### FOREWORD

This bulletin contains considerable information regarding high schools in Kentucky. Some data are given regarding every high school in operation.

The official rating given the high schools by the State Board of Education was made on the recommendation of "The Commission on Secondary Schools of the Kentucky Association of Colleges and Secondary Schools." This Commission is composed of the following members:

W. J. Baird	Mark Godman	R. E. Jagers
P. E. Barker	Herbert Hazel	M. E. Ligon
W. E. Burton	T. A. Hendricks	J. F. McWhorter
Sister Casilda	C. I. Henry	Juliet J. Poynter
J. M. Deacon	J. H. Hewlett	Chas. O. Ryan
R. A. Edwards	Sister Mary Hilda	W. S. Taylor
Paul Garrett	O. E. Huddle	S. B. Tinsley

The material in this bulletin has been prepared by the Division of Supervision, of this Department.

H. W. PETERS

**SECONDARY EDUCATION IN KENTUCKY**

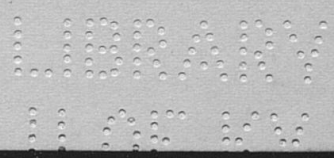

*Schools and Types of Organization.* There are 783 high school organizations in Kentucky. This number is in contrast to 808 such organizations last year. Of the 783 high schools reporting this year, 686 are complete organizations, i. e., they offer work through the twelfth grade. More than one-half of these complete organizations are organized as six-year high schools (grades 7-12). This number represents an increase of 18 such organizations since last year. There are 295 of the complete high schools organized on the traditional four-year basis (grades 9-12). This number represents a decrease of 24 such organizations since last year. It is apparent from these figures that the movement in favor of the six-year high school has developed so rapidly in this state that it appears it is to become the standard rather than simply another form of high school organization. This seems to be true in both county and independent districts. Last year there were 7 senior high schools (grades 10-12); this year there are 9. Last year there were 29 junior high school organizations (grades 7-9); this year there are 34. The number of schools organized on the 9-11 and 7-10 basis is practically the same as last year. The big decrease in numbers of high school organizations has taken place in those organized on the two-year basis (grades 9-10). Last year there were 33 schools of this type; this year there are 18.

The following table gives data regarding the types of high school organizations in Kentucky.

**TABLE I**  
**Types of High School Organizations and Number of Each**

Types of Organizations	County Districts	Independent Districts	Private Secondary	State and Municipal	Total
Grades 7-12 .....	263	108	12	8	391
Grades 9-12 .....	159	75	60	1	295
Grades 10-12 .....	0	8	1	0	9
Grades 7-9 .....	16	18	0	0	34
Grades 9-11 .....	15	2	1	0	18
Grades 9-10 .....	15	2	1	0	18
Grades 7-10 .....	18	0	0	0	18
<b>Total .....</b>	<b>486</b>	<b>213</b>	<b>75</b>	<b>9</b>	<b>783</b>

The above table not only shows the number of different types of high school organizations in the state, but also gives the number of high schools under the different types of control. It will be noted that

486 high schools are operated and maintained by county boards of education, while 213 are maintained by boards of education in independent school districts. Seventy-five are private secondary schools. The other 9 represent 5 high schools that are operated in connection with the state teacher training institutions, the 2 state vocational high schools at Paintsville and Paducah, the School for the Blind in Louisville, which is operated by the state and the Ormsby Village School in Jefferson County, which is maintained by the municipality of Louisville.

*Size of High Schools.* The following table gives interesting data regarding the size of high schools.

TABLE II  
Size and Number of High Schools

Size Based on Enrollment	County Districts		Independent Districts		Private Secondary		State and Municipal		Total
	White	Colored	White	Colored	White	Colored	White	Colored	
Below 50	66	15	1	17	12	0	1	0	112
50-99	158	7	18	17	34	1	1	0	236
100-199	163	0	53	13	20	0	3	1	253
200-499	70	1	55	5	7	0	3	0	141
500 and above	6	0	30	4	1	0	0	0	41
Total	463	23	157	56	74	1	8	1	783

The above table shows that 348 of our high schools enroll less than 100 pupils. This number is in contrast to 407 such schools last year. In other words there has been a decrease of 59 high schools with enrollments of less than 100 pupils. Last year there were 246 high schools enrolling 100-199 pupils. This year there are 253 such schools, or an increase of 7. Last year there were 117 high schools that enrolled 200-499 pupils. This year there are 141, or an increase of 24. Last year 38 high schools had enrollments above 500 pupils. This year there are 41, or an increase of 3. In other words the day is passing when we shall think of high schools in Kentucky as small thirty-, forty-, or fifty-pupil schools. We are definitely headed in the direction of high schools that enroll 100 or more pupils. When one considers that among the high schools enrolling less than 100 pupils that there are 47 private schools and 46 high schools for Negroes, it becomes apparent that Kentucky does not rate so badly when we recognize that in the Nation as a whole the median high school enrollment is less than 100 pupils.

The number of small, struggling high schools which continue to exist are not continuing because of any conviction of their worth, but rather because of such factors as sparseness of population in areas where they are located, inadequate financial ability of certain counties to operate a better system of schools, or poor road conditions for transportation to larger and better high school centers. In some sections it has been a question whether to have a very small high school or no high school at all. In counties where the population is fairly dense and roads are good, one expects to find consolidated high schools with enrollments large enough to justify a rich and board program of work.

As has been pointed out, the percentage of small high schools is decreasing. More and more county boards of education and taxpayers are becoming convinced that small high schools should be regarded as concessions to untoward conditions rather than as things to be desired.

