\$1.59 million financial aid package set

By KAYE COYTE
Copy Editor

University funds for financially needy students will total \$1.592 million for the next school year.

The new federal money will permit UK to continue financial aid programs at near the 1972-73 levels, but will not provide any great increases in available funds, said James Ingle, director of financial aid.

THE NEW FEDERAL funds are a result of congressional action which reversed some reductions in student-aid programs proposed by President Nixon.

The \$1.592 million for student aid is distributed into:

- \$800,000 for national direct student loans
- \$550,000 for work study programs
- \$242,000 for educational opportunity grants.

A new program initiated by the Health, Education and Welfare Department

(HEW) will make additional funds available to students. The program will provide \$120 million in national funds for basic grants to students.

FINANCIAL AID SERVICES help about 3,100 students at UK each year. National direct student loans will aid about 1,400 students; federal grants aid 500 to 600 students and the work-study program affects about 1,100 students. About 400 students were turned away last year, Ingle said. The figures should remain about the same for next year, despite the new federal funds.

Students seeking aid from the new HEW program should make applications directly to HEW. They will issue the student a "certificate of eligibility" if he qualifies.

An eligible student then presents the certificate to the University financial aid

office with a statement of how much he or his family can pay for his tuition and other educational costs. The amount he can provide is deducted from \$1,400, and the remainder will be the amount of his grant. The total may not exceed one half the student's educational costs.

GRANTS MAY BE reduced if applications exceed the \$120 million in national funds available.

Entering freshmen will be eligible for student financial-assistance programs for the first time this year, Ingle said. The last day for freshman application was Feb. 1, 1973, but the financial office will accept some late applications, Ingle said.

Notification of the financial-aid programs will be sent to interested students within the next 10 to 14 days, he said.

VA dedicates new hospital; plea is made to end wars

By RON MITCHELL
Managing Editor

An end to the Veteran's Administration (VA) through the eradication of wars was the thought amplified Saturday by the administrator of veterans affairs at the dedication of the new regional VA hospital near University Drive.

Donald E. Johnson, the featured speaker, cited developments during the Nixon-Brezhnev summit and the end of the Vietnam War as steps toward a goal of continuous peace.

The administrator centered his comments on the idea that the hospital, with all of its modern equipment, will still have the most important quality--people.

He related the history of the VA, especially its medical facilities and praised the conveniences and quality of the local hospital.

Cost of the six-story structure was over \$15 million, and it contains \$7.5 million in the most up-to-date equipment available for health care. Most of the equipment is the first of its kind in this area, according to Dr. William G. Malette, chief of staff for the hospital.

During a recent tour of the facility, Malette pointed out the numerous X-ray units, neurology instruments, cardiac equipment and surgical units which are contained in the 370-bed hospital.

Malette said the hospital will serve as a regional location for area VA hospitals

since the facility contains major equipment not available elsewhere. Major surgery patients from West Virginia hospitals will come to the new facility for treatment as will those from the UK Medical Center.

Malette pointed out that the two hospitals will operate jointly to provide the best facilities and equipment to patients. A walkway connects the two structures, which are some 40 feet apart.

Continued on Page 2, Col. 1

The \$15 million Veteran's Administration Hospital opened with dedicatory ceremonies Saturday. The 320-bed facility is one of the most modern in the world. The new hospital will work in cooperation with UK's Med Center. (Kernel photo by Charles Wolfe.)

Inside synopsis

UK stars shine on tour

Kevin Grevey and Jim Andrews helped lift the U.S. All-Star basketball team to two victories last week as the State Department sponsored team continued its tour of China.

Andrews, using his 6-11 height, controlled the backboard game while Grevey shared top scoring honors with 16 points in a 94-67 decision. See story on page 4.

Hearings continue

The Watergate hearings resumed yesterday with John W. Dean III reading a six-hour statement concerning his role in the scandal.

During the course of the testimony Dean revealed it was his "honest belief that while the President was involved, that he did not realize or appreciate at any time the implications of his involvement." See page 3 for the complete story.

Library receives new service

In the not too distant future UK students will have the opportunity to explore millions of books not available in the M. I. King Library.

The library has just recently joined the Southeastern Library Network (Solinet) which,

through a computer link-up, will connect the UK facility with 83 other libraries in the southeast. Initially the service will aid in cataloguing and bibliography records. See story on page 3.

Sports shorts

Mike Clark explores everything from new ceiling tiles in the Coliseum to planting grass on the new football field in his weekly sports column on page 4.

Today's weather

Today's weather may become a bit sticky under partly cloudy skies as the temperature climbs to 90.

There will be a chance for thundershowers in the afternoon and evening with tonight's low expected to be near 60.

