

KENTUCKY
AGRICULTURAL EXPERIMENT STATION

OF THE
State College of Kentucky

BULLETIN NO. 95.

COMMERCIAL FERTILIZERS.

LEXINGTON, KENTUCKY,

September, 1901.

KENTUCKY
Agricultural Experiment Station.

BOARD OF CONTROL.

THOS. TODD, Shelbyville, Ky.
T. NOBLE LINDSEY, Frankfort, Ky.
D. F. FRAZEE, Lexington, Ky.
J. K. PATTERSON, President of the College.
M. A. SCOVELL, Director, Secretary.

STATION OFFICERS.

M. A. SCOVELL, Director and Chemist.
A. M. PETER, } Chemists.
H. E. CURTIS, }
H. GARMAN, Entomologist and Botanist.
C. W. MATHEWS, Horticulturist.
J. N. HARPER, Agriculturist.
W. H. SCHERFFIUS, } Ass't Chemists.
L. O. BEATTY, }
R. M. ALLEN, Clerk, Food Division.
J. D. TURNER, Secretary to the Director.
J. O. LABACH, Chemist, Food Division.
GEO. ROBERTS, Ass't Chemist.
T. L. RICHMOND, } Asst's to Entomologist and Botanist.
MISS M. L. DIDLAKE, }
Address of the Station—LEXINGTON, KY.

NOTICE.

The Bulletins of the Station will be mailed free to any citizen of Kentucky who sends his name and address to the Station for that purpose.

Correspondents will please notify the Director of changes in their post-office address, or of any failure to receive the bulletins.

ADDRESS:

KENTUCKY AGRICULTURAL EXPERIMENT STATION,
LEXINGTON, KY.

Bulletin No. 95.

Analyses of Commercial Fertilizers.

Number of Brands. There were 268 different brands of commercial fertilizers registered from January 1, to May 1, 1901. Of these different brands, 159 were complete fertilizers, or fertilizers containing all three of the essential ingredients, namely: phosphoric acid, nitrogen and potash; 35 were acid phosphates, or superphosphates; 6 contained a mixture of acid phosphate and nitrogen compounds only; 33 acid phosphate and potash salts only; and 35 were classed as bones or tankage.

Samples Collected and Analyzed. Three hundred and forty six samples were collected by deputy inspectors, or were sent by farmers from various parts of the state; 281 samples were those sent in by firms as official samples; of these samples, 438 were analyzed by the Station.

Results of the Analyses. The results of the analyses show that of the 438 samples analyzed, 83, representing 71 brands and 30 firms, fell so far below the guaranteed analyses in phosphoric acid, nitrogen or potash, or any two, or all three of these ingredients, that the deficiencies could not be accounted

for by variations in sampling or analysis. It is probable that in most cases, variations can be accounted for by hurried or careless mixing at the factories, or gross mistakes in shipping one brand for another, but in one or two instances, the results show a desire on the part of the manufacturer to guarantee a higher percentage of the essential ingredients than the goods contain.

The great majority of the manufacturers, however, have furnished in most instances, fertilizers fully up to guarantee.

The following table gives the names of all manufacturers legally selling fertilizers in the State this year up to May 1, and the number of samples analyzed of each firm's fertilizers taken from various places in the State or furnished by the manufacturers.

The table also shows in how many of these samples there was a serious deficiency of either phosphoric acid, nitrogen or potash, and in how many the percentages of these constituents are such as to be considered acceptable, from the point of view of the buyer, either because they equal or exceed the percentage guaranteed by the manufacturer, or because a slight deficiency in one constituent is, in the Director's judgement, fully made up by an excess in one or both of the others. Under the heading "Relative Value Per Ton," is shown in how many instances the "estimated value per ton" calculated from our analysis, equals or exceeds the value calculated from the manufacturer's minimum guaranteed analysis, and in how many it is too low, reasonable allowance having been made for unavoidable variations. This table should be carefully studied. It concisely reviews each firm, showing how the samples of fertilizers taken from various places in the State compare with what was guaranteed. In order, however, to see the amount of variations from the guaranteed analyses, this table should be studied in connection with the table of results of analyses, which follows this introduction. This table can be easily referred to, as the names of the firms are arranged in alphabetical order.

It is evident from the preceding table that while most of the fertilizers examined ran above the minimum guarantee, yet a thorough and careful inspection seems essential. It is hoped that farmers will generally take advantage of Section 8 of the fertilizer law, and when they purchase fertilizers, at least in quantity, that they will take a sample in accordance with Section 8 and send it to the Station for free analysis.

