lt. Colonel Johnston

J. Pelham Johnston, Lexington, a graduate of the University in 1939, was elected commander of the Fourth district of the Veterans of Foreign Wars at the June 2 meeting of the representatives of the 15 VFW posts, at the City Hall in Lexington.

Mr. Johnston is a member of the Henry A. Lucas Post. He was separated from the Army with the title of lieutenant colonel and he served overseas 39 months in the American theatre at Trinidad and in the China-India-Burma theatre. He was installed at the Kentucky department convention held at Owensboro, June 14-16, and will hold the office for a two year term. Colonel Johnston is a son of the late J. Pelham Johnston who was also an alumnus of the University, class of 1900.

Major H. C. Cox Returned

Maj. Henry C. Cox, on terminal leave from the Army, has returned to Lancaster after serving in the armed forces since the spring of 1942.

Major Cox, co-publisher of The Central Record with Paul F. Morrow, John McRoberts and Clayton Morrow, is editor-in-chief of the weekly newspaper.

He announced today that he was ready to assume his law practice and will assume the duties of his office as county attorney, to which he was re-elected, unopposed, last November. During his absence from Garrard county, H. Clay Kauffman has been acting county attorney.

Sageser Kash, Garrard county correspondent for the Lexington Herald, who has been managing editor of The Record since Jan. 1, will continue in this capacity.

W. F. Scott Returns to 69th Reconnaissance Group

Captain William F. Scott returned recently to the 69th Reconnaissance Group from the Command and General Staff School, Fort Leavenworth, Kansas.

The airman, a native of Kentucky, is an Operations Officer in Group Headquarters with duties as Plans and Training Officer. The flyer, who has over 1000 flying hours, is responsible that personnel are receiving the proper schooling and that AAF Training directives pertaining to the photo P-51 "Mustangs" and A-26 "Invaders" are complied with. He is a graduate of the U. S. Military Academy, West Point, class of 1943, as a Bachelor of Science. He served in the 8th Air Force from April 1944 to June 1945. While

in Europe, he flew B-17 bombers which blasted the Nazis in France and Germany. Later he became Assistant Group Operations Officer of the 398th Bomb Group, which brought him the promotion to Captain on August 7, 1944. His combat tour closed with these awards being presented: Distinguished Flying Cross, Air Medal with 4 Oak Leaf Clusters. In addition, he wears the ETO ribbon with 6 Battle Stars, American Theater, American Defense, and World War II Victory Medal.

The aviator attended the University of Kentucky, Lexington, from 1938-1940, leaving there to attend the Cadet School.

Lewis Is Attorney For Slaughters Committee

Joseph C. Lewis, young Lexington attorney who recently returned from service in North Africa, Italy, Corsica, and Austria in the United States Army and the criminal investigations division, has been named as attorney for the Slaughters Committee to Investigate War Assets of Surplus Property for the U. S. government.

The Slaughters Committee is a committee of Congress named to investigate the sale of surplus property left over from the war.

Mr. Lewis has been assigned to organize the investigators and his headquarters will be in Washington, D. C., and his duties will carry him throughout the United States on organization that is required.

Mr. Lewis is a graduate of the University of Kentucky College of Law. Mr. Lewis served in the infantry but was transferred while overseas to the investigations division and conducted numerous investigations for the Army.

Major Jack W. Hoover Receives Army Discharge

Major Jack W. Hoover, a graduate of the University in 1938, was separated from the service about May 10 and now holds the following World War II ribbons; American Defense, American Theatre and World War II. He expects soon to return to his position with the International Business Machine Corporation.

World War II Service began as 2nd Lieutenant on 1 October 1946. Initial assignment was at the Ordnance School, Aberdeen Proving Grounds, Maryland, with the U. S. Army Ordnance Department. On 4 January 1946, was transferred to the Hoosier Ordnance Plant, Charlestown, Indiana. At this station, was assigned Acting Quartermaster and Property Officer for the construction and operation of this bag-loading ammunition (smokeless powder) plant. Was promoted to 1st Lieutenant 16 June 1941. Was advanced to Captain during August 1942. Completed Emergency Defense Training Course at University of Louisville 16 May 1941.

During August 1942, was transferred to the Portage Ordnance Depot, Ravenna, Ohio. An assignment as Assistant Magazine Officer was received at this ammunition storage installation.

On 14 December 1942 was transferred to the Lordstown Ordnance Depot, Warren, Ohio. Assignment to this general supply installation included Machine Records Officer, Supply Property Officer, Transportation Officer, Fiscal Officer, Property Disposal Officer, Warehouse and Supply Inspection Officer. At the present time the writer has the position of Stock Control Officer. On 7 November 1944, was promoted to Major.