An examination of the annual reports of high schools employing fewer than five or six teachers and enrolling fewer than 125 or 150 pupils, as well as an observation of their operation, convinces one of the limitations of these schools. Usually one finds that the experience of the teachers in these schools is less than the experience of teachers in larger schools. The teaching load of teachers in the small high schools is usually greater than that of teachers in high schools with 150 or more pupils as judged by the number of classes taught, the number of different daily preparations, the number of different subjects taught and the number of subjects taught in fields in which the teacher is poorly trained. Also in the small high school one usually finds that science, shop and library equipment is inferior, extra-curricular activities are limited, cost of instruction per pupil is high and curricular offerings are confined largely to academic, college preparatory subjects. In addition to these items of weakness in the small high school, one usually finds that the general tone and dignity of the larger high schools are more desirable as are also the opportunities for contacts which stimulate worth-while social and personal development on the part of the students.

It is hoped that county school authorities and those who support the schools will see the wisdom of abandoning many of their small, expensive and usually inefficient high schools through transporting their pupils to larger community centers where a broader and more enriched program of work is provided. Every county superintendent and every county board in counties where small, struggling high schools are operated should carefully survey the possibility of providing the boys and girls of these little schools with the opportunities that are offered pupils in larger centers. To bring this about generally

requires a high type of leadership, since such proposals often run afoul of local pride, community jealousies and noneducational interest of the people themselves. It is only in this way, however, that secondary education in rural areas can provide boys and girls with a program of work that better fits them for college or for passage directly into life activities if college entrance is not possible.

TABLE III  
High School Enrollments—Classified by Grades and Types of Control

	County Districts		Independent Districts		Private Secondary		State and Municipal		Total
	White	Colored	White	Colored	White	Colored	White	Colored	
7th Grade	8,187	133	8,244	1,476	120	0	206	15	18,381

1937-38	652	80	76	808
1938-39	628	80	75	783

Table IV shows a continuous growth in the number of high schools from 1915-16 to 1934-35. Since 1934-35 there has been an increase in the number of colored high schools, while there has been a slight

decrease in the number of private secondary schools and a more marked decrease in the number of public white high schools. The decrease in the number of public white high schools is a result of the merger of small county high schools into larger high school units.

Table V gives the high school enrollments from the school year 1914-15 through the present year.

TABLE V  
Enrollment by Years in Different Types of High Schools

School Year	Public White High Schools	Public Colored High Schools	Private Secondary Schools	Total
1914-15	15,547	No report	No report	15,547

1930-31	61,589	4,054		65,643
1931-32	67,268	4,677		71,945
*1932-33	*83,092	*6,994	7,407	97,493
1933-34	83,930	6,961	7,445	98,336
1934-35	88,583	7,983	7,846	104,412
1935-36	101,017	6,546	8,173	115,735
1936-37	106,799	8,711	8,994	124,504
1937-38	109,587	8,938	9,610	128,135
1938-39	117,284	9,587	9,166	136,037

\* Beginning with the school year 1932-33, the enrollments of the 7th and 8th grades of six-year high schools and of junior high schools are included in the totals.

Table V presents an interesting picture of the increase in high school enrollments in the different types of high schools since 1915 to the present day. In this increase in high school enrollments, one finds an increase that is many times greater than the increase in the state's population during the same period. Only one conclusion can be drawn from these figures and that is the growing success of the ideal of high school education for all boys and girls of high school age in the state.

The character of our high school population has changed greatly since 1915. Then the high school was thought of only as a school for the few rather than an institution for the many. In fact prior to 1908, there were fewer than 50 high schools in the state. They were small, enrolling fewer than 5,000 pupils and were all located in cities. Practically all boys and girls who lived in rural areas were without high school advantages except in so far as private schools were organized. Many of these private schools did not offer work beyond the eighth or ninth grades. It was not until 1908 that the counties

were legally bound to establish high schools and it was not until 1914 that districts independent of the county system were required by law to provide high school education for their boys and girls. Since the date of these legal demands on county and independent districts, the growth in numbers of high schools and enrollments has been phenomenal.

The above has been written for two purposes; first, to show that the idea of public secondary education is of comparatively recent date in this state, and, second, that the phenomenal development of this idea has within it significant implications for those who administer public secondary schools in both county and independent districts. It was once thought that the public high school was intended for select economic and social groups and that preparation for college was its chief aim. Today, however, when one notes that only thirty per cent of those who finish high school enter college, one is conscious of the fact that our secondary schools are attracting not only the select, but every other group of our economic and social life. As boys and girls of all groups of our population continue in increasing numbers to find their way into high school, then those who administer secondary education will be called upon more and more to reorganize high school work so as to better meet the varied interests, needs, aptitudes and abilities of those who attend. This calls for and will continue to

TABLE VI

call for greater adaptation of instruction and subject matter courses to the economic and social life of today as well as to the individual differences of pupils.

The above table shows the situation as regards the number of accredited high schools by years since 1909. When one thinks of a high school in its true sense, one thinks of an institution that offers a program of work through the twelfth grade. High schools that are organized to give work which does not extend through the twelfth grade, excepting junior high schools (grades 7-9) should be looked upon as incomplete, feeder schools for regularly organized high schools, i. e., schools that offer pupils a complete high school program through the twelfth grade.

\* Interpretation of High School Ratings.

A—Accredited through the entire high school course (through grade twelve).

B—Accredited through the entire high school course (through grade twelve).

11 Gr.—Accredited through grade eleven.

10 Gr.—Accredited through grade ten.

9 Gr.—Junior high school—recognized through grade nine.

T—This initial when attached to the designation of any rating indicates that such rating is given in the face of some deficiency, that it is temporary for this year only, and that the school should be discontinued at the close of this school year or reorganized in full compliance with regulations for accrediting.

E—This initial suggests that an emergency is recognized to exist that may justify the operation of the school even with an observed shortage in the number of pupils or of teachers.

U—Unaccredited.
