

Reception, Dance Top Social Plans

Tea, Steak Fry, Luncheon, Movies Also Planned

With activities and programs planned for every day, the first week of the summer session will be full of entertainment for students and faculty.

Headlining the list of activities are the women's residence halls house meeting and reception tonight; a tea hour and dancing Wednesday; the summer school reception Thursday; the business education department's steak fry, a moving picture show, and the Phi Delta Kappa luncheon Friday; dancing and dancing in the Union Saturday; and bridge in the Women's gym Monday of the staff.

A general house meeting at Patterson hall Tuesday night, when the dean of women's staff will be introduced as one of its leaders, the second annual clinic in educational administration will be conducted at the University this week.

WORKSHOP TOPS LARGE PROGRAM Forkner, Others Direct Courses

Headlined by a "business education workshop," directed by Dr. Hamden L. Forkner of Teachers College, Columbia University, the summer session will offer this year the largest program it has ever scheduled in the field of business education.

The workshop, a new feature of the summer session, will provide an opportunity for students to follow their own interests in working on their problems, guided by several persons of national state recognition in business education.

Dr. Forkner, president of the National Council for Business Education who has had wide experience in planning programs of business education for cities and states, will be a visiting member of the University staff from June 16 to June 21. He will not only help in directing the activities of the workshop, but will also participate in courses in the commerce curriculum and problems in business education. He will give a series of lectures and will be available for individual conferences.

Other visiting instructors in the field of business education, many of whom will assist in the workshop, are: Miss Lucille Taylor, Henderson State Teachers College, Arkansas; Mrs. Marguerite D. Fowler, Louisville Public Schools and first vice-president of the Southern Business Education Association; Ralph Lucas, Castle Heights Military Academy, Lebanon, Tennessee; and F. DeVore Smith, Olympia High School, High School, Columbia, South Carolina.

Members of the resident faculty who will assist in this work are: Professor A. J. Lawrence, Professor H. P. Gray and Leslie Betz, Professor Lawrence, who is on leave from the University for the school year 1939-40, taught at Teachers College, Columbia University, last summer.

'Sunlight Of Enlightened Age' Seen By President Emeritus

The "sunlight of a new and enlightened age" was prophesied by Dr. Frank L. McVey, President Emeritus of the University in a commencement address at 44 Morehead College seniors.

Dr. McVey said, however, that the new age could be realized only if "you and others like you" believe in democracy.

Dr. McVey traced briefly the history of the United States, then declared, "For a second time in a quarter of a century the United States is in war."

The first war developed a slogan "Save democracy for the world." That slogan has been belittled in that interval between the two world wars, but again the slogan states more vitally the essence of the contest than it did 25 years ago, for our democracy was not greatly endangered then, but now it very nearly is threatened."

ANNUAL CLINIC IS CONDUCTED

With Dr. George D. Strayer of Teachers College, Columbia University, as one of its leaders, the second annual clinic in educational administration will be conducted at the University this week.

Offered through the cooperation of the Kentucky State Department of Education and the University, the clinic will present an opportunity for educators to discuss administrative problems and receive assistance of several well-known authorities in the field.

Dr. John W. Brooks, state superintendent of public education, and the division heads of the State Department of Education will participate in the clinic by serving as leaders of discussion groups and by being available for conferences.

Prof. Maurice F. Seay, head of the Department of Education, will be in charge of the clinic, which will be followed next week by Dr. Harold P. Clark's one-week course. One credit is allowed for each week's work.

Dr. Strayer is a national authority in school administration; he has made surveys of many school systems, written a large number of books on educational topics, and held important positions and appointments in his field.

In the clinic there will be a lecture period during the morning and group meetings in the afternoon in which special problems of school administration will be given attention.

Topics the afternoon discussions probably will cover are finance and budgeting; educational programs for National Defense; textbooks and their distribution; vocational education; special education; census and attendance; supervision, with emphasis upon efforts in Kentucky to improve instruction, and including in-service training and certification; and school buildings and grounds.

Assisting will be members of the University's administrative committee, and a group of students including Misses Dixie Dexter, Laura Berry, Jean Lancaster, Jean Rose, and Sarah Bishop. A punch course will be served.

(Continued on Page Four)

Schedule Changes

Courses Dropped: Education 107-Safety Health Problems. Hygiene 51a-Personal Health Problems. Hygiene 124a and b-Public Health Nursing. Mathematics and Astronomy 122-Actuarial Mathematics. Social Work 124-Orientation to Field Work Practice I. Zoology 25-General Animal Biology. Zoology 108-Parasitology.

Courses Added: Agricultural Economics Courses-Farm Economics 124b-Parl Management for a Changing Agriculture-1 credit, 8:00-8:50 a.m. daily, Room 1 Agriculture Building, instructor, Bradford, June 16 to July 2. Markets and Rural Finance 132b-Current Problems in Agricultural Economics-1 credit, 9:00-10:50 a.m. daily, Room 1 Agriculture Building, instructor, Card, June 16 to July 2.

Markets and Rural Finance C207-The Effect of Political, Economic and Cultural Forces Bearing on Rural Life in America-1 credit, 9:00-10:50 a.m. daily, Room 1 Agriculture Building, instructor, McVey, June 16 to 24. Farm Engineering 101b-Special Problems-3 credits, first, second and third hours daily, Room 211 Agricultural Engineering Building, instructor, Young, June 16 to July 2.

Hygiene C10-Health Education and Health Supervision of Schools-2 credits, third hour daily, Room 108 Miller Hall, instructor, Young.