Star Aviator

The June edition of Southern Coach and Athlete published and All-Time All-Southern Track Team on which was mentioned Dave Rogan of the University of Kentucky who ran the mile in 4.16.3 and the 800 yard in 1.54.

Dave Rogan of Middlesboro spent about three years overseas and returned to the States with the rank of Captain to act as instructor in flying. He is a Life Member of the Alumni Association. He enlisted with the Canadian Air Forces and later after going abroad was transferred to the Royal Air Force. He was in the raid over Dieppe and was wounded and awarded with the Purple Heart. After returning to the States he was decorated with the Distinguished Flying Cross, two Oak Leaf Clusters and the Air Medal.

The All-Time All-Southern Track and Field Team has been picked for two reasons; one was to honor those track and field men who have so ably represented the South over the world and secondly to refute the statements that the South does not produce track and field men that compare favorably

with those in other sections of the Country.

Earl McGuffey Returns To Active Army Duty

Erle McGuffey, assistant United States district attorney here since December, 1944, left July 5 for Camp Kilmer, N. J., where he will be given a special assignment for legal work with the Army in Europe. He will be on military leave from the attorney's office during his overseas work.

Mr. McGuffey, who held the rank of colonel when placed on inactive status in 1944, served as judge advocate for the Ninth Air Force in Egypt, Sicily and France. His work with the Army of Occupation will be similar to the services he performed as judge advocate, he said today, although he has not received a definite assignment of duties or location. He will return to active status with his former rank.

As soon as Col. McGuffey receives a permanent assignment, Mrs. McGuffey, who now resides at 101 Shady Lane, will go to Europe and will remain during his stay there.

University Man Named To National Board

Prof. Walter Allen Price, head of the University of Kentucky entomology department, has been elected for a three-year term as one of two representatives from the Central States Plant Board to the National Plant Board. He has served as chairman of the uniform regulations committee of the board this year and for several years has been a member of various standing committees of the central group.

14 U. K. Men

Of the 84 men named from Kentucky for regular officers in the Army former University students included:

First Lieutenant Basil L. Baker, of Lexington.

First Lieutenant David A. Brown, Jr., of Lexington.

First Lieutenant Robert L. Rowan, of Lexington.

First Lieutenant Albert L. Betz, of Lexington.

First Lieutenant Austin Triplett, of Lexington.

Second Lieutenant Harold W. Brown, of Paducah.

First Lieutenant Smylie C. Stark, of Franklin.

First Lieutenant Gerald W. Johnson, of Owenton.

First Lieutenant Wallace E. Jarboe, of Glen Dean.

First Lieutenant Ernest L. Janes, of Sharpsburg.

Captain William S. Conley, of Carlisle.

First Lieutenant Byrne A. Evans, of Russellville.

First Lieutenant William J. Meng, of North Middletown.

First Lieutenant John I. Saad, of Pikeville.

Dr. Blanding Named On School Committee

Dr. Sarah G. Blanding, president-elect of Vassar College, has been named a member of a 25 person committee to consider establishment of a state university in New York. The committee was appointed by Gov. Thomas E. Dewey. Dr. Blanding, dean of Cornell University's College of Home Economics and former dean of women at the University of Kentucky, will be installed as Vassar president Oct. 11.

Lt. Col. William L. Tudor

Lt. Col. William L. Tudor, of Lexington, a graduate in the College of Commerce, University of Kentucky, in 1940, has been appointed by presidential commission to the regular Army Air Forces. The appointment was confirmed by the Senate.

Lt. Col. Tudor attended Lexington public schools and was graduated from Henry Clay high school in 1936. While a student at the University he was editor of the Senior Yearbook, a member of Omicron Delta Kappa, Delta Tau Delta social fraternity and was president of the Men's Student Council. He has spent six years in the Air Forces as pilot.

Hendry On Leave

Wickliffe B. Hendry of Holt, Ky., who was graduated from the University in 1939, was placed on terminal leave March 23 and has reverted to a Reserve Status with the Army. At the present time he is concentrating on work leading to an M.S. degree in Mechanical Engineering at the University of Minnesota. The work will be completed this year. Mr. Hendry is an active member of the Alumni Association.

Dr. Allen on WOWO "A" Award For Kenyon

Dr. William Ray Allen, professor of zoology at the University of Kentucky and a graduate of Indiana University and native of Ossian, Ind., was presented in a radio program over Station WOWO, Ft. Wayne, on July 16, sponsored by Indiana University and featuring prominent alumni of that institution.

