* Resigned November 1969.

INTRODUCTION

This bulletin contains the results of inspection and analysis of commercial feeds sold in Kentucky during the calendar year of 1969, and other information helpful to those interested in this field.

During 1969, 3,043 official samples of feed were secured by inspectors. 2,752 or 90.5% of these passed inspection and analysis satisfactorily. During 1968, 2,769 official samples were secured and 93% of these were passed. The total estimated tonnage of commercial feeds distributed in Kentucky for 1969 was 651,787 tons. In 1968, the tonnage was 627,500 tons.

The feed control section of the Division of Regulatory Services handles all matters concerning feed inspection, registration, analysis, and compliance.

FEED MONITORING PROGRAM

All feeds sold in Kentucky must be registered with the Feed Control Section. Registration forms are available upon request. There is no charge for registration. Once registered, it continues in effect until re-registration is called for. Most companies keep all registrations current by cancelling feeds no longer manufactured and by adding new feeds. Inspectors are constantly in the field checking with dealers to assist them with their records and feed manufacturing practices. Inspectors examine labeling and sample feed. Samples are analyzed in the chemical laboratory. Samples that do not come up to the guaranteed analysis are listed in an annual feed bulletin published by the Section. Those companies having seriously deficient feed samples are advised by letter regarding the deficiency and on occasions when the situation is serious, stop sale notices may be issued until the deficiency can be corrected. Feed inspection and analysis is becoming more and more complicated. The Feed Control Program protects the feeder by requiring proper labeling, adequate purpose statements, precautions and warnings where necessary and checking contents of feeds with the guarantees. Manufacturers and dealers are thus enabled to do business on an orderly and equitable basis.

During the year inspectors brought in 64 samples of feeds that were not registered. Feed manufacturers have been most cooperative in registering such feeds. 104 stop sales were issued during the year on feeds. 56 of these were for record only as the feeds that were sampled had been sold before the results of analysis were available.

ESTIMATED TONNAGE OF SALES BY CLASS OF FEED,
KENTUCKY, 1969

<u>Mixed Feed</u>	<u>Tons</u>
Calf Feed	8,994
Cattle Feed	32,492
Dairy Feed	153,002
Dog & Cat Feed	27,734
Horse & Mule Feed	22,648
Mineral Feed	7,875
Pig & Hog Feed	146,343
Poultry Mashs	105,421
Rabbit Feed	2,040
Scratch Feed	5,748
Sheep Feed	552
Turkey Mashs	1,145
Miscellaneous Mixed Feed	<u>17,697</u>
TOTAL MIXED FEED	<u><u>533,757</u></u>
<u>Straight Materials</u>	
Alfalfa Products	3,589
Animal Products	2,660
Barley Products	183
Brewers Products	798
Corn Products	24,648
Cottonseed Products	6,838
Distillers Products	7,400
Linseed & Flax Products	552
Molasses	15,806
Oat Products	2,942
Soybean Products	25,940
Wheat Products	18,206
Miscellaneous Products	<u>8,468</u>
TOTAL STRAIGHT MATERIAL	<u><u>118,030</u></u>
GRAND TOTAL	<u><u>651,787</u></u>

COMPANIES HAVING FEED REGISTERED, 1969

- Acme-Evans Co., Inc., Indianapolis, In. 46222

UREA

The following information may be of some help to manufacturers and feeders using urea.

Urea is a white crystalline powder made by combining ammonia and carbon dioxide under pressure in equipment that will withstand high temperature.

Urea contains 46.5% nitrogen, which is equivalent to 291% protein. The commercial product "262" Feed Compound, is urea which has been diluted with other materials to prevent caking, and contains 42% nitrogen which is equivalent to 262% protein. The addition of 1 percent of this material to a dairy feed is equivalent to adding 2.62% protein. Besides urea's protein equivalent value, one must also consider its lack of energy value as compared to the common high protein feeds. An example of this, if the nitrogen in urea is used as efficiently as the nitrogen in high protein feeds, it will require approximately 14 pounds of urea, plus 100 pounds of grain to replace 100 pounds of soybean meal.

Urea, when used as an ingredient in feeds sold in Kentucky is shown in the guaranteed analysis as follows:

Crude Protein, Not less than _____ %
 This includes not more
 than _____ % of equivalent crude
 protein from non-Protein Nitrogen

Crude Fat, not less than _____ %

Crude Fiber, not more than _____ %

One percent of "262 Feed Compound" would be 2.62% equivalent protein from non-protein nitrogen. Urea should be shown as an ingredient under "Ingredients."

Cattle, sheep, and goats are able to convert urea to a usable form through the action of micro-organisms in the rumen. The organisms convert the nitrogen of urea to protein in their cell bodies which are in turn digested by the animal.

Horses, swine, dogs, and other single-stomach animals are unable to utilize urea. If used in large quantities, it may be toxic to such animals.

