Students dealing with adjustments

By Jamie Kerr
Contributing Writer

Imagine leaving your home town, your family and your country and going to live somewhere overseas, having to adjust to different food, weather, customs and a whole different culture.

Imagine emerging yourself into a strange world where everybody seems to know each other, but you don't know anybody. That's what many of the international students at UK have had to face: A total readjustment to life.

Lily Arasaratnam knows the transition well.

"I felt a lot of out place when I came here," said Arasaratnam, a graduate student and communications major from Sri Lanka. I felt like people already had a group of friends established, so I

found it really hard to make friends," she said.

After growing up partly in Sri Lanka and partly in the Maldives, formerly the Maldivian Islands, Lily went two years of her undergraduate at the Institute of Technological Studies in Sri Lanka and then came to UK, where she completed the last two years of her undergraduate work.

She received a bachelor's degree in psychology and now works as a teaching assistant. Her days at UK are somewhat routine but always busy.

Lily's typical Thursday begins with teaching an 8 a.m. Calculus 113 class. As they file into the classroom, Lily affectionately greets her students by name. The class is rather small with an upbeat atmosphere, and, although it's early in the morning, the students seem attentive to what Lily says.

She begins the class with questions about the homework.

"Two, 12, 18," various voices shout, referring to numbers of certain homework problems. Lily proceeds to explain the problems and takes other questions.

She dismisses the class at 9:15 a.m. and goes back to her office to prepare for the next class. At 10 a.m. she checks her e-mail and grabs something to eat before teaching another Calculus 113 at 11 a.m. She attends a statistics class, Educational and Counseling Psychology 557, at 12:30 p.m.

After her office hours, from 2:30 p.m. to 3:30 p.m., she goes to the computer lab to do some research for her classes. She winds down by meeting with a close friend at 5 p.m. to pray and talk.

"At six o'clock, I go home," Lily said with relief.

The food is one of the

PHOTOS BY JOHNNY FARRIS Kannel staff
INTERNATIONAL STYLE Undeclared freshman Krutika Desai (left) talks to Jamie Lee, a business junior, in the lobby of Jewell Hall (top).

biggest adjustments for many international students.

"When I came here, I was miserable. I couldn't taste anything because everything was so bland," she said.

She was used to very spicy food that takes a long time to prepare.

Eventually Lily adapted to the taste of the "bland" American food.

Bowl hopes resting on final games

An unexpected welcome greeted me upon arrival at lucky number seat 13 on press row in Commonwealth Stadium Saturday night.

It was appealing for the first 30 minutes of rain-soaked football, even as LSU jumped out ahead of UK early 12-0.

It read like an early addition to a Big Blue, Christ-mas-wish list.

The four-panel, double-sided brochure, advertising a holiday trip for two teams and their guests to Shreveport, La., included more than Cajun cooking and Auburn quarterback Dameyune Craig throwing from 1996.

The grand prize? A Dec. 28 date in the 22nd Annual Poulan/Wed Eater Independence Bowl where the Southeastern Conference's fifth best team is inserted.

Representatives from the Florida Citrus

UK prof provides insight into abuse

New approach makes the abuser more accountable

By Ellen Lord
Staff Writer

Brian Jory's Intimate Justice Theory has touched the hearts of abusive men around the country.

Jory, an assistant professor of family studies and acting director of UK's Family Center, developed a new approach for treating men who batter and psychologically abuse women.

"Brian has created a model for working with the couple that challenges common ideas that the woman plays a major part in her abuse," said Michele Bogard, a Boston psychotherapist whose work on violence issues has been published widely.

"He also is not victimizing or demonizing the man but is

working with him to strengthen the relationship and his responsibility as a husband," Bogard said.

As a therapist, "you're taught to be neutral, objective," Jory said, but when dealing with abusive situations, "the therapist must take a stand."

"Intimate Justice" Theory gives the therapist some solid ground on which to challenge or confront an abusive man, something other than saying "What you're doing is wrong," Jory said in a news release.

To give therapists a counseling structure, Jory studied the ethics of intimacy. In 1995 he began to apply intimacy ethics to therapy. He and his colleagues spent hours interviewing subjects in abusive relationships and worked with 30 couples developing techniques and specific approaches for nearly two years.

Jory and his colleagues found the Intimate Justice Theory "surprisingly effective."

Students don't show for lottery

By Brian Dunn
Assistant News Editor

About 50 students stood on the wet sidewalk in front of Memorial Coliseum at 7:59 a.m. yesterday. Fifty students waited eagerly for the doors to open to UK's first basketball ticket lottery of the season. Fifty students stood where thousands have before on frozen days.

"It was not a good start to say the least," said Rodney Stiles, director of Administrative Services for the UK Athletics Association.

It was not a good start for students hoping to get back their original allotment of student tickets, he said. It was not a good start in what appears to be a continuous decrease in student ticket interest.

"I hope they start coming," Stiles said. "I don't want to see them lose their tickets."

But, Stiles added, the lottery was for what will probably be the three least interesting games of the season — Court Authority on Tuesday, Nov. 11 at 7:30 p.m., the Australian National Team on Tuesday, Nov. 18 at 8 p.m. and Morehead State University on Thursday, Nov. 20 at 8 p.m.

The ticket window opens at 9 a.m., and guest tickets go on sale on Tuesday morning at 9.

Another explanation for the small turnout at the lottery is that UK hasn't had lotteries for the exhibition games, Stiles said. Instead, students bought exhibition game tickets at the Memorial Coliseum window.

Because the Morehead State game was close to the Australia game, UK held a student ticket lottery for all three games, he said.

Most of the about 500 tickets that were sold by last night were for the Morehead State game, Stiles said. Seats are available in rows H and J of section 32 for the exhibition games. Tickets also remain in the lower arena for the Morehead State game.

"Students can probably buy as many tickets as they want to," Stiles said before warning if student ticket purchases don't increase, then the UK Ticket Committee may have to decrease the student allotment again.

Art exhibit a reflection of student's life

By Matthew May
Contributing Writer

When Libby Barnes walks down the street and sees a piece of junk, she sees art.

In an art exhibition opening today at the Radfall Gallery in the Student Center, Barnes will show that ordinary junk is the key to a masterpiece.

The exhibition, titled *Mixed Meditations*, is full of everyday items that, coupled with artistic designs and a pallet of colors, have been turned into extraordinary pieces of artwork to show Barnes' penchant for death and the environment.

Barnes, who is putting on the expo as the final step in her Master of Fine Arts program, said the pieces reflect both the positive and negative events that have filled her life.

"I have had a lot of death in my life, but that is what motivates my work," she said. "I use the art to keep personal memories of those loved ones alive."

In many pieces she will display, many have special meaning to Barnes. One piece includes several small and decorative jewelry bags that contain something from Barnes' past, such as wisdom teeth and other significant items.

While these pieces of jewelry and artwork have special meaning to Barnes, she wants people who see her show to connect with the works.

"Each piece is very personal and has a special connection with me," Barnes said, "but some pieces were designed to be interactive with the viewers."

Although Barnes' work is diverse and draws upon a multitude of both artistic and environmental aspects, one characteristic seems to stand out. Many of the pieces incorporate what looks like a stained-glass window design, using a variety of colors in wild and eccentric patterns.

Much of the work in this exhibition was crafted within the last two years, but it is really a culmination of years of work that has evolved.

"This show is filled with my more recent work," Barnes said. "I started out working with children and people in asylums, then moved through a feminist period. But this show is really the fruit of my searches and enshrines special presences within my life."

Cats fail in attempt for MAC supremacy

Staff report

With yet another chance to clinch or at least tie for the Mid-American Conference championship, the UK men's soccer team traveled to Oxford to face Miami and came home empty-handed. The team fell 2-1 to the Red Hawks (7-10-1, 4-3 MAC) in front of only 76 fans. The game was scoreless for the entire first half, before MU's Craig Cochran scored in the 67th minute. Just over one minute later, Cochran and Jon Holfinger assisted Will Bloom on a goal, putting the Red Hawks up 2-0. UK (11-6-2, 5-2 MAC) avoided being shut out when senior Brian Baltzell scored an

unassisted goal at the 74:54 mark.

Baltzell was listed as day-to-day prior to the game with a calf strain.

UK managed only 10 shots on goal while MU had 14.

The game marked a return to goal for senior Chris West, who had not started since being named MAC Player of the Week earlier in the season.

Freshman Brian O'Leary had been handling the goalkeeper post, but injured his thumb Wednesday night against Vanderbilt.

West had four saves. The Cats have lost three in a row, and will travel back to Oxford Wednesday for the MAC Tournament, which runs Thursday through Sunday.

'O' doesn't show on Senior Day

By Rob Herbst
Sports Editor

An enormous black cloud blanketing the UK Soccer Complex was a true omen as to how yesterday would turn out.

Senior Day isn't supposed to be cold and dreary.

Senior Day for the UK women's soccer team was cold and dreary. The Wildcats' offense was stuck in the thick mud for 90 minutes as UK lost to rival Indiana, 2-0.

"This week we said we needed to play with heart and give it everything we had," said UK head coach Warren Lipka. "We did that, but in doing that, we forgot to play the game. We were never in rhythm and we just could not take care of the ball."

If the crummy weather was a bad omen, the Hoosiers' (11-8) first goal was an even worse omen. IU's Kris Fosdick took a point-blank shot from inside the box at 35:57.

UK goalkeeper Carrie Kuhnell hunched over and ready for the save but the ball slipped through Kuhnell's hands like a wet bar of soap and trickled just over the line for a goal. There was some controversy as to whether the ball made it into the net but a goal was counted.

Thirty minutes later the Hoosiers' Emily Fitzkorn was alone just inside 18 yards. She planted a shot in the right side of the net and planted any hopes UK had to win on Senior Day.

"The thing that was really missing today was ball control," said senior Kim LaBelle. "We just gave the ball up and they had the ball control and showed us what to do."

Before yesterday's game, four UK seniors were honored on the field with their parents. Co-captains Alison Rooney and LaBelle were honored along with Brittany Mobley and Megan May.

The quartet will be remembered most for taking the Cats to back-to-back NCAA Tournament appearances in 1995 and '96.

"Sure it's our last game at home, but it's not like we go out any harder on Senior Day," said Rooney who downplayed the festivities.

While Rooney and LaBelle have been perennial starters for the Wildcats, Mobley and May have not.

Lipka is especially grateful for Mobley and May's continued efforts despite not seeing too many minutes.

"A lot of people don't know the sacrifices they make for being on the team," Lipka said. "They're just as important if not more so than our starters. They know they have to get a break or do something spectacular to play some minutes and for that I carry the utmost respect for them."

While the quartet will be remembered for the two tournament appearances they will be especially remembered for the Cats make it to the NCAA Tournament this season.

A Southeastern Conference Tournament championship is a must for the Wildcats (8-11-1) to be a part of this year's NCAA Tournament field.