Mathematics 106a-Advanced Calculus-3 credits, second hour daily, Room 129 McVey Hall, instructor Downing. Romance Languages 20-Intermediate Spanish-3 credits, second hour daily, Room 306 Miller Hall, instructor, Holmes. Change in Instructors, Class Periods, Room Numbers, Credits: Education 112-Determining Teaching Content in Distributive Occupations-meets from June 16 to July 2, first and second hours daily. Education 115a and b-Problems in Distributive Education-meets the third and fourth hour daily from June 16 to July 2. Romance Languages 20-Intermediate Spanish-3 credits, second hour daily, Room 306 Miller Hall, instructor, Holmes. History 8-4-Independent Work-3 credits, first, second and third hours daily. History 8-5-History of the United States-Instructor, Powell instead of Hopkins. Hygiene 111a-4-Independent Work-Instructor, Heinz. Hygiene 104-Maternal and Child Health-Instructor, Chambers instead of Griffin. Class meets in room 102, Health and Hygiene Building. Mathematics 19-Plane Analytic Geometry-Instructor Downing instead of South. Political Science 15-Problems of Citizenship-Instructor, Trimble instead of Blazing.

What Happened

During the period between publication of the regular Kernel and this edition, the University was in the news with several important developments. Among these were:

NEW DEAN OF THE UNIVERSITY. Dr. Henry H. Hill, former superintendent of Lexington schools, appointment of the University, accepted by trustees.

ROAD LABORATORY, to be built by State Highway Commission at the University, accepted by trustees.

PETITION asking that Board of Trustees reconsider reorganization plan passed by University. Senate at last meeting, was not received by trustees in time for consideration.

STAFF MEMBERS James H. Martin, D. H. Peak, E. S. Good, and S. D. Averitt, to retire this month, were assigned changes in occupational assignments.

UK GEOLOGISTS GO 5000 MILES

Take Field Trip Through Southwest

As a part of the first term of the summer session, 16 instructors and students in the department of geology are on a 5,000 mile three-week field course through the southwestern states.

Dr. A. C. McParlan, head of the department of geology, and Prof. David C. Young, assistant professor, are in charge of the trip which began June 1 and will end June 21. Particular areas to be studied include Pike's Peak, the Royal Gorge of the Arkansas River, the Black Canyon of the Gunnison, the rich mining regions of Cripple Creek, Ouray, and Telluride, and the volcanic region of the Spanish Peaks.

The party will leave the Rockies for Carlsbad Cavern, New Mexico and return through Texas where they will collect in the Permian and Cretaceous fossils will be made.

Having visited all these points of interest and studied their geological structure, the party will continue to Fort Worth and Dallas and then return to Lexington.

Approximately two tons of specimens collected on the trip will be shipped back for use in courses on the campus.

Dr. McParlan will fly home from Ft. Worth in order to conduct a field trip for the Kentucky Oil and Gas Association at the University. Two courses of two credits each are offered in the trip. Geology 118 is offered to advanced students, while Geology 23 is available for undergraduates.

The 1940 expedition visited points north of Denver including Yellowstone National Park, and the Big Horn mountains.

Baker To Speak

Prof. W. W. Baker, head of the department of distributive occupations, will speak on "Vocational Training in Retail Drug Stores" at a meeting of the State Drug Association at 2 p.m. Thursday at the Henry Clay hotel in Louisville.

Registration Total Reaches 1390 During Initial Enrollment Day

Students Welcomed

Another Summer Session at the University of Kentucky begins this week. I am happy to welcome visiting faculty and students to this important division of University work. For many students it is a period to be spent in advanced professional work and in obtaining a broadened viewpoint.

SHORT COURSE BY CLARK SET Taylor To Assist Columbia Teacher

Utilization of community resources in improvement of instruction will be emphasized in the new course, Education C250b, which is to be taught by Dr. Harold F. Clark, professor of education at Teachers College, Columbia University.

Beginning next Monday and extending through July 2, the course has been planned to contribute to the efforts for the improvement of instruction in Kentucky, which are being sponsored by the State Department of Education and the K.E.A.

Dr. Clark will be assisted in the course by Dean W. S. Taylor of the College of Education.

Dr. Clark, a national authority in the field of education and economics, has studied the economic effects of education in almost every country of the world; he has been a leader in the field of consumer education and has written extensively on the relationships of education to community resources.

The new course, entitled "Educational Problems and Community Resources," will cover four major topics: the utilization of community resources in improvement of instruction; national, regional, and local agencies especially concerned with programs designed to improve instruction; experiments and demonstrations dealing with new methods in content in education; and the place of administration and supervision in programs for the improvement of instruction.

Dr. Strayer, a national authority in school administration, has made surveys of many school systems, and has written books on educational topics. In addition to lecturing this week to the clinic, entitled "Educational Problems and Community Resources," he will hold individual conferences with interested persons.

Ordnance Inspection Taught In National Defense Course

The University adds one more service to its list of national defense projects today, as the three-month course in testing and inspection of ordnance materials gets under way.

Offered with the approval of the United States Department of Education, the course will provide training in industrial testing and chemical analysis, designed to meet the demand for inspectors and operators in ordnance materials.

From a list of 75 applicants for admission to the course, 24 students and six alternates were chosen.

The 24 successful applicants are: William Miller Butler, Millersburg; Hue H. Comer, Cecilia; Owen Powell Cornelison, Richmond; Rankin DuVal, Jr., Winchester; Clarence Grover, Lexington; Logan Hamley, Louisville; William Logan Hammett, Jr., Pineville; John Bennett Hunt, Mt. Vernon; Dow Klindorf, Versailles; Alvin R. Lyon, Campbellsville; E. F. Marrs, Lexington; Edward Mays, Millersburg; Robert J. Moberly, Lexington; Carl Ray Neikirk, Somerset; Oscar Bennett Owens, Hazard; Wadell Platt, Versailles; Walter Price Roberts, Lexington; Charles Wade Ruffner, Ludlow; Kenneth E. Swanson, Bowling Green; Robert Bruce Walker, Jeff. Charles T. Warren, Lexington; and John Marshall White, Manchester.