Sanctified Hill

Mudslide victims want UK land for homes

The University is negotiating the sale of land near Southeast Community College (SCC) in Cumberland, to the residents of Sanctified Hill left homeless by a mudslide last December.

Lawrence E. Forgy, vice president for business affairs, said the sale must be approved by the International Harvester Corp., donor of the 123-acre tract. The deed stipulates that any land not used for educational purposes be returned to the corporation.

THE SALE INVOLVES a 20-acre site separated from the main campus at SCC. Forgy said the University has no plans for the land and he thinks the sale is possible if the appraised value of the land is paid and the money goes to SCC.

Appraised value of the land ranges from \$4,000 to \$6,000 per acre because of the scarcity of level land suitable for building.

The former residents of Sanctified Hill plan to build 80 low-cost homes on the 20 acres, creating a

new neighborhood in Cumberland. Forty-four of the new houses would replace the 17 homes destroyed by the mudslide and those in various stages of deterioration. The remaining 36 would be sold to low-income families in the area.

HOUSE PRICES in the new neighborhood will range from \$15,000 to \$16,000. The money will come from the sale of the land on Sanctified Hill to the Appalachian Regional Commission. The area then would become a city park.

Three committees working on relief for the slide victims have given approval to this plan.

An alternate plan, favored by the city, would turn the SCC land into a park. The existing city park will be closed when KY 119 is rerouted around Cumberland.

BILL RISDEN, a member of both the park relocation committee and one of the residents' relocation committee, said the park and the housing project could occupy the land if UK will agree.

The state and federal governments have pledged \$1.2 million to assist the residents in buying land and constructing new homes. The city's share of the cost would be \$15,000 to \$25,000, for the development.

John Sweeney, an Appalachian Regional Commission consultant said the first houses could be available in December if the proposed plan is executed.

The plan calls for a local professional staff and the use of local labor for construction work.

New hospital boasts latest in medical equipment

Continued from Page 1

The VA Hospital is made up of full-time UK Med Center personnel who, like Malette, will temporarily serve the VA facility on a part-time basis.

Cooperation between the two hospitals is also shown by the training of medical students at the VA Hospital through the use of closed-circuit television. Video instruments are installed in most

of the surgical areas.

Each patient room is equipped with bedside oxygen and suction equipment, a 2-way communications system for calling nurses, 4-channel radios and a

modern system of getting supplies into the rooms.

Instead of each patient's supplies being taken into the room by the nurse, the materials will be placed in a recess in the wall from the hallway. When the nurse attends the patient, she opens a door on the inside of the room and removes the supplies for that particular patient.

Malette explained that this system will avoid unnecessary disturbances to those inside the room and will provide more privacy to the patient.

Specialty equipment includes a two-bed training unit for instruction to patients and their families in the use of a kidney dialysis machine. The objective of the training is to make it

possible for a kidney transplant patient to continue treatment at home with the aid of his family.

The 9,000 square-foot laboratory will contain various offices and an SMA 1260, capable of performing 12 different tests on a single blood sample.

Hospital physicians will be able to measure absorption and retention of various compounds in the body through the use of radioactive materials and a linear whole body scanner, only the fourth of its kind in the nation.

Only a small portion of the hospital is now open with many of the old hospital's patients being transferred to the new facility.

The entire hospital will be in operation before July, 1974.

M. I. King library joins central computer service

The Margaret King Library has joined a centralized computer service which will connect the facility with 83 other academic libraries in the southeast United States.

The service, called the Southeastern Library Network (Solinet) will provide additional aid in cataloguing and bibliography records, Harold Gordon, acting director of UK libraries said.

AFTER THE SYSTEM is further developed, Gordon explained, it will aid in records for serial publications, book purchases, and circulation.

Other Kentucky schools which are members of Solinet are University of Louisville, Asbury Theological Seminary, Southern Baptist Theological Seminary, and Northern Kentucky State College.

At the outset, the system will be funded by the member institutions amounting to about \$254,000. Gordon said the system will probably be self-supporting after the first year with the institutions paying for the services they receive.

GORDON SAID THE computerized system could be attained only by working together because individual libraries cannot afford computers.

Solinet will enable the UK library to scan the holdings of all 84 members and know within a short time where the requested book is and whether it can be borrowed by UK students and faculty.

The regional concept is expected to become nationwide, Gordon said. The regional idea came from an Ohio computerized system, originating at the Ohio

College Library Center in Columbus.

PRESENTLY, universities in New England and New York are organizing similar systems.

Other member universities in the southeast include; Florida, Georgia, Tennessee, North and South Carolina, Georgia Tech, Tulane, and Auburn.

Solinet's main office is in New Orleans.

Gordon said the UK library system is considered to be medium-sized compared to Harvard, Yale, Michigan, and other similar schools. He said UK purchases 40-50,000 books per year while Harvard, Yale and Michigan buy 387,000, 219,000 and 148,000 respectively.