UK will take on Auburn in the first round of the SEC Tournament which begins Thursday in Gainesville, Fla.

The Wildcats will be the No. 3

seed from the East and the Cats aren't exactly on a high losing roll their last three games. "We're still missing something. I don't know if it's the guts or if it's the talking. It just seems real quiet out there," LaBelle said.

"We can't look at our past results and try to build on that that would be pretty stupid," Lipka added. "This is a second season for us and we have to remember that."

UK volleyball loses to Georgia

The UK volleyball team lost to Georgia in four games, 15-7, 8-15, 2-15, 10-15 Saturday in Athens, Ga.

UK (12-11, 3-8 Southeastern Conference) was led by Jaclyn Homan's .400 hitting percentage

behind 10 kills, five digs and two block assists. Georgia (15-10, 9-3 SEC) hit .287 as a team, while holding UK to a .123 hitting percentage.

The Wildcats return to home action on Tuesday against Louisville at 7:30 p.m.

Double trouble

The UK doubles team of Mas-

soumeh Emami and Kelly Brown advanced to the semifinals of the Southeastern Conference Cross Country Regional Tournament in Chapel Hill, N.C., on Sunday.

The duo will face the second seeded team of Nicola Kaiwai and Dorothea Kurz of Wake Forest today in the semifinals.

Cross country finishes seventh

The UK men's and women's

teams finished seventh and sixth, respectively at the Southeastern Conference Cross Country Championships on Saturday. The Arkansas men's and Florida women's teams brought home the two titles.

Alan Beymer was UK's top performer with his 27th place finish. Susan Gibson placed 31st to lead the UK women.

TRIVIA TEST

WHEN WAS the last time LSU won a Southeastern Conference Championship?
A: In 1988, LSU went 6-1 under Mike Archer.

SPORTS WEEKEND wrapup

"IT'S LIKE tinkering with a car — adjust some bolts, tighten some screws, change a fan belt or two."
Mike Major, UK defensive coordinator on the Cats' defensive woes.

UK defenseless against Bayou Bengals

SAM HAVERSTICK, Kernel staff

HANGIN' TOUGH The LSU defense put consistent pressure on UK quarterback Tim Couch. Despite the play of the LSU defense, Couch threw for 400 yards and four touchdowns.

By Jay G. Tate
Sports Editor

Against No. 14 Louisiana State Saturday night, UK ran 95 plays on offense. Most of those 95 plays helped the Cats amass 529 yards of total offense.

Five of them made the whole situation moot.
What ended as a 63-28 Big Blue bludgeoning looked like a closely contested game at half-time. UK's defense had managed to hold heralded LSU running back Kevin Faulk to 68 yards through the first half.

The Cats' offense, after a slow start, was in full splendor — putting together three touchdown drives in their final four possessions of the half.

UK was ahead of LSU, 21-20.
"We withstood the onslaught of their athleticism in the first half like we'd been talking about doing," UK head coach Hal Mumme said.

"The kids were playing real good," UK defense coordinator Mike Major said of his unit's first half performance. "We played hard and we were ahead."

But the lead wouldn't last long. After marching 45 yards on its initial possession of the second half, UK turned the ball over on a fumble by fullback Derek Homer deep in LSU territory. The Tigers scored on the ensuing possession.

One play, one turnover, one LSU touchdown.

On the second play of UK's next possession, wideout James Whalen fumbled. LSU scored on the next play.

Three plays, two turnovers, two LSU touchdowns.

"I think we would have overcome one (turnover) because we were moving the ball well," Mumme said. "The second one down there in our end — was the one that kinda broke our back."

It got worse. On UK's second play of the next possession, quarterback Tim Couch threw for wideout Craig Yeast. He found LSU's Chris Cummings instead.

LSU scored on the ensuing possession.

Five plays, three turnovers, three LSU touchdowns — an anti-theatrical slam of UK's game plan.

"If we'd put that TD drive in to begin the second half, I think you have a different ballgame — for a while, anyway," Mumme said of the drive halted by Homer's fumble. "You know (the Tigers) were going to be able to run at us hard after a while."

"But if you put that one in, you make them press and things can happen for you."

Instead, the UK offense was in broken record limbo — drive, turnover, LSU score.

"I was really surprised to get the ball those three times," LSU head coach Gerry DiNardo said of UK's third quarter follies. "You couldn't have written a better script. Our defense made plays and our offense was able to capitalize on them."

LSU's second half capitalization was key. It was indeed offense with a capital O.

The Tigers scored touchdowns on six consecutive possessions in the second half — a streak that catapulted LSU's running statistics into the absurd.

State amassed 400 rushing yards against the weary UK defense. Faulk finished with a gaudy 212 yard performance. Back-up running back Rondell Mealey tattooed the Cats with 131 yards. Quarterback Herb Tyler rushed for 53 yards, including a second quarter 52-yard draw play that set up the Tigers' second touchdown.

It was Rushing Offense 101. And LSU walked out of the classroom with an A.

"We came into the game think-

ing we could establish a running game and that is what we did," Faulk said.

It was known coming into Saturday's game UK's run defense had its hands full against the LSU ground game. But in the wake of the multifaceted blasting Big Blue took from the Tigers, is it time for a defensive overhaul?

"I'm sure we'll make some changes," Major said. "It's like tinkering with a car — adjust some bolts, tighten some screws, change a fan belt or two."

"In the second half, we just should have made a bunch of plays," Major added. "And we didn't do it."

Despite key turnovers and a tiring defense, UK continued to move the ball on offense. The Cats rolled up 529 yards of offense — including 410 yards poured in by Tim Couch's right arm. Saturday's touchdown passes, which extended Couch's season total to 34, broke the NCAA record for touchdowns by a sophomore quarterback.

Afterward, though, Couch instead focused on his three interceptions against LSU.

"I've got to get out of the mood of trying to make too much happen," Couch said. "Right now, I'm just forcing things out there. I feel like I can throw it through people sometimes — I've got to start hitting open men."

But the open man Saturday night wasn't on Couch's team — it was LSU's Faulk who was throwing himself through people.

And after the game, UK defensive end Bamidele Ali dismissed claims that the defense scored a moral victory after holding Faulk in check in the first half.

"I'm sick and tired of moral victories," Ali said. "It's the same old, same old story. The bottom line is that you've got to find a way to win."

"Moral victories don't mean (anything)."

Atkinson

Miracle needed for trip to beautiful Shreveport

PAGE 1

A night crowd of 58,450, clad in yellow, orange and blue ponchos, neither rained.

Who'd the duo come to see?

With Shreveport only 239 miles away, LSU is a prime candidate. The Tigers' biggest liability is their 6-2 record, good enough to send them to a bigger and better place.

UK, needing two wins to become eligible for postseason play, held a narrow 21-20 advantage over the Tigers at the half.

I flipped to the layout of Independence Stadium to consult optimal seating preferences.

A Mardi-Gras preview party highlighted the agenda on the eve of the big game.

To open the third quarter, the Cats were on the move again, flirting with a possible 28-20 lead.

A costly fumble started a series of UK miscues — five offensive plays with three turnovers, and the airfare to the South-state soon was to be forgotten.

In solitude the pamphlet, lay flat on a table, staring up saying nothing.

Its mere presence was a nuisance as LSU quarterback Herb Tyler scooted into the end zone for six points with 9:06

remaining in the third. His scramble for two more points gave LSU a 28-21 lead, one the Tigers would only build on.

As the Cats' deficit increased, compliments of 221 yards rushing and five touchdowns by running back Kevin Faulk, so did the frustration.

This was supposed to be upset Saturday in the SEC. Louisiana Tech handed Alabama a trifecta for home losses, a 26-20 Homecoming heartbreaker.

At the "World's Largest Outdoor Cocktail Party" in Jacksonville, Fla., Georgia conquered the Gators, 37-17.

Mississippi State threw a wrinkle into the SEC West title race by shocking Auburn, 20-0 at Jordan-Hare Stadium.

My holiday donation to Louisiana's casinos wouldn't get my Christmas money after all. Miracles can happen.

With two minutes left and down 63-28, Independence was nowhere to be found and figured never to be seen again.

Wrong.

In the Wildcat Den for head coach Hal Mumme's postgame press conference, those two reappeared to hear what was to be said. As Mumme talked they listened — attentively. Mumme looked to his left, saw a flash of red, and scanned the rest of the room.

By games end, the brochure found its way to the back pocket of the royal blue UK game folder not to be seen again.

Two games left and two wins later, red may surface again.

Sports Columnist Price Atkinson is a journalism senior.

LSU running game dooms Wildcats

By Price Atkinson
Senior Staff Writer

Losing to Ole Miss at home the last time out, LSU had something to prove not only to themselves but the Southeastern Conference.

"This was a big game for us," LSU tailback Kevin Faulk said after scoring five touchdowns in the Tigers' 63-28 win over UK. "We needed to reestablish ourselves in the SEC."

"Because we lost our last game, we wanted to come out on the field and redeem ourselves."

Led by Faulk's 212 yards on 28 carries, the Tigers' offense amassed 613 yards of total offense, including 400 yards by way of the run.

Backup tailback Rondell Mealey also totaled a season high with 13 carries for 131 yards and two scores giving the Bayou a double dose out of the backfield.

Georgia head coach Jim Donnan said after UGA defeated the Cats 23-13 the previous week, for any team to win in the Southeastern Con-

ference, a team must be able to defend the run. He was right.

The Cats' relinquished a 21-20 halftime lead in a second half that saw LSU's offense rush for 235 and score 43 points on a tired UK defensive unit.

"Over 60 snaps, we get in trouble," head coach Hal Mumme said.

"We didn't have any more steam defensively to make any more stands," he said. "We fired all our shots in the first half."

LSU QB Herb Tyler threw for a season high 213 yards in a near perfect and turnover free effort by the offense.

SEC and NCAA records fall

Overshadowed by Faulk was UK QB Tim Couch who threw for 400 yards and change on 41 of 66 passing with 3 interceptions and 4 TD's.

Both attempts and completions by Couch tied the SEC marks for a single game. He shattered the SEC record for completions in a season, now with 311 (Kurt Page's 286 in 1983 from Vanderbilt).

The Cats' offense eclipsed

SAM HAVERSTICK, Kernel staff

HAIL COLEMAN UK's Kevin Coleman was one recipient of a Tim Couch touchdown pass in the Cats' 63-28 loss to LSU.

the league mark for completions in a season with 322. UK ran a single game record 95 offensive plays Saturday while breaking the school mark for total yards in a season with 4,346.

Ailing

Center Jason Watts suffered a "leg contusion and will miss a few days according to Mumme. Running back Anthony White is also nursing sore ribs.

STICK 'EM UP Dennis Quaid stars in the bland serial killer thriller, 'Switchback.' The film plays at Southpark and Man O' War.