Alternates are: W. P. Armstrong, Mackville; Roy Donald Burberry, Lexington; Paul Ford, Pikeville; Stanley Jones, Murray; J. E. Keith, Manchester; and John Ed Scott, Murray.

The course, under the supervision of the College of Engineering, will continue through September 6. Since no tuition fee is charged, only expenses to be incurred by the students are board, room and cost of books. Full attendance is required.

Strayer Will Address Term's First Convocation

Dr. George Drayton Strayer, member of the faculty of the Teachers College, Columbia University, and one of the leaders of the Administrators' clinic of the summer session, will address the first convocation of the summer term convocation of the summer term Thursday at 11:15 a.m. in Memorial Hall.

Dr. Strayer, a national authority in school administration, has made surveys of many school systems, and has written books on educational topics. In addition to lecturing this week to the clinic, entitled "Educational Problems and Community Resources," he will hold individual conferences with interested persons.

Tuesday Kernels Will Be Distributed In Various Buildings

The summer Kernel will be issued each Tuesday morning, and may be obtained at the following places: Administration Building, Dr. Adams' office, Hygiene building, Engineering college, University library, Men's dormitories, McVey hall, Miller hall, Lafayette hall, Biological Sciences building, White hall, Student Union building, Fraze hall, Gym annex, Music department, Home Economics building, Agriculture building.

Students wishing to work on the summer Kernel are requested to meet in the news room, McVey hall basement, Friday afternoon.

KYIAN SHOWS CASH BALANCE Auditors Declare Accounts Accurate

Accurately kept books and a \$1,673.33 cash balance at the end of the school year were shown in an audit of the University of Kentucky's annual "Kentuckian," today by a better system to prevent unexplained taking of copies of it was recommended.

The report, made public by State Auditor D. A. Logan, also criticized a \$10 contribution to the local Community Chest fund.

"The propriety of this contribution from the fund may be seriously questioned," the auditor said, "since a large portion of the fund is derived from the senior student fees expressly for the Kentuckian. Students or student organizations certainly should have the privilege of making such contributions, but such acts should be voluntary."

"We recommend that all money exacted from the student at the time of registration should be used solely for the purpose set forth and not be diverted to any other use, however worthy the purpose, by any subordinate board of the institution, or student body."

The auditor said 1,060 books were printed, 774 sold and 276 were on hand, and that the 11 missing had been taken from the stock room "during a certain week-end."

It pointed out that the business manager of the Kentuckian, J. M. Donnelly, was advised by the Civil Aeronautics Administration. "The fine reputation for safety established by the CAA instructors has reduced the student's accident insurance this year 20 per cent." Colonel Donnelly announced. He explained that ground instruction would be given at night during the summer months in order to permit day-time hours for flight instruction. An extra course, general service of aircraft, has been added to the courses on civil air regulations, meteorology and navigation. Colonel Donnelly said.

Six Days Remain For Signing Up; Decrease Is Seen

Dean Thomas R. Cooper

May "the combination be that happy one that will make this Summer Session memorable." THOMAS P. COOPER, Acting President

ONE-WEEK AG COURSE SLATED McVey To Teach Farm Economics

Beginning the College of Agriculture's annual short course in agricultural economics, a one-week, one-credit class in "The Effect of Political, Economic and Cultural Forces Bearing on Rural Life in America" with President Emeritus Frank L. McVey as instructor, is being offered this week.

Designed primarily for experienced county agents, teachers of agriculture, and farm security supervisors who can leave their work for only a short period, the course is a continuation of the short courses offered during past summers and does not duplicate work previously offered.

Dr. McVey's class, from June 16 to June 24, will be followed by a one-week, one-credit class in "Current Problems in Agricultural Economics," by Dr. David G. Card, which will extend from June 25 to July 2.

Prof. McInteer Publishes Study

The close correlation between the flora of Kentucky and the underlying geologic formations is the subject of a study prepared by Dr. B. B. McInteer, associate professor of botany, and just published by the State Department of Mines and Minerals under the title of "Distribution of the Woody Plants of Kentucky in Relation to Geologic Regions."

In his pamphlet, Dr. McInteer points out the relation of flora to soil and soil to underlying rock and concludes that "if the type of vegetation is determined by the nature of the soil, and the kind of soil in turn is influenced by the original rock, it follows that the flora of a region is governed to some extent by the geologic formations underlying it."

Carnegie Musicals Scheduled For Wednesday Night

Symphonies, operas, overtures, song, piano music, string quartet and other types of musical ensemble music may be heard in the Music room of the Union according to the following schedule:

Monday-12:30-2:30 and 7 to 9 p.m. Tuesday-12:30-2:30 p.m. Wednesday-12:30-3:30 and 7:30 p.m. (Carnegie Musicals) Thursday-12:30-4:30 p.m. Friday-12:30-4:30 p.m.

The Carnegie Musicals on Wednesday evening is a special prepared program of instrumental or vocal music by the great masters.

Bankruptcy Petition

The University Club of Lexington, Inc. recently filed a voluntary petition in bankruptcy in Federal District Court. The petition listed assets valued at \$510.80 and liabilities totaling \$1,117.95. The board of directors of the club voted last week to dissolve the organization because of lack of support. The club maintained club rooms at 153 Market Street.

# Sinking Of Robin Moor Adds Fuel To American Diplomatic Bonfires

WAR'S WEEK BY JIM WOODRIDGE

It was a dismal outlook to draft-age college students this week.

Frequently we had predicted that it wouldn't be long before some American merchant ship was sunk by the now well-hated through-much-propaganda Germans and our nation would be led into the inevitable war.

