WELCOME STUDENTS

Belong students, old and new, to the University. We are about to embark upon another semester...

When we enrolled it should have been with the primary purpose of furthering our education. Many, undoubtedly, seek rather a social prestige, a whirl of dates and dances...

Just as dietitians advocate a simple, well-balanced menu, so should we make of our life at college an equally moderate and balanced one.

TOO MANY COLLEGIANS

According to the best available statistics, only 15 per cent of the 1,500,000 graduates from American colleges and universities have succeeded in securing something that might be termed a job.

In spite of this our institutions of higher education continue to enroll approximately as many students as formerly and turn out graduates in the ratio of 20 to every 1,000 population.

A BAD CONDITION

LIVE TO THE BRIM

Live life to its fullest!—Yet how many of us actually do?

Each of us unconsciously has tabulated in our mind a list of every possible achievement, every honor, standing, organization, recognition, and friendship which we desire to attain...

Mentally, we span the years of our lives as we span our college careers. Somewhere in the crevices of our minds, is the ever-thwarted desire to "be somebody."

We can imagine ourselves swaying audiences with the rhythm of our bodies; drawing tears from the eyes of the most cynic critics with the force of a character; writing books that will make people laugh and cry...

Our editorial was begun with the assumption that criticism of a constructive nature is best. Since we have attempted to show the destructive side we shall now attempt to show our constructive viewpoint.

In the middle of the year, why is it necessary to go through the biggest part of this ordeal? Being examined by the Alumni Commission is at least a day or two of spare time in which they could pay their fees to the business office and thus avoid a large part of the trouble which now exists.

In September, when this system would not be usable, why is it now used, there would be a decided lessening of trouble and confusion which has characterized the recent registrations.

We have presented our opinion in regard to this matter and we believe that we have offered some suggestions which if properly administered should go far toward improving conditions. The Kernel has shown this criticism in the spirit of helpfulness and it most earnestly hopes that it will be received in the same manner in which it was given.

And didn't it make you stop and think the other night when suddenly the lights went off a candle?

Stefansson, (Vilhjalmur) the eminent Arctic explorer and writer, Monday night will be in Lexington to lecture. Some of the things he has written are "Polar Regions," "The Gates of the Great North," "Kak," "My Life with the Eskimos"—it should be good.

Professor Farnham says that "Education is meditation."

Wonder how many 20th century "we could name?"—napal right like that. Miss King, at the library, tried it on a class and in a "twinkling minute" or so 28 names were cooked up.

Professor Brady, when eulogizing the magnificence of Keats' odes and commenting on how little Keats appreciated his own genius in writing this type of poem (desiring to impress the stupendousness of Keats' type of appreciation), says, "I could not find rest with the crowd, why do you know what I'd do if I

Just above and pull this over—and punch this, and there you are—oh, it's very simple! I was tempted to say "so" but I refrained. You see I've been on a sojourn into the press room—and am I stuffed with knowledge? Why I could practically print the entire paper right now.

By the time all of our required books have been bought we shall not be surprised if the amount expended for them doesn't top the registration fee figure.

The members of the old Harvard'ed cop are bright eyed like freshmen again—wonder how long I'll last this time. If cold air is stimulating, then let's have more!

FIRES

I know my fires consume too fast, I know that soon they will have passed. But, oh, the joy of mounting flame. The gift of warmth to those who came! Burn, burn, my spirit, in the blast! These bones to ash must turn at last. So light your own in beauty's name. —LOUISE AYLES GARNETT.

Production control and a marketing program for the state were subjects of discussions held at the meeting of dairy farmers by H. W. Fleemann, manager of the Fallow-Gives Cooperative Milk Producers' association, Louisville, and L. A. Venne, of the College of Agriculture. Other speakers were Ted Besh and George Byers of the college.

Rural pastors were welcomed at their special session by Pres. Frank L. McVey, and Dr. T. W. Rainey of The Lexington Leader. Other speakers at this meeting included Dean Thomas P. Cooper, J. M. Felner, and Dr. H. B. Price of the College of Agriculture, and Dr. Henry W. McLaughlin, Richmond, Va.

A discussion of Bang's disease and other stock-raising problems was held at the meeting of veterinarians. Speakers included Dr. D. E. Westmoreland, state veterinarian; Major E. C. Conant, Lexington; and Dr. W. W. Dimock, Dr. P. R. Edwards and Dr. F. E. Hull, of the Experiment station.

The opening day's program for the women's meetings featured economics, health, and style. Immediately after the community singing, led by Miss Mildred Lewis of the music department, Miss Sarah Blanding, dean of women at the University, spoke on "What Does the Housewife Need to Know About World Economic Conditions?" Miss Ruth S. Dyken of Ohio gave a health lecture, and a fashion show and lecture were presented by Mrs. Evelyn Tobey, New York fashion expert.

"Previous plans have sought only to raise the market price of farm products," he said. The speaker then explained the advantages in profit to the farmer who participates in the AAA.

The Wednesday feature of the women's meeting was a lecture by Dr. Arthur J. Cramp, chief of the bureau for investigation for the American Medical association, Chicago. His subject was "Pink Pills and Panacea." Dr. Cramp declared that the cheapest thing about a patent medicine is the most expensive thing is the advertising which sells it. The speaker explained that the term, "patent medicine," does not indicate that the medicine has been patented, and that the maker of the medicine coins a fancy name for his mixture and gets a trade mark on that name. "In buying a 'patent medicine' one buys a name, not a thing," said Dr. Cramp.

Dr. H. A. Morgan, president of the University of Tennessee, discussed the Tennessee Valley development Thursday morning. Pres. Frank L. McVey spoke Friday morning on "How the International

Lines in your face come from jangled nerves

Jangled nerves can make you look older than you are. And that's bad news for any woman—or man either.

Look in the mirror today. See if you already have any of those telltale wrinkles that come from nervousness—and, if you have, do something about it.

Get enough sleep—fresh air—recreation—and make Camels your cigarette.

For, remember, you can smoke as many Camels as you want. Their costlier tobaccos never jangle your nerves.

How are YOUR nerves?
TEST No. 15

Take a small rubber band—not more than two inches in length. Place one loop over your little finger. Then pull it across the back of your hand, well below your knuckles and catch the other loop on your thumb. When you are ready to perform the test, the hand is in the position indicated in the drawing. Now, without touching your hand to your body, without help from the other hand, work off the rubber band. Average time is 10 seconds.

Shepard Rowley (Camel smoker), famous bridge expert, completed the test in 1 1/2 seconds.
