Commercial Feeds in Kentucky, 1947

The estimated tonnage of commercial feeds consumed in Kentucky during 1947, based on the sale of guaranty tags, was 582,375 tons. This was 65,286 tons less than in 1946.

Tonnage of feed sold in Kentucky, as estimated from the number of tax tags issued by calendar years, beginning with 1940, was as follows:

| Year | Tons |
|------|---------|
| 1940 | 353,138 |
| 1941 | 350,000 |
| 1942 | 426,805 |
| 1943 | 630,438 |
| 1944 | 663,039 |
| 1945 | 671,351 |
| 1946 | 647,661 |
| 1947 | 582,375 |

Of the tonnage for 1947, 140,025 tons were dairy feed; 37,570 tons, hog feed; 25,630 tons, horse and mule feed; 134,085 tons, poultry feed; 4,215 tons, rabbit feed; 1,450 tons, sheep feed; 16,615 tons, stock feed; 10,505 tons, dog feed; 3,995 tons, mineral feed; 500 tons, goat feed; and 153,880 tons were straight by-product feed.

A summary of estimated sales by class of feed, in tonnage, is given in Table 1.

FEEDER'S GUIDE

The feeder has several aids to guide him in selecting a commercial feed. He should never buy feed not registered and labeled with an official guaranty tag. He should read the tag carefully and base his selection on the information in the guaranty rather than on the claims made by the salesmen. If a feed is not labeled, he should refuse to accept it regardless of any claims made for it. He can also safeguard himself by buying from reputable manufacturers who have good records and make good, clean feeds. He should look with suspicion on all yellow-tag feeds, as such feeds contain fillers of little or no feed value. As a general rule, a feed containing a complex vitamin and mineral mixture is to be avoided, because a long list of materials has no particular merit and needed vitamins and minerals usually can be supplied at lower cost in simple materials.

The Feed Control Department constantly makes check analyses of feeds sold in Kentucky. The results are summarized and published with other valuable data on feeds and their use, in bulletins, which are sent free to anyone interested. Other publications of interest to feeders can be obtained from county agricultural agents or by writing to the Agricultural Experiment Station, Lexington.

REGULATORY BULLETIN No. 63

TABLE 1—SUMMARY OF SALES BY CLASS OF FEED, KENTUCKY, 1947

| Feed | Tons | Feed | Tons |
|---------------------------------|---------|---------------------------------|---------|
| Straight byproducts | | | |
| Alfalfa meal | 300 | Calf feed | 3,290 |
| Barley, ground | 75 | Dairy feed | |
| Bone meal | 550 | 16% protein, yellow tag | 28,700 |
| Brewers dried grains | 1,575 | 16% protein, white tag | 22,475 |
| Corn, ground | 175 | 18% protein, yellow tag | 1,550 |
| Corn meal | 300 | 18% protein, white tag | 5,000 |
| Corn feed meal | 900 | 20% protein, yellow tag | 3,350 |
| Corn byproduct feed | 2,975 | 20% protein, white tag | 27,725 |
| Corn gluten feed | 100 | 24% protein, yellow tag | 5,200 |
| Corn, cracked | 22,440 | 24% protein, white tag | 37,775 |
| Crushed ear corn | 500 | Supplement | 6,825 |
| Cottonseed meal | 4,850 | Dry, freshing, and fitting feed | 1,425 |
| Cottonseed meal (solvent) | 700 | Total dairy feed | 140,025 |
| Distillers dried grains | 4,175 | Dog and cat feed | |
| Distillers dried solubles | 500 | Goat feed | 10,505 |
| Hominy feed | 10,800 | Hog feed | 500 |
| Linseed oil meal | 575 | Fattening and growing | |
| Meat scrap | 2,125 | Supplement | 13,115 |
| Meat and bone scrap | 600 | Total hog feed | 37,570 |
| Mixed feed | 15,875 | Horse and mule feed, yellow tag | 1,175 |
| Oats, ground | 375 | Horse and mule feed, white tag | 23,610 |
| Oat hull feed | 825 | Total horse and mule feed | 24,785 |
| Soybean oil meal | 19,250 | Pigeon feed | |
| Solvent soybean oil meal | 1,375 | Poultry grains | 125 |
| Soybean feed (extracted) | 100 | Chick | 4,510 |
| Tankage | 3,600 | Scratch | 41,105 |
| Wheat bran | 11,700 | Total poultry grains | 45,615 |
| Wheat brown middlings or shorts | 4,625 | Poultry mash | |
| Wheat gray middlings or shorts | 28,770 | All-mash starter and grower | 5,665 |
| Wheat red dog flour | 1,100 | All-mash laying | 12,535 |
| Wheat mixed feed | 8,975 | Broiler mash | 8,685 |
| Wheat feeds (miscellaneous) | 2,375 | Fattening mash | 2,125 |
| Wheat (ground) | 720 | Flushing feed | 525 |
| Total straight byproduct | 153,880 | Growing mash | 13,880 |

