## OFFICERS OF THE ASSOCIATION

### Alumni Representatives on Board of Trustees

GEORGE G. BROCK, London, Ky.  
JOHN E. BROWN, Shelbyville, Ky.  
PHILIP P. JOHNSTON, JR., Lexington, Ky.  
J. I. LYLE, New York City.  
SAMUEL B. MARKS, Lexington, Ky.  
J. F. BATTAILE, Lexington, Ky.

### General Association

J. M. GRAVES, President, Pittsburg, Pa.  
J. H. GARDNER, Vice-President, Tulsa, Okla.  
J. D. TURNER, Secretary-Treasurer, Lexington, Ky.  
HARRY STAPLES, Editor, The Alumnus, Lexington, Ky.

### Executive Committee

W. E. FREEMAN, Chairman, Lexington, Ky.  
FRANK BATTAILE, Lexington, Ky.  
LOUIS E. HILLENMEYER, Lexington, Ky.  
MISS LUCY K. HUTCHCRAFT, Lexington, Ky.  
WALLACE HOEING, Louisville, Ky.  
MRS. CHARLES J. SMITH, Lexington, Ky.  
PRESIDENTS OF THE CLUBS.  
PRESIDENT AND SECRETARY, *ex-officio*.

## LOST LIST.

If any one can supply the address of any of the "Lost," the Secretary will appreciate it.

Caleb S. Perry, '79.  
Henry M. Wright, '79.  
B. P. Eubank, '84.  
Jas. R. Scott, '85.  
Margaret Wilson, '92.  
John G. Maxey, '92.  
B. C. Keiser, '94.  
W. C. Trigg, '94.  
John E. Hestand, '00.  
T. A. Jones, '00.  
U. A. Hatfield, '02.  
T. F. Finneran, '03.  
Edward Rand, '03.

# THE KENTUCKY ALUMNUS

IS PUBLISHED BI-MONTHLY—SEPTEMBER, NOVEMBER, JANUARY, MARCH,  
MAY AND JULY OF EACH YEAR—BY THE ALUMNI ASSOCIATION OF  
THE UNIVERSITY OF KENTUCKY, AT LEXINGTON, KENTUCKY.

Entered as second-class matter September 28, 1916, at the post-office at  
Lexington, Kentucky, under the Act of March 3, 1879.

THE SUBSCRIPTION PRICE FOR THE KENTUCKY ALUMNUS IS \$1.00 PER YEAR.  
TO ALUMNI, INCLUDING DUES TO THE ASSOCIATION, \$2.00 PER YEAR.

The Kentucky Alumnus is the official publication of the Alumni Association. It is  
issued bi-monthly by the Association under the direction of the Executive Committee  
in the interest of the Association and University. It therefore represents the  
sentiment and policy of the Alumni organization.

The Editor-in-Chief is appointed by the Executive Committee of the Alumni Association  
and the Associate Editors are the Class Secretaries of the various classes and the  
Presidents of the Alumni Clubs.

## Editorial Comment

### Greetings for 1917.

The advent of the new year automatically throws us into meditations in which retrospect and prospect are curiously blended. It is to be hoped that all of us have at least utilized the past as a means of learning to direct our actions better in the future. The experiences of the past may not have been altogether pleasant nor the results quite gratifying but if we have learned our lessons well, then we have profited.

The University has had her troubles; the results, now visible, are not gratifying but we have learned valuable lessons. The Alumni have learned that it is their privilege and duty to stand by the old University, to afford help and constructive criticism without knocking. We have a Board of Trustees more alert and interested than ever before and we believe they are going to do great things in the immediate future, looking to greater efficiency and higher ideals about the University. It is the duty of each of us to lend our interested help.

The Alumnus sends this word of greeting with the sincere wish that the New Year may bring much happiness, joy and prosperity to its friends and Alma Mater.

—o—

### Most Gratifying.

Most gratifying has been the response to our appeal for assistance and we repeat for the benefit of those who came in late that the Editor regrets exceedingly the lack of time or means to personally answer the many letters of encouragement and remittances and we take this means of assuring you that the box office receipts speak more eloquently than pages of literature, and old Kentucky State's place in the sunshine of educational institutions is now a certainty, and the labours and sacrifices of dear old "Aunt Lucy" Blackburn, James K. Patterson and others too numerous to mention but known without naming, have not been in vain. We thank you.

**The Carnegie Foundation.** When the Carnegie Foundation was first established, it was not intended that the Land Grant Colleges should enjoy its benefits. Later, at the unanimous request of the Land Grant Colleges of the United States, they were admitted to the privileges of the Foundation, although the action required an increase of the endowment from ten million dollars to fifteen million dollars.

From the time of the establishment of the Carnegie Foundation, its great value has been fully recognized by the foremost educational institutions of the country. The dominating idea at the time of the establishment of the Foundation seems to have been to provide retiring allowances for teachers, but educators soon learned that this was only one of its great functions. There is scarcely a college or university, or even a high school, in the country that has not directly or indirectly felt its beneficial influences. The preparatory schools have been compelled to strengthen their courses in order to meet the higher entrance requirements of the higher institutions brought about by the standards required by the Carnegie Foundation. The whole movement has been a matter of striving for greater excellence in curricula, teaching and administration.

Any institution of higher learning may make application for admission to the benefits of the Foundation, but there are many conditions which may cause a refusal to grant the request. For example: "The Trustees of the Foundation reserve the right to decline the application of any such institution if it is subject to political control or interference which, in the opinion of the Trustees of the Foundation, impairs its educational efficiency."

The following extract from Dr. Pritchett's preface to the bulletin on Academic and Industrial Efficiency gives an idea of the comprehensive way in which university efficiency is studied by the Foundation. \* \* \* \* \* "They may gain from the intelligent study of college forms of organization a real help from those who conduct industrial enterprises, without at the same time in any measure losing sight of the fact that scholarly and spiritual leadership is the highest quality of college efficiency and the one most necessary to attain."

There is no greater stimulus to excellence and the exercise of human ingenuity than competitive exhibits where the products of all competitors are carefully scrutinized by well qualified and disinterested judges, where those of greatest excellence are appropriately rewarded and where the less fortunate may learn the standards of excellence for which they must strive if they would succeed. All are wiser and more capable because of having competed and naturally strive to correct their short comings.

**There are a number of scholarly men on our faculty who are worthy of the benefits of the Carnegie Foundation. It is unfair to them to deprive them of these benefits because the institution as a whole does not measure up to standards. Men who are worthy of the benefits will refuse to attach themselves here, and ultimately we will have a faculty of mediocre qualifications if the conditions are not removed.**

Our University could certainly lose nothing by submitting itself to the scrutiny of the Trustees of the Carnegie Foundation. If we stand approved, we enjoy honor and reap rich benefits; if we stand rejected, we are shown our deficiencies and have at least the benefit of wise counsel in correcting our shortcomings. **The truth can do the just no harm.**

—o—

#### Prevention of Nepotism.

There has been considerable criticism at times—open and implied—of the Board of Trustees on the practice of nepotism. The appointment of relatives of members of the faculty and members of the Board itself to high positions in the University, whether they were best qualified or not for such positions, must force the Board to recognize the fact that it places itself in a position to be criticised. Not only should the Board be not called upon to embarrass itself by passing upon relatives of members of the Board or some member of the Board itself who may be an applicant for a position, but it should not be embarrassed by applications at all, especially for the most important positions on the staff. It is well recognized professional ethics that University and College men will not actively seek the higher positions. The practice in most colleges and universities of high standing is to invite men to join the faculty and they are considered solely on their fitness for the position.

In order to relieve itself of such a handicap and to reassure the public mind of its position in this respect, the Board on its own initiative adopted a rule bearing specifically on the question, which appears at the close of this article.

The Alumnus approves the action of the Board and believes that it will inspire confidence in the public mind. The Alumnus believes that the Board should go a little further and offers the following suggestion which it entertains as being no less pertinent along this line than the resolution concerning nepotism, which is: That no person be appointed on the academic staff of the University who does not hold an academic degree.

The resolution adopted by the Board is as follows:

*Be it Resolved by the Board of Trustees of the University:*

That no appointment hereafter be made to any position in the University or Experiment Station of any member of the Board of Trustees for at least two years after his term of office has expired, nor of any person who is a near relative by blood or marriage of any person already holding a position in the University or Experiment Station, or of any member of the Board of Trustees.

—o—

#### The Alpha Zeta Student Loan Fund.

Alpha Zeta is an honorary fraternity in the Agricultural College, corresponding to Tau Beta Pi in engineering. Although Kentucky has had a chapter of Alpha Zeta for only a few years, Scovell Chapter, as it is called, has long since made its presence felt in encouraging better scholarship and generally higher standards among the agricultural students. Competition for admission to its membership has long since become very keen.

The most recent noticeable action of this chapter of Alpha Zeta helps to show the reason why it is held in such high esteem by all.

Although there are as yet few Alpha Zeta alumni, they have provided a loan fund of \$100.00 to be placed in the hands of the Executive Committee of the Alumni Association to be loaned to worthy students who are having a hard time getting through college. Such action speaks well for the chapter, commands respect and sets a good example, worthy of emulation by others.

—o—

#### Life Membership.

At a meeting during the Golden Jubilee of a few patriotic and loyal alumni for the purpose of discussing the question of finance to bridge the Association over the year, most of those present agreed to take out Life Membership in the Association by paying \$25.00.

Through the generosity of Mr. R. C. Stoll, Class '95, the Association was presented with an elegantly designed membership certificate, suitable for framing, to be issued to those who have taken or may take life-memberships in the Association. The Association greatly appreciates this gift from Mr. Stoll.