The Association of American Feed Control Officials has a regulation to the effect that urea be used in such limited quantities as to insure the total amount present shall not exceed 3 percent of the (grain) ration or 1/3 of the total protein. If a feed contains more than 3 percent of urea, the label shall bear a statement of proper usage and the following in type of such conspicuousness as to render it likely to be read and understood by ordinary individuals under customary conditions of purchase and use:

CAUTION-USE AS DIRECTED

On labels such as those for medicated feeds which bear adequate feeding directions and/or warning statements, the presence of added non-protein nitrogen products shall require neither additional feeding directions nor the customary non-protein nitrogen warning statement.

CHANGES IN PRODUCT NAMES

<u>NEW NAME</u>	<u>OLD NAME</u>
Soybean Meal	Soybean Oil Meal
Linseed Meal	Linseed Oil Meal
Meat Meal	Meat Scraps
Meat Meal Tankage	Tankage or Digester Tankage
Wheat Middlings	Wheat Standard Middlings
	Wheat Gray Middling
Wheat Shorts	Wheat Brown Shorts
	Wheat Gray Shorts
	Wheat White Shorts
Wheat Mill Run	Wheat Mixed Feed
Wheat Germ Meal	Wheat Germ Oil Meal
Oat Hulls	Oat Mill By Products (If Fiber is over 22%)
Rye Mill Run	Rye Feed
Rye Flour Middlings	Rye Middlings
Soybean Mill Feed	Soybean Mill Product
Vitamin A Oil	Vitamin A Feeding Oil
Vitamin D Oil	Vitamin D Feeding Oil
Vitamin A & D Oil	Vitamin A & D Feeding Oil
Cane Molasses	Molasses
Corn Sugar Molasses	
Beet Molasses	
Citrus Molasses	
BHA (A Preservative)	Butylated Hydroxyanisole (A Preservative)
BHT (A Preservative)	Butylated Hydroxy Toluene (A Preservative)

THE MEDICATED FEED LABEL

The medicated label is to be used for all medicated feeds, which contain drugs for specific purposes, such as: Prevention of diseases, treatment of diseases, aid in control of diseases, hormone action, worming, etc. It is also to be used for certain non-antibiotic drugs added for growth stimulation and feed efficiency purposes (i.e., organic arsenicals). It is also to be used for feeds containing antibiotics at low levels for growth promotion and improved feed efficiency. The following features should be noted:

1. The word "Medicated" shall appear directly following and below the product name, in type-size no smaller than one-half the type-size of the product name.
2. The purpose statement shall appear below the term "Medicated." It should be precise and simple.
3. Active drug ingredients (list of common names, not trade names) and percentage present, except low level antibiotics for growth promotion and feed efficiency in feeds which are to be fed continuously as a sole ration for each drug. All products which contain less than 2,000 grams (total) of antibiotics per ton are to be expressed in grams per ton, and all products which contain 2,000 grams or more are to be expressed in grams per pound. The term "milligrams per pound" may be used, in lieu of percentage declarations for drugs (including antibiotics), on the label only in those cases where a dosage is given as "milligrams per day" in the feeding directions. Note that the hormone percentage need not be stated in the product name but may appear only as a regular active drug ingredient guarantee.

Labels for feeds containing growth promotion and/or feed efficiency levels of antibiotics, which are to be fed continuously as a sole ration, are not required, at the present time, to make quantitative guarantees, except as specifically indicated in certain instances in the Federal Food Additive Regulations for certain antibiotics, such as Tylosin, Oleandomycin, and Nystatin, wherein quantitative guarantees are required regardless of the level or purpose of the antibiotic.

LABEL FOR ALL MEDICATED FEEDS

100 LBS. NET WEIGHT

**BLUE BIRD
CHICK STARTER 3218**

MEDICATED

To aid in preventing outbreaks of coccidiosis. Follow feeding directions and warning statement on back of this label.

Active Drug Ingredient(s)

Nicarbazin 0.0125%

Guaranteed Analysis

Crude Protein, not less than..... 20.0%
Crude Fat, not less than 4.0%
Crude Fiber, not more than..... 3.0%

INGREDIENTS

Each ingredient must be specifically named (unless stated as such in the guaranteed analysis listing) in accordance with the names and definitions adopted by the AAFCO.

Manufactured by

BLUE BIRD FEED MILLS

Robin, Indiana

Samples are shown as "not passed" in Table 2 when extremely deficient or excessively above guarantee as follows:

Protein:	More than 2 units*below guaranty Exceeds guaranty by 5 or more units
NPN:	Exceeds guaranty by more than 2 units
Fat:	More than 2 units below guaranty Exceeds guaranty by 5 or more units
Fiber:	Exceeds guaranty by more than 2 units
Invert Sugar:	10% lower than guaranty
Salt:	Varies from guaranty by plus or minus 2 units
Calcium:	Varies from guaranty by plus or minus 2 units
Copper, Iron, Zinc:	± 40%
Oxytetracycline, Penicillin, Chlortetracycline:	± 50%
Phenothiazine, Sulfamethazine, Furazolidone, Arsanilic Acid, 3-Nitro-4-hydroxyphenyl arsonic Acid, Nitrofurazone, Zoalene:	± 40%
Tylosin:	± 30%

* One percentage point is considered a unit. Example: a "found" value of 15%, is 1 unit below a guarantee of 16%.