Essentials in Taking a Sample. 1. Take it at the time of purchase, and if possible in the presence of agent or seller. 2. Take a sample from not less than two bags, and from one additional bag for every ten purchased; mix these samples carefully and take at least a pint of this mixed sample, put it into a fruit jar, seal, box and express to M. A. Scovell, Director, Lexington, Ky. 3. Take the sample in the presence of at least one witness, and have the witness sign the required certificate. 4. The certificate for free analysis to be sent by mail and should be in accordance with the law as given in Section 8.

If the sample is taken in accordance with the above directions it may be sent by express and the charges will be paid by the Station.

Form of Certificate. A good form of certificate is the following, and blank certificates will be sent free to any farmer requesting the same.

CERTIFICATE FOR FREE ANALYSIS.

M. A. SCOVELL, Director, Lexington, Ky.:

This is to certify that I am not a dealer in, or agent for the sale of any fertilizer, and that the fertilizer, a sample of which I have sent by express to you for free analysis was purchased by me..... 190 for my own use and not for sale.

I further certify that the sample was taken at the time of purchase from at least 10 per cent. of the sacks or other packages comprising the whole lot purchased, and that it was taken as provided in Section 8 of the fertilizer law, in the following

described manner, to wit:.....

.....

.....

Upon receipt of the analysis from you, I agree to furnish you with a tag taken from one of the sacks sampled, the name and address of the firm or agent of whom the fertilizer was purchased, and the amount purchased.

(Signature).....
(P. O. Address).....

Signature of Witnesses:

.....

Should, however, any farmer desire to take a sample and not have a blank certificate at hand, he may write one in full like the form above given, or take the sample in presence of seller and witness and so mark it that he can identify it subsequently in a certificate, and send it at once to the Experiment Station with the request that the station furnish form of certificate, such certificate to be filled out upon receipt covering the sample and properly signed by sender and witnesses and sent by return mail to the Station.

Section Providing for Free Analysis. The section of the Fertilzer Law, providing for the taking of samples for free analysis is as follows:

SEC. 8. Any person not a dealer in, or agent for the sale of any fertilizer who may purchase any commercial fertilizer in this State for his own use and not for sale, may take a sample of the same for analysis, which analysis shall be made by the said Experiment Station free of charge. Such sample for free analysis shall be taken by the purchaser in presence of the person, company or agent selling the fertilizer from at least ten (10) per cent. of the sacks or other packages comprising the whole lot purchased, and shall be thoroughly mixed and at least one pound of the material after mixing must be put into a jar or can, securely sealed and marked in such a way as to surely identify the sample and show by whom it was sent, without giving the name of the fertilizer or the person from whom it was purchased, and must be forwarded to the Director of the Kentucky Agricultural Experiment Station, Lexington,

Ky. The purchaser shall also send with the sample a certificate signed by himself and witness, or by two witnesses, stating that the sender has purchased the fertilizer for his own use and not for sale, and that the sample was taken in the manner prescribed in this section. Provided, however, that if the person, company or agent shall refuse to witness the taking of the sample, then the sample may be taken at the time of the purchase in the manner already described in the presence of two witnesses who shall certify to the manner of taking the sample. The purchaser shall preserve the official label from one of the bags or other packages sampled to be sent to the Director after having received the report of analysis of the sample, and at the same time he shall furnish to the Director the name and address of the firm of whom the fertilizer was purchased and the amount purchased; and any person having sent a sample for free analysis, under the provisions of this section, who shall, after having received the report of analysis of the same, refuse to furnish the required information, shall thereafter forfeit the privilege of free analysis of fertilizers under this section. But if any sample shall have been submitted for free analysis without all the requirements of this section having been complied with, the Director shall inquire into the case and may accept the sample for free analysis if he believes that it is a fair sample of the fertilizer as it was delivered to the purchaser.

Values Used.—In calculating the relative value per ton, the following values have been used;

Soluble and reverted phosphoric acid in mixed fertilizers.....	6c per lb.
Soluble and reverted phosphoric acid in plain acid and uncidulated phosphates.....	5c per lb.
Insoluble phosphoric acid in mixed fertilizers.....	2c per lb.
Insoluble phosphoric acid in plain acid phosphates.....	Nothing.
Phosphoric acid in fine bone	4c per lb.
Phosphoric acid in medium bone.....	3c per lb.

Fine bone is all that passes through a sieve with meshes one-twenty-fifth inch square. Medium bone passes through a sieve with meshes one-sixth inch square, but does not include fine bone.

Nitrogen in all fertilizers.....	15c per lb.
Potash in all fertilizers, from sulphate.....	6c per lb.
Potash in all fertilizers, from muriate.....	5c per lb.

The term "Potash from muriate" does not indicate necessarily that the manufacturers used muriate of potash in furnishing the potash; they may have used sulphate of potash, or other salts of potash, but in all fertilizers where the term "Potash from Muriate" is used there is enough chlorine present to combine with the potash, either from salt in the tankage used, or the potash salts used, as muriate, kainit, carnallite, etc. As the objection to the use of muriate of potash arises from the chlorine present in this salt, it likewise follows that chlorine in a fertilizer is objectionable, whether put in with the potash or otherwise. The using of sulphate of potash where there is chlorine present in other ingredients of the fertilizer will not obviate the injurious effect of the chlorine, and therefore we take this method of showing chlorine present by designating the potash as "from muriate."