And sure enough, news of the sinking of the U. S. vessel Robin Moor by an alleged German submarine in the middle of the south Atlantic on May 21 was released this week, adding gasoline to the diplomatic fire in Washington.

According to a report from the state department, the 5,000 ton cargo ship was torpedoed once and shelled 30 times after the 46 passengers had taken to lifeboats. Eleven passengers were picked up by a passing vessel. The others are still missing.

"We won't be baffled by any American and English discussion concerning the Robin Moor. Whenever any ship with contraband sails for England we'll shoot at it whether it is the Robin Moor or anything else," it was said by authoritative German sources in commenting on the incident.

U. S. state department officials insisted that the cargo of the Robin Moor was not contraband, explaining that, as far as is known, the vessel carried only steel rails, cereals, hosiery, and other supplies—none of which had been purchased by Britain under the lease-lend agreement. The Robin Moor was bound for Cape Town.

# Diplomatic And Military Victories—Both Must Go The Democratic Way

SMOKE RINGS BY RICHARD P. ADAMS

Now that our democratic way of life seems to be threatened with extraordinary dangers, both from within and from without the borders of the few remaining nations which attempt to live up to it in some degree, it seems to me that we ought to try to understand it better than we have done in times of peace and safety. It was during such times of quiet, we might remind ourselves, that the seeds of the present danger grew.

Among the bases of the democratic way of life are the rights mentioned in our own Declaration of Independence—the rights of life, liberty, and the pursuit of happiness. Further guaranteed in the Constitution are the rights to speak, write, and worship freely, to assemble and peaceably petition for redress of grievances, to be tried fairly, and to be kept immune from the tyrannical which eighteenth-century governments practiced, such as the quartering of troops in private homes during times of peace, unlawful search and seizure, cruel and unusual punishments, etc.

Behind all this is the simple, common-sense notion that a man ought to be allowed to do as he pleases so long as he does not please to do things that deny the same right to his neighbor. Governments, as the Declaration of Independence maintains, derive their just powers from the consent of the governed. They are

South Africa, which is outside the forbidden zones of the U. S. neutrality law.

That the administration is deadly in earnest in its defense preparations was shown this week when President Roosevelt ordered 3,500 soldiers to take over the strike-bound North American Aviation Corporation's plant at Inglewood, California.

The plant, which produces 10 planes a day in normal operation, was reported at full production less than a day after the troops marched into the factory. Thirty CIO picketers were hurt in resisting the soldiers.

One picketer carrying an American flag, was relieved of his flag by the soldiers and quietly driven away in an Army truck.

A bill to defer all men over 27 from military service passed the Senate this week.

It was a dismal outlook to draft-age college students this week.

Frequently we had predicted that it wouldn't be long before some American merchant ship was sunk by the now well-hated through-much-propaganda Germans and our nation would be led into the inevitable war.

And, sure enough, news of the sinking of the U. S. vessel Robin Moor by an alleged German submarine in the middle of the south Atlantic on May 21 was released this week, adding gasoline to the diplomatic fire in Washington.

U. S. state department officials insisted that the cargo of the Robin Moor was not contraband, explaining that, as far as is known, the vessel carried only steel rails, cereals, hosiery, and other supplies—none of which had been purchased by Britain under the lease-lend agreement. The Robin Moor was bound for Cape Town.

the servants, not the masters, of the people. Their sole legitimate purpose is to help people live together as peacefully, prosperously and happily as possible.

That principle has been enunciated over and over in our most precious documents, laws, and pronouncements of policy; and in the main, I think, considering the general shortcomings of human nature, we have lived up to it reasonably well.

As long as two such opposite ideas are held by important sections of the world's population, there is sure to be war between them constantly, in more or less open, violent, and destructive form. If we are to go on living by democratic rules, we must win that war, first by force and then by diplomacy.

The first general outbreak occurred in the four years 1914-1918; the victory went finally to the democratic side. But the democratic statesmen failed in diplomacy, for the peace they signed led to a worse outbreak in the fall of 1939, in which so far the decisions have almost all gone the other way. Most of us seem to feel that it concerns us to see that the victory by force goes again to the democracies. I think it is even more important, though secondary of course at the moment, to see that the diplomatic victory goes that way too.

## ON THE COLLEGE FRONT: Universities In The News

### Dog Credited With Assist In Blind Man's Degree

With 27-year-old Arthur W. Lehide when he received the Bachelor of Arts degree from the University of Illinois recently was Peggy Lou, a white and tan blind dog leading him through the final steps of his college career.

Lehide, of Beaucaup, Ill., is blind, but with Peggy Lou's help he has marked up a brilliant academic record.

He has completed a regular four-year liberal arts and science course in three and one-half years, with an average grade of 4.5—only a point below perfect. In the semester just ended, he achieved the unusual—straight "A" in all subjects, giving him high honors.

Now that he has finished with school, he and the girl he met and married at the university plan to return to Beaucaup, where he hopes to realize his ambition—a newspaper feature writer.

Few stories that he may write likely will equal the story of himself, the dog, and the girl he met and married at the university. In July of 1935 he bought a six-week-old pup, named her Peggy Lou, and hunted with her that fall. In March of the following year, injuries from an automobile wreck left him blind.

He and a 5-year-old neighbor boy began teaching Peggy Lou to lead. In February, 1938, Lehide decided to enter the university, and he and his dog came to Champaign.

After studying true chameleons, Dr. Sarah Rogers Astast, zoology professor at University of California, concludes they are a first cousin to the horned toad.

### 82,300 COKES SOAKED UP

Call it propaganda, but no less than 82,300 cokes crossed the bar of the Jungle during the past school year to confirmed advocates of pausing and refreshing.

Although these statistics are furnished by coke authority Lee Astness, single finger, deputies may take 80 gallons of coke a month at 115 drinks per gallon, for nine months and reach the same deduction.