COMMERCIAL FEEDS, 1947

5

SUMMARY OF SALES BY CLASS OF FEED, KENTUCKY, 1947—CON'T.

| Feed | Tons | Feed | Tons |
|--|---------|--------------------------|---------|
| Special purpose feeds—Continued | | | |
| Laying mash | 51,220 | Rabbit feed | 4,215 |
| Starting mash | 10,045 | Sheep feed | 1,450 |
| Starting and growing mash | 16,110 | Stock feed | 16,615 |
| Supplement mash | 3,875 | Miscellaneous feeds | |
| Turkey growing mash | 4,660 | Mineral feeds | 3,995 |
| Turkey laying mash | 1,225 | Miscellaneous | 3,345 |
| Turkey starting mash | 3,010 | Protein and mineral feed | 2,375 |
| Turkey supplement mash | 525 | | |
| Total poultry mash | 134,085 | Total, all feeds | 582,375 |

SYSTEM OF TAGGING

This Department groups feeds into three general classes: "straight" feeds, "straight mixed" feeds, and "yellow-tag" feeds, and labels them accordingly. The purpose of this system of labeling is to mark conspicuously certain important differences in the character of feeds. It is designed to aid in the selection of feeds. The tags are issued according to a three-color scheme, as follows:

A manila tag printed in black ink designates a feed made from one grain or plant. This class of feeds is known as "straight" feeds. *Examples:* wheat bran, hominy feed, cottonseed meal, alfalfa meal.

A manila tag printed in red ink designates a feed made from the products or byproducts of two or more grains, or plants, or animal byproducts. This class of feeds is known as "straight mixed" feeds. *Examples:* a mixture of wheat bran, hominy feed, and cottonseed meal; a mixture of corn chop, crimped oats, wheat bran, and alfalfa meal; or a mixture of yellow corn meal, wheat gray shorts, ground oats, alfalfa leaf meal, soybean oil meal, meat scrap, dried buttermilk.

A yellow tag printed in black ink designates a feed containing a material or materials of little or no nutritive value. Such are usually known as "yellow-tag" feeds. *Examples:* feeds containing oat hulls, corn cobs, cottonseed hulls, screenings and screenings refuse or waste, or other similar materials containing an excessive percentage of fiber.

AVERAGE COMPOSITION OF SOME FEEDSTUFFS

This table contains the average analysis of feed materials usually found in commercial feeds in Kentucky. The data are from analyses made at this Station and from other published results, especially **Food and Life** (U. S. Dept. Agr. Yearbook, 1939) and **Feeds and Feeding**, by F. B. Morrison, 1946.

| | Protein | Fat | Fiber | Cal- | Phos- | Vita- | Vita- |

METHOD OF CALCULATING THE ANALYSIS OF A FEED MIXTURE

Requests are often received for a method of calculating the analysis of a given feed mixture. Examples are given of two classes of feed most commonly mixed by the feeder, in 1,000-pound batches, for his stock.

Example 1. 20-percent protein dairy feed

| 1 | 2 | 3 | 4 |
|--------------------------------|--|--|---|
| Ingredients | Percentage of protein, or pounds in 100 | Hundreds of pounds of each ingredient | Pounds of protein from each ingredient |
| 150 pounds wheat bran | 15 | 1.5 | 22.5 |
| 200 pounds ground shelled corn | 9 | 2 | 18.0 |
| 150 pounds hominy meal | 11 | 1.5 | 16.5 |
| 150 pounds cottonseed meal | 41 | 1.5 | 61.5 |
| 150 pounds soybean oil meal | 41 | 1.5 | 61.5 |
| 100 pounds ground oats | 11 | 1 | 11.0 |
| 100 pounds alfalfa meal | 14 | 1 | 14.0 |
| 1000 pounds | | 10 | 205.0 |

Then 205.0 divided by 10=20.5, the percentage of protein in this feed.

