
The undersigned would respectfully report that he is
employed in procuring 88 tons of the kind of hard stone known as
the Berea stone from about two miles above Berea on the
Ohio River that portion he could find where was once a granite
building being much out of repair also on record a good stone
of a Community located in the County Seat where all would
agree best to procure Mr. Russell not any decision after he has
all must not cost anything to those then — the Jail House
because of the Court House the County shall duly and
Commissioners Court to procure such necessary repairs
for Counties in making and on the Public Highways. Your Committee
of the Jail plan of repairing and enlarging that they have
— we find an old stone building just up according to the
original plan of repairs also for the Court House
— have reported Berea at $1.00 — to more than $1.50 —
more. The property of the Commissioners
to be ... would be viewed that we have for this
purpose intended only but that can be built for
... all ... in

Your Committee would further report
that he has not had an opportunity to make further examination
or investigation but states that he does not know of any
other places as eligibly located as this that can be procured
and found for the same amount of money. Should some
other locality be selected it would still be necessary to take
other plans as the cheapest plan for the building under
the appropriation. Finally submitting a plan for the
Court of Pleasure which will suit the Court House
Building Committee with the Commissioners Court
ask the discharge of the Committee.