There are twenty-two life members in the Association at this time, some of them having taken out life-memberships in the early part of the history of the Association, and some more recently, and their names have been published in The Alumnus heretofore. Those who have just recently taken life-memberships are:

Paul Ingold Murrill, '85.  
 Richard C. Stoll, '95.  
 Joel Irvine Lyle, '96.  
 James William Carnahan, '96.  
 Job D. Turner, '98, (Second Membership).  
 George Roberts, '99.  
 James Henry Gardner, '04.  
 Howard Payne Ingels, '05.  
 George Hubbard Gilbert, '05.  
 Alexander Thornton Lewis, '06.  
 Herman Clayton Robinson, '06.  
 Leo Logan Lewis, '07.  
 Otho Balfour Chisholm, '09.  
 Philip Lee Blumenthal, '09, (Second Membership).

—o—

#### Down at Del Rio.

Down on the border at Del Rio, Texas, is stationed the Third (U. S. A.) Infantry. One of the officers in this division is Captain George W. Ewell, Class of 1902, and with him, a near captain, of Class of 1901, Mrs. George Offutt Ewell. Captain Ewell writes the Secretary as follows:

"\* \* \* I have been a little lonesome today and have taken advantage of the time to write to some of the Class of 1902 in order to raise \$100.00 as a class

Student Loan Fund. \* \* \* \* If you will put me in touch with the proper officials of the Class of 1901, I will see what can be done with that class towards raising another fund, that is, Mrs. Ewell will, as she is a member of that class. \* \* \* \*

What can be more encouraging to the Alumni Association and bespeak the future of the University than such unselfish service of her sons and daughters.

---

## SKETCHES OF THE ORIGIN AND GROWTH OF THE UNIVERSITY OF KENTUCKY.

BY JAMES K. PATTERSON, President Emeritus.

### CHAPTER V.

In 1862 there was but one agricultural college in America. The State of Michigan established her agricultural college five years before the passage of the Morrill Act of 1862. Their college was still in the experimental stage, working tentatively and cautiously for a secure basis on which to build. The Experiment Station at Geneva, New York, had also been in existence for some years, but it confined itself mainly to experimental work. To these two institutions the greater number of agricultural colleges established under the Act of 1862, looked for instructors and for guidance.

One of the ideas which had taken deep root in the American mind was that manual labor constituted an important, if not the principal element in agricultural education, that every student enrolled should do daily labor alternately with work in the class room and in the laboratory and that this labor should be compensated. But compulsory labor was soon discovered as irksome, expensive and unproductive and was gradually abandoned. As long as the system lasted it gave opportunity to energetic and industrious students who had little means at command to earn a subsistence while prosecuting their studies.

The charter of the Kentucky University required that two-thirds of the Board of Curators should be members of the Christian church. They were eager for the growth of the University as a means for the expansion and growth of the church. At the outset, Mr. John B. Bowman was given an enthusiastic support. In the exuberance of their gratitude for his work, the Board of Curators voted him the privilege of residence at Ashland. This they could readily do inasmuch as his services for years in founding and endowing Kentucky University, in consolidating it with Transylvania and in engrafting the Agricultural and Mechanical college upon the consolidation had been gratuitously given to the university. Transylvania had belonged to the State. A majority of its trustees were appointed by the State. Larger contributions had been made by the City of Lexington and by private citizens, in consideration of which they had representatives on its Board, but it was a State institution. Mr. Bowman held that, although the composition of the Board of Curators remained unchanged by the union of Transylvania and Kentucky University, the union required and implied that ecclesiastical interests should no longer be paramount but should be subordinated to public utility. The alliance of the Agricultural and Mechanical College with the consolidated interest and the splendid liberality of Lexington and

Fayette County in providing the money for the purchase of Ashland and Woodland, emphasized his attitude towards the church, the university and the public.

The secular element introduced by the incorporation of the Agricultural and Mechanical Colleges appealed to him with peculiar force and determined him to use all his influence to liberating, through a liberal policy, public education in the university. These views were vigorously and ably contested. They argued that the original Kentucky University was created and endowed by private benefactors, that Mr. Bowman in obtaining their subscriptions to this endowment never intimated even a modified secular administration of the funds subscribed, that their intention was to build up a university for the benefit of the Christian church and that to hand over its administration to aliens, would be a wanton breach of trust. Mr. Bowman replied that while the interests of the church should not and would not be compromised or ignored, that they should not be either obtrusive or exclusive, that the logic of events made necessary a control in which the interests of Transylvania and the Agricultural and Mechanical College should be regarded, and that this could be done quietly and without friction, by mutual concession and good will.

While his influence was still paramount, he endeavored to fill vacancies in the Board by men of influence outside of his church and who shared his views. Such men as the late Frank Hunt, James B. Beck and Benjamin Gratz, men who would give the institution distinction at home and reputation abroad. The height of church influence however, was against him. The non-sectarian members soon discovered that they were ill at ease with their associates, that while they were treated with all courtesy, their absence would be more acceptable to the majority than their presence. As time went on the lines became more drawn. Mr. Bowman in loving, true confidence and the support of the majority, found that his ability to raise money among the membership of his church has gone and that an appeal to the general public under existing conditions, was futile. His intention had been to raise a million dollars with which to erect on his Ashland estate, the buildings necessary for the colleges of Arts and Science. Agriculture, Mechanic Arts, with the museums, libraries, laboratories and other equipment whereby instruction was effective. His intention was to use the buildings on the Transylvania grounds for law and medicine. These hopes were blighted.

The matriculation had grown rapidly between 1865 and 1871. From this time on the cleavage between the Bowman and the anti-Bowman factions became more pronounced, the attendance gradually declined. The instruction of the class soon, however, steadily improved. Of the Agricultural and Mechanical College, John Augustus Williams, the first president, a man of supreme ability, good education and a good organizer, resigned. Joseph Desha Pickett was appointed *pro tempore* and served one year. In 1869 I was appointed president, and served until January, 1910, when I resigned after a continuous service of forty-one years.

An effort was made by the anti-Bowman members of the Board of Curators during the session of 1873-4 of the General Assembly, to amend the charter of

the university. The proposed amendment required that all the members of the Board instead of two-thirds, be members of the Christian church. Mr. Bowman saw clearly that if this were done, the State would at once withdraw the Agricultural and Mechanical College from the University. He therefore resisted the proposed change with all the energy and all the resources at his command. Inasmuch as I shared his views upon the public policy of the University and its obligation to the State, he urged me to assist him in his defense and make an argument before the committee in the Senate to which the amendment was referred. The supporters of the measure had made a temperate, an able and a plausible plea. The issue appeared to be very uncertain. Before a full Senate in committee, I made an address in opposition to the amendment. When the measure came before the Senate for action, the motion to amend was lost by one vote. The victory won by Mr. Bowman however, contained the elements of his ultimate defeat. The internecine warfare became more bitter than ever, the institution declined in attendance and in reputation. The General Assembly of 1877-8, acting on the report of a commission of inquiry, passed an act dissolving the relationship of the Agricultural and Mechanical College to Kentucky University. The same legislature appointed a commission to recommend the future location of the college, and to lease meanwhile from the Kentucky University, the grounds and buildings necessary to carry on its operations until the next legislature should determine where it should be established.

This ended the first period of its existence.

---

### BASKET BALL SCHEDULE.

January 17—Centre at Lexington.  
 January 23—Vanderbilt at Nashville.  
 January 24—Ramblers at Nashville.  
 January 27—Georgetown at Georgetown.  
 January 30—Rose Polytechnic, of Terre Haute, Ind., at Lexington.  
 February 2-3—Vanderbilt at Lexington.  
 February 9-10—Tennessee at Lexington.  
 February 16—Centre at Danville.  
 February 21—Georgetown at Lexington.  
 March 2-3—Tennessee at Knoxville.

---

### EARLY HISTORY OF ATHLETICS.

BY PROF. A. M. MILLER.

#### ARTICLE VII.

Since the publication of Article VI, I have been informed that Dan Bryan was the manager of the 1905 football team.

My attention has also been called to the fact that the game of football played between Centre and our institution in the fall of '91 was not the first game of intercollegiate football played in Kentucky, but that games were played between Kentucky University and State College before that.

It even appears that this was the Rugby game played with the oval ball or perhaps the American game modified from the Rugby; though the method of counting the score was peculiar.

Mr. Miles M. Dawson, of New York, a student at Kentucky University from 1878 to 1880, and Mr. C. C. Calhoun, of Washington, a student at the old A. & M.—when a little later than this the A. & M. were separated—both remember these intercollegiate games.

Prof. J. W. Porter, of Lexington, also remembers these games well and has supplied me with incidents connected with them. An account of the first game of intercollegiate Rugby football in Kentucky, and also possibly west of the Alleghenies, appears in both the Lexington Press and the Lexington Transcript of date April 10, 1880; and a review of this account, accompanying an interview with Dean Patterson, of the University of Louisville, appears in the Lexington Leader of date, Sunday, December 3, 1916.

The leading spirits in the introduction of this sport at Kentucky University were the students, C. L. Thurgood from Australia, who had learned the game there, and Miles M. Dawson, of Minnesota.

The previous fall they obtained from Princeton a ball and a book of rules, and taking up the matter with Centre College, succeeded in arranging a game for Friday, April 9, 1880, which resulted in a victory for K. U. of 13¾ to 0. Upon what system of counting they arrived at the fractional part of the score I am unable to figure out.

Professor John L. Patterson, State College '82, now Dean of the University of Louisville—then a student at the combined Kentucky University and the A. & M. College—was captain of the K. U. team, and Mr. Dick Ernst, a student at Centre from Covington, was captain of the Centre team. The contesting teams were composed as follows:

Kentucky University—Fox, (afterwards to earn fame as the Kentucky novelist); Allen, (Buckner Allen), a brother of John Allen, present Commonwealth's Attorney of Fayette County; Logan, Shelby, King, Craig, Overstreet, Graves, Patterson, Hoopman, Garvey, Johnson, Lindeman, Langsford and Thurgood.

