FOREWORD

The purpose of this bulletin, prepared by the staff of the Division of Instructional Services, Bureau of Instruction, is to present important information concerning the secondary education program of the state school system and the classification of the high schools for the school year 1955-56.

While it is fully recognized that a great number of our high schools are providing a distinct school service for the boys and girls within their communities, there are many that fail to satisfactorily meet the educational needs of their youth. It is regrettable that many of these must be classified as emergency schools. With the full implementation of the Foundation Program, the services of the Department of Education will be bound more closely to the local districts in bringing about improvements in the immediate succeeding years.

I acknowledge with much appreciation the efforts that have been made in making the material in this bulletin available for publication, both on the part of the State Department of Education staff and the local school personnel. I trust that members of the profession and others will find the information useful.

ROBERT R. MARTIN
Superintendent of Public Instruction

KENTUCKY HIGH SCHOOLS—1955-56

Kentucky public and private high schools are classified and accredited by the State Board of Education. This requirement is set forth in the law which requires that each school district in the state provide an **approved** twelve-grade school service and that rules and regulations be adopted governing the quality of this service. The law also provides that the "Superintendent of Public Instruction shall annually prepare or cause to be prepared and submit for approval and publication by the State Board of Education a list of all public and private high schools or other secondary schools in the state showing their classifications." The classifications are given on recommendation of the Commission on Secondary Schools of the Kentucky Association of Colleges, Secondary, and Elementary Schools.

This year, there are 570 public and private high schools in the state. Last year, the number was 581. Of the 570 high schools now operating, 517 are complete organizations in that they offer work through the twelfth grade. The remaining 53 high schools are approved as incomplete feeder schools. Of the 53 incomplete high schools, 44 are separate junior high schools organized as one distinct unit offering work exclusively in grades seven, eight, and nine. The remaining nine high schools are incomplete organizations that offer work only through the tenth or eleventh grades.

Of the 517 complete high schools, 297 are operated by county boards of education while 144 are maintained by boards of education in independent school districts. The remaining complete organizations are either private secondary schools or schools that are maintained entirely by the state.

This year, the six-year high schools (grades seven to twelve) number 202. Last year, they numbered 223. This year, the traditional four-year high schools (grades nine to twelve) number 271. Last year, they numbered 252. The remaining 44 complete high school organizations represent modifications of the six-year and the traditional four-year plans.

Sixteen high schools operated last year that are not operating this year. This does not mean that the total number of high schools was reduced by sixteen because five new high schools have been organized; hence the loss of eleven in the total number of high schools for this year as contrasted to the total number of high schools that operated last year. Two of the new high schools are

county high schools representing in each case a consolidation of all the high schools in their respective county systems. The two new centralized high schools are the Mercer County High School, Harrodsburg, Kentucky, and the Scott County High School, Georgetown, Kentucky. In addition to these schools, a new county high school was organized in Floyd County to serve a certain number of the high school pupils in Floyd County together with the pupils from the independent district of Prestonsburg, which district recently merged with Floyd County.

The following table presents data regarding the various types of high school organizations to be found in the state.

TABLE I
TYPES OF HIGH SCHOOL ORGANIZATIONS AND NUMBER OF EACH

Types of Organizations	County Districts	Independent Districts	Private Schools	State or Regional	Total
Grades 7-12	120	70	7	5	202
Grades 9-12	158	59	52	2	271
Grades 8-12	15	6	8	0	29
Grades 10-12	4	9	1	0	14
Grades 11-12	0	0	1	0	1
Grades thru 11	0	0	1	0	1
Grades thru 10	6	1	1	0	8
Grades thru 9	18	26	0	0	44
Totals	321	171	71	7	570

The foregoing table not only shows the number of different types of high schools that are found in the state, but it also indicates the number of such schools that operate under different types of control.

Table IV shows that there was a continuous growth in the number of high schools from 1915 to 1935. In 1935 there were 848 public and private high schools in the state. This represents the largest number of high schools that the state has ever had. Now that we have 570 high schools, public and private, it is clear that there has been a decrease in the number of high schools of 278 since 1935. This decrease has come about very largely through the merging of small high schools into larger school centers.

1955-56	148,119	12,485	14,649	175,253

* Beginning with the school-year 1932-33, the enrollment of the seventh and eighth grades of six-year high schools and of junior high schools are included.

Table V presents an interesting picture in total high school enrollments in different types of high schools (public white, public Negro, and private) since 1915. High school enrollments increased rapidly until around 1941, then enrollments began to decrease on account of the second World War. The lowest total high school enrollment was for the school-year 1943-44. Today, the total high school enrollment is 175,253. This enrollment includes seventh and eighth grade enrollments in schools that incorporate these grades in their organizations. There are 134,617 pupils enrolled in grades 9-12. The total high school enrollment for the current school year is 4,733 more than the total enrollment last year; 3,514 of this increased enrollment took place in county high schools, 797 located in independent school districts, 419 in private secondary schools, and three in high schools operated by the state.

Table VI shows the situation as regards the number of accredited high schools by years since 1910. When we use the expression "accredited high school," we think of an organization that offers a program of work through the twelfth grade. High schools that do not give work through the twelfth grade should be looked upon as incomplete feeder schools for the regularly organized, complete high schools of the district.

Accreditation of high schools is primarily a means to an end. This end is that of stimulating growth and improvement in the schools. Originally, accreditation of high schools came about as a result of the need of institutions of higher learning for some satisfactory basis for admission to college. In recent years, however, as a result of increasing numbers of young people continuing through elementary school into high school, the emphasis upon accreditation as a basis for college admission has been shifted to that of better education for **all** youth. The rapidly changing social, industrial, and economic world and the marked increase in high school enrollment is challenging the schools to provide for a diversity of needs and capacities.

To better provide for these needs and capacities, a broader and more varied high school program is demanded. High schools should not only prepare some pupils for work in higher institutions, but they should also prepare a larger proportion of the pupils for direct entrance into business, industry, agriculture, and homemaking. It is at once apparent that small high schools cannot possibly offer an enriched program to meet the needs and capacities of all high school pupils unless it is done at excessive cost, hence the justification of requiring increased enrollment for accreditation of high schools.

* Interpretation of High School Ratings:

- A—Accredited through the entire high school course (through grade twelve).
- B—Accredited through the entire high school course (through grade twelve).
- 11 Gr.—Accredited through grade eleven.
- 10 Gr.—Accredited through grade ten.
- 9 Gr.—Junior high school—recognized through grade nine.
- T—This initial when attached to the designation of any rating indicates that such rating is given in the face of some deficiency and that the accredited rating of the school should be terminated at the close of this school year.
- E—This initial suggests that an emergency is recognized to exist that may justify the operation of the school even with an observed shortage in the number of pupils or of teachers.
- U—Unaccredited.