"Cherry cokes, according to Astness, received the most biding during the year, but lemon cokes have a strong following.

During the winter, coffee at 5,000 cups per month runs close competition to 9,200 cokes, but is definitely outclassed in the spring.

—South Dakota State College

### Mountain Students Hunt 'Possoms In College Class

"Possum hunting is now part of the curriculum of Lees-McRae College, unique institution nestled high in the mountains of Western North Carolina.

No, the school does not award the degree of Ph.D. in doctor of "possom hunting" to the boys and girls who come here from a dozen or more states. The latest addition to the list of accredited college activities came about this way. All students of Lees-McRae are required to participate in some sport as part of their course in physical education necessary for graduation. They may hunt "possoms" at the same time as the season allows. Hikes into the surrounding mountains.

Sometimes it is necessary to climb the tree to get the "possom" and sometimes it is necessary to cut it down. The main idea is to get the animal into the sack before the dogs reach it. After that, the only problem is to find the way back home.

The final chapter comes after the "possom" has been fattened in captivity. Perhaps in time this will add further to the "possom" studies of the students at Lees-McRae. Here the boys and girls work as well as study and play and few are the girl graduates who don't know how to cook. And where is there a finer art than that of cooking "possom with sweet potatoes" — Cincinnati Enquirer.

Major F. E. Bunaway, army officer in charge of the Louisiana State University co-ed rifle team, states women are as good marksmen as men when given the same training.

### Psychic Powers Studied

If the University of Louisville ever has a good healthy seance, Carol-Louise Wedekind, Margaret Lynch, Juanita Arrowood, and Leonard Lusk should be able to take a firm lead according to the results gained by Agnes Snyder in tests she gave in connection with research work which she is doing in extra-sensory perception.

Miss Snyder has given two hundred and fifty tests to students here at the University in order to scale their powers of mental telepathy. Next year she will be one of the three people eligible for a fellowship at Duke where the most progressive work is being done in this field.

When questioned as to how he felt upon learning that he beat the

odds of chance consistently in guessing what cards were what during the tests, Leonard Lusk scratched his head and ventured, "I don't feel any different, but I scare my family now with threats of mind-reading."

"I've thought seriously of getting a crystal and a large white turban but when people would want to know why I don't win at the horse races, that question might prove very embarrassing."

Miss Snyder says that so far she has not reached any conclusion as to whether or not there is such a thing as a definite psychic power but that all her tests do point to the fact that certain persons score high consistently.

—Louisville Courier-Journal

### UK Engineers To Test State's Power Service

Ten student engineers from the University yesterday began a series of tests of electric meters in Kentucky to assist the Public Service Commission's annual survey of Kentucky power service.

Before the tests are over at the end of the summer, it is estimated that from 7,000 to 10,000 meters will be inspected in 124 cities and towns in all parts of the state. Under the direction of H. Meyers, in charge of research and statistics, the crew will travel in an automobile, a station wagon, and equipment truck and will test for voltage fluctuation in power lines as well as testing meters.

TRAINING GIVEN  
The students received training in inspection work at the University during the past two months under the direction of H. C. Kahl, of the State Public Service Commission's Division of Engineering and Rates.

If a meter is found to be more than one per cent off, the utilities company is required to re-test and correct the condition, Kahl explained. Line improvements also must be made where voltage surveys show more than a reasonable variation. Testing in the Lexington area opened Monday and will continue for about nine days, it was announced.

Headquarters will be established here, and about 1400 meters will be examined in Lexington, Frankfort, Midway, Versailles, Wilmore, Stamping Ground, and Centerville. The Kentucky Utilities Company and the Kentucky Light and Power Company serve these towns.

From central Kentucky the group will travel through the southern and western, back to the central, and into the northern regions of the state. Headquarters will be set up in Somerset, Bowling Green, Hopkinsville, Mayfield, Henderson, Paducah, Elizabethtown, Louisville, Shelbyville, Covington, and Maysville.

NINE COMPANIES  
Besides the Kentucky Utilities Company and the Kentucky-Tennessee Light and Power Company, the inspectors will investigate the electrical service of the Stearns Power and Light Company, the Tri-County R. E. A., the Salem Utilities Company, the Central States Power and Light Company, the Louisville Gas and Electric Company, and

### Letter-Writer Asks Band For American Tunes

To the Editor of The Courier-Journal:  
Commencement exercises at the University of Kentucky on Boll Field were beautiful and impressive. Had the famous "Best Band In Dixie" been allowed to "strut its stuff" in the form of stirring American airs, we could not have found one flaw with the program.

However, we feel that something is radically wrong in selecting the music for this occasion. The 3,000 or more spectators were shocked by having to listen to one German and two depressing Russian airs which breathed the pathos and hopelessness of the Totalitarianism.

Why is it that many musical artists seem to feel they must leave American shores when it comes to selecting music for public occasions? I am not a Chauvinist, but it would seem to me that just now it is high time that every citizen should go out of his way to stress all that is good and fine in America, made or composed in America. It may be true that the leaders of our bands and orchestras are largely from alien lands. But it is up to them to cease parading those things that come from lands that are Un-American at heart and bent on the destruction of democracy.

Certainly we have a right to expect that the directors of every type at

A \$140,000 ROTC building is being planned at the University of Virginia.

our State University should show their patriotism at least to the extent of refraining from broadcasting foreign products just now.

The University of Kentucky band leader may be American born and American bred, but he is not American. But I am sure that he has a former band leader at the university been on the job, his band would have thrilled the audience with those good old American tunes which make our hearts beat a little faster, cause our spirits to chill a bit with delight, make the toes work somewhat overtime in their shoe-encasements and always result in soul-stirring cheers and loud applause. We hope the leaders of the Best Band In Dixie will open their eyes to the opportunity they have to help play the game of making Americans proud of America.