Centre College—Fulton, Dunlap, Vaughn, Clark, McCartney, Cowan, Moore, Cowles, Barbour, Ernst, Taylor, January, Skinner, Webster, Read, Barret and McKee.

The Rugby game, as an intercollegiate or inter-club sport, is of very recent origin, not having spread from the Rugby school in England until as late as 1850, and it was not until 1871 that the game was generally played in England under a definite set of rules. These rules were not at first very clear, and evidently meant for interpretation by those who had already been playing the game. It was largely for this reason that it became so rapidly modified when introduced into American Colleges under the lead of Yale, Harvard and Princeton, it was first played in this country.

While a student at the University of Wooster, (Ohio), from 1880 to 1882, I was one of a number who attempted to start the game there, but without much success, chiefly on account of the difficulty of interpreting the rules. We played with the oval ball. At that time there was no intercollegiate football played among the colleges of Ohio. I believe, however, that about that time or perhaps slightly before, Rugby football was played between Hughes and Woodward High Schools in Cincinnati. And it had always been my impression, until this bit of ancient football history just recounted came to light, that the honor of having introduced Rugby football in the west belonged to these two Cincinnati High Schools, and it may still be true that the playing of the game there antedates that at K. U. The introduction of the game in Cincinnati had been attributed to a Princeton man, Prof. Andrew West, now dean of the Graduate School, Princeton.

#### SEASON OF 1906-1907.

A new Faculty Committee, consisting of A. M. Miller, Chairman; W. W. H. Mustaine, Dr. J. W. Pryor, F. E. Tuttle and C. J. Norwood was appointed by the President.

The other officers of the Association were: L. E. Hillenmeyer, President; H. E. Curtis, Treasurer; J. D. Turner, Graduate Manager. For football—A. L. Donan, Manager; F. C. Paulin, Captain; White Guyn, Coach. Basketball—A. M. Kirby, Manager; J. M. Wilson, Captain. Baseball—F. C. Paulin, Manager; C. C. Kelley, Captain. Track—P. P. Shannon, Manager.

The Committee found that the Board of Trustees at the June meeting had passed rather drastic restrictions as to the number of games to be permitted each branch of athletics. These if held to would have spelled financial ruin to the athletic management, already laboring under a large indebtedness inherited from the previous management; as several of the games already scheduled would have to be cancelled and the forfeits paid. On presenting the state of affairs to the Board, however, that body appreciated the situation and rescinded their order.

This year was the inauguration of an era of good feeling among the Kentucky colleges. There was a general reorganization of the control of athletics in most of the institutions and the presence, at the head of each local Faculty Committee of such men as McCartney, of Transylvania, Throckmorton, of Central, (old Central, of Richmond, and Centre, of Danville, had been combined at Danville since the fall of 1901), Marsh, of Berea, and Terrell, of Georgetown, insured that athletics would be straight at those institutions, even if drastic measures had to be instituted.

#### FALL OF 1906.

The Committee at State, dissatisfied with a condition of affairs which seemed to be traceable largely to the imported professional coach, had determined to try the alumnus coach system, and hence had employed at a very nominal salary the captain of the team of the previous year, who was at this time holding the position of assistant city engineer for Lexington.

The Kentucky colleges this year did not put forth very strong teams, as they were suffering a relapse from over-athletic stimulation in previous years. K. U. did not put any team in the field.

State College did not play a very ambitious schedule, but it had a clean team and made a creditable showing, all things considered, winning against Eminence Athletic Club, K. M. I., University of Tennessee, and Georgetown and losing to Vanderbilt, Marietta and Central (Centre). The scores are not given in the Annual for this year, so I append them:

Oct. 6—S. C. vs. Vanderbilt at Nashville.....	0—28
Oct. 13—S. C. vs. Eminence Athletic Club, at Lexington.....	48— 0
Oct. 27—S. C. vs. K. M. I. at Lexington.....	16—11
Nov. 2—S. C. vs. Marietta at Lexington.....	0—16
Nov. 10—S. C. vs. Tennessee at Lexington .....	21— 0
Nov. 24—S. C. vs. Georgetown at Georgetown .....	19— 0
Nov. 29—S. C. vs. Central at Lexington .....	6—12

The football team consisted of the following:

Baer, left end; Coleman, left tackle; Hendrickson, left guard; Adair, center; Speyer, right guard; Brewer, right tackle; Elgin, right end; Wilson, left half; Paulin, right half; McKinney, full back; Stone, quarter.

Substitutes—Dunlap, Goldthwait, Logan, Cook, Galloway, Chisholm, Cram.

#### WINTER AND SPRING, 1907.

The men's basket ball team consisted of W. C. Fox, S. T. Baer, T. R. Bryant, R. C. Barbee and J. M. Wilson. The team was a good one and all the games were exciting. The schedule contemplated the playing of 9 games. I am unable to find a record of any but five. Of these S. C. won against K. U., 16 to 14, and lost to C. U. 23 to 25, to Georgetown 8 to 19, to City Y. M. C. A. 22 to 41 and to C. U. again 13 to 15.

The girls' basket ball team was composed of Nell Wallis, Lucy Hopper, Anne Crenshaw, (captain), Catherine Carmody and Christina Pence. It appears to have played no intercollegiate or school games.

The base ball team was constituted as follows: Stone, catcher and right field; Elgin, catcher; Reed, pitcher; Caudill, pitcher; Baer, first base; Goldnamer, first base and right field; Hillenmeyer, second base; Rule, third base; Alden, short stop; Donan, left field; Woodward, center field.

A schedule of 13 games was played, of which Kentucky State lost only two—those with Millersbug Military Institute, 3 to 5, and with C. U., 2 to 4.

The games were won with Lexington Athletic Club, 5 to 2; University of Cincinnati (two games), 5 to 4 and 22 to 2; Georgetown (two games), each 1 to 0; K. U. (two games), 14 to 4 and 8 to 1; last two games with C. U. ? to 0 and 2 to 1; Miami, 2 to 1.

From the above it can be seen that we had a good team that year, which easily won the championship of the State.

A track team was organized; but I find no report of its competing in any contests.

Financially, the collegiate year—1906-07, was a success.

After the new Committee took charge, outstanding bills for the season of 1905 and 1906 kept coming in, until the total indebtedness of the Association was \$1,579.75.

This was reduced by the close of the 1906-07 season to \$131.23.

#### FALL OF 1907.

The same Faculty Athletic Committee in charge the preceding year were reappointed for the year 1907-08.

The managers of the various branches of athletics were as follows:

Football, T. R. Bryant; men's basketball, Leo Brewer; girls' basketball, Jane Wanless; baseball, C. C. Kelley; track, W. C. Kisel. Mr. Turner continued as graduate manager, and Mr. Curtis as treasurer.

Mr. Guyn was retained as coach in football.

The team consisted of: Adair (Capt.), center; Hendrickson, left tackle; Payne, right tackle; Dunlap, left guard; Clark, right guard; Barbee, left end; Elgin, right end; Stone, quarter; Wilson, left back; Rodes ("Pete"), right back; Rout, fullback.

Substitutes—Walker, Stofer, Brockman, Mathers and Webb.

With the exception of a bad defeat by Vanderbilt early in the season the team made a good record, winning all the other games but the one with the University of Tennessee, which was a scoreless tie, and improving steadily until the close.

In the game with Vanderbilt in which we were defeated 40 to 0, Dr. Dudley, of that institution, the dominant spirit of the S. I. A. A., would not consent to our playing one of our best men—Montgomery, who came to us from the V. M. I., on the ground that that institution should rank as a college, and that the one year rule should apply in Montgomery's case. It was reported the following spring, however, that Vanderbilt played a V. M. I. man on their base ball team, who had not been at Vanderbilt for one year, and we know how during the past year, a special dispensation was obtained by Vanderbilt to enable her to play a former Bethel College man, who would have been debarred by the same rule.

Also in the game against us, one Campbell, whose eligibility was very much in question by the other colleges in the S. I. A. A., was an important factor in our defeat. His ineligibility was afterwards admitted to me by a member of the Vanderbilt faculty, who did not stand for that sort of thing.

The scores with which we defeated the other institutions that year were as follows: Manual Training, 30 to 0; Morris Harvey, 29 to 0; Hanover, 40 to 0; Maryville, 5 to 2; Georgetown, 30 to 0; C. U. (Thanksgiving), 11 to 0; and K. U., 5 to 0. The latter game was postponed from a date before Thanksgiving to one after on account of the very bad weather which prevailed on the day on which it was originally scheduled.

The season was a success financially. Besides paying off the last of the debt left over from '06, (even as late as August, 1907, old claims against the Association kept coming in, of which the former management apparently knew nothing), the Association put more than \$1,000 in improvements on the grounds, part of which was a new fence.

#### WINTER AND SPRING OF 1908.

Basket ball was growing in popularity. The men's team of this year, though, not winning the championship, was an unusually strong one. It consisted of Barbee, captain; Wilson, Fox, Post, Downing and Stone.

The fact that football men were taking to basketball augured well for both sports, for it is admitted that each is a splendid training for the other.

It won a majority of the college games, but lost to the Lexington Y. M. C. A. and once to the Louisville Coliseum.

The girls' team was also an unusually strong one, consisting of Christine Pence, Bessie Hayden, Esther Vaughn, Ruby Fleming, Nell Wallis, (captain), Margaret Wanless, Mary Belle Peace, and Minnie Frost. Professor Leaphart was the coach. It won all its games.

About this time the name of the institution by act of the legislature was changed from A. and M. College, though it had long been called "State College," to State University. Kentucky University in this same year took the name "Transylvania University."