Explanation of the Table. In the table of analyses, following the name of each brand will be found the analysis of the sample furnished by the manufacturer at the time the fertilizer was entered for sale and which was accompanied by an affidavit giving the guaranteed analysis. This is the analysis that is marked "manufacturer" in the column headed "From Whom Obtained." If any other analyses of the same brand have been made, they will be found following this analysis. These samples have been collected by deputy inspectors or sent in by farmers. The manufacturer's guarantee is printed last in *italic* figures.

The figures in the table which are set in bold face type are those results which, in the judgment of the Director, were too low to be acceptable. Where the total phosphoric acid in samples of bone is marked with (*) it indicates that the bone contains soluble phosphoric acid. This soluble phosphoric acid is an indication of either the addition of acid phosphate to the bone, in which case it would not be a pure raw bone, or else that the bone containing this soluble phosphoric acid was not strictly a pure or high grade bone, but contained trashy materials, which carried with them the soluble phosphoric acid.

The names of the manufacturers are arranged in alphabetical order, and all the analyses of the same brand have been grouped together.

A. M. PETER, } Chemists.
H. E. CURTIS,

September, 1901.

The following is a list of Bulletins issued by the Kentucky Agricultural Experiment Station since its organization. Those marked with a star * are out of print:

- *No. 1.—Do Fertilizers Affect the Quality of Tobacco? Dec. 23, 1885.
- “ 2.—Corn Fodder as Food for Stock. Jan. 4, 1886.
- * “ 3.—Milk.
- * “ 4.—Distillery Slop.
- * “ 5.—Analyses of Feeding-Stuffs.
- “ 6.—Clover.
- * “ 7.—Fertilizers.
- * “ 8.—Experiments with Wheat. Sept. 25, 1886.
- “ 9.—Experiments with Potatoes. March 1, 1887.
- * “ 10.—Fertilizer Analyses. May, 1887.
- “ 11.—Wheat Experiments. September, 1887.
- * “ 12.—Fertilizer Analyses. Dec. 31, 1887.
- “ 13.—Commercial Fertilizers. April, 1888.
- “ 14.—Analyses of Commercial Fertilizers. July, 1888.
- “ 15.—Wheat Experiments. September, 1888.
- * “ 16.—Potato Experiments. December, 1888.
- “ 17.—Corn Experiments. February, 1889.
- “ 18.—1. Hemp Experiments. 2. Notes on the Treatment of an old Apple Orchard. April, 1889.
- “ 19.—Experiments in Pig Feeding. May, 1889.
- “ 20.—Commercial Fertilizers. July, 1889.
- * “ 21.—Wheat Experiments. The Grain Louse. September, 1889.
- “ 22.—Potato Experiments. December, 1889.
- “ 23.—1. Experiments With Oats. 2. Tests of Fertilizers on Meadow Land. February, 1890.
- “ 24.—Broom-Rape of Hemp and Tobacco. March, 1890.
- “ 25.—Strawberries. April, 1890.
- “ 26.—Corn Experiments. April, 1890.
- “ 27.—Experiments with Commercial Fertilizers on Hemp. April, 1890.
- “ 28.—Tobacco Experiments. May, 1890.
- “ 29.—Commercial Fertilizers. July, 1890.
- “ 30.—Wheat Experiments. A new Wheat Insect. August, 1890.
- “ 31.—Some Strawberry Pests. December, 1890.
- “ 32.—Strawberries. Vegetables. March, 1891.
- “ 33.—Corn Experiments. April, 1891.
- “ 34.—Commercial Fertilizers. August, 1891.
- “ 35.—1. Experiments with Wheat. 2. Experiments with Oats. September, 1891.
- * “ 36.—Commercial Fertilizers. December, 1891.
- “ 37.—Experiments with Potatoes. December, 1891.
- “ 38.—1. Vegetables. 2. Strawberries. March, 1892.
- “ 39.—Marls. March, 1892.