Serial Filler

'Switchback' regurgitates killer story

By Matt Mulcahey
Staff Writer

Hollywood movies follow a simple pattern: Once a movie succeeds, repeat the formula until it doesn't work anymore. Movies like *Silence of the Lambs* and *Seven* have made serial killer movies a popular genre, but in the new movie *Switchback*, the formula just doesn't work.

If you've seen any of the serial killer flicks from recent years, you can probably already guess *Switchback's* plot. Basically, FBI agent Frank LaCrosse (Dennis Quaid) heads a task force assigned to catch an elusive serial killer. When Quaid gets too close, the

killer kidnaps his son. The FBI removes him from the case, but Quaid follows the killer to the mountains of Colorado anyway.

The fatal flaw of *Switchback* lies in the inept script of writer/director Jeb Stuart. With movies like *Die Hard* and *The Fugitive*, Stuart has proven he's a talented action writer. You couldn't tell from this movie.

In Stuart's defense, *Switchback* was his first screenplay and it was written while he was a student at Stanford. It went unmade for more than a decade and should have stayed that way. Stuart's implausible storyline and underwritten, paper-thin characters ruin any chance of *Switchback* rising above mediocrity.

Although the characters are one-dimensional, the acting could have been better. The usually reliable Dennis Quaid gives a stone-

faced performance in the lead. Quaid looks as if he knows this movie is bad, and he's just trying to get through it.

"My So Called Life" star Jared Leto doesn't fare much better than Quaid. Leto accomplishes the astonishing feat of not changing his facial expression throughout an entire movie. It's hard to believe him as a doctor with that blank, vacant look on his face.

In spite of their co-stars' uninspired performances, the supporting cast comes away unscathed. Underrated character

actor R. Lee Ermye, best known for his role as the drill sergeant in *Full Metal Jacket*, gives his usual outstanding performance as a sheriff who helps Quaid. Ted Levine is also good, but he's a constant reminder of the far superior *Silence of the Lambs*, when he

played the cross-dressing psycho. For a movie like *Switchback* to work, it must have a wide array of possible suspects, and the real killer can't be revealed until the end. Stuart gives us only two possible suspects, and one is ruled out after 15 minutes. It's fun to watch Danny Glover play the smooth-talking bad guy, but he's stuck playing the worst-written serial killer of all time. Glover has no motivation for his crimes, and no reason is ever given for his killing spree.

Even when the story lags, there's Oliver Woods' breathtaking cinematography of the snowy mountain landscapes of Colorado. Woods' provides a scenic backdrop for several memorable stunts. The final when Quaid and Glover have a fist fight while hanging off the side of a moving train is particularly well-done.

Lack of originality plagues nearly all of today's Hollywood movies. It's disappointing to see good actors and a good screenwriter doing retrained material from better movies.

Fu feeds on dated '70s gimic

By Trey Prestigiacomo
Contributing Critic

Fu Manchu is a band that you have to be in the mood for. I have never looked up to the stoner image or '70s cool which Fu Manchu currently uses to create some record sales. Despite counting Black Crowes and White Zombie among its fans, Fu Manchu will just have to be put in that unfortunate and ever growing category of "Would have been cool in 1993 or '94 but just didn't have the right timing." Despite its dated concept, there are some high points on their latest album *The Action Is Go*.

Lead guitarist and vocalist Scott Hill used to ride motocross and watch a film called "On Any Sunday" that's where the album's title came

from. I would have to say that the album's title can honestly describe its overall feel.

The album starts with some pseudo-psychedelic lick (thanks to producer J. Yuenger of White Zombie) on "Evil Eye" and then builds to splattering of '70s guitar fuzz and vocals reminiscent of roller derby for some reason. The title track sounds like the music from those old BMX/motocross movies back in the mid to early '80s.

The trend here is retro-music, but not like cheese retro you get in any popular fashion magazine, we're talking about banana skate boards and bike seats, Harley handlebars and B-52's. Fu Manchu is the total epitome of the '70s. In a way you could just call Fu Manchu the soundtrack of

MANCHU MUCK Fu Manchu's stoner/retro marketing play comes about four years too late on its new album 'The Action Is Go.'

the '70s. Even the song "Evil Eye" is written about a car in a figure eight demolition derby that had this huge eye on the hood.

Fu Manchu succeeds bringing about this weird seventies sound,

however, I am left wondering what came first: the music or the marketing? So many bands today are developing music around 15 minutes of trend (i.e. that crappy disco resurgence everyone couldn't believe happened). Music today is just so much more complicated than it should be.

The major problem is that with this stoner/retro music there is no ground breaking you want to tell all your friends about. Therefore, you just have to be in the mood for cars, sci-fi and weed when you listen to Fu Manchu.

Don't get me wrong the music is OK it's just nothing special. I'm sure there are a lot of pissed angry teens into this kind of heavy/loud/bad lyrics/poor taste/non-parental approving sound (if, weren't we all?). But for the college-aged crowd, the lack luster effort and gross marketing play of Fu Manchu cannot be recommended.

Gere up for disappointment

By Jonathan D. Gent
Staff Critic

Red Corner tells the story of Jack Moore (Richard Gere), an American who's caught behind enemy lines in a China that's gone bad with politics and bad business tactics.

After a night with a saucy Chinese model, Moore is found covered in her blood and is taken away.

In China the guilty are punished, and he's guilty.

But he isn't, and Moore and his defense counsel (Bai Ling) must try to prove his innocence, or Moore will get a bullet in the head for his troubles. What follows is a banner-waving political intrigue film with all the trimmings.

Richard Gere is one of the best actors in Hollywood today. At least he can do an accent that's believable. But he often lets his political views overshadow his acting ability. He solves this problem with his new movie, in which he can play a character with his political views and use it for extra publicity.

How nice and simple.

Some people, though, just don't like publicity. The Chinese government wanted to block the release of *Red Corner* because of its harsh portrayal of the Chinese legal and prison system.

If the U.S. government did that every time a film showed them in a bad light, half the movies released each year would be cut in half.

Besides, who cares if a film depicts a powerful Communist nation treating people as less than human by showing an unsanitary prison system that regularly beats its prisoners?

Wait a minute. I see their point.

The real problems for the creators of *Red Corner* is not what a foreign power says about it, but instead its own flaws, of which there are many. In showing the differences between the two societies, they show ritual dances and music of the Chinese people. Do they show American culture as decent? Are the Village People

Photo furnished

decent? OK, not to knock the Village People, but they are far from being cultural necessities. This film almost does more damage to Americans' self-esteem than to the Chinese.

Director Jon Avnet gives the film no real edge, so the audience is left with the script and the actors to give it punch.

He has what could have been a suspenseful, riveting film, and gives it no umph. Avnet's last film was *Up Close and Personal*, and for *Red Corner*, this film doesn't have Michelle Pfeiffer splashing around the ocean in cut-off jeans.

Viewers are really left with Richard Gere and his co-star, beautiful Bai Ling (the spooky sister of Top Dollar in *The Crow*) movie) to carry a sub-par movie

over to averageland. They put up a decent struggle and have an impressive amount of on-screen chemistry, but not even Oscar-worthy performances could have saved this film from being any more than blah.

And just when everything appears its darkest, Avnet proves me wrong with a thrilling climactic courtroom scene that brings the whole movie into focus.

This is a good movie after all! Gere, Ling and the other actors kick it in for one final go-around. But after this harrowing climax, our filmmakers end with a trite, banal cliché — and any other descriptive term meaning overused — Hollywood sappy ending: hugging, tearful farewells and incredibly bad lines.

Just when you thought it was safe to go back into the movie theater, BANG!

We often speak in grandiose terms about the benefits of a well-rounded, liberal arts education. Those benefits can often be life-changing, but they can also be illusionary. What most students really care about is jobs.

We would wager that many students don't care much for those mandatory foreign language classes, the public speaking course or the immeasurably popular cross-cultural requirement. Oh sure, occasionally students will stumble upon gem of a class that they initially dreaded, but those rarities are only a brief distraction from the true goal: A career.

They want something that will support a family for a lifetime and help send their own kids to college. They want the security that one is supposed to gain from a college education.

There's just one problem. Thousands upon thousands of other students want the very same jobs and most are willing to compete for them.

Students need a leg up when they step out into the real world.

That extra boost could be a connection made during an internship program or through a UK

alumni looking to fill a job with fresh blue blood.

The University has taken a giant step towards making that a reality for more students and alumni. Last Thursday, President Wethington announced the donation of \$1 million from First USA, a Bank One company, towards the construction of a new Career Center.

The new facility would be located next to the King Alumni House on Rose Street and would allow the Center to move from its cramped quarters in the Mathews Building.

Not only will staff, students and corporate recruiters have more room to move in the facility, but so will handicap students who presently cannot access the Mathews Building.

The center will have a modern library, on-line computer access and video conferencing equipment. The facility should be completed within two years and may become the finest such center in the nation, helping it to lure recruiters from across the country.

We would like to thank the individuals at UK and First USA that helped make this next step into the future possible. Great job!

IN OUR OPINION

Failure of men to step it up is hurting society

Acceptance of men's role as fathers is a great first step

Being a man is about responsibility; it's not about lame excuses. When my own marriage failed in 1993, I could have taken the easy way out. I was in the Army at the time in route to Korea and I could have pushed the kids onto their mother and said "see ya." Instead I accepted a discharge from the Army so that I could take full custody of my children. My career ambitions in the Army were secondary to my responsibilities as a father.

Clayton Sandford
Kernel Columnist

As most who know me are assuredly aware, I consider myself to be solidly planted in the far right wing of the Republican Party, especially in matters relating to defense. Recently, I was asked by an associate for an opinion about the root cause of the myriad of problems this country faces.

My friend knew that I have a passionate dislike of Bill Clinton, so I'm sure my friend expected me to blame this country's problems on Clinton and by extension, Democrats in general. Although I feel that Clinton is a dreadful president, he is not the root cause of America's problems.

I strongly feel that dead beat dads are the greatest single factor accounting for the decadence that is present today in the United States. Ahhh, I hear a wave of discontent rumbling through the audience. Did I hear someone say illegal drugs were to blame for America's woes? What about the proliferation of firearms on the streets? Crumbling education? Teen pregnancy? Absence of prayer in schools? While the aforementioned problems are indeed serious, I believe them to be symptomatic of the decline of American males as a source of strength in American families.

By no means am I devaluing the role women play in the American family. For the most part women have held up their end of the bargain, it's men who continue to drop the ball. That's right guys, one of your own is calling you out onto the carpet.

For years now, American women have borne the brunt of child rearing. More than ever, single parent families are becoming the norm. In the case of divorce it seems that many males believe a divorce decree is a license to do as they please. I'm fed up with guys who think God placed them on earth to have a good time at the expense of everyone else. I'm sick of reading the accounts of men who father children with no regard to the future well-being of the mother or the children.