The baseball team of 1908 consisted of: First base, Capt. W. O. Alden; catcher, N. E. Stone; second base, I. S. Crosthwaite; third base, W. W. Hillenmeyer; short stop, J. B. Giltner; left field, C. E. Ellis; center field, Holton Cook; right field, H. R. Creal, pitcher, S. F. Caudill; coach, Professor Leaphart.

This was a strong team. It played a schedule of 18 games, winning 12 out of the 18. Six of these games were played on a trip to Indiana. It lost only one game on this trip—one of the three played with DePauw. In the Kentucky series, it won three out of the four games with Transylvania, two out of the three with Georgetown, the single game with Berea, and split even in the two games with Central.

In track athletics there were no intercollegiate meets.

#### SEASON OF 1908-09.

The Faculty Committee on Athletics for this year were A. M. Miller, Chairman, Commandant Corbusier, A. M. Wilson, Dr. J. W. Pryor, and H. E. Curtis, Treasurer.

This Committee held almost daily meetings at noon in conjunction with the student committee, consisting of one member from each class, as was also the custom two years previous.

The strict accounting system, established when the new management undertook to pay off the indebtedness of the Association, was still maintained. No expenditures were authorized except upon requisition voted in meeting by the joint committee, and no moneys would be paid out by the Treasurer, except

upon presentation of these requisitions properly signed by the Chairman. With a stub-requisition-book system in use the Committee could tell from day to day the exact state of its finances.

As the result of a request from the Committee, December 1907, the Board of Trustees issued an order that every student in the institution should make a damage deposit fee. Beginning with this season of 1908-09 the Committee was able to get nearly every student to sign over a release of \$5 out of this fee for athletics, should that much be remaining to his credit at the end of the year. In consideration of this the student was given \$6 worth of coupons, each of which was good for admission at the gate at the rate of 25 cents per coupon. In case the amount out of the damage fee should not equal five dollars at the close of the year, the student obligated himself to pay the difference then in cash.

The system worked well from the start, the only objection to it being that before a game, like the one on Thanksgiving, some students would attempt to speculate, by buying these coupons at the reduction price and selling them to the public on the day of the game at their face value, or only at a slight reduction.

Even one member of the student committee was found guilty of this practice. The remarkable thing about this affair was that neither he nor his student colleagues seemed to think there was anything reprehensible in the act. From persons with such consciences (or lack of consciences), I fear, are recruited the army of public grafters we have in this country. Persons are elected to protect the interests of an organization, or community, and proceed at once to exploit them to their own private gain.

The first year that this coupon book system was put into effect with the credit method of payment, the Association was given an amount, that it could realize on in June of that year, between \$1,600 and \$1,800. Of course this system diminished the cash receipts at the gates, and it necessitated the borrowing of money to meet current expenses. This Professor Wilson and I were able to do from the bank, by giving our joint personal notes from time to time.

The student officers of the Association were J. S. Crosthwaite, President; B. H. Logan, Vice-President; H. L. Rankin, Secretary; G. M. Hendrickson, Captain, Football; B. E. W. Stout, Manager, Football; S. E. Caudill, Captain, Baseball; E. B. Perrine, Manager, Baseball; W. C. Fox, Captain, Men's Basketball; J. F. Chambers, Manager, Men's Basketball; Nell Wallis, Captain, Girl's Basketball; Alice Cary Williams, Manager, Girls' Basketball; C. White, Captain, Track; C. C. Garvin, Manager, Track.

White Guyn was retained as coach for football. The team consisted of Hendrickson, captain, left end; Webb, center; Dunlap and Stofer, tackles; Clark and Earle, guards; Johnson, right end; Post, quarter; Barbee and Taylor, half backs; Rout, fullback. Substitutes—Cardwell and Shelby.

This team was composed of good material, but inexperienced—that is, it had not run up against big teams before.

This was the most ambitious schedule any previous team of the institution had ever attempted, five of the seven games being with teams outside of the State. It was defeated by three of these teams: University of Tennessee, 7 to 0; Sewanee, 12 to 0; and University of Michigan, 62 to 0. In the latter game which was played at Ann Arbor, State for the first time ran up again a real northern team, played in the presence of an immense crowd of hostile rooters, and it was no wonder each Kentucky boy was afflicted with stage fright. So rattled was our back, who received the punts, that he muffed every one of them, and Michigan soon found this was the way to roll up the score. In only this way can we explain the overwhelming defeat, for as Sweetland, our subsequent coach, is said to have remarked, when reading the score while yet in the east, "No State University ought to beat another that bad."

It was largely in order to prove his opinion correct that he offered his services as coach of the Kentucky team for the succeeding year.

State won against Maryville, 10 to 0; Rose Polytechnic, 12 to 0; Berea, 17 to 0, and Central (on Thanksgiving), 40 to 0.

The latter game was the first one ever "diagrammed in Kentucky." This was done by Professor Wilson, and this graphic presentation appears in the Annual for '08-'09.

#### WINTER AND SPRING OF 1909.

The men's basket ball team was an advance on previous teams, being unusually fast, and skilled in the fine points of the game, yet it was unable to land the pennant, because it was pitted against other teams just a shade better. The scores below show this. The team consisted of Fox, captain; Barbee, Post, Rodes (Wm.), and Plummer.

It won four out of the eight games: First game against C. U., 24 to 23; both games against Georgetown, 45 to 32 and 48 to 19; and the second game against the University of Cincinnati, 28 to 23.

It lost to Advent Memorial Club of Cincinnati, 27 to 41; to C. U., two games, 20 to 36, and 20 to 26; and the first game against University of Cincinnati, 25 to 39.

The girls' basket ball team, consisting of Nell Wallis, captain; Bessie Hayden, Esther Vaughn, Mary Rodes, Ruby Fleming, with W. C. Fox as coach, played only two important games, both with Transylvania girls' basket ball team. The first one was lost by State, 19 to 23, and the second won, 26 to 19. Transylvania refused to play off the tie.

The baseball team consisted of Caudill, Hillenmeyer, Giltner, Cook, and Ellis from the last years' team, and new men, Plummer, Stevens, Meadors, Johnson, Vogliotti, Gower, Vivion, Armstrong and Rochester. There was a wealth of pitchers in this group, Caudill, Meadors and Vivion, all being good.

It played a schedule of 21 games, five of which were on a southern trip.

On this trip it lost all but one of the games: 11 to 4 and 7 to 1 with Tennessee; 4 to 0 with Georgia, and 5 to 4 in the first game with Sewanee. It won the second game with Sewanee, 4 to 3.

Of the games played in the State it lost 8, as follows: To Tennessee, 1 to 11; Transylvania, (first game), 2 to 5; Michigan, 0 to 10; three games with C. U., 0 to 2, 1 to 8, and 1 to 7; the first game with Georgetown, 3 to 4.

It won 8 games as follows: With Lexington Colts, 9 to 8; Kentucky Wesleyan, 7 to 5; second game with Transylvania, 8 to 1; Louisville High School, 5 to 0; second and third games with Georgetown, 7 to 2, and 5 to 3; Miami University, 3 to 1; and Berea, 7 to 2.

#### TRACK ATHLETICS.

At the State Fair the previous fall, there was an intercollegiate contest in running, in which Central University, Berea, St. Mary's, Georgetown, and Transylvania competed. State won by more than double the points of any of her opponents.

In the spring the State management felt that it was in a good enough condition financially to undertake the financing of an Intercollegiate Meet, and sent out an invitation to the other colleges offering to pay the expenses of an equal number of contestants from each of the colleges composing the K. I. A. A.

The invitation was accepted, and the meet was held on our grounds, all the colleges contesting. They ended in the following order: State 1, Berea 2, Central 3, Transylvania and Kentucky Wesleyan tie 4, Georgetown 6.

One K. I. A. A. record was broken, the 120-hurdles, by Long, of C. U., in 15 2-5 seconds. The shot put, by Baker, of State, distance 35 feet, 9 inches, was reported by the Alumni Annual for that year as a State record broken. The statement is incorrect, if by that is meant a K. I. A. A. record, as 36 feet, 8 inches, by Blanford, of C. U., in the first Intercollegiate Field Meet ever held in Kentucky—that on Decoration Day, 1893, is still the record for the K. I. A. A.

#### FIRST WESTERN INTERCOLLEGIATE FOOT BALL GAME WAS PLAYED HERE IN 1880, SAY AUTHORITIES.

The conclusion of the 1916 foot ball season in Lexington, after a series of games which made the season one of the most interesting in years, revives interest in the question of when the first intercollegiate foot ball game was played in this section.

Dr. J. L. Patterson, Dean of the University of Louisville, who was in Lexington recently to preside over the meeting of the Association of Kentucky Colleges, was the captain of a team at old Kentucky University which played Centre College on April 9, 1880.

Dr. Patterson said that after this lapse of years he could not remember whether the University had played any other intercollegiate games that year or not, but was under the impression that the Centre College game was the only one played, and that it was also the first, in Lexington and in Kentucky.

"I was quarterback," said Dr. Patterson, "and snapped the ball into play. The rules were generally called the American Rugby rules, and the ball could be either kicked or carried forward. It was in many respects like the game as played today, but very much cruder, both in the operation of the rules and in the defensive and offensive organization of the opposing teams.

"The captain of Centre College that year was Richard P. Ernst, now of Covington, and the game was taught us by a student named Thurgood, an Australian, who had learned it either in Australia or England." Dr. Patterson recalled the names of the members of the team.

The game of 1880, and which appears to have been the first played in the style of modern collegiate foot ball, was described in the following account appearing in the Lexington Transcript of the following day:

"13¾ TO 0."

"The above is the result of the match game of foot ball played yesterday afternoon at the city park between the Centre College and the Kentucky University teams. As the Danville boys had the reputation of being a splendid club our boys expected to be beaten.

"The visiting club was composed of tall athletic men, while the University club was mostly made up of short but muscular boys whose style of physique is considered best for such a game.