- No. 40.—Some Common Pests of the Farm and Garden. March, 1892.
" 41.—Commercial Fertilizers. July, 1892.
" 42.—1. Experiments with Wheat. 2. Experiments with Oats. September, 1892.
" 43.—Commercial Fertilizers. December, 1892.
" 44.—Bordeaux Mixture for Apple Pests. January, 1893.
" 45.—Field Experiments with Fertilizers. 1. Corn. 2. Potatoes. 3. Tobacco. April, 1893.
" 46.—Commercial Fertilizers. August, 1893.
" 47.—1. The Pests of Shade and Ornamental Trees. 2. An Experiment on Plum Rot. December, 1893.
" 48.—Commercial Fertilizers. January, 1894.
" 49.—1. Destructive Locusts in Kentucky. 2. The Bud-Worm of Tobacco. March, 1894.
" 50.—1. Fruit Growing in Kentucky. 2. Notes upon Vegetables. April, 1894.
" 51.—Commercial Fertilizers. August, 1894.
" 52.—Commercial Fertilizers. 1. Official Analyses. 2. Analyses of Farmers' Samples and Samples Collected by Deputy Inspectors. December, 1894.
" 53.—1. Spraying for Codling Moth. 2. The use of Arsenites on Tobacco. 3. The use of Bisulphide of Carbon and Hydrocyanic Acid Gas on Low growing Plants. December, 1894.
" 54.—Notes on Vegetables. March, 1895.
" 55.—Field Experiments with Fertilizers. 1. Corn. 2. Potatoes. 3. Tobacco. 4. Hemp. April, 1895.
" 56.—Analyses of Commercial Fertilizers. August, 1895.
" 57.—1. Wheat Experiments. 2. Oat Experiments. September, 1895.
" 58.—Cut Worms in Kentucky. November, 1895.
" 59.—Spraying Experiments in 1895. December, 1895.
" 60.—Analyses of Commercial Fertilizers. 1. Official Analyses. 2. Analyses of Farmers' and Inspectors' Samples. December, 1895.
" 61.—Potatoes. 1. Experiments with Fertilizers. 2. Insects and Fungus Pests. 3. Tests of Varieties. March, 1896.
" 62.—Strawberries. March, 1896.
" 63.—Tobacco. May, 1896.
" 64.—Analyses of Commercial Fertilizers. July, 1896.
" 65.—Analyses of Commercial Fertilizers. 1. Official Analyses. 2. Analyses of Other Samples. December, 1896.
" 66.—Tobacco. February, 1897.
" 67.—The San Jose Scale in Kentucky. May, 1897.
" 68.—Analyses of Commercial Fertilizers. May, 1897.
" 69.—Wheat. 1. Test of Varieties. 2. Test of Fertilizers. 3. Descriptions of Varieties. 4. Treatment for Smut. September, 1897.

- No. 70.—1. The Woolly Mullein. 2. The Gape Disease of Poultry. December, 1897.
" 71.—Analyses of Commercial Fertilizers. 1. Official Analyses. 2. Analyses of Other Samples. December, 1897.
" 72.—Potatoes. 1. Experiments with Fertilizers. 2. Corrosive Sublimate and Sulphur for Potato Scab in 1896. 3. Corrosive Sublimate for Potato Scab in 1897. February, 1898.
" 73.—Strawberries. February, 1898.
" 74.—1. The Chinch Bug. 2. Earthworms a Source of Gapes in Poultry. May, 1898.
" 75.—Commercial Fertilizers. June, 1898.
" 76.—Commercial Fertilizers. August, 1898.
" 77.—Wheat. 1. Test of Varieties. 2. Test of Fertilizers. 3. Notes and Descriptions. 4. Red Rust of Wheat. September, 1898.
" 78.—Ginseng, its Nature and Culture. November, 1898.
" 79.—Commercial Fertilizers. December, 1898.
" 80.—1. Some Pests Likely to be Disseminated from Nurseries. 2. The Nursery Inspection Law. March, 1899.
" 81.—1. A Method of Avoiding Lettuce Rot. 2. Potato Scab Experiments. March, 1899.
" 82.—Commercial Fertilizers. July, 1899.
" 83.—Wheat. 1. Experiments with Fertilizers. 2. Variety Tests. 3. Notes and Descriptions. August, 1899.
" 84.—The Elms and Their Diseases. November, 1899.
" 85.—Commercial Fertilizers. December, 1899.
" 86.—Inspection and Analyses of Foods. January, 1900.
" 87.—1. Kentucky Forage Plants—The Grasses. 2. Analyses of Some Kentucky Grasses. May, 1900.
* " 88.—Commercial Fertilizers. August, 1900.
" 89.—Wheat. 1. Test of Varieties. 2. Test of Fertilizers. 3. Descriptions of Varieties. September, 1900.
* " 90.—Commercial Fertilizers. December, 1900.
" 91.—1. Enemies of Cucumbers and Related Plants. 2. Experiments with Potato Scab. 3. The Food of the Toad. March, 1901.
" 92.—Grapes. April, 1901.
" 93.—1. Diseases of Nursery Stock. 2. Rabbits and Their Injuries to Young Trees. June, 1901.
" 94.—Wheat. 1. Test of Varieties. 2. Descriptions of Varieties. September, 1901.
" 95.—Commercial Fertilizers. September, 1901.