The title of the program series is "Indiana in Science and Invention," and the one featuring Dr. Allen sketched his life and achievements in his professional field from his undergraduate days at Indiana University up to the present time.

Dean Taylor On N. E. A. Board

Dr. William S. Taylor, dean of the University of Kentucky College of Education and graduate of the University in the class of 1912, has been named to the executive committee of the National Education Association. The election carries a three-year term of office.

The members of the executive committee of the NEA are responsible for carrying on the work of America's teachers between the summer meetings of the organization.

Combs Assigned To Switzerland

I. Newton Combs Jr., of Lexington, sailed recently for Switzerland where he will fill the position of Administrative Assistant to U. S. Treasury Representative in Bern, Switzerland.

Mr. Combs was graduated from the University in 1935.

J. B. Kenyon, dean of men at Asbury College, received the first "A" award ever given by Asbury Alumni Association. The association inaugurated the letter "A" idea last year and presented it for the first time at the 1946 commencement. The award was made on the basis of being a graduate of the college, an outstanding worker, having contributed something definite in life and of being a true representative of the ideals of the college.

Dean Kenyon, a native of Iowa, completed his early education in Iowa and North Dakota. After his graduation from Asbury he did graduate work in Columbia University and the University of Kentucky from the latter of which he received the M.A. degree in 1926. He continued his graduate work for two more years. He began teaching in 1913 and with the exception of three years when he was dean of the college at Union College, he has been teaching at his alma mater. He is one of the most popular teachers on the campus of Asbury.

Vets' Administration Opens Office At U.K.

The Veterans Administration June 5 opened on the University of Kentucky campus a part-time "contact office" for the convenience of the 2,000 veterans who are attending the school. Ray M. Stewart, VA contact representative, will be at the office from 8:30 a. m. to 4 p. m. each Wednesday to confer with students who need advice or help concerning veterans' legislation and benefits. The office is located in the Administration building.

ALUMNI OBITUARIES

Allen W. Gullion

Major General Allen W. Gullion, a native of Carrollton, Ky., who was the wartime provost marshal general of the United States Army, died June 19 in Washington. General Gullion was a guest of his son, Captain Allen W. Gullion Jr., in the latter's apartment and was listening to a broadcast of the Louis-Conn fight when his death occurred. He had been ill since December, 1944, and he retired from active duty January 1, 1945.

Funeral services were held June 23 at the home of his brother Carroll Gullion in New Castle, Kentucky, the immediate family alone being present, and as the distinguished soldier had requested his ashes were sprinkled in a small grave in the family lot in New Castle and was mingled with the earth of Henry County. The burial services were limited to two hymns and a prayer.

Major General Gullion is survived by his sons, Captain Allen W. Gullion Jr., Edmund Gullion and Philip Gullion; two daughters, Mrs. Fred Simpick of Honolulu and Mrs. Thomas Moorman of Langley Field, Virginia, and his brother.

Tom Underwood wrote:

"In the death of Major General Allen W. Gullion one of the highest ranking officers from Kentucky in the past World War and a forceful figure in determining the military policy of this country, especially in regard to war and crimes and punishment, passes.

General Gullion served with General John J. Pershing in Mexico and later was judge advocate of the Third Corps in France and Germany in the first World War. He was the head of the civil affairs section of the Allied Supreme Headquarters in Europe in the second World War.

"Following World War I, General Gullion was named by the War Department as this nation's representative at the international conference of 47 nations to formulate the Geneva convention governing prisoners of war.

"The steps that were taken following the first World War were not on as large a scale as those following a second World War, but General Gullion foresaw their importance and his studies and careful preparations in connection with war prisoners, especially those of this country captured by the enemy, resulted in lessening their hazards, sacrifices and hardships.

"As provost marshal general of the United States Army, General Gullion was confronted with a task of major importance. Under his general direction one of the greatest programs of mobilization, training and organization in any branch of the armed services was undertaken. It included the large field of military government that played so important a part in the recent war and also the organization of the MP's, who in the first World War despite the good personal services of the men employed in that service did not gain the recognition for training, competence and efficiency that was so clearly noted in World War II.

"For his services in mobilizing this great program and bringing it into being and execution, Gen-

eral Gullion was awarded the Distinguished Service Medal.

"General Gullion, having seen close range the steps taken following the first World War, planned for the mistakes not to be repeated after the second one. Illness prevented a more effective hand being taken by him, personally, but in this planning he rendered outstanding service to his country.