God only knows how many current inmates in the penal system would have walked a different path had a loving father been present during their childhood. How many troubled teens have effective male role models? More and more studies are suggesting that a loving and present father is one of the most important components to developing responsible social behavior in children. Yet an increasing number of children continue to be raised in single parent households lead by a woman.

Since the first day I took custody of my children in 1993, they have remained with me. I served in three separate combat operations while on active duty. I served with distinction in the 82nd Airborne Division as well as other airborne units. I have received a chest full of medals for my service, but the greatest badge of honor I have yet earned is that of being a good father.

No one said it's easy being a good father, but then why should it be easy? How often in life is the easy path the right one? It takes guts to be a good father as well as the moral courage to accept responsibility for one's actions. Yet to my eyes, this country seems to be filled with moral cowards. Listen here young men, the time to contemplate the responsibilities of fatherhood is before you engage in sexual activities. If you're not willing to accept the possibility of creating a new life and the 18 years of responsibility that comes with it, keep the pants on!

I have received a chest full of medals for my service, but the greatest badge of honor I have yet earned is that of being a good father.

Ahhh, I can hear a second wave of grumbling from the audience. It takes two to tango I hear someone shout. Which does bring up an interesting point. What about the woman's responsibility as far as conception and child rearing are concerned. While it's obviously true that women are involved in the process, when's the last time you had a girlfriend promise the moon, stars and undying love if you'd only sleep with her. By and large women don't play the pathetic little games men do just to notch the bedpost. I'm not excusing irresponsible behavior by women, I'm just pointing the finger at the larger problem.

It's high time men re-evaluated what it means to be a man. Being a man is about courage and moral convictions. Being a man is about respecting the intrinsic value of women and children. To paraphrase the Apostle Paul: "When I was a child, I thought and acted as child, when I became a man, I put away childish things."

It's time for us men to put away the toys and start acting with true regard to our future. It all starts with a simple yet profound concept.

Think before you act and own up to the consequences of your actions.

Kernel Columnist Clayton Sandford is a psychology junior.

READERS' forum

Who knew that Watkins could get something right?

To the editor:

For the first time in my four years at UK, I partially agree with something Boyce Watkins has written. In a column, Mr. Watkins discusses the SGA's spending habits, and rightly points out the absurdity of allotting \$8,000 of student money for a talent contest.

Now, this contest is an effort to bring together all the campus organizations for some fun, but as we all know, it will turn out to be the \$8,000 Greek talent show. Anyway, for once, Mr. Watkins has made some sense in bashing this idea. Eight thousand dollars is way too much money to be wasted on an event that will include very few students.

Now, on the subject that I disagree with Mr. Watkins, the

money that was allotted to the Circle of Imani group. This is an utter disgrace to the credibility of our beloved SGA President and Vice-President. I seem to recall a group called the Promise Keepers who requested funds for a trip to Washington to attend a rally. Our SGA President vetoed the bill, stating that it was against SGA guidelines to give funds to a group that was exclusive in membership. This decision was noble, and ultimately, the right one.

A rule is a rule. But it seems to me that the same decision should have been made about the money for the Circle of Imani members to attend the Million Woman March. They too, are an exclusive group. It shows the cowardice of our elected leaders that the funding was approved.

It is obvious that the money was approved because of a fear of retribution and slanderous remarks. Why do we have a double standard here?

Tuition hikes don't help us

To the editor:

I wish to register my protest against the proposed tuition hike at Kentucky's universities.

I am a graduate student at UK. If the state wants UK and U of L to be premier research institutions, as it should, what is it going to do about it?

The state's education should be the top priority for the government. It should be willing to spend money for it.

Do not penalize the students, who are already reduced to wearing torn jeans and paying 10 cents to print a page.

Penalizing the student is like axing the branch you are sitting on.

Don't you want more people to go to college?

Astronomical hikes in tuition won't help that, will it?

Life at the Disney Store is just a bit too chipper for me

You work at the Disney Store downstairs, don't you?" the cashier at the mall's food court asked me.

"Uh-huh," I said, accepting my beef and bean burrito.

"How do y'all stay so cheerful? Do they use an electric prod on you, or what?"

"Yeah, they use a prod. Their prod is, 'Cheer up, or you're fired!'"

It wasn't what I had anticipated when I filled out an application to work at the Disney Store. I am a Disney fanatic, so my idea of paradise is shelving Winnie the Pooh piggy banks, dusting porcelain Sleeping Beauty figurines, and hawking Bambi sweatshirts.

When they called me for an interview, they got my answering machine: "You have reached Beverly's enchanted castle. I'm helping Beauty and the Beast polish their Academy Awards

Beverly Spitzer
Contributing Columnist

right now, but please leave your name..."

After that, securing the job was a breeze.

At first, I was very happy in the magical atmosphere. My favorite feature was the movie screen at the back of the store, which would play the "Under the Sea" routine from *The Little Mermaid*, or any of several other tunes.

I carefully followed all the rules. I never let my mouse ears slip askew. I did not strangle the 5-year-old who clammered to the top of the "plush mountain" (the huge pile of stuffed animals) and started pitching Grumpy, Sneezy and Dopey all about. And I never, ever cursed, except for the time that Aladdin's lamps fell on me.

Nevertheless, I soon got in trouble. I don't consider myself a morose person. When I'm at work, I always act polite and pleasant. I can even pull off cheerful,

if the job demands it. What I can't handle is maniacally perky. Oh, I tried. I dutifully plastered on a wide smile and tried to sparkle like the fairies in *Fantasia*. I was standing at the door one morning, smiling relentlessly and greeting "guests" (customers), when the manager beckoned to me. She led me across the "stage" (selling floor) into "backstage" (the stockroom) and sat me on a stool.

I realized I was in "trouble" (deep shit). The manager, "Tinker Bell," stared earnestly at me. Then she smiled. "Now, Beverly, you have to remember that our job is to spread pixie dust!"

I swear that's what she said. I stared back as she went on. "When you're greeting, it would be nice if you could sing along with the screen, and maybe dance around a little!"

I had a nightmarish vision of myself, all gussied up in my cheerleaderish "costume" (uniform), flapping around and

crooning. "Someday My Prince Will Come." I would be doing this in full view of smart-ass teen-age boys, former employers and old high-school chums.

Luckily, there was a stumbling block. I explained, "I can't sing."

"Of course you can sing!" she bubbled. "Everyone can sing!"

"If I burst into song at the front of the store, not only would I class up my prospective customers, the plate glass window displays would shatter. Before I could explain, Tinker Bell chirped, "Go back out there and show that Disney spirit!"

I slunk out, feeling as guilty as Simba after his father died. Back at my post, I decided that if I couldn't sing, I should at least try to dance.

After a minute of my half-hearted shuffles, a fellow "Cast Member" (employee) slipped up to me and whispered, "I'll take over for you if you need to go to the bathroom."

This set the tone for the rest of my stint at the Disney Store. Despite my frantic work, helping guests, stocking displays and wearing a goofy smile, nothing rendered me a true Mouseketeer in Tinker Bell's eyes. I was treated to two more backstage lectures. The second one drove me to tears. They probably would have needed everyone for the Christmas rush.

Come January, I parted, with considerable relief, from the place that had metamorphosed from Alice's Wonderland to Snow White's forest.

By the way, I would appreciate it if you would refrain from showing this article to anyone you happen to know who works for Disney. I don't want to wake up some dark night to see Mickey Mouse's grinning face leaning over me as his white gloves tighten round my throat.

Contributing Columnist Beverly Spitzer is a library and information science graduate student.

Face off

Today's edition of the Kentucky Kernel includes a difficult-to-miss pro-life advertising supplement that annually stirs up the abortion debate as it appears in various newspapers around the country. Although the papers don't produce the supplement they often take heat for agreeing to run them.

Choice of a lifetime

Morality is a small part of bigger debate

The abortion debate rages on and the minority faction of pro-life advocates resort to paying newspapers to publish misleading and logically unsound manifestos of anti-abortion rhetoric. Heaving a labored sigh, the pro-choice realists again assert the long-accepted premise that women possess a constitutional right to choose and maintain control of the course of their lives and the health of their bodies. As you peruse the "abortion tab" in today's paper, feel free to find the flawed reasoning and unacceptable assumptions inherent in their arguments.

Ashley Shrewsbury
Kernel Columnist

At the heart of the issue rests the absolute necessity of balancing the interests of a woman with that of her unborn fetus. The pro-life argument rejects this basic premise, and any debate mandates its inclusion. The states have a legitimate interest in protecting the life of unborn children, and likewise pass legislation in an effort to achieve this end. On the other hand, the state has a legitimate interest in recognizing the rights of women illustrated by the concept of personal liberty embodied in the 14th Amendment's Due Process Clause and the right of privacy inherent in the Bill of Rights and its penumbras. By forcing a woman to serve as a slave to government's interest in prenatal life, she thus loses her autonomy and suffers a morass of damning consequences — life endangerment, the social stigma of unwed motherhood, economic distress, and the grim future of raising a child that she may be psychologically and economically unfit to raise.

Moreover, with regard to the fetus itself, pro-life advocates maintain that it represents a full person, replete with all rights afforded the woman. This is sim-

ply a falsehood. The law recognizes the potentiality of life. All rights, whether they be for damages, for prenatal injury or inheritance of property remain contingent on birth.

Thus, while a woman and the fetus possess rights, although the latter's rights take effect upon birth, it becomes necessary to weigh the competing interests. With this in mind, the Supreme Court in *Roe v. Wade* permits regulation of abortion at the point a fetus reaches viability or after the first trimester. Nevertheless, a woman, depending on her health and in the preservation of her life, may seek an abortion after the first trimester.

The preceding discussion illuminates the underlying principle that abortion is not a black/white morality issue, with only one answer. Abortion represents a complicated, highly individualized concept of rights that continues to fascinate philosophers, moralists and the unfortunate women who seek abortions.

As tender as the issue is to the people faced with the decision, I turn again to the pro-life camp and the tactics used to dissuade the exercise of fundamental rights. One popular tactic, flouting snapshots of developing or aborted fetuses, necessarily appeals to the emotions and makes the abortion seem like a bloody hell or first-degree murder of the helpless. Consider the alternative to illegalized abortion. Abortion would still exist, but death at the hands of quacks and coat hangers would abound as it did in the unpreferred past.

I once saw a picture of a

woman, alone in a cheap motel room, laying on her stomach with her legs tucked beneath her, dead of an embolism following an illegal abortion. Is this an acceptable alternative to legalized abortion? Given the chance, pro-life advocates would skirt this issue and make the choice for everyone. Needless to say, women would face a grim future, shackled by pro-life preferences and their purported moral superiority.

As morally sound as they claim to be, maintaining the pro-choice attitude does not negate morality. Law and morality often walk hand

in hand, and the law's decision to allow choice in the abortion issue reflects lawmakers' decisions to include basic rights and freedoms in the Constitution and Bill of Rights. We reverse the individuality and autonomy inherent in every person and our laws reflect this moral acknowledgment of rights. The law's treatment of the abortion issue likewise makes a moral judgment insofar as a woman's right to choose must be upheld because abolishing it immorally ignores her inherent right to privacy and personal freedom.