"A large crowd of ladies and gentlemen, estimated at five hundred, witnessed the game. The ladies seemed to take especial interest in the fun and it was pronounced that foot ball had decidedly the advantage of base ball as a means of amusement to spectators. The collision between players at various times was almost equal to the coming together of two Spanish bulls and provoked much laughter. The game lasted two hours, commencing at four and ending at six o'clock. It was played according to the Princeton rules."

Princeton, New Jersey, December 11, 1916.

Dean Arthur M. Miller, University of Kentucky,  
Lexington, Kentucky.

Dear Mr. Miller: I have your letter of December 7th. When I was a teacher in the Hughes High School of Cincinnati, from 1875 to 1880, the game of Rugby foot ball was first played between the Hughes and Woodward High Schools, of Cincinnati. I acted as captain for the Hughes team, and Mr. Smith, the instructor in mathematics, as captain for the Woodward team. I cannot now remember the precise year, but am under the impression that the first Rugby foot ball game between these two schools in Cincinnati was either in 1877, 1878 or 1879. I left the Hughes High School in December, 1880.

Ever sincerely yours.

ANDREW F. WEST.

#### 1917 FOOT BALL SCHEDULE.

September 29—Butler at Lexington.  
October 6—Open.  
October 13—Miami at Lexington.  
October 20—Vanderbilt at Lexington.  
October 27—Sewanee at Sewanee.  
November 3—Center at Danville.  
November 10—Mississippi A. and M. at Starksville.  
November 17—Alabama at Lexington.  
November 29—Tennessee at Lexington.

#### ALUMNI TO PRESENT NEVILLE PORTRAIT.

During the jubilee week, a campaign was started among the alumni of the University to pay for painting a portrait of Professor John H. Neville, to be presented to the University. Letters have been addressed to the 1,500 alumni of the institution, in keeping with the policy of the association, which has already

presented portraits of Dr. James K. Patterson and Dr. Joseph H. Kastle, to their Alma Mater. The committee who are in charge of the campaign are J. D. Turner, John Craig Shelby and T. T. Jones.

Professor Neville was connected with the University for thirty years. If the plans of the Alumni Association are carried out, portraits of Professors James G. White, John Shackelford, Francis Helveti and Robert Peter, among others formerly connected with the institution, will be presented to the University.

#### UNIVERSITY LAKE TO BE RESTORED—MAYBE.

Professor Frank T. McFarland, superintendent of grounds at the University, has announced that an effort will be made to restore the lake on the campus. If this is not possible, it is almost certain that an Italian garden will be built in the northwest corner of the campus.

Various other improvements are to be made. A number of trees will be cut out this fall and sodding done as soon as possible. Hedges will replace the chain fences about the campus.

#### WHAT SOME ARE DOING.

R. T. TAYLOR, '15.

R. T. Taylor, B. M. E., '15, of Frankfort, Ky., visited in Lexington a few days on his way back to New York. Mr. Taylor has been on a two-weeks' vacation. He is connected with the Charles Hartmann Company, of New York, sheet metal contractors. Before leaving on his vacation he prepared the estimates for a \$20,000 contract for the sheet metal work for the heat and ventilating system of a plant of the American Locomotive Company at Schenectady, New York.

L. B. EVANS, '15, AND G. O. KELLEY, '14.

L. B. Evans, '15, and G. O. Kelley, '14, graduates of the College of Mechanical and Electrical Engineering, motored over from Lebanon, Ky., to visit friends at the University.

Mr. Kelley is at present Assistant Manager of the Lebanon Light, Ice and Power Company, and has charge of electrical construction and maintenance.

Mr. Evans is sales engineer for the Franklin Manufacturing Company of Franklin, Pa., manufacturers of steam and heating specialties.

J. A. HATTER, '14.

J. A. (Jack) Hatter, a member of the '14 graduating class from the College of Agriculture, has returned from the Philippine Islands, where he has been employed since graduation by the Department of Agriculture as tobacco specialist.

J. R. WATKINS, '15.

J. R. Watkins, a member of the '15 graduating class from the College of Civil Engineering, is now with the Babcock & Wilcox Company, under P. R. Cassidy, a former instructor in the College of Mechanical and Electrical Engineering. Mr. Watkins was taking post-graduate work in the University.

C. E. BLEVINS, '15.

Charles E. Blevins, a graduate of the University, and familiarly known as "Chief," will leave soon for Hangchow, China, where he will represent the Y. M. C. A. For several months Mr. Blevins has been connected with the physical department of the "Y." at Jacksonville, Fla. He will be sent to China

by means of a fund raised for that purpose by the Georgia Tech. College. Mr. Blevins has always been interested in athletics and while a student in the University often acted in the capacity of assistant instructor of athletics. He was also assistant football coach and assistant physical director.

C. E. ROGERS.

C. E. Rogers, formerly a student in the Department of Chemistry, left last week to accept a position with the Union Powder Company, at Parlin, N. J. The Gamma Alpha Kappa fraternity, the honorary chemistry fraternity of which he was a member, entertained in his honor last Monday night. Those present were the members of the fraternity and Dr. A. M. Peter, Chief Chemist of the Experiment Station.

JAMES PARK, '15.

James Park, former star athlete of the University and at present a member of the St. Louis Browns, is spending his vacation at his home in Richmond. Jim has "made good" in baseball and sporting writers predict a brilliant career for him.

CHARLES E. WILSON, '13.

Charles C. Wilson, who graduated from the University in 1913, has been elected County Attorney at Meade, Kas. He ran far ahead of his national and state tickets. Mr. Wilson was in Lexington practicing law for nearly a year after graduation.

R. M. ALLEN, 1900.

R. M. Allen, former head of the Pure Food and Drug Department of the Experiment Station, and now head of the Research Products Department of the Ward Baking Company, of New York, stopped a few hours in Lexington and visited friends at the Experiment Station.

MARY C. LOVE, '16.

Mrs. Mary C. Love Collins, who graduated from the College of Law last year, will become director of the Southern School of Social Science and Public Service, at New Orleans, January 1. The school of which Mrs. Collins will become director is held under the auspices of the Kingsley House, the largest and most influential settlement house in New Orleans. Mrs. Collins has been practicing law in Lexington for five years and she intends to retain her profession.

J. G. SCRUGHAM, '00.

James Graves Scrugham, dean of the College of Engineering at the University of Nevada, visited the University in November for the purpose of getting Kentucky's support to the Newlands bill, providing for the creation of engineering experiment stations throughout the country.

Mr. Scrugham is a 1900 graduate of the College of Mechanical and Electrical Engineering of the University of Kentucky. He is vice president of the association of Land Grant Colleges, and is just returning from Washington, D. C., where he attended a convention of these colleges. Support to the new law was pledged by the members at this meeting.

—o—  
**UNIVERSITY SECTION**  
**COLLEGE OF MINES AND METALLURGY.**

Robert Atkins, a graduate of the College of Mines and Metallurgy, has been appointed assistant superintendent of mines for the Federal Coal Com-

pany, of Bell County. This is an active company and has a large output of coal annually. The Hon. M. S. Barker, a brother of President H. S. Barker, is general manager of this company.

E. B. Jones, a Senior in the College of Mines and Metallurgy, who recently discovered an error in a mine ventilation formula in the ninth edition of Kent's Mechanical Handbook, is in receipt of a letter from the publishers acknowledging the error and praising him for his ability.

At the regular meeting of the Kentucky Mining Society held Monday night in the Mining Building, it was decided to issue an annual this year, the purpose of which is to promote interest in the College of Mines and Metallurgy. Louis Ware was chosen editor-in-chief and E. B. Jones, business manager. They will have the privilege of selecting a staff. The annual, which will contain between 100 and 150 pages, will be put on sale about May 1.

J. J. Hume, of Covington, addressed the meeting on his experience in the borderland of West Virginia. Eugene Elder spoke on "University Affairs." The society was requested to send its picture and information about the college for publication in the monthly bulletin of the American Institute of Mining Engineers. W. C. Eyl, president of the society, presided.

The College of Mines and Metallurgy is receiving its share of applications for members of this year's Senior class. W. C. Eyl has accepted a position with a large mining concern and places are awaiting the other seniors.

Seniors in the College of Mines and Metallurgy have completed a flotation machine, the latest instrument for the concentration of sulphide ores. The machine will be used for laboratory work in that college.

The machine utilizes the agitation froth principle by which sulphide ores are liberated from the "gangue" by oil froth produced by agitation.

The principal builders of the machine were Cal Schirmer and Louis Ware, who worked last summer for the Arizona Copper Company at Morenci, Ariz., on the original flotation machine used in mining operations. Professor C. B. Worley, instructor in metallurgy, superintended the work.

Students taking mining engineering have done considerable work in practical mining. Several of them readily find work while undergraduates as consulting engineers in coal and oil prospecting. Their work is under the supervision of Dean C. J. Norwood, who is State Mining Inspector and one of the leading men of Kentucky mining work.

#### COLLEGE OF AGRICULTURE.

Professor George Roberts, acting dean of the College of Agriculture, has been re-elected for the fifth time treasurer of the American Society of Agronomy at the sessions of the American Society of Agronomy and the Association of Agricultural Colleges and Experiment Stations, held at Washington, D. C., in November. Professor Roberts, who attended, reported that more than 100 leading agronomists of the country were present at the meetings.

The Association of Agricultural Colleges and Experiment Stations, in session at Washington, D. C., November 15-17, passed resolutions on the death of Dr. Joseph H. Kastle, who was a member of the association and who was on the program for the meeting this year.

