

## The New Era.

That we are entering upon a new era the most incredulous now concede. The amount of money that has been invested along the proposed line is enough of itself to assure us of the building of a railroad through our County. The <sup>the</sup> vigorous manner in which the company is arranging to commence work together with the financial ability and well known business character of the men who are at the head all give double assurance that we are not dreaming when we talk of what is about to be. The new era will bring many changes. It will revolutionize our methods, it will <sup>vastly</sup> increase our opportunities for acquiring wealth and all that wealth can give. It will shake society from bottom to top, from <sup>perence</sup> center to circumference.

There is one question, however, not yet settled, and that is who is to be benefited by this new order of things? This is a vital question, for it will ~~be~~ not be a blessing alike to all. ~~So~~ we answer that this new state of things will be a benefit to those who are <sup>willing and</sup> prepared to receive and appreciate the ~~blessing~~ advantages which it brings.