The compelling arguments on each side of the issue find credibility only in the mind of the woman changed with exercising a choice. The moral findings, neither right nor wrong, are only relevant when a woman, through consideration of accurate information, chooses one side over the other. A woman should seek the true and fair facts of abortion and try to ignore the guilt-induced path of compliance pro-life advocates create through misleading propaganda.

Kernel Columnist Ashley Shrewsbury is a first-year law student.

Ad gives personal side to tough choice

This is the column I never wanted to write, the column I never imagined writing. I thought about assigning it to someone else and even spoke to a few willing writers about it, but in the end I had to write it. That's not because I have some great wisdom to impart or

Minnesota, a group that annually places such advertising supplements in papers across the country. The photography, stories and layout are entirely the work of that group.

It's true that we could have refused the advertising supplement as some papers have done; however, the seriousness of the subject matter outweighed objections that might have been raised about the manner of its presentation. As for myself, I've never given much thought to abortion.

I've always accepted the notion that guys shouldn't have an opinion on abortion because they can't have children.

But that's the coward's way out. It's a convenient excuse for guys who don't want to be pinned down as either pro-life or pro-choice. It's a way to avoid taking a stand. It does us all a great disservice by removing from consideration a great variety of voices and opinions, both pro-life and anti-abortion.

For instance, take my initial reaction to the supplement. It was one of complete apathy. I thought the photos would scare a few women out of abortions and piss off a whole lot more. If anything it seemed destined to backfire.

Then I read it and realized there was more to it than a few graphic photos to catch our attention. In fact, the pictures seemed rather tame after a thorough reading of the literature within. It's all about context. If those pictures had appeared in a biology textbook or were shown at a medical seminar they

wouldn't have raised nearly so many eyebrows. I would challenge everyone, on both sides of the issue, to sit down for an hour tonight and flip through it. You don't have to buy into it, just put aside your own feelings for a little while and at least read it, before you condemn it.

It isn't the typical political literature that you often read and I should know. I've read far more than I'd like from Republicans, Democrats and others. I expected to see heavy doses of religion combined with a number of heart-ripping guilt trips. It wasn't there. Admittedly, you could savor and feel it around the edges, but it's not in your face like you would expect.

For those who haven't ventured inside the supplement's pages, here is a little of what you'll find:

An entire page devoted to resources for women dealing with a pregnancy and even a few to help women that have already opted for an abortion.

Upbeat stories of three women all faced with the same decision. One opted to keep the child, another placed her baby up adoption and a third had an abortion but successfully moved on with her life.

A detailed description of seven abortion techniques. Obviously, it's an anti-abortion publication and there is a definitive slant. Nonetheless, much of the information can be useful and enlightening. Some of the information may be disturbing especially for women who have been faced with an unplanned pregnancy, but that doesn't mean it should be dismissed.

It's a difficult decision, a life changing one for the mother and child. It shouldn't be taken lightly and it shouldn't be another ball for the politicians to throw around. Go out and get a little information from all sides. Discuss it with family and friends. Then move forward knowing that you haven't rushed into anything.

We may live with hypocrisy but our faith continues

To the editor:

Thanks to Ben Rich for his recent column "The Greek gods of Olympus had it right all along." I always find it interesting when an extremist writes against religion because more often than not they end up proving the very thing to which they are so vehemently opposed.

Unfortunately Mr. Rich writes as if hypocrisy is the fatal objection to faith in God and the practice of true Christianity. What he fails to understand, as does the pious fraud who defrauds himself, is that being a true Christian means we have been called by and in accordance with the teaching of the New Testament to follow Christ, not his disciples, not the church fathers, not even the church itself. Thus, neither Mr. Rich nor any other unbeliever can honestly charge Jesus Christ with being a pious fraud (hypocrite). They can only resort to the mother of all their prejudice and ignorantly ridicule Him as the "poor schmuck dumb enough to get nailed to a cross." Mr. Rich, in his admitted hubris, would have us believe that he is open-minded and sophisticated. Yet, I would remind him that G. K. Chesterton once said something to the effect that an open mind should be like an open mouth; it should only be opened when it has

something solid to bite down on.

Mr. Rich expressed his disdain for faith in The One God revealed in the Bible because of the pious frauds (hypocrites) among some professing that belief. Granted there are hypocrites and even I must confess I have been guilty at times and I have an equal disdain for it in my own life. Yet, even hypocrisy presupposes a faith in the One God that is both real and valuable. Think about it. Hypocrisy, like counterfeiting, can only exist for two reasons; namely, because of what is real and what has value. Men do not counterfeit \$25 dollar bills because they are not real to begin with and are therefore valueless. Furthermore, men only counterfeit the higher denominations of currency rather than nickels and dimes because of their greater value. Mr. Rich, hypocrisy in religion, while shameful as it is, presupposes the greater value and the reality of true religion. Thanks for pointing out the hypocrisy in religion.

Rich must live with accusations

To the editor:

I am writing in response to Ben Rich's recent editorial on Christianity. I must confess, I am no fan of Mr. Rich, but in the interest of free press I have found no objection in the past to his incessant ravings. However, I would now like to exercise my right to respond in like fashion.

In his article, Ben Rich raised many points, the majority of which centered on the hypocrisy of Christians. I, being a dedicated and hard-working Christian, of course took offense, but that is not the reason for my writing. I would like first to commend Ben Rich, and then to warn him.

Ben Rich does indeed have a point, no matter how much it pains me to acknowledge it. There are many, many people wearing the label of "Christian" who do not live up to its standards. I am one of them. In fact, no one can conceivably live up to the title "Christ-like." That is why the world needed Christ in the first place.

Nevertheless, when we decided to become Christians, we did so with the knowledge that from that moment forward our lives would be put under a microscope for the entire world to examine, pick apart, and mock. So now Ben Rich joins the masses of Christian critics. He is in good company by the world's standards. For just a few of his contemporaries include Athar Schopenhauer, Karl Marx, John-Paul Sartre, Albert Camus and Friedrich Nietzsche.

The difference here lies in the fact that these gentlemen showed their great respect to Christianity with infinitely much more intelligence, wit and validity than Ben Rich or the Kernel could ever possibly fathom.

I would also like to point out that this article proves that in God's eyes, Ben Rich and people who share his views, are more tolerable than those in this world who have no opinion at all, or who claim an empty opinion. Jesus himself said, "I know thy works, that thou art neither

could nor hot: I would thou wert cold or hot. So then because thou art lukewarm, and neither cold nor hot, I will spue thee out of my mouth." (Revelation 3: 15-16).

And while Ben Rich does not believe this, because he does not believe the Bible, those of us who are Christians are called upon to adhere to this teaching — Ben Rich is not the greatest evil on campus, no matter how much he would like us to believe it.

My point is this, Ben Rich has made some pretty bold accusations and personal statements of belief in a public newspaper. I sincerely hope he realizes the magnitude of his actions. For, just as those of us who label ourselves Christians are held to certain behavioral standards by the world, so has Mr. Rich now committed himself to living a life of anti-Christianity.

He must be consistent in his actions and beliefs, or else face the consequence of being labeled a hypocrite, too. This means that unless a statement of retraction is ever made, Ben Rich just declared his life a monument to the antonym of each and every Christian belief. He better believe that we will be watching.

Jessica Harris
architecture sophomore

Rich misfires on Christianity

To the editor:

I have no problem with Mr. Rich sharing his opinion with the rest of the University. That's great! We have the right to express ourselves freely. Our nation sup-

ports this concept as stated in the Constitution. However, I do have a problem with him degrading other people and their beliefs.

I am a Christian and, yes, I did not like Mr. Rich's article. However, I did not dislike the article because Mr. Rich does not believe in God. I am sorry that he doesn't believe in God, but he is missing out on a lot. Nonetheless, that is his opinion. I do not agree with it, but I understand everyone is entitled to his or her opinion and I respect his viewpoint.

I disliked the article because he portrayed Christians as ignorant seeking fools who invented the idea of God to feel secure about the afterlife.

Granted, there are some Christians who feel they have the right to judge, the majority of us do not. We do not make fun of someone else's belief, we just want to share our belief with those who do not understand. Christians do not degrade other people who are different.

Mr. Rich should pay more attention to his environment. There are many educated people who are Christians, such as doctors, lawyers, politicians and even scientists. Surely these educated people are not ignorant seeking fools?

Christians may not be able to "prove" to a Non-Christian there is a God, but could a Non-Christian prove there isn't one? A Christian belief in God is formed on a foundation of faith. If you are not a Christian, this concept may be too simple. And if you are a Christian, then you know it is.

UK graduate guest judge on MTV show

Training in Fine Arts college has prepared Bell for stardom

By Paula Pryor
Contributing Writer

The MTV series "12 Angry Viewers," will have a recent UK graduate participate on its panel this week. Lori Bell, of New York, was chosen to be a judge on five shows today through Nov. 7.

She is one of 12 out of nearly 1,000 people who auditioned. The show, which airs Monday through Friday, 5:30 p.m.-6 p.m., features new music videos and the judges' feedback on the piece.

Bell said that the hardest part about taping this show was not having a script and not knowing what to expect.

Show host Carson Daley was the only person with assigned lines throughout the taping. "There was no practice before filming, but all five shows were taped in one day."

After graduation in June, Bell moved to New York City in pursuit of her lifelong dream.

"I've always known that I wanted to be an actress. I did my first TV commercial at eight years of age," Bell said. "Once I got a taste of it, I couldn't be stopped."

Bell earned a bachelor of Fine Arts with a concentration in acting in 1997. She was active in many of UK's plays such as *Hair*, *Jesu Christ Super Star* and most recently *Kiss Me Kate*. After studying at UK for two years, Lori wanted to broaden her horizons and started her junior year in California at San Diego State.

It was almost immediately that she realized the theater department at UK was superior to what she was encountering in California.

So she returned to UK after one semester.

While making plans to move to New York, Bell was introduced to Brian Stocker. Sandy Bell, Lori's mother, is the assistant ath-

letics director for UK Athletics Association. She had known the former UK basketball manager, and she knew that he was moving to New York to work on Wall Street.

Though originally apprehensive about Lori's career choice, Sandy Bell has become supportive of her daughter.

"After trying to direct Lori into a 'real career' for years, I finally learned that acting is a very real career to her and I will support her where ever she goes or whatever she does."

Sandy Bell is happy to know that Lori is not alone in New York.

She and Stocker have become best friends. They share an apartment in midtown Manhattan. They serve as advisers to each other on their personal lives as well as professional business, and they have conquered the fear of

the big city by going out and experiencing it firsthand.

Stocker landed a job with Lehman Brothers on Wall Street, and Lori Bell is working with her second passion — clothes. She has a salaried job in the garment district for a private clothes line, Casablanca. She said she looks forward to going to work every day.