Dean links Nixon to disastrous 'cancer' of Watergate scandal

By HARRY F. ROSENTHAL
Associated Press Writer

WASHINGTON—John W. Dean III testified Monday that President Nixon was involved in the Watergate affair and ignored or failed to understand his repeated warnings about "a cancer growing on the presidency," that could destroy Nixon.

"When the facts come out," Dean said as he read a day-long, uninterrupted recitation of his own complicity, "I hope the President is forgiven."

THUS BEGAN the first testimony at the Senate Watergate hearings to point directly to presidential involvement in the cover-up of the Democratic Party break-in-the incident that touched off the explosive White House scandal.

Last Sept. 15, when seven men were indicted for the Watergate break-in, Dean said he received congratulations from the President that the case reached no higher than G. Gordon Liddy, the former legal counsel to the President's re-election and finance committees.

"I left the meeting with the impression that the President was well aware of what had been going on regarding the success of keeping the White House out of the Watergate scandal," Dean said. "I also had expressed to him my concern that I was not confident that the cover-up could be maintained indefinitely."

AND AFTER MANY meetings with the President, about Watergate, this year, Dean said, "it was quite clear that the cover-up as far as the White House was going to continue."

Dean, who was Nixon's official lawyer until he was fired April 30, said, however:

"It's my honest belief that while the President was involved,

that he did not realize or appreciate at any time the implications of his involvement."

Others had pointed to Dean as a key member of the conspiracy to hide official involvement, as the conveyor of executive clemency offers, a raiser of funds to keep the Watergate defendants silent.

Efforts by The Associated Press to reach others accused by Dean for comment were unsuccessful.

Dean quoted the President as saying he had personally discussed a clemency offer to one of the Watergate defendants and said Nixon told him it would be no problem to raise up to \$1 million in hush money.

DEAN'S VERSION, essentially, was that he did not know about the June 17 Watergate burglary in advance that he was in the center of cover-up activities but did nothing without concurrence of H.R. Haldeman, the President's chief of staff, and John D. Ehrlichman, his principal aide for domestic affairs.

Dean had immunity from prosecution for any self-incriminating statements he made.

Freeple people to host Festival of Life fete

The second Festival of Life celebration sponsored by the Freeple Happiness Conspiracy will be held July 1 in the Memorial Hall amphitheatre.

Freeple Happiness Conspiracy coordinator Steve Dunifer is expecting over 5,000 persons to attend the event which will feature some 20 rock, folk, bluegrass, and blues bands. They include feature groups Hatfield Clan, Genesis, Honey is the Rock, and Taurus.

but not for evidence developed independently.

His story was one of trying to get the White House to admit the truth and that he told the President:

"I THOUGHT it was time for surgery on the cancer itself and that all those involved must stand up and account for themselves and that the President himself get out in front on this matter."

But, he said, Nixon did not understand. Eventually, he said, Haldeman and Ehrlichman realized "I was not playing ball...could present a serious problem to them," and he saw they were interested most in protecting themselves.

It took Dean nearly six hours to read his statement and questioning by the senators was put off until Tuesday, the 13th day of the hearings.

AT SAN CLEMENTE, Calif., Press Secretary Ronald L. Ziegler said Nixon was being kept informed of Dean's testimony, but would have no comment this week.

In a press release, Dunifer said the celebration is being conducted to "Celebrate the oneness of all living organisms and to bring people together in a joyous union of life, love, happiness and peace."

A similar free festival was held in April. Only about 1,000 persons attended the event due to over-cast skies and occasional rain, although coordinators had expected 5,000 for that event, too.

Coliseum gets new ceiling

Assorted tidbits from the UK Athletic Department: Memorial Coliseum's ceiling is presently being replaced with a new one, at the cost of approximately \$110,000. The R.T. Jordan Construction Co., of Lexington, is performing the task, to be completed in mid-August.

The center section, which stands over the basketball floor, is almost finished. The side sections which cover the seats will be a bit more difficult. Scaffolding must be constructed over the stands before work can commence on those areas.

The new ceiling will include a grid-type support system, which allows for replacement of individual tiles. The old tiles had to be patched. Chicken Little can wait a long time before a piece of Memorial Coliseum's new "sky" falls on his head.

Concession contract due today

The concession contract for UK's Commonwealth Stadium will be awarded this morning at 10 a.m., in Frankfort.

The company which receives the contract will work out of 28 concession stands currently under construction in Commonwealth Stadium. State health regulations forbid preparation of food at the stadium, so food will be cooked and then shipped hot to the stadium.

Food will be kept warm with ovens after it reaches the stadium.