Example 2. 20-percent protein laying mash

| 1 | 2 | 3 | 4 |
|-------------------------------|--|--|---|
| Ingredients | Percentage of protein, or pounds in 100 | Hundreds of pounds of each ingredient | Pounds of protein from each ingredient |
| 150 pounds wheat bran | 15 | 1.5 | 22.5 |
| 200 pounds wheat middlings | 16 | 2 | 32.0 |
| 200 pounds ground yellow corn | 9 | 2 | 18.0 |
| 100 pounds ground oats | 11 | 1 | 11.0 |
| 150 pounds meat scrap | 50 | 1.5 | 75.0 |
| 100 pounds alfalfa meal | 14 | 1 | 14.0 |
| 100 pounds soybean oil meal | 41 | 1 | 41.0 |
| 1000 pounds | | 10 | 213.5 |

Then 213.5 divided by 10=21.35, the percentage of protein in this feed.

Explanation of Method Used in Table I.

1. List the number of pounds and ingredients in column 1.
2. Get from the guaranty on the official tag or from the average analysis the protein content of each ingredient and put it in column 2.
3. Place the hundreds of pounds of each ingredient in column 3. For example, 150 pounds of an ingredient is listed as 1.5 hundred pounds.
4. Multiply the figure for each ingredient in column 2 by that in column 3 to get the figure in column 4. This is multiplying the number of pounds of protein in a hundred, by the number of hundred pounds of each ingredient, to get the total pounds of protein furnished by each ingredient.

5. Add column 3, which gives the total weight of the mixture, in hundred pounds.

6. Add column 4, which gives the total weight of protein in the mixture.

7. Divide the sum of column 4 by the sum of column 3. This gives the percentage of protein in the mixture.

The percentages of other substances such as fat or fiber can be calculated in a similar way.

Some of the standards that have been in effect in Kentucky for a number of years were changed January 1, 1948.

The present standards and regulations are as follows:

Chemical Standards:

| Standard By-Products: | Minimum Protein | Minimum Fat | Maximum Fiber |
|--|-----------------|-------------|---------------|
| Alfalfa Leaf Meal..... | | | 18.00% |
| Alfalfa Meal | 13.00% | 1.50% | 32.00% |
| Barley, Ground | | | 6.00% |
| Buttermilk, Dried | | 5.00% | |
| Corn, Chopped, Cracked, (Screened) | 8.00% | 3.50% | 3.00% |
| Corn, Chopped, Cracked, Ground | 9.00% | 3.75% | 2.50% |
| Corn Feed Meal | 8.00% | 3.75% | 4.00% |
| Cottonseed Meal, 41% Protein | 41.00% | 5.00% | 12.00% |
| Cottonseed Meal, 43% Protein | 43.00% | 5.50% | 10.00% |
| Hominy Meal, Hominy Feed | 10.00% | 7.00% | 6.00% |
| Oats, Ground | 11.00% | 4.50% | 12.00% |
| Rye Middlings or Shorts..... | 15.50% | 3.50% | 6.00% |
| Wheat, Ground | 12.00% | 2.00% | 3.00% |
| Wheat Bran | 14.50% | 3.75% | 10.00% |
| Wheat Brown Middlings or Shorts | 16.00% | 4.00% | 7.50% |
| Wheat Flour or White Middlings or Shorts..... | 16.00% | 3.50% | 3.50% |
| Wheat Gray Middlings or Shorts | 16.00% | 4.00% | 6.00% |
| Wheat Low Grade Feed Flour | 13.00% | 2.50% | 1.50% |
| Wheat Mixed Feed | 15.50% | 4.00% | 8.50% |
| Wheat Red Dog (Hard Wheat) | 16.00% | 4.00% | 4.00% |
| Wheat Red Dog (Soft Wheat) | 14.50% | 3.50% | 3.50% |

Special-Purpose Mixed Feeds:

| | | | |
|----------------------------|--------|-------|--------|
| Dairy Feed | 16.00% | 3.00% | 15.00% |
| Hog Feed (Fattening) | 14.00% | 2.50% | 8.00% |
| Hog Feed (Growing) | 16.00% | 3.00% | 6.00% |
| Horse and Mule Feed | 9.00% | 2.00% | 15.00% |

Poultry:

| | | | |
|---|--------|-------|-------|
| All-Mash Broiler Ration | 18.00% | 2.50% | 8.00% |
| All-Mash Growing Ration | 15.00% | 2.50% | 7.00% |
| All-Mash Laying Ration | 15.00% | 2.50% | 8.00% |
| All-Mash Poultry Ration | 15.00% | 2.50% | 7.00% |
| All-Mash Starting Ration | 17.00% | 2.50% | 7.00% |
| All-Mash Starting and Growing Ration | 17.00% | 2.50% | 7.00% |
| Broiler Mash | 18.00% | 2.50% | 8.00% |