Wm. A. Duncan, M.D. Russellville, Ky.

**AIR WAVES: From The Hills**

By JOHN SUTTERFIELD  
The University of Kentucky radio station, located atop McVey Hall, present a very interesting program each Saturday night entitled "From The Kentucky Mountains." This series, directed by Ben Ruskus, an announced by Jack Dunn, features music, plays, and interviews with outstanding men and women from the Eastern Kentucky mountains.

"From The Kentucky Mountains" seeks to combat the more spectacular impressions of the Kentucky hills and attempts to portray the area as it really is with all its native color and folklore. Traditional ballads of many of the direct Scotch, Irish, Welsh, and English origin, are heard. Typical writings of mountain authors are dramatized. Many of the numerous contributions of the Southern Appalachian area to the culture of our country are vividly illustrated. The A. S. Salem people are invited to participate and talk informally to the "outside world."

**McConnell, Lipscomb Take Class Of '41 Top Honors**

**Barry Bingham Presented Award For Citizenship**

Barry Bingham

Top honors for the Class of '41—the Algonquin Sidney Sullivan medallions—were awarded to Jean Marie McConnell of Danville and William Num Lipscomb, Jr., of Lexington at the 74th annual commencement exercises recently.

Recipient of the annual award for "qualities of outstanding leadership and citizenship" for a Kentucky citizen was Barry Bingham, Louisville newspaper publisher.

In making the presentation, Doctor Cooper declared "Mr. Barry Bingham, a graduate of Harvard, magna cum laude; president and publisher of the Courier-Journal and the Louisville Times; owner and operator of radio station WHAS has served well in the interests of philanthropic, educational and other agencies for the public welfare.

"As one of the foremost citizens of the commonwealth, as a friend of the youth, and a sympathizer with youthful ideals; as one interested in the agriculture of the state and in the many social and economic movements in the present day south, he now is recognized as being among the leaders of the southern part of the United States."

In December, Mr. Bingham gave \$10,000 to the University for the purchase and renovation of the old Tatum Springs hotel in Washington county for the use as a state camp for members of 4-H clubs. This camp has been named the Robert Worth Bingham Memorial 4-H Club Camp in memory of the late Judge Robert W. Bingham, father of the donor.

**McCONNELL ACTIVE**

Miss McConnell was graduated with a bachelor of science degree in music. She maintained a high

scholastic standing for four years and has been active in various groups on the campus. She is a member of Phi Beta, honorary dramatics and music fraternity. Mortar Board, senior women's honor society; the Student Legislature; has been accompanist for the men's and women's glee clubs and the University Chorists, member of Caves, sophomore honor society, and a member of the radio extension studio trio.

**LIPSCOMB'S RECORD**

Mr. Lipscomb received his bachelor of science degree in industrial chemistry from the University. He has maintained a high scholastic standing during his residence at the University. Son of Dr. William N. Lipscomb and Mrs. Lipscomb, 39 Mentelle park, Lexington, he is a member of the University Philharmonic orchestra and the University Simphonets.

The Algonquin Sidney Sullivan award was established in a group of southern universities in 1925 by the New York Southern Society to honor the memory of the man for whom it is named. It is presented annually to a senior man and senior woman at the University and also is given a citizen of the commonwealth when the University feels there is a citizen who, because of the high quality of his life, can be judged a worthy recipient of the distinction.

The 1940 award was presented Mrs. Frances Jewell McVey, wife of Dr. Frank L. McVey, president emeritus of the University.

**University Plays Host To 1,000 4-H Boys And Girls For Week's Meeting**

**Johnson, Cooper, Other Officials Speak To Youths**

Kentucky farm youth took over the campus last week as 1,000 top-ranking farm boys and girls from the state's 4-H clubs, and club leaders, county agents and county home demonstration agents met for the 21st annual Junior Week.

Virtually all phases of farming and home economics were treated in class sessions, special lectures, demonstrations, and motion pictures during the week. Tours throughout the Bluegrass were sponsored by the Lexington Junior Chamber of Commerce, and a trip was taken by the group to the state capitol at Frankfort on Friday.

Speakers during the week were Gov. Keen Johnson; Dr. Thomas P. Cooper, acting president of the University; Mrs. Willie Snow Ethridge, Louisville, distinguished author of several best-sellers; Raymond Mc-

Lain, president of Transylvania College; Dr. Myron T. Hopper of the College of the Bible, and others.

**WHITEHEAD DIRECTS**

The program of the week was under the general direction of J. W. Whitehead, state leader of 4-H Club work for the College of Agriculture.

Vesper services were held every evening in the Memorial hall amphitheatre, led by Lexington ministers. Following the services, winning teams presented demonstrations of farm and home practices at the evening sessions in the hall.

The week presented a "highlighting" of the 4-H club work and contribution for the year. This year a primary theme was the contribution of 4-H clubs to the nation during the period of national defense.

Wayne Stewart, Rockcastle county, was elected president of the University Association of 4-H Clubs for the coming year. Harry Gatton, Jr., Muhlenberg county, was chosen vice president, and Lucy May Griggs, Madison county, secretary. Stewart succeeds Elmer McBride of Warren county.

**JOHNSON SPEAKS**

Governor Johnson told the 4-Hers that they had a big stake in the United States, "to see that it remained a place where there is opportunity, a land of freedom of the press, religion and speech." In speaking of today's farm youth, the governor said, "they appreciate the opportunities of farm life instead of feeling sorry for their lot."

Dr. Cooper lauded "the development of a sense of responsibility by farm youth through activity in 4-H clubs and allied groups." The part the 4-H club is playing in building a strong, healthy citizenry was reviewed by the speaker, who said it had been "one of the nation's foremost groups" in realizing many years ago the importance of good nutrition, exercise and a sound program in living.