Robert Hiner Winn

Judge Robert Hiner Winn, 75, prominent lawyer and former judge of the Kentucky Court of Appeals, died May 17 at Mary Chiles hospital in Mt. Sterling. He had been ill four weeks.

Judge Winn received a Doctor of Laws degree from the University in 1912. He was president of the Kentucky State Bar Association in 1912 and 1913 and was a member and organizer of the American Law Institute.

Judge Winn served from 1920 to 1924 as a member of the Kentucky State Board of Control of Penal and Charitable Institutions. He was permanent chairman of the Republican general state convention in 1931, and in 1932 he was appointed by President Herbert Hoover as a member of Perry's Victory Memorial Commission. He was a member of the Kentucky State Commission for admission to the bar from 1920 to 1923.

Survivors include his wife, Mrs. Elizabeth Turney Winn; a sister, Mrs. Nellie Winn Lipscomb, Nashville, Tenn., and a brother, Pierce Winn, Mt. Sterling.

Funeral services were held May 18 at the grave in Machpelah cemetery with the Rev. Harold Williamson, pastor of the Episcopal church, officiating.

Arch Logan Hamilton

Arch Logan Hamilton, 65, died June 16 at his home, Hillcrest, on the Bates Creek Pike in Fayette County, Ky.

A member of the Senate from 1923 to 1931, Senator Hamilton was author of the first voting-machine bill and when the machines later were adopted in 1942 he persuaded Fayette County to employ them.

While in the Senate, Senator Hamilton was recognized as a strong advocate of the primary-election method of choosing party candidates, and was known as a supporter of the racing industry in the state and of the University of Kentucky. He also aided in passing the present law regulating and limiting activities of loan firms.

Senator Hamilton began his political career in 1916, when he was elected representative from Fayette county. While in the House he backed legislation establishing the moon-light schools in eastern Kentucky.

He was elected to the Senate in 1923, and was re-elected in 1927.

Until it was sold, Senator Hamilton served as head of the Bradley-Gilbert Company, Louisville printing firm. He was owner of Kirklevington Stud on the Bates Creek pike, which he leased to R. T. Wilson, who was president of Saratoga Racing Association.

A native of Clark county, Senator Hamilton was a son of the late Archibald Logan and Emma Van Meter Hamilton and had been a resident of Fayette county since he was a boy. He was educated first in private schools in Central Kentucky, attended the University of Kentucky and was grad-

uated in law from Yale University.

He was a 32nd-degree Mason and was a member of Episcopal Church of the Good Shepherd.

Senator Hamilton is survived by his wife, Mrs. Edna Gilbert Hamilton, Fayette county; two daughters, Mrs. Boyd Bailey, Bath, Maine, and Mrs. Charles R. Lowery, Brunswick, Maine; a sister, Miss Amelia M. Hamilton, Lexington, and three grandchildren, Philip Gilbert Bailey and Anne Hamilton Bailey, Bath, Maine, and James George Lowery, Brunswick, Maine.

The body was removed to W. R. Milward mortuary chapel, where services were held June 18, the Rev. David Cartwright Clark, rector of the Church of the Good Shepherd, officiating. Private burial services were in the Lexington cemetery.

Tom S. Hawkins

Tom S. Hawkins, 74, of 103 West High street, a retired grocer, died at Good Samaritan hospital June 3 after a long illness. He was a son of the late Col. Thomas and Mary Spurr Hawkins of Fayette county.

He was educated in the public schools of Fayette county and attended the University of Kentucky. He taught agriculture at the University for six years and was a grandson of Dr. Richard Spurr.

Survivors include his wife, Mrs. Emma Baker Hawkins; one sister, Mrs. Frank Bancroft, Louisville; two nieces, Misses Jewell and Thelma Bancroft, and one nephew, Lyle Bancroft, all of Louisville.

The body was removed to Kerr Brothers funeral home where it remained until time for services. The Rev. Orval Morgan, pastor of Broadway Christian church officiated and burial was in the Lexington cemetery.

Scott Graves

Clarence Scott Graves, 82, associated with the laundry business in Lexington for many years before his retirement in 1935, died June 9 at his residence, 242 Arlington avenue, following an illness of several months.

A native of Fayette county, Mr. Graves was born on the old Graves farm, which is now a part of Walnut Hall Farm, and he was a son of the late Col. John R. and Mary E. Tarleton Graves. He was educated in Lexington private schools and was graduated from the University of Kentucky in 1884, being valedictorian of his class and also captain of the school's military unit. He was a Life Member of the Alumni Association.