Dr. Alfred M. Peter, an associate of Dr. Kastle for many years and acting head of the Experiment Station since Dr. Kastle's death, delivered a memorial

address at a meeting of the Experiment Station section. More than 300 prominent agriculturists and experiment station directors were present at the general sessions of the body. The resolutions read:

"Whereas, This association has received with deepest regret the information of the death on September 24, 1916, of Dr. Joseph Hoeing Kastle, Dean of the College of Agriculture and Director of the Experiment Station of the University of Kentucky; therefore be it

"Resolved, That in the death of Dr. Kastle in the prime of life and in the midst of a useful career, this association has lost a valued member; the science of chemistry one of its most able investigators and teachers; agriculture an exponent of unusual breadth of view and the scientific world in general a worker conspicuous for his tireless energy in the prosecution of his work and a master in the presentation of the results of his labor.

"Be it further resolved, That in commemoration of our respect and appreciation, these resolutions be spread upon the minutes of the association.

### COLLEGE OF LAW.

The Association of American Law Schools, which is made up of forty-three of the leading law schools of the United States and Canada, met in annual session at the Auditorium Hotel, in Chicago, during Christmas week.

The Law School of the University of Kentucky is one of the four southern law schools whose standard is such as to admit it to membership in this Association, and was represented at the meeting by Dean W. T. Lafferty.

A resolution was offered and passed to raise the standard of the law schools of the Association, to be effective in 1920, but the forward step taken was anticipated by five years by this Law School, the new standard having been established here in 1915, making the standard of the Kentucky Law School in advance of other law schools of the South.

As evidence of the fact that the bench and bar of the State of Kentucky are appreciating the necessity for better preparation for lawyers, and the advancement of the standards, the attendance at this school has greatly increased, and those who are now taking the work are better prepared than in previous years.

The practice court work is being done more successfully this year than heretofore, because the classes are divided into small sections, requiring of each three recitation periods each week. The practice manual, which has been prepared for class use, is proving very beneficial, and carries the class over all phases of the practice possible to be covered in one year's work. No class in any previous year has had the opportunity that is now afforded.

The law library is still increasing, and is being appreciated by members of the bar, out in the State, many of whom now visit the Law School and use the library freely. The size of the library is such that no such opportunity can be enjoyed in their home towns.

While this Law School has been in existence only eight years, one hundred and forty-three of its graduates are located in Kentucky, and in most instances are giving a good account of themselves in the practice of the profession. Arrangements will soon be made, whereby those who are practicing law may get the benefit of the law library when their local libraries are not sufficient for their use, by sending a statement of law question raised by them, to the school, and the Senior class will look up the law, brief the point raised, and return it to the sender.

**COLLEGE OF MECHANICAL AND ELECTRICAL  
ENGINEERING.**

During the past two months we have been popular with the "newly-weds."

First in the list come Mr. and Mrs. J. F. Hall, of Youngstown, Ohio. Mr. Hall is a member of the class of 1913 and is at present connected with the Youngstown Sheet and Tube Company as lubrication engineer. Mrs. Hall was formerly Miss Alice Snodgrass, of Youngstown, Ohio, and the story of their courtship and marriage is quite a pretty little romance. The winter of 1914-15 Mr. Hall was major in the Kentucky Military School, stationed in Florida, and Miss Snodgrass was spending the winter in Florida, and he had the double good fortune of saving a life and winning a bride, when he rescued Miss Snodgrass when she had gotten beyond her depth while swimming.

Mr. J. T. Jackson, Jr., class of 1915, brought his bride in to see us. Mrs. Jackson was formerly Miss Adelia Williamson, of Hopkinsville, and is quite well known here as she was a student in the University for two years. This is the culmination of another romance beginning on the campus of "old State." Mr. Jackson is in the Planning Department of the Goodyear Tire and Rubber Company, at Akron, Ohio.

Mr. and Mrs. Ellis B. Hayden, of Milton, Pennsylvania, were visitors here recently. Mrs. Hayden was formerly Miss Isabel R. Berie, of Milton, and since Mr. Hayden has been a resident of Milton only since last spring, it must have been a case of love at first sight. Mr. Hayden is foreman of the shell forging department of the Milton Manufacturing Company.

Mr. L. B. Evans, class of 1915, made us a short call. Mr. Evans is engineer, production and sales department of the Franklin Manufacturing Company at Franklin, Pennsylvania. Just at present he is in charge of the New York offices of the company in the absence of the regular representative, who is ill. His New York address is care of the Franklin Manufacturing Company, 17 Battery Place, New York City.

Mr. George E. Kelly, of the class of 1914, motored over from Lebanon with Mrs. Evans. Mr. Kelly is now in charge of the Lebanon Light, Ice and Power Company, Lebanon, Kentucky.

Mr. H. Lee Moore, 1911, manager of the Buffalo Forge Company, Pittsburgh, Pennsylvania, was in the city to attend the wedding of his sister-in-law, Miss Margaret Milward, and was a caller at Mechanical Hall. Mr. Moore has been with the Buffalo Forge Company ever since graduation and is making a decided success. He was appointed manager of the Pittsburgh office a little over a year ago.

Professor J. G. Scrugham, class of 1900, was a visitor here the first of November. Professor Scrugham has recently been appointed Dean of the Schools of Engineering at the University of Nevada, at Reno, Neva. The University of Nevada has been taking an active interest in the development of the State, particularly along engineering lines. Professor Scrugham has been instrumental in developing the "first-aid-to-the-injured" courses for railroad and mine employes. Professor Scrugham is very active also in the movement to get the bill for establishing engineering experiment stations in all Land Grant Colleges, through Congress. This is known as the Newlands Bill. He is also connected with several firms as consulting engineer—notably the Elko-Lamiolle Power Company, which is one of the most important construction firms in the State of Nevada. Professor Scrugham has also conducted a series of tests on mechanical equipment of the Southern Pacific fleet of steamers and ferry boats.

Mr. J. B. Shelby, class of 1910, was another recent visitor. Mr. Shelby is in the general power apparatus department of the General Electric Company, New

York office. He has made quite a reputation for himself as a switchboard specialist, and is entirely worthy of the success he is attaining. By way of identification, Mr. Shelby is the proud possessor of a brand new blonde mustache.

Mr. Philip L. Kaufman paid Mechanical Hall a visit recently. Mr. Kaufman graduated in the class of 1901. Since 1907 Mr. Kaufman has been connected with the Strauss Bascule Bridge Company, of Chicago, and is now western representative of this company with headquarters in Chicago. The Strauss Bascule Bridge Company constructs a large number of the steel bridges in the United States and also the "Bascule" bridge—a bridge that lifts to permit the passing of steamers.

Mr. M. G. Ireland, class of 1915, was at the hall a few days ago, on his way to Barberton, Ohio, where he goes to accept a position with the Babcock and Wilcox Company, of that city. We have quite a number of men identified with the Babcock and Wilcox Company now. Recently Mr. W. C. Armistead, class of 1913, went to Barberton to accept the position of production manager of the new plant of the Babcock and Wilcox Company. Mr. Perry Cassidy, class of 1911, was assistant superintendent in the construction of this plant, and his personal assistant is Mr. H. E. Melton, class of 1916. Mr. Cassidy spent the Thanksgiving holidays with his parents in Lexington and we were pleased to see him looking so well. He is enthusiastic about his work with the Babcock and Wilcox Company.

Messrs. W. S. Carrithers and George W. Gayle, of 1914, went with the Babcock and Wilcox Company immediately after graduation. Mr. Carrithers is engineer in the tool department, while Mr. Gayle is assistant purchasing agent.

Mr. H. Y. Barker and K. P. Howe, class of 1915, are both with the Babcock and Wilcox Company. Mr. Barker is in the shell department and Mr. Howe is in the machine design department. There are a number of underclassmen in the employ of this company also. This firm makes practically two-thirds of the water-tube boilers of the world.

We have lately received a bulletin, setting forth the Ohio Valley Electrical Exposition, held in Cincinnati, and we note that Mr. Warner P. Sayers, formerly a student here, is one of the officers of the Exposition. Mr. Sayers is connected with the F. D. Lawrence Electric Company and is president of the Cincinnati Alumni Chapter of the University of Kentucky.

### SYMPHONY ORCHESTRA.

The latest development in musical circles at the University is the organization of a symphony orchestra, under the direction of Professor Lawrence A. Cover, head of all musical activities on the campus. A campaign has been made among the student body of the institution in an effort to get everybody to join some of the musical organizations and it was in this campaign that the need of an orchestra was found. At least fifty persons will play in the orchestra, according to Professor Cover.

The first rehearsal was held in the Y. M. C. A. room with good attendance, and many more are expected after the holidays. Students will form the nucleus of the organization but many other musicians of Lexington will be included.

New instruments for the band have arrived, and other equipment for the music department of the University will be purchased in a few days. The band has thirty-five members now and Mr. Cover expects to have fifty before the end of the year. He is preparing for a concert to be given in chapel in a few weeks. The first appearance of the symphony orchestra also will be in chapel and later there will be a concert open to the public.

**BOARD OF WOMEN TO MANAGE PATTERSON HALL.**

Mrs. Elizabeth King Smith, Mrs. A. M. Harrison and Mrs. Shelby T. Harrison were appointed a board of control and management for Patterson Hall by the Executive Committee of the Board of Trustees of the University of Kentucky in special session Wednesday, November 3.

An act appropriating a special fund for building and furnishing Patterson Hall, provided also for a board of three women to draw up regulations for the discipline and control of students in the dormitory, general supervision of the hall and semi-annual reports on receipts and expenditures.

A committee appointed at the completion of the hall continued in office until June, 1915, consisted of Mrs. Solomon L. VanMeter, Mrs. O. L. Bradley and Mrs. F. A. Atkins. When about to elect a successor to Mrs. Caroline Wallis, matron, who resigned in June, 1911, the Board of Control was informed that a matron had been appointed already and the dormitory would be managed under a different plan. Since then no board had been named until November 3, the hall having been managed by Dean Hamilton, under the direction of President Barker.