**Accident Victims Condition Is Good**

The condition of Dr. Flors Elizabeth LeStourgeon, associate professor of mathematics, and Mrs. Albert Wilson Server, assistant professor in the division of romance languages, was reported as good by the Good Samaritan hospital yesterday.

Mrs. Server and Dr. LeStourgeon were injured last Wednesday morning in an automobile collision at the intersection of Rosemont Garden and the Harrodsburg pike.

The accident occurred when the two staff members had just started

**Faculty Members To Display Works**

An exhibition of drawings by Prof. Edward W. Rannels and of paintings by Prof. Raymond Barnhart, of the University art faculty, will be on display at the Biological Sciences building for the summer months. The collection of approximately 50 works will be open daily from 8:30 a. m. to 5:30 p. m.

**"Colonel" of the Week**

If it's results you're after, Try Kernel Advertisements

Pres. Cooper

This week's "Colonel" of the week goes to Dr. Thomas P. Cooper, who became acting President of the University in July, 1940.

Dr. Cooper obtained a B.S. degree from the University of Minnesota and holds an honorary degree of Doctor of Science from Princeton University.

Dr. Cooper is a member of the State Board of Agriculture, the State Park Committee, the Rotary Club of Lexington, the Convocation Club of Louisville, and the Cosmos Club of Washington, D. C.

**Engineers Leave For Summer Camp**

Twenty-three students in civil engineering at the University left Lexington Monday for Camp Robinson, Breathitt county, the civil engineering camp located on University property near Quicksand, for a seven weeks summer surveying course.

They were accompanied by Prof. D. V. Terrell, head of the department, and R. E. Shaver, associate professor of civil engineering. The camp is a requirement for juniors in the College of Engineering's civil engineering department.

Manning Called

Dr. John W. Manning, on leave from the University of Kentucky as educational counselor for the National Institute of Public Affairs, Washington, has been called to active Army duty as a reserve captain. He has been assigned to the personnel bureau of the Adjutant General's office, Washington.

298,175 Books Listed

A recent survey of the University of Kentucky library, classed as one of the largest school libraries in the south, reveals that there are a total of 298,175 volumes on the shelves and in the stacks. Included in this number are 16,280 volumes of bound periodicals, 850 volumes of bound newspapers and an estimated 2,000 University publications.

Two New Courses Included In Recreational Program

'Body Building' Horseback Riding To Be Offered

With two courses—horseback riding and "body building activity"—scheduled for the first time, a full term of recreational activities has been planned by the physical education department.

The "body building" course is offered for both men and women, and will be conducted each Monday, Wednesday and Friday from 4 to 5 p.m. in the gym annex by Ben Martin, supervisor of health and recreation for the Tennessee Valley authority.

The course has a two-fold purpose: first, to provide summer students with opportunity to increase their physical efficiency for national defense requirements for armed forces and industrial personnel, and, second, to give a general teaching procedure for persons interested in acquiring a general knowledge to use in their respective communities.

Horseback riding for men and women is offered each Tuesday and Thursday. The fee is six dollars for ten days or 75 cents for single rides. These begin immediately.

All students wishing to take part in baseball games are requested to meet on Stoll field Wednesday, Tuesday and Thursday, 1:30 to 2:30 p.m. Teams will be organized at that time, to play under the supervision of officials furnished by the physical education department. Those who wish to form their own teams must report with their captains.

Physical education courses offered, and the instructors are:

Archery, for men and women, Monday and Wednesday, 2 to 3 p.m., gym annex, Sofronson.

Badminton, for men and women, Tuesday and Thursday, 1:30 to 2:30 p.m., gym annex, Russell.

Golf, for men, Friday, 2 to 4 p.m., gym annex, Russell.

Golf, for women, Friday, 3 to 5 p.m., gym annex, Robbins.

Recreational games, for men and women, Monday, Wednesday, Friday, 4 to 5 p.m., gym annex, Nieman.

Social dancing, for beginners, Monday and Wednesday, 7 to 8:30 p.m., women's gym, Lewis and Robbins.

Social dancing, for advanced students, Monday and Wednesday, 4 to 5 p.m., women's gym, Lewis and Robbins.

Tennis, for men, Tuesday and Thursday, 1:30 to 2:30 p.m., tennis courts, Purdon.

Tennis, for women, Tuesday and Thursday, 2:30 to 3:30 p.m., tennis courts, Purdon.

Beginning tap dancing, for men and women, Tuesday and Thursday, 2:30 to 3:30 p.m., women's gym, Keener.

Advanced tap dancing, for men and women, Tuesday and Thursday, 3:30 to 4:30 p.m., women's gym, Keener.

Modern dancing for women, Tuesday and Thursday, 1:30 to 2:30 p.m., women's gym, Kouss.

Folk dancing, Monday and Wednesday, 2 to 3 p.m., women's gym, Lewis.

Intramural sports, 6 to 8 p.m. daily, Intramural Sports field, Eddy, Nieman and Martin.

Graduate students who are to assist in the department during the summer are Eloise Keener, Almhurst, Ill.; Helen Mary Robbins, Hardin-Simmons college, Abilene, Texas; Amanda Purdon, Carrollton; Allen B. Russell, Lovington, Ill.; Sidney Sprenson, Staples, Minn.; C. V. Eddy, Simon Kenton High school, Independence; Elmer A. Nieman, Fragg City, Mo.; Lavaine Lewis, Lexington; and Martin.

Prof. Henry B. Moore, associate professor of economics, left yesterday for Washington, D. C., on a three-month summer assignment as industrial economist with the U. S. Department of Labor.

Advanced Military Students Announced

Acceptance of fifty students for admission to the first year advanced course of the department of military science was announced last week by Lieut. Col. Howard Donnelly, University professor of military science and tactics.