Grass day set for Friday

Friday is the target day for groundskeepers to begin work on the new football field. Bermuda grass sprigs will be spread over the huge playing surface and allowed to grow until September. Hopefully, a lush green carpet will await Kentucky and visiting Virginia Tech on Sept. 15.

Sunny skies speed building

The suddenly sunny skies have allowed work crews to catch up with tasks laid aside during a rainy spring. Painters are busy covering almost a million square feet of the new stadium.

The final large concrete seating block has been installed, and seats are being placed now. Hagan said he would like to have ticket holders visit the stadium on a date to be determined to "get a feel" of the stadium. This orientation session, it is hoped, will allow fans smoother entry into the stadium and to their seats. It would also give people a chance to choose which parking lots near the stadium are best suited to their needs.

U.S. leads series 3-0

UK's Grevey, Andrews pace rout of Chinese

Sparked by Kentucky's Kevin Grevey and Jim Andrews, the U.S. All-Star basketball team buried China twice last week.

The U.S. won 94-67 and 95-75 against a pair of Chinese All-Star teams, marking the third U.S. win without a loss. Five games remain in the State Department-sponsored tour.

Meanwhile, the U.S. Women's team dropped its third straight game to the Chinese women.

Grevey, the Southeastern Conference Player of the Year last season, scored 16 points in the second game of the series, sharing game honors with Memphis State's Ronnie Robinson. It was Grevey's second half magic which boosted the U.S. from a 46-31 halftime lead.

Andrews, using his 6-11 frame to great advantage, dominated

both boards and added 12 points, a figure equaled by North Carolina's George Karl. Ohio State's Wardell Jackson had 11 points as the U.S. placed five men in double figures.

Karl and Indiana's Quinn Buckner teamed at guard, keying a U.S. fast break which wore down the smaller Chinese.

Before the third game, U.S. coach Gene Bartow held a coaching clinic.

Chinese coach Ghang Hsi-Shan said the Americans were "better ballhandlers, rebounders, and shooters," and added that his team had "learned much from the American players."

Incidentally, the TVS Television Network will delay broadcast one or more of the U.S.-China games, beginning tomorrow night. As of now, none

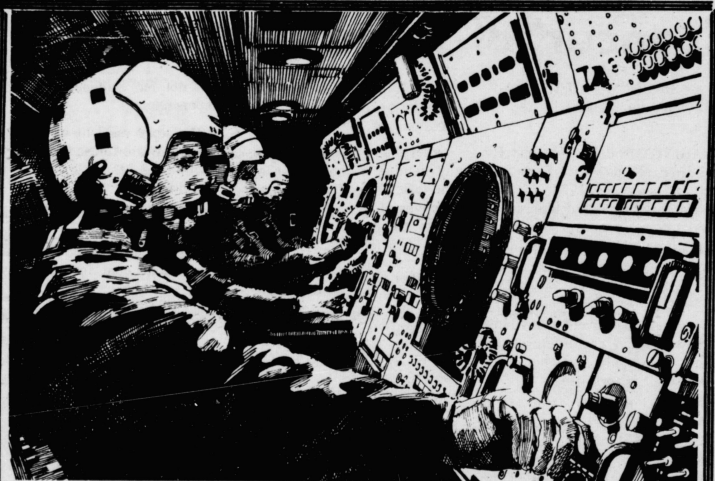

of the Lexington television stations plan to air the broadcast,

Frosh set schedule

The University Of Kentucky freshman football team will play a four game schedule this fall.

The Kittens open with Ohio State on Friday, Oct. 5 at 1:30 p.m. Other games include Marshall on Monday, Oct. 15 at 4 p.m.; Tennessee on Friday, Oct. 26 at 4 p.m.; and Vanderbilt on Saturday, Nov. 17 at 1:30 p.m.

The first three games are scheduled for Commonwealth Stadium, with the season finale opposite Vanderbilt set for Nashville.

Be a special kind of Navy Flyer. Be a Naval Flight Officer.

Whenever a Navy plane is under electronic control, that plane is in the hands of a Naval Flight Officer. Naturally, as a candidate for Naval Flight Officer training you'll need some very special qualifications. First, you must really want to fly, even if you've never flown before. You'll also need a college degree and the kind of mind that works well with math and physics.

Waiting at the end of your training program is a Navy Commission and the Golden Wings of a Naval Flight Officer. By then you'll be an expert in areas like Jet Navigation and Airborne Control... equipped to do your job wherever you go.

But whatever your specialty, travel will be part of your life. And so will challenge, responsibility, achievement and reward.

If that's the kind of career you're looking for, and if you think you've got

what it takes to be a Naval Flight Officer, send in the coupon. It will bring you all the facts. Or talk it over with your Navy recruiter. He's at 253-1703