**CHIMES MAY REPLACE ANTIQUATED WHISTLE.**

A faculty committee composed of Professors Grehan, Miller, Lafferty and Roberts, which has been investigating a proposition to substitute chimes on the campus for the big siren which now calls students to recitations, reports that many of the alumni have expressed their approval of the movement and their willingness to contribute to the fund to secure them.

Chimes are now being used by many universities for a signal at the end of a recitation hour. Although the antiquated whistle which now serve this purpose sounds musical to the weary students who are anxious for the recitation hour to end, its noise is very disagreeable to the people of the city.

**MISS SWEENEY CONTRIBUTES HEALTH BULLETIN STORIES.**

Miss Mary E. Sweeney, dean of the Department of Home Economics, is one of the contributors in the current issue of the Board of Health Bulletin, the fifth Woman's Federation number. Her story is entitled "Foreword of the Home Economics Department." In another story she discusses the advisability of teaching the high school girl "how to spend the family income."

**TESTS FOR STONE MONUMENT OF JEFF DAVIS.**

Tests are being made in the Civil Engineering laboratories of the University of stone to be used in a monument for Jefferson Davis.

General Bennett H. Young, of Louisville, president of the Jefferson Davis Home Association, sent in to Professor D. V. Terrell specimens of stone from several quarries in the neighborhood of the Davis home on which he is running tests for strength and wearing qualities.

**STUDENT SECTION.****HIGH SCHOOL LETTERS TABOOED BY "K" MEN.**

The "K" men of the University at a recent meeting took up the matter of the indiscriminate wearing of athletic letters, especially of high school sweaters. The wearing of unearned athletic letters and also of "H's" by high school athletic stars has always been tabooed, but in order to eradicate this nuisance the "K" Association has adopted by-laws prohibiting these letters from being worn and providing punishment in case this rule is broken. The by-laws follow:

"No person in the University shall be permitted to wear any letter except the one he made in that particular form of athletics, e. g., a baseball man shall not be permitted to wear a football or basketball sweater unless he has made a letter of that kind.

"Persons who have made letters at other colleges or universities shall not be permitted to wear them at the University of Kentucky.

"High school letters are absolutely forbidden to be worn at this institution.

"Girls will be permitted to wear only earned 'K' sweaters.

"Persons trespassing upon the privileges of this association shall be coerced by armed force if such it takes."

#### Y. M. C. A. AND Y. W. C. A. NOTES.

Making the best of a bad bargain is what the Patterson Hall girls have been doing since the only room in the building available for meetings was made into sleeping quarters this fall.

The lack of a place for the Y. W. C. A. to hold its meetings has presented a serious problem, since the weather has prevented services being conducted on the porch. At last, however, the difficulty has been solved. The laundry in the basement which has previously occupied two rooms, has been moved into one, and the girls have converted the other into an association room. Curtains at the windows, a flower box hiding an unsightly corner and dashing yellow shades over the lights have worked miracles with the old laundry.

The Young Woman's Christian Association has planned the room for a community center, to make up to the girls in some measure the loss of their old recreation hall.

The Y. M. C. A. has enrolled approximately two hundred new members as the result of a membership campaign waged here last week. The men of the University were approached in an entirely different manner than has been used in previous years. Formerly a membership fee was required from new members, but this year no fee was charged and the campaign was made from a moral and religious basis. The students were appealed to from that standpoint. The association feels sure that the spirit of the students is such that they will assist the "Y" in all of its undertakings and support the cause by presenting an example of ideal student spirit and good character.

#### Y. M. C. A. SERVICE WORK.

The University Y. M. C. A., under the guidance of J. E. Johnson, has undertaken a wide social service work. His work will consist of basketball coaching and playground work in the city schools and brotherhood work in the reformatory at Greendale.

A group of four men, Frank Lancaster, Frank Ricketson, Byron Bacon Black and J. W. Mackenzie, opened the campaign at Greendale in co-operation with Messrs. Jacobs, Jenkins and Mullins, of Georgetown. This work will be continued each Sunday throughout the winter.

The work under G. H. Mummert, supervisor of recreation in the public schools, will be taken up next week.

#### STUDENT BRANCH OF A. S. M. E. ORGANIZED.

The Senior class of the College of Mechanical and Electrical Engineering has completed the organization of the student branch of the American Society of Mechanical Engineers. The formation of this student branch identifies the Seniors with the greater league whose membership covers both North and South America. The officers of the Kentucky branch are M. E. Pendleton, president; M. M. Montgomry, vice president; D. S. Springer, secretary; J. E. McNamara, treasurer.

## ATHLETIC COMMITTEE AWARDS "K" SWEATERS.

"K" sweaters awarded by the Athletic Committee for baseball, tennis, and track, 1916, were received last week by Coach J. J. Tigert and distributed to the winners. Those who received them are:

Baseball—Ernest McIlvain, Emery Frazier, J. C. Kelley, George Park, James Moore, manager; Tom Grubbs, P. P. Cooper, Charlie Haydon, George Zerfoss, James Server, Curtis Park and Frank Crum.

Track—J. A. Hodges, Jeff Clark, T. F. Marshall, Broadus Hickerson, Herbert Graham, manager; R. A. Otten.

Tennis—Howard Kinne, F. Paul Anderson, Jr., Derrill W. Hart and Watson.

Cheer Leaders—Whayne Haffler and Leonard Taylor.

## BRITAIN WILL LEAD 1917 FOOTBALL TEAM.

John Albert Brittain, who has played guard on the Wildcat football squad for the past two years, was elected captain of the 1917 team as a banquet given at the Leonard Hotel Friday evening, December 15, in honor of the sixteen men who earned the "K" on the gridiron this fall. About twenty friends and supporters of the Wildcats were present, besides the regular varsity men.

## STROLLER NOTES.

The Strollers, the dramatic organization of the University, gave their annual reception in honor of the new members, November 23, in the Stroller studio. The feature of the entertainment was a skit, "Virtue is its Only Reward," or "How the Ham Saved the Homestead," presented by six members of the club who have had experience in Stroller productions. The sketch was written by William Shinnick, stage manager last year, and was a satire on the old-time ten, twenty, thirty melodrama.

All those who took part in the little play acquitted themselves with honor, and the audience rewarded them with continuous bursts of applause. Mary Turner, as a sweet country lass, was very appealing, and Emery (Friszy) Frazier was well cast in the role of a regular hero, who married the girl "because she could open beans with a safety razor." John Marsh and Nancy Innes, as Pa and Ma Jenkins, living in the shadow of a roof covered with a mortgage, made quite a hit, and Herbert Graham, as Hiram Jenkins, was a real success. William Shinnick, as a villain, with mustaches and everything, played his part acceptably.

## STUDENTS WILL FLOCK TO CHAPEL SURE NOW.

A resolution to make chapel attendance compulsory on the part of the male members of the Freshman and Sophomore classes and all co-eds was unanimously adopted by the faculty of the University at a regular meeting held recently. The resolution was presented by the chapel committee, Dean C. R. Melcher, chairman.

The battalion will be required to fall in every Tuesday as if for drill and will be marched to chapel. If anyone cuts chapel it will be counted as cutting drill and he will have to do squad drill. Dean Anna J. Hamilton will have charge of the co-ed attendance.

## KENTUCKIAN STAFF FOR 1917.

The staff of the 1917 Kentuckian has at last gotten down to consistent work on the annual and according to F. T. Street, editor-in-chief, is already planning to turn out the biggest and best book ever produced at the University. Definite arrangements have been made with the publisher and each editor, including snap-shot artist and feature man, will be on the job during the next few months.

The new Kentuckian room, which has been fitted out in the basement of the Education Building, is being used now and the editor wishes it announced that the staff will meet there every Thursday afternoon at 3:30 until further notice.

The business and editorial staffs given out are:

**BUSINESS STAFF:** Charles R. Smith, business manager; W. W. Owsley, assistant business manager; Miss Martine Ratican, assistant business manager; F. O. Mayes, subscription, manager; William B. Martin, Junior business manager.

**EDITORIAL STAFF:** Frank T. Street, Jr., editor-in-chief; Clarence Clark, assistant editor; Marie Becker, assistant editor; William Shinnick, feature editor; Tom Underwood, athletic editor; Anita Crabbe, literary editor; E. A. Taylor, snap-shot editor; Morris Pendleton, art editor; G. B. Fishback, Junior editor.

### SENIOR AIDS FOREIGN BOY THROUGH UNIVERSITY

College life, with its meringue of happiness, sunshine and troublesome trifles, has also its filling. One pictures it as a zig-zag puzzle with crazy, criss-cross cut-outs. Cadet hope and lost collar buttons, Patterson Hall and ten-thirty, chapel hour and hamburgers at "Brits," Seniors and canes, George and turkeys, Hallowe'en and street cars, drill and new shoes, tug-of-war and bad cold, Ada Meade and first-hour class, football and celebrations, cramming and conditions—all go to make up the multi-colored picture.

But the "real stuff" is under the crust. One foreigner of the University is working his way through college. The first few weeks he was having a hard time. Not long ago one of the Seniors, who lives in Lexington, heard he was having trouble "getting by." He called the foreign student aside one day and told him this:

"If you ever need any money let me know. I may be able to lend you a little myself and if I can't I can raise some among my friends in town."

The deed passed on and the Senior did not say a word about it. The foreigner has gotten "on his feet" now, and tells the story. It is just one of the many little things that pass unnoticed in the student life of the University.

### BAND AND GLEE CLUB MAKE GOOD SHOWING.

The musical organizations at the University, under the direction of Lawrence A. Cover, are making rapid progress. The cadet band made its first appearance at the football rally in chapel on Friday before the Kentucky-Vanderbilt game, but because of lack of equipment, it took no part in the jubilee exercises. It made its bow publicly at the Sewanee game, where it made a very creditable showing. The band is larger this year than usual, having about thirty-four regular men. The officers are: David Glickman, captain; John Sherwood, first lieutenant, and Reuben Pearlman, first sergeant.