These students, who will be juniors next fall, will take a two year course in advanced military science and will receive a second lieutenant's commission in the United States infantry reserve on graduation.

Uniforms and commutation to the amount of approximately \$200 for the two year course are furnished by the government.

All appointments are subject to enrollment in the University next fall and passing of a physical examination.

Also accepted were 47 students for admission to the first year advanced course under paragraph 20 AR 145-10. These students will take the regular course, but will not receive the commutation. Twenty-six juniors who served under paragraph 20 AR 145-10 were accepted for enrollment in the second year advanced course as regular students.

Admitted to the first year advanced course as regular students were the following:

FIRST YEAR ADVANCED

A. P. Adair, L. B. Allen, M. L. Akers, R. J. Ammons, J. F. Atkins, T. D. Arkie, C. N. Beck, W. L. Blanton, W. L. Blythe, J. A. Bohak, M. C. Brewer, J. H. Carroll, Van D. Coker, D. W. Collins, B. Coons, Robert Courtney, C. P. Cutchin.

W. T. Darnell, B. M. DeLong, M. Ellis, R. N. England, R. J. Eschborn, J. H. Feaster, A. D. Higgins, E. H. Hank, Robert Hillenmeyer, A. F. Hicks, R. A. Herbert, C. Johnson, J. N. Kerr, J. M. Leach, H. H. Lowenthal, O. E. McBeath, D. C. McCard, M. E. Mitchell, R. Mulberry, W. R. Peyton, H. C. Presser, A. K. H. Rye, N. I. Rice, B. L. Ridley, W. W. Schick, L. B. Van Hoy, W. W. Ward, J. W. Wilson, L. P. Wiley, Clark Wood, J. R. Woodward, P. G. Woolfolk.

Admitted to the first year advanced course under paragraph 20 were:

C. M. Adair, W. Bewley, L. P. Blanche, O. C. Brumfield, B. D. B. Caldwell, J. R. Casner, E. G. Chase, R. N. Crapster, G. C. Cunningham, R. E. Davis, R. C. Davis.

All CAA Students Pass Examination

All 10 students at the University of Kentucky who were enrolled in the initial civil-pilot-training course under sponsorship of the Civil Aeronautics Authority successfully passed the government's written tests in the subjects of civil air regulation, meteorology and navigation. Lieut. Col. Howard Donnelly, CAA coordinator and head of the University military department, announced.

The highest average of 95 per cent was made by R. D. Montondo of Lockport, N. Y. None of the 10 students made less than 84 per cent. "These outstanding high percentages," Col. Donnelly said, "are indicative of the great interest and enthusiasm on the part of the students and the capable leadership and instructional technique developed by Professors Henry B. Moore, David M. Young and R. E. Shaver."

As soon as the students successfully pass flight tests now being conducted by government inspectors at the Lexington airport, they will be issued private pilot licenses by the CAA.

Margaret Whitcomb, a 1929 graduate, is the first girl meteorology instructor to teach at Massachusetts Institute of Technology.

A new course, "Courtship and Marriage," offered at Bucknell university is the most popular on the campus.

CROUCH NAMED TO YWCA POST Graduate To Head Girl Reserves

The day after she graduated from the University with a major in social work, Annetta Crouch of Bloomfield was appointed Girl Reserve secretary of the Lexington YWCA.

Succeeding Miss Barbara F. Brown, the new secretary will assume office September 1.

Miss Crouch for the past six months has been doing orientation work with the University of Kentucky YWCA, in addition to carrying on studies which resulted in her graduation. She previously attended Western State Teachers' College and the Bowling Green Business University at Bowling Green and spent one summer in camp and settlement work at the University of Chicago Settlement House.

Accompanied by Miss Brown, Miss Crouch is now attending the Southern Girl Reserve Conference at Camp Alexander, Stephens at Crawfordville, Ga.

The conference, an eight-day meeting for Girl Reserve leaders in five southeastern states, is putting special emphasis on group work, personal relations, national defense, worship and problems of the south.

Re-elected under paragraph 20 were Harold Friedman, Ben H. Lowery and John W. Pfeffer.

CAA BEGINS

The authorized quota for the training has been raised from 10 to 20, Colonel Donnelly explained. Applicants are William E. Swope, Philip Angeltuch, John O. Sandbach, William Stephenson, Arthur L. Milburn, William S. Valentine, Robert Pennington, Vernon Alexander, William C. Walker, B. M. Collins, C. J. Cooper, J. P. Conley, E. G. Eley, R. E. Humphreys, and Hugo Hesson.

Applications will still be accepted, Colonel Donnelly said, in case that any of these men fail to pass the physical examination.

Mr. Greenwood Cooanougher, secretary in the University athletic director's office, will audit the course. Ten University students, including one girl, Miss Billy Dyer of Lexington, recently completed the CAA spring training course, took their examinations and are awaiting word from the Chicago CAA headquarters as to the results of the tests.

RECEPTION

(Continued from page one) LUNCHEON PLANNED The annual Phi Delta Kappa luncheon, for all members of the fraternity, will be held at 12:30 p.m. Friday, June 29, in the football room of the Union building, with Dr. V. F. Payne, president, presiding. Speaker for the luncheon will be Dr. Jesse E. Adams, director of the summer session. Members of the Educational Administrators Circle are also invited to attend.

A steak fry will be held Friday night from 4 to 8 by the department of business education at the private picnic grounds of the Lexington Water Company. All business teachers are invited to attend. Tickets, which will cost 50 cents, are available at room 202 of White Hall.

Friday night at 8:30 a moving picture will be presented in the Union building. The film will be shown on the balcony outside the ballroom, weather permitting. If it is raining, the show will be given in the ballroom. This is the first of a series of three movies to be presented free of charge during the first term of the summer session.

A complete list of social events appears elsewhere in today's Kernel.