Chemical Standards—Continued

| Poultry—Continued | Minimum Protein | Minimum Fat | Maximum Fiber |
|---|-----------------|-------------|---------------|
| All-Mash Poultry | | | |
| Fattening Mash | 12.00% | 2.50% | 8.00% |
| Growing Mash | 17.00% | 2.50% | 8.00% |
| Laying Mash | 18.00% | 2.50% | 8.00% |
| Starting Mash | 20.00% | 2.50% | 7.00% |
| Starting and Growing Mash.... | 17.00% | 2.50% | 7.00% |
| Turkey All-Mash | | | |
| Laying Ration | 16.00% | 2.50% | 8.00% |

General Requirements:

- (a) In making registrations, care should be exercised to make the chemical guaranties reasonably close to the actual content of feed. In other words, arbitrary guaranties will not be accepted as final.
- (b) If a material change is made in the guaranty of a feed, in effect lowering the value of the feed, the name of the feed must be changed also.
- (c) The percentage of protein must form part of the name in all high protein materials. Example: 41% Protein Cottonseed Meal, 60% Protein Tankage. Where more than one special purpose feed is offered under the same brand name and for the same purpose, the protein guarantee must form a part of the brand name. Example "Excelsior Brand" 18% Protein Dairy Feed, "Excelsior Brand" 20% Protein Dairy Feed.
- (d) Oil-mill by-products containing hulls, screenings and similar materials, thus materially lowering the percentage of crude protein, cannot be called meals, but may be called meal and hulls, or meal and screenings, or feed, or by some proprietary name.
- (e) Any feed containing less than 9% protein must be called by the name of its ingredients.
- (f) In naming feeds, the terms "feed" and "ration" should be distinguished. A feed may or may not be a ration. A ration is a complete feed and does not require other feed to be fed in addition to it.

Ingredients:

- (a) Basic or essential organic food ingredients stated in the guaranty must be in 3% each or more. If not, the feed will be classed as misbranded.
- (b) Vitamin carriers must be correctly listed, grouped together, and total percentage given.
- (c) Mineral ingredients, generally regarded as dietary factors essential for the normal nutrition of animals, when added to a feed must not exceed 3%, except for laying and breeder mashes in which 4% is allowed. Where it can be shown that these allowances will not provide the minimum mineral requirements for a given feed, larger amounts may be allowed upon special request.
The amount of salt in any stock feed, including poultry feeds, should not exceed 1%.
- (d) Condiments and charcoal are not feed materials. However, they are permitted when percentage amounts are given.
- (e) Materials primarily medicinal or poisonous in nature are prohibited as ingredients in feed.

Screenings:

- (a) Percentage of screenings in wheat feeds and statement that they are ground must be given.
- (b) When screenings are used in mixed or special-purpose feeds, the percentage must be stated, and the minimum amounts of protein and fat and the maximum amounts of fiber and ash for such screenings must be stated in the registration. Samples of such screenings may be required to be furnished on request by the Department.
- (c) If all or part of the immature, broken and light grains and other seeds of commercial value have been removed from screenings, the material must be called "screenings refuse" or "screenings waste."
- (d) Screenings must be ground fine enough to destroy the germination of all weed seeds present.

Materials of Little or No Feeding Value:

- (a) Percentage of material of little or no feeding value must be stated.
- (b) When organic materials of little or no feeding value as concentrates are used in mixed or special-purpose feeds, the open formula must be given in the registration. The open formula will not be printed on the tag unless there is a good reason why it should. The Department reserves the right.
- (c) In mixed feeds, the amount of a material or materials of little or no feeding value as a concentrate, must not exceed 25% of the mixture.

False Registration and Cancellation:

Improper registration, adulteration or misbranding of a feed not only renders the offender liable to prosecution, but the registration may be canceled by the Department.

TABLE 2—REPORT OF OFFICIAL FEED SAMPLES ANALYZED
October—December, 1947

Samples failing to equal guaranty by more than one-half of one percent, or that were adulterated with hulls, unground weed seeds, or refuse, have been made to stand out in the report by the use of bold-faced type, a pointing hand, and (where necessary) appropriate remarks in the column labeled "Remarks."