Bell has already been cast in a Woody Allen film, but the rigorous filming schedule conflicted with her regular job. Plus, it didn't offer the benefits she receives at her current job. She said she is looking forward to the time when filming jobs will be her primary occupation.

"It is wonderful to be living out my lifelong dream here in New York, but it was tough leaving my family and friends behind," Bell said.

"I make small amounts of money and pay large amounts for living expenses here, but I have no regrets. I had all my sacrifices will pay off in the long run."

Bell

Penn State studies minority retention rates

By Booeyon Lee
Daily Collegian

STATE COLLEGE, Penn. — Since the University released financial initiatives last fall to increase the presence of underrepresented minorities on campus, more members of those minority groups have matriculated to Penn. and the administration has begun to address the pressing issue of student retention.

Of the 2,333 students who accepted the University's offer of admission this year, 287 black, Latino and Native-American students matriculated — a 24 percent increase in that population from the previous year.

And the number of incoming black students increased 22 percent last year — from 126 to 156 — while the number of incoming Latino students increased by 10 percent, according to Admissions Dean Lee Stetson.

Neither the Admissions Office nor the Department of Institutional Research and Analysis would release specific numbers on the Latino or Native-American populations.

Further data shows that the growth in minority applications, admissions and enrollment has been relatively steady over the four years of University President Judith Rodin's administration — with the exception of last year,

which saw a major drop in the admissions and matriculation rates.

The initiatives may have contributed to this year's rebound. But the large jumps this year may also be less significant than they first appear, because they represent a continuation of the broad trend of steady increases.

"The numbers have grown significantly over the last 10 years," Stetson said, adding that his staff is working to attract more minority students for the Class of 2002.

But Black Student League President Rasool Berry noted that minority representation has been better in the past. In 1971, 170 black students matriculated into the University's freshman class,

he said — 14 fewer than this year even with the heavy increase.

"Why is there such a difference from 22 years ago?" the College junior asked. "Looking back and also looking at what needs to be done on this campus now, you realize it's a long way to go. But these improvements over this past year is definitely a move in the right direction."

Tania Castro, president of La Association Cultural de Estudiantes Latino Americanos, noted that lumping minority groups together for statistics can often be deceiving.

"The University often groups the Latino-American and international Latinos together," the Col-

lege junior said. "There's a big difference between the two."

Rodney Morrison, director of Minority Affairs for the Admissions Office, attributed the rise in the minority population to increased recruiting efforts funded by the University's initiatives.

"We visit a lot more secondary schools in high minority population — especially those in inner city — than our competitors," he said.

As a result, Penn receives more minority applications from underrepresented minorities and Asian Americans than any of the other Ivies, with a minimum of 6,000 minority applications out of a total of approximately 15,500, according to Morrison.

Native Americans, scientists at odds over artifacts

By Helen Gao
Chicago Maroon

CHICAGO — Who has the most legitimate claim to Native American Indian remains and cultural artifacts, most of which currently "belong" to museums and around the world? This was addressed at the conference held this past Friday by the University of Chicago Social Science Division, entitled "Law and the Sacred: Native American Repatriation."

The conference is part of nationwide efforts to address some of these issues and many more complexities surrounding the

widespread Native American Indian repatriation movement. At issue is whether scientists who study them for a better understanding of human anthropology, the museums which display and preserve them, or the Native Americans from whose ancestors they originated have the ultimate claim.

Even if it is settled that the latter should have the right to the remains and artifacts, how is the process of repatriation to be negotiated amongst these competing parties? The repatriation movement started with the passage of the Native American Graves Protection and Repatriation (NAGPRA) statute seven years ago.

NAGPRA was passed to protect Indian burial sites from disinterment and help Indian tribes reclaim ancestral remains, funerary and sacred objects stored in museums. The conference drew a diverse audience from around the country and Canada concerned with Native American affairs. Those who attended included museum staffs, lawyers, scholars, federal administrators, those from unrepresented tribes. A Lakota elder from South Dakota, Vinson Catches, opened the conference with a blessing in a Native American language.

Professor James Riding In from Arizona State University, a Native American of the

Pawnee tribe in Nebraska with extensive knowledge in repatriation, gave the keynote speech.

"Many of these people that we have dealt with manifest something of a schizophrenic behavior," Riding In said. "On the one hand, they proclaim nothing but the utmost respect for our culture and beliefs."

On the other hand, they are willing to go into our cemeteries to trash our culture, to take them, to place them in institutions for study, and claim ownership of them." Riding In also noted the disrespect American Indians suffered in the repatriation process.

Teaching assistants fight Florida policies

GAs protesting University's lack of health benefits

By Abby Alderman
Independent Florida Alligator

GAINESVILLE, Fla. — Graduate teaching and research assistants are protesting what they say is an unfair UF policy that denies them employee health benefits and adequate pay.

UF is the only member of the American Association of Universities that does not provide health care for graduate assistants.

In an attempt to encourage UF officials to give them the coverage, these UF employees held a petitioning drive on Monday and Tuesday at the Plaza of the Americas.

"I believe that as employees of the state and the university we deserve health insurance," said Dina Smith, an English teaching assistant. "Our pay is fairly low, and as a result many of us can't afford it."

Smith said Graduate Assistants at the University of Wisconsin are paid \$15,000 a year and receive benefits. UF GAs are paid about \$8,000 a year, without benefits, she added.

Some GAs said they see this as an

Duke lashes out against practices of sweatshops

Associated Press

DURHAM, N.C. — The makers of items that carry the Duke University logos will soon be required to sign a pledge that they don't use sweatshop labor.

"It's important for us, as an institution, to ensure that people who are manufacturing products bearing our (trademarks) are conducting themselves in an ethical manner," said Jim Wilkerson, director of Duke Stores operations and trademark licensing.

The code of conduct being worked on by Duke and Collegiate Licensing Co., which negotiates trademark deals for 160 universities, will require companies to fully disclose working conditions in their factories.

At the urging of student leaders, Duke is one of a handful of schools, including Notre Dame, revising their contracts to include a code of conduct for manufacturers, said Bruce Siegal, Collegiate Licensing vice president and general counsel.

"When top schools, such as Duke, come out and pay attention to this issue, I wouldn't be surprised if other colleges don't jump on the bandwagon," Siegal said.

Of any sweatshop work involving Duke products, Wilkerson said he has no "firsthand knowledge of a lot of problems out there."

On Friday, students at the University of North Carolina at Chapel Hill met with former basketball coach Dean Smith about alleged working conditions in Nike's overseas factories. Nike has contracts with both Smith and Duke basketball coach Mike Krzyzewski.

Twenty Duke students helped guide the university forward with a late-September campaign to raise campus awareness. The "Students Against Sweatshops" campaign has more than 30 university chapters around the country.

"We're not trying to boycott one country or one company," said Duke junior and campaign organizer Ben Au. "We're trying to make sure the entire system is correct."

The students sent a letter to Duke President Nan Keohane on Sept. 12 asking her to push for a policy that would guarantee Duke merchandise had no links to sweatshops.

Keohane said Duke's contract with Collegiate Licensing will be updated with the code of conduct in August.

JOHNNY FARRIS/Kernell staff

UNITED NATIONS Flags representing the nationalities of students at UK line the walls in the lobby of Jewell Hall.

Jewell Hall offers world of diversity to residents

Cultures merge allowing others to learn customs

By Kristin Henley
Staff Writer

Imagine living in a dorm with students who represent the world. About 100 international and American students live in Jewell Hall.

"The diversity is awesome," said Annmarie Hahn, a home economics senior and one of five Jewell Hall resident advisers. Hahn originally from Radcliff, Ky., studied in Germany for six and a half years.

"It creates a feeling different in itself than other dorms," she added.

"The students like how close Jewell Hall is to the campus," said Melanie Tyner-Wilson, assistant director of Residence Life.

"The dorm is ideal for international students because it is open nine months of the year, including academic breaks when other dorms are not open. International students have this alternative if they do not have the opportunity to return home during the breaks.

"Students like the option and the special holiday activities," Tyner-Wilson said.

"Even though the residents are unique to one another, the dorm provides a family atmosphere for residents from far

away," said Eva Ralvik, an economics and marketing junior from Sweden.

"It is difficult to be so far away," said Krutika Desai, an undeclared freshman from Zambia, "and you get really homesick."

"The residents have a common goal: a will to do something different. This creates a bond among the residents," Hahn said.

Jewell Hall merges cultures and allows its residents to learn another's culture and customs.

"It's a learning, living lab," Tyner-Wilson said.

Housing tries to pair an American student with an international student, especially if the international student is studying English as a second language. Students applying to live in Jewell Hall follow the same procedures other students do for the other dorms on campus.

"Residents learn from each other because of the differences," said Jeannie Lee, a finance sophomore from Malaysia.

"You have to handle two different cultures who may or may not understand the other's verbal or body language," Ralvik said.

But "language is not necessarily a barrier in communication," said Caroline Boag, a school psychology doctoral student and Jewell Hall Director who studied in Great Britain.

Roommates deal with the usual roommate trouble, but

understanding each other's cultural differences offers another potential problem.

Usually the problems are resolved after both roommates can communicate and understand the differences, Boag said.

The dorm gives residents opportunities to display their customs in floor programs. One group might dance, sing, or prepare a traditional dish from his or her country.

"It gives them a chance to interact with each other," Boag said.

"It's like a library," Ralvik said, "just waiting a news story with a resident about his home country gives you a different perspective."

Everyone is friendly and share everything, the students said.

The staff likes to have programs to bring out the diversity of the residents.

We make our own community with the residents and staff, Boag said.

International students come to UK through exchange programs with foreign universities, and because UK has a strong international business program, Hahn said, a field many residents are studying.

When students leave Jewell Hall after graduating or deciding to move off-campus, they still feel a bond with the dorm.

"They miss Jewell because everyone takes care of each other," Ralvik said. "They eventually return to visit those who still live here."

Student

International students deal with life at UK

From PAGE 1

can food, and she said it would be difficult now for her to eat the spicy food she once loved.

Weather is another big change.

For example, Lily saw snow for the first time on her first day in Lexington. She called the United States a "cold country" but said she didn't have trouble adapting to the lower temperatures. Going back to the Maldives and re-adapting to the very hot temperatures was difficult.

International students also have to deal with the changes that come with living in a new country.

"Here, you find lots of different people," said Chchicuzo Okoli, or Zim as she likes to be called, a nursing major from Nigeria.

The first difference Lily noticed between Sri Lankans and Americans is "people have this space concept here." She said she wasn't sure whether or not people liked her because they wouldn't sit beside her in classes. She later realized many people here initially sit far away from each other, and let the space fill in. It's customary in Sri Lanka for someone to go sit beside whoever is already there, she said.

Both Lily and Zim have similar ideas about the friendliness of people in America.

"I knew that Americans were friendly here," Lily said.