Following his schooling he entered the laundry business with the Lexington Laundry Company and served as manager until 1902, when he entered the motion-picture business. He operated the Princess theater at 273 West Main street until 1914. During World War I he was engaged in the coal business with Harry E. Bullock and after the war returned to the laundry business, first with the Lexington laundry and then with Croppers laundry until his retirement in 1935. He was a member of the first Baptist church.

Survivors include his wife, Mrs. Cora Marshall Graves; a daughter, Mrs. John Brockway Nelson, Princeton, N. J.; a brother, Claude R. Graves, Lexington; four grandchildren, John Brockway Nelson III, Marshall Nelson, Sally Nelson and Mary E. Nelson, all of Princeton, N. J., and a niece, Mrs. Fred Shuhart, Lexington.

Services were held at the W. R. Milward mortuary chapel. The Rev. Leslie R. Smith officiated and interment was in Lexington cemetery.

Edna L. Totten

Miss Edna Louise Totten, 19, of 366 South Spring street, died at Good Samaritan hospital June 25 where she had been a patient since June 6.

Miss Totten, a former student at the University of Kentucky, had been in ill health for two years.

She was a native of Clark county, a daughter of Paul Totten and Mrs. Jane Witt Redd. Besides her parents she is survived by her stepfather, R. T. Redd; a brother, John Redd, Lexington, and her maternal grandmother, Mrs. J. G. Witt, Clark county.

The body was removed to Kerr Brothers Funeral Home and later was taken to the residence of Mr. and Mrs. Redd, 366 South Spring street, where it remained until time for funeral services.

Services were held at the grave in the Winchester cemetery, the Rev. Orval Morgan, of Broadway Christian church officiating.

★ *Alumni Nuptials* ★

of Lexington practically his entire life. He attended the University before entering the service in 1943. The funeral was held at W. R. Milward mortuary chapel and burial was in the Lexington Cemetery.

Besides his parents he is survived by his wife, Mrs. Zelma Uldrick Bryant; a son, Larry Earl Bryant; a brother, Eugene F. Bryant, and his paternal grandmother, Mrs. Ellen Bryant, all of Lexington. The body was removed to the W. R. Milward mortuary chapel.

Connie Gaines

Connie Gaines, 35-year-old University graduate and operator of a wood preserving company near Harlan, was killed July 23 when the small plane piloted by Pete Guthrie, 30, coal operator, crashed into a cornfield about six miles from Harlan. Guthrie was killed in the crash also.

A licensed pilot, Guthrie was at the controls when the plane left the ground, airport officials said. Although Guthrie owned a plane, the one which crashed had been rented from the airport.

A 16-year-old witness said that he saw the plane crash after spinning twice at about 500 feet. Both men were dead when neighbors arrived. The cause of the crash has not been determined.

Gaines, a member of a prominent Harlan family, was graduated from the University with a civil engineering degree in 1934, and was a member of Kappa Alpha fraternity. He is survived by his wife and two sons.

Mrs. Houlihan was formerly Miss Pattie Field Van Meter of Winchester and was graduated from the University in 1938 and Mr. Houlihan was graduated from the Law College in 1941.

U. K. Chemistry Dept. Accredited by American Chemical Society

The American Chemical Society has notified President H. L. Donovan that the University of Ken-

tucky has been accredited by the society and that the name of the University has been added to the list of schools whose faculty, facilities and curricula have been investigated and approved by the committee on professional training.

The American Chemical Society maintains high standards for accrediting, which means that graduates of the University of Kentucky department of chemistry have been granted full professional status. The department was inspected early last March by Dr. S. C. Lind, dean of the School of Chemistry of the University of Minnesota, acting as a representative of the society.

The curricula leading to the bachelor of science degree with a major in chemistry and the bachelor of science degree in industrial chemistry have been revised recently. In addition, within the past few months, 27 quarter courses carrying graduate credit have been added, thus providing broad and thorough training leading to the degree of Doctor of Philosophy.

Present plans for the fall quarter call for 12 regular staff members and 15 graduate assistants on the instructional staff in the University's chemistry department. Ninety-two per cent of the regular staff of the department hold the Ph.D degree and all courses above the freshman level are taught by persons holding the doctorate.

Dr. Lyle R. Dawson has been head of the department since January 1, 1945. Prior to coming to Kentucky he was in charge of certain phases of the work on the atomic bomb project at the University of Chicago.

Lest We Forget!