The Boys' Glee Club has a large number of new members, and promises to be a much stronger club than the University has had for several years. Clarence Harney, leader of Harney's quartet, an organization well-known on the campus, is president of the club. R. S. Clark is business manager and David Glickman, secretary-treasurer.

### PAUL ANDERSON, Jr., TOURNAMENT WINNER.

Paul Anderson, Jr., a Sophomore in the College of Mechanical and Electrical Engineering at the University, son of Dean F. Paul Anderson, won the 1916 President's trophy in the Country Club golf tourney. The running-up matches were close, and the former champions worked hard for victory. This is the second season young Anderson has won the championship, having carried away the trophy last year after some very brilliant work.

**"ARE YOU FROM DIXIE"**

The words of this song were written by Misses Lena Clem and Mary Ricketts, University co-eds, and runs as follows:

"All hail Kentucky,  
Dear old Kentucky,  
Where the 'Wildcats' fight with all of their might;  
When they begin it  
They're sure to win it  
For the dear old Blue and White.  
When U. K. men break through the line,  
And then they make a dash,  
Their opponents' well-laid plans  
Will go to smash,  
We'll cheer Kentucky, dear old Kentucky,  
For she is always right.

**CLASS SECRETARY SECTION.****CLASS OF 1890.**

By CHARLES R. BROCK, Secretary.

Three members of the class, Mrs. Annie Baker Hawkins, John W. Gunn and Charles R. Brock, were present at the Golden Jubilee.

No higher compliment can be paid Mrs. Hawkins than to say she looked as she did on the day of her graduation; and, wonderful to say, after the lapse of more than twenty-six years it can be truly said that on the 14th of October, at the Jubilee exercises, she looked precisely as if sufficient time only had elapsed subsequent to her last recitation to enable her to pass to another class room.

It was a source of pleasure that Governor Stanley registered as having belonged to the class of '90.

The class secretary enjoyed to the fullest extent every minute of his visit to the University. It was an incomparably delightful occasion and emphasized the pleasure we are missing in our failure to meet more frequently.

James A. Yates, now Professor of Physical Science in the Kansas State Normal School at Pittsburg, Kansas, has suggested a reunion of the class in the near future, and it is to be hoped that his suggestion will materialize.

**CLASS OF 1909.**

By PHIL BLUMENTHAL, Secretary.

It is a great pleasure to be able to announce that over 43 per cent of the class are now subscribing to the Alumnus and helping to support the Alumni Association. There are more of us who should be "doing their bit," and with the assistance of those classmates who read this column, the secretary hopes to see at least three-fourths of the class enlisted in the army of those who show their loyalty to the University of Kentucky in a more tangible way than by "gas attacks." Won't each one who reads this write to one classmate urging him or her not to "be a slacker."

The secretary recently received a picture of James Alfred Moore, a sturdy, handsome boy, the son of our own "Peg" Moore. Who will be the next classmate to contribute to the class collection of pictures? We want to keep in touch with the class children, and visiting alumni are always glad to look through our records and archives.

On his vacation the secretary had the pleasure of passing several hours with Charlie White and Fred Tucker, both of whom are prospering and show-

ing little of the effects of hard work and of the ravages of time. Fred Tucker has a very fine young man at his house, who inherits the parental fondness for football and clarinet.

Inez Luten is teaching English and Latin in the high school at Clinton, Ky.

OTHO B. CHISHOLM, '09.

Mr. O. B. Chisholm, '09, of Fort Jameson, Rhodesia, South Africa, buyer for the United Tobacco Company, is back home on a leave of absence, the first since leaving America in 1909. He was for some time associated with Mr. W. H. Scherffius, '09, chief of the tobacco division of the Transvaal Department of Agriculture. Mr. Chisholm visited the University while in Lexington, renewing his many acquaintances. He was married on December 26, to Miss Ethel Baldwin, of Paris. Mr. Chisholm's home is at Campbellsville, Ky. After the first of the year he will return with Mrs. Chisholm to Fort Jameson, South Africa.

ERNEST E. PITTMAN, '15, AND W. C. JOHNSTONE, '16.

Mr. E. E. Pittman, '15, and W. C. Johnstone, '16, sailed from New York on December 26, for Brazil to engage in service for the Brazilian Government, the former in experimental work in tobacco production and the latter in fruit production.

Just before leaving for New York to sail, Mr. Pittman and Mr. Johnstone called on the secretary and made all necessary arrangements to have the Alumnus to follow. Mr. Johnstone also deposited his check with the treasurer covering the first installment on the class student loan fund, being the first of class '16 to pay. These payments are not due until June 1, 1917.

LECOQ H. NELSON, '16.

Lecoq H. Nelson, '16, honor graduate, is now employed as teacher of natural science and agriculture at the Centerville High School, Centerville, Md.

#### CLASS OF 1911.

BY OLLINE CRUICKSHANK, Secretary.

Best wishes for the best year of your life! Let's turn over a new leaf and promise to keep the Alumnus posted as to your work, health, doings and about everything. Then we will have the best page in the whole book.

Did you know that Marion Johnson is married? Well, "Johnny" gave all of us the slip and took unto herself a husband. She is now living in Nicholasville where her husband is principal of the High School. Much happiness to you, "Johnny."

Lee Moore is making a most successful engineer and we are expecting great things of him.

Walter Harn is located at Akron, Ohio, and is doing well.

I hope to have better news next time, but I cannot write a report when you forget to send me word monthly as to your whereabouts. Wake up! I am ashamed of you. Write ! ! ! !

Who will send the first postal to me? I promise him a grand write up? Get busy ! !

### ALUMNI CLUBS.

#### NEW YORK CLUB.

By REUBEN T. TAYLOR, Secretary.

The New York Club certainly was happy at the splendid showing of our football squad at Knoxville. We send a slap on the back to each and every one of them. The rooters surely showed up with the old time spirit.

Dean F. Paul Anderson was in the city for a few days, attending the annual meeting of the A. S. M. E., whose visits the boys here have begun to look forward to. This was readily seen by the splendid showing at a dinner given for the occasion at Keen's Chop House, affording an opportunity for us to get down the "old clays" and have a smoke together. Prof. Anderson, between football cheers and Kentucky songs, was called upon for a little talk, which he responded to by telling us in a nutshell some of the past year happenings at the University.

H. H. Lowry, class secretary, '09, stated in the October issue, 1915, that Hal Townsend and Charlie White were the only two members of the Chicago, '09, bunch remaining in single blessedness. Hal blamed it on his looks, but Charlie kept quiet, for which quietness we are announcing that on September 5th, 1916, Charles White was married to Miss Margaret Noland, of Richmond, Ky.

J. S. Garvin is the proud parent of a fine baby girl. Congratulations!

Lynn B. Evans, '15, is located here with the Franklin Manufacturing Company, with offices in the Whitehall Building, 17 Battery Place. He will probably be here for a month or six weeks, after which he may be transferred.

J. Esten Bolling, '15, who has been with the American Blower Company, Detroit, is now located with the Greef Engineering Company, Newark, N. J.

O. L. Day, '11, was here in the city for a couple of days the latter part of the month, on business, aside from which he spent an evening with Jimmie Lowe. 'Nuf said, says Jake Gaiser.

#### OKLAHOMA CLUB, (TULSA.)

By C. R. GILMORE, Secretary.

We are glad to announce that W. C. Payne, class of 1904, was re-elected Superintendent of Schools of Pushmataha County by a large majority, the largest, in fact, of any candidate on his ticket, excepting one.

The young son of Dr. J. H. Gardner, class of 1904, who has been very near the point of death, is now rapidly recovering.

C. E. E. Baldwin, class of 1910, who was running on the Republican ticket in Tulsa County, a strong Democratic county, was beaten by only a few votes.

We were glad to have had a visit from R. L. Gordon, class of 1897, last week. He is president of the local alumni branch and is a very enthusiastic one.

#### WASHINGTON, D. C., CLUB.

By F. H. TUCKER, Secretary.

It was a genuine pleasure for the members of our club, in Washington, at the time of the A. O. A. C. meeting, (week of November 30th), to meet with a number of our fellow alumni, classmates and friends.

Being unable to get many of our small number together at this time, we contented ourselves by mustering a few, accompanied by Blumenthal, on the evening of November 15, and made informal calls upon President Emeritus Patterson and brother, and Dr. and Mrs. Peter, at the Willard Hotel. We were highly entertained and the evening was one of pleasure and profit to us.

From time to time during the week we exchanged greetings and upon a few occasions indulged in reminiscences of school days with Roberts, Turner, Buckner and Rodes. There was much of interest to us, concerning the University to be had at first hand from everyone, who is some way is connected with it. We are glad at all times to see our fellow alumni, and would ask that you let it be known when you are in Washington. You can help us and we may be able to help you in creating an effective interest for a greater University.

W. G. Campbell, '02, was married to Miss May Lambert, of Washington, D. C., on Wednesday evening, Nov. 29.

**MARRIAGES.**

J. D. McMurtry, '12, to Marie Frashier, Chicago, Ill., July 1.  
James F. Hall, '13, to Alice Snodgrass, Youngstown, O., Oct. 21.  
W. G. Campbell, '02, to May Ashby Lambert, Raleigh, N. C., Dec. 10.  
Ellis B. Hayden, '14, to Elizabeth Berry, Paris.  
Otho B. Chisholm, '09, to Ethel Baldwin, Paris, January 3, 1917.  
Inez Gillis, '13, to Arthur Wickliffe Huckle, Reed City, Mich.

**ENGAGEMENTS.**

Berkley Hedges, '14, to Margaret Norris Russell, Plainfield, N. J.

**BIRTHS.**

To Mr. and Mrs. Geo. P. Mills, a daughter, Marjorie, October 29.