"People smile at you and then pass you by, but for the longest time, I couldn't understand why someone who was so friendly wouldn't want to be friends with me," he said. "There's a different concept between friendliness and friendship."

Zim described Americans as "so nice they don't want to offend you."

"The American humor was another difference he noticed."

"At times you get it," he said, "at times you really can't."

Model makes abusers more accountable

From PAGE 1

ive because it created an empathic environment for the man while simultaneously challenging him ... to change his abusive way."

The treatment has earned national attention. *The Journal of Marital and Family Therapy* published an article this month about Jory's treatment, and his paper was voted as one of the most influential at a recent meeting of the American Association of Marriage and Family Therapy.

"His ideas are obviously getting the attention of the marriage and family therapy world," Douglas Sprenkle said in a news release. Sprenkle is a marriage and family therapy professor at Purdue University and former editor of the journal.

"Intimate justice is ... the first comprehensive approach for therapists," Jory said. "It is based on principles of ethics and works with the abusive men to change their behavior."

Many abusive men have suffered severe abuse as children, Jory said. Even after being "whipped with electrical cords" or "hit with a two by four," these men do not acknowledge their previous experience as abuse.

"They have a tendency to deny and minimize" the abuses they commit, he said. They also tend to react defensively when confronted by therapists. Jory's first technique "shifts the focus away from (the abuser) and forces him to consider the impact his behavior has on (the woman)."

By creating "an environment where he feels comfortable enough to examine his own behavior," Jory and his co-therapist help the abusive man understand the nature of abuse.

He said, "It's a very eye-opening experience for them."

Barnes

Art exhibit displayed in Student Center

From PAGE 1

The Student Activities Board and Visual Arts Committee is sponsoring the show, which runs through Nov. 28. It is open to the public Monday through Friday from 11 a.m. to 5 p.m.

Barnes will also have a reception for the expo on Nov. 21 in conjunction with the Gallery Hop, an event that allows people to tour several Lexington art galleries in one night. People will get a chance to see Barnes' work and speak with her directly.

"I wanted to hold it (the reception) the same night as the Gallery Hop as that people could come and interact with me," Barnes said. "Hopefully, it will make it more enjoyable for them."

While the public will get to speak with Barnes herself, they still probably won't understand exactly what is meant with each piece. She said they will come away with an appreciation for that piece of junk they step over everyday without thinking twice.

Students commit to Fellows

By Charles Shumaker
Staff Writer

The UK Fellows program has added some new faces to University contributors like W.T. Young.

UK students Sherri Eden, Jennifer McClelland, Josh Mitchell, Melissa Moore and Carrie Sterling Wilder committed to the program.

The UK Fellows program is set up so that students who wish to have an opportunity to give something back to UK. A student Fellow is someone who gives a minimum of \$10,000 to UK.

Student Fellows have a longer period of time than Fellows. The students' pay-back period is 15 years, while the normal period is 10.

Fellows co-chairwoman Alizha Rice said, "The program shows that students are willing to contribute even though it may be a sacrifice for them."

The new Fellows were honored at a dinner Friday night in their honor. The dinner, at Rupp Arena, featured new and old Fel-

lows. In the 31-year history of the UK Fellows, more than 4,000 individuals and organizations have contributed \$326 million to UK. University Fellows join Barker Fellows, Bowman Fellows, Patterson Fellows and Presidential Fellows, all contributors at different monetary levels.

The Fellows Society hopes that this year will be another year like last year when a record 44,000 donors gave \$41 million to UK.

The students plan, which was constructed last year, gives students an opportunity to play a major role in improving UK at an affordable rate. The plan calls for students to pay \$20 a month while they are students and then as little as \$50 a month for the first five years after graduation. After these five years, a review is done of income and the payments are set up based on that.

"The student plan has the same requirements, just easier payments," Rice said.

Since the new plan started last year, including last year's student

Fellows, the program has given \$100,000 to UK. The plan was set up to incorporate students after a proposal two years ago.

The opportunity to become a student Fellow was introduced in September when letters were sent to student leaders across campus. After that, a reception was held to inform candidates of the program.

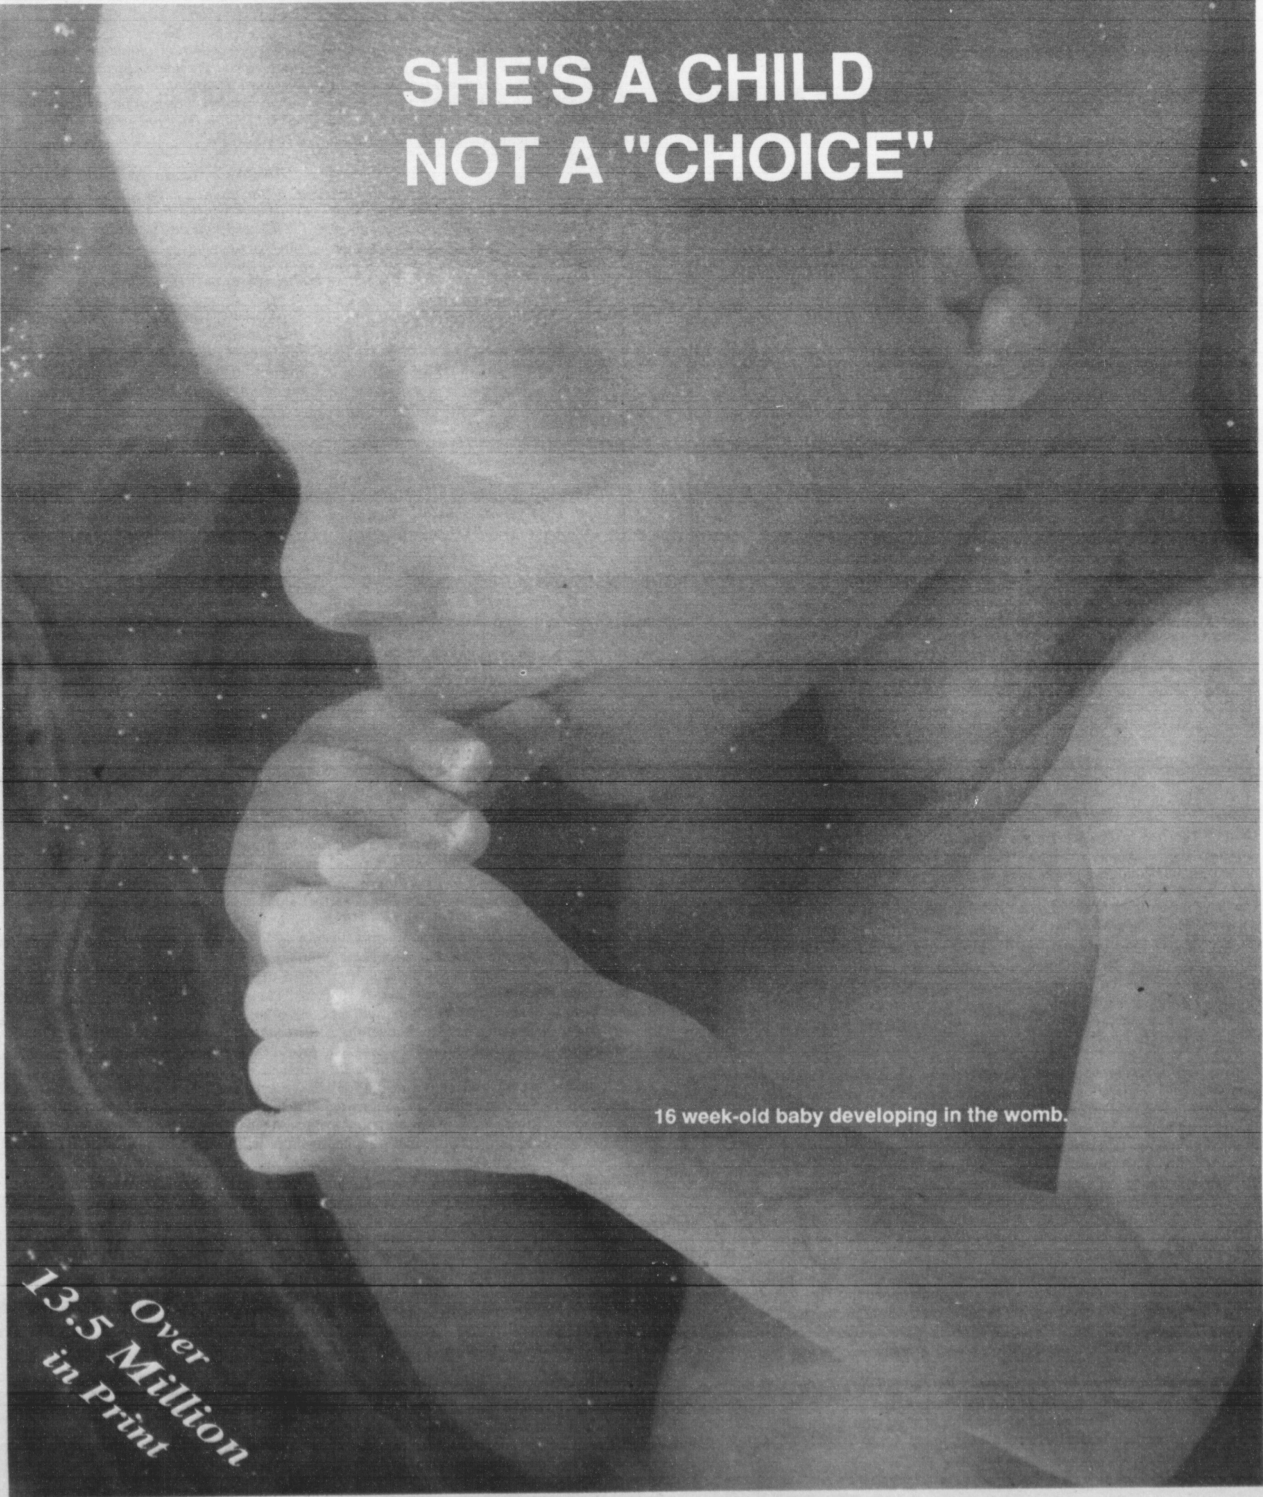

Eden, an ISC junior and one of the new Fellows, said the plan is affordable for college students wanting to contribute.

"I always planned on contributing to UK, this is a better investment," Eden said.

Although Eden said, Fellow they are given the opportunity to give back to the UK community.

"Being a Fellow is something to be proud of, I wanted to contribute as an alumni," Eden said.

Although Eden said, contributing \$10,000 to UK is far from some students' minds, the UK Fellows Society gives those who want to an opportunity to contribute and leave their mark by assisting the future of the University.

**SHE'S A CHILD
NOT A "CHOICE"**

16 week-old baby developing in the womb.

in Print*

The of the Matter

The special love between a mother and baby comes straight from the heart.

