## SEED INSPECTION IN KENTUCKY, 1953 - 54

The twenty-second year of operation of the Kentucky Seed Law began May 1, 1953 and closed April 30, 1954. During this time 842 official samples were taken from a total of 8,205 lots of seed inspected.

Enforcement officials have passed upon all violations and irregularities and helped to solve many of the problems of farmers and seedsmen.

### EXPLANATION OF TABLES

The following tables show the results of analysis of official samples. Table 1 shows the percentages of purity and germination stated on the tags and the percentages found, a statement of excessive amount of noxious weed seeds when present, irregularities in tags, and absence of tags. The variations allowed in purity, germination, and weed seed per ounce are described on page 22, USDA Service and Regulatory Announcements, No. 156, Rules and Regulations Under the Federal Seed Act, Reissued July, 1950: paragraphs 201.59, 201.60, 201.61. Results within the allowed variations are marked with "+" if above, or "-" if below statement on the official tag.

Variations greater than those allowed constitute violations of the Kentucky Seed Law, and such results are underscored. In the table, "L" means listed on the tag and "F" means found in our test. The long line means "not listed".

Table 2 shows violations found in samples classified according to wholesale dealers from whom they were purchased.

Table 3 contains a summary to show the kind and number of violations detected.

Totals	842	35	30	53	98

Regulatory Bulletin No. 113

The percent of unlawful samples this year is 11.7 as compared with 5.6 last year and 15.9 for the twelve year average, 1941-2 to 1952-3 inclusive.

Recent abnormal weather conditions have so affected seed production as to make it difficult for seedsmen to maintain their usual high standards. However, the trend is still toward a higher standard of quality.

Farmers and seedsmen, as well as operators of seed cleaning machines, have given excellent co-operation to the educational program of the Department.

The demand for higher quality seed is strong in Kentucky.