This Supplement has been prepared by:
Human Life Alliance of Minnesota Education Fund
3570 Lexington Avenue North, Suite 205
St. Paul, Minnesota 55126 • (612) 484-1040.

Fact vs. Fiction: Exposing the Myths

Claim: *Abortion is legal, therefore, it must be right.*

Answer: If child abuse were suddenly declared legal by the U.S. Supreme Court, would that make it right? Would we ignore such an injustice and do nothing to protect the children?

Claim: *I have the right to "choose" to abort my baby - a woman's "right to choose!"*

Answer: How can anyone have the right to *choose* to kill another individual? The only "choice" in abortion is between a dead baby or a live baby. Furthermore, the advocates who defend the "choice" to abort, producing a dead baby, are not consistent. Why is it only in the case of abortion they argue that "choice" should be absolute? Using the same rationale, shouldn't people have the right to "choose" to use drugs ("*It's my body*") or the right to "choose" to practice prostitution? Should our society allow a person to "choose" to kill another person (or have that person killed) to solve the first person's problem?

Claim: *The government should not interfere with a woman's "right" to abortion.*

Answer: Our Declaration of Independence declares that we have an "inalienable right to Life, Liberty and the Pursuit of Happiness." Thomas Jefferson defined government's role, "The care of human life and happiness, and not their destruction, is the first and only object of good government." President Reagan, a defender of the human and civil rights of the preborn, called it "the transcendent right to life of all human beings, the right without which no other rights have any meaning." (Without life, taxation, education etc., are immaterial).

Claim: *If public money (tax money) is not available to pay for abortions "poor" women will be denied access to abortion. They will be discriminated against.*

Answer: Are we obligated to provide cigarettes and alcohol to poor people if they cannot afford them? On the contrary, government is very explicit about which items may be purchased with food stamps. Is this considered discrimination? The same people who argue for "public" subsidies for abortions are the same ones who argue that it is a "private" decision. To quote Congressman Henry Hyde, "We have a 'right' to free speech. Does this mean the government has to buy us a personal computer? A typewriter? A megaphone?"

Claim: *I am personally opposed to abortion, but I would not interfere with another's right to have an abortion nor impose my morality on others.*

Answer: Analogy -- if the abolitionists had bought this argument regarding the slavery issue, some states could still be saddled with slavery today. Every law ever passed sets standards which reflect someone's (or a body of law-makers') morality.

Dear Reader:

If you're in a crisis pregnancy, or know someone who is, please be assured that we understand the emotional trauma you are going through — the doubts, the fears, the sense of shame and frustration. We know the agonizing decisions you face and the pressures you feel.

At first blush, opting for an abortion probably sounds like the "quick-fix" solution to your problem. You need to be advised, as this supplement does in numerous articles, that abortion is not in your best interest. Those who have been telling you that it's a "women's rights" issue have been withholding critical information from you.

Actually, if you are subjecting yourself to the possible after-effects of abortion, as outlined on page six; or putting yourself in the position of being the anguished mother pouring out her heart from personal experience (on page seven); or making yourself two to four times more prone to breast cancer (documented by recent research), shouldn't people who claim to be for women be warning you of these consequences?

Perhaps abortion isn't about women's rights after all! What then, or whom, is it about? The answer can be found within these pages.

For instance, isn't it exciting to discover, as Dr. Jerome Lejeune points out

on page four that the miniature language mapping out the new baby at the time of fertilization contains more information about him/her than can be stored in five sets (not volumes) of Encyclopedia Britannica?

It is our hope that in reading this Supplement and relating to the preborn child you will be convinced that abortion, besides not being in your best interest, is indeed an unjust, inhumane and irreversible destruction of an innocent human life. There are alternatives to such a drastic measure!

Is carrying your baby to term a manageable decision? Yes it is! Please refer to page five to realize the number of people and organizations ready and eager to help you. Don't hesitate to call on them, whatever your needs. The support is there to see you through your crisis pregnancy - and beyond!

Remember the decision you make will affect you for the rest of your life. Don't let anyone pressure you into a quick decision! We don't pretend to have an easy solution - but a just, manageable, rewarding one, one which you will not regret: continued life for your baby!

Marlene Reid

Marlene Reid, President
Human Life Alliance of Minnesota

Claim: *You want to ban women's "constitutional right" to abortion.*

Answer: This is a "spurious" or false "right" - having no basis in the Constitution. The U.S. Supreme Court claims to have discovered a "privacy" right in the "penumbra" of the Constitution ("penumbra" definition: a partly lighted area around an area of full shadow). Court decisions (*Roe v. Wade* and *Doe v. Bolton*) are aberrations (deviations from truth) and do nothing more than grant temporary license to kill children in the womb, the most dangerous place of residence. This license is tenuous and could be over-ridden by reversal or an amendment to the U.S. Constitution. Indeed, to guarantee the permanent freedom of the slaves and establish rights for all U.S. "persons" the 14th Amendment to the Constitution was passed. It states, "...No state shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any state deprive any person of life, liberty, or property without due process of law; nor deny to any person within its jurisdiction the equal protection of the law." (emphasis added). In *Roe v. Wade* the Court determined that unborn children are not "persons" even though they have the right to inherit property, the right to be protected from a drug-addicted mother, and many other rights. Some states have entire sections of law outlining Crimes Against Unborn Children in which they, from conception on, are protected from negligent or willful harm or death.

Claim: *If legal abortions are banned, women will resort to back alley abortions.*

Answer: In 1972, the year before the Supreme Court legalized abortion, a total of 39 women died from illegal abortions, according to the U.S. Centers for Disease Control. Former abortion provider Carol Everett states, "In the last 18 months I was in the business, we were completing 500 abortions monthly and killing or maiming one woman out of 500" (p.10). If the numbers are this astounding for her four Texas clinics, it doesn't take an expert mathematician to figure out that the number of **maternal** casualties happening nationwide at the over 2200 supposedly "safe" abortuaries would be in the high hundreds.

Claim: *Abortion should be legal to end a pregnancy resulting from rape or incest.*

Answer: It is important to remember that the child conceived in rape, or incest, is no less human than any other child. David Reardon's article, (page 8) points out that the very worst solution that can be offered to the pregnant woman at this crisis time in her life is an abortion. Abortion compounds the problem! If a small child were killed in the street by a negligent driver and it was later determined that the child had been conceived in rape, would the driver be held less responsible? Is that child's death less tragic?

Test Your Abortion I.Q.

- On January 22, 1973 the U.S. Supreme Court legalized abortion through which month of pregnancy?
A) 3rd month; B) 4th month; C) 6th month; D) 9th month
- Since surgical abortion was legalized in 1973 the number of preborn babies' lives extinguished by surgical abortion alone is:
A) 6 million; B) 12 million; C) 30 million; D) 35 million
- Abortion is the leading cause of death in the U.S., causing what percent of total deaths?
A) 21%; B) 35%; C) 46%; D) 52%
- What age group of women have the greatest number of abortions?
A) 15-19; B) 20-24; C) 25-29; D) 30-34
- About 10 million Black children have been aborted since abortion was legalized. This is what fraction of the present Black population in the U.S.?
A) one-eighth; B) one-fifth; C) one-third; D) one-half
- Since 1960 the number of babies born out-of-wedlock has risen by what percent?
A) 60%; B) 105%; C) 250%; D) 419%
- Women who abort their first child stand how much greater risk of developing breast cancer?
A) 3 x; B) 2 x; C) 4 x
- With the advances in medical science the number of surgical procedures which are now performed on babies in the womb is:
A) over 50; B) 80; C) 90; D) over 100
- One out of every how many preborn babies is killed by abortion?
A) two; B) three; C) four; D) six
- What percent of abortions performed in the U.S. are repeat abortions?
A) 30%; B) nearly 40%; C) nearly 50%; D) 60%
- What percent of women who have had abortions experience suicidal tendencies?
A) 45%; B) 60%; C) 70%; D) 75%
- A developing baby's heart begins to beat at:
A) 21 days; B) 30 days; C) 45 days; D) 60 days
- How many Americans now have an incurable sexually transmitted disease?
A) 20 million; B) 36 million; C) 56 million
- Every year up to what number of U.S. women become infertile because of STDs?
A) 66,000; B) 75,000; C) 98,000; D) 150,000

The answers to these questions can be found on p. 9.

Abortion is Legal During 7th, 8th and 9th Months

In *Roe v. Wade* the Court allowed states to restrict abortions in the 3rd trimester "except where it is necessary... for the preservation of life or health of the mother." However, in *Doe v. Bolton*, the companion case to *Roe*, the Court defined "health" to include "all factors - physical, emotional, psychological, familial, and the woman's age - relevant to the well-being of the patient." Because of this broad definition of "health" the Court, in effect, permitted abortion-on-demand in all fifty states right up until birth for any reason!

Chronology of a New Life

Fertilization: The sperm joins with the ovum to form one cell. This one cell contains the complex genetic makeup for every detail of human development—the child's sex, hair and eye color, height, skin tone etc.

Month One: The first cell divides within several hours and then cell division continues in an orderly fashion every few hours as the small group of cells travels down the Fallopian tube to the uterus, where the uterine lining has been prepared for implantation. There are over 100 cells present when this tiny embryo reaches the uterus 7 to 10 days after fertilization. **Day 20**—foundations of the brain, spinal cord and nervous system are already established; **day 21**—the heart begins to beat in a regular fashion; **day 28**—the backbone, the rest of the skeleton, and muscles are forming—arms, legs, eyes and ears have begun to show. At one month old, the embryo is 10,000 times larger than the original fertilized egg — and developing rapidly. The heart is pumping increased quantities of blood through the system. The placenta forms a unique barrier that keeps the mother's blood separate, but allows food and oxygen to pass to the baby.

Month Two: At **35 days** the pre-born baby has all her fingers. Brain waves can be detected at **day 40**; the brain is controlling 40 sets of muscles as well as the organs. The jaw forms, including teeth buds in the gums. The eyelids seal during this time to protect the baby's developing light-sensitive eyes which will reopen in the seventh month. The stomach produces digestive juices and the kidneys have begun to function. The tiny human being responds to touch. By **8 weeks**, the developing baby is now referred to as the fetus, a Latin word meaning "young one" or "offspring."

Month Three: Day 63 (9 weeks): Unique fingerprints are evident and never change. The baby now sleeps, awakens and exercises her muscles by turning her head, curling her toes, and opening and closing her mouth - often sucking her thumb. Her palm, when stroked, will make a tight fist. She breathes amniotic fluid to help develop her respiratory system. By **12 weeks** all the organs and systems of her body are functioning. The only major activity from now until birth is growth - the increase in her size.

Month Four: By the end of this month (**16 weeks**) the baby is 8 to 10 inches in length and weighs a half pound or more. Her ears are functioning, and there is evidence that the baby hears her mother's voice and heartbeat, as well as external noises. The umbilical cord has become an engineering marvel, transporting 300 quarts of fluids per day and completing a round-trip of fluids every 30 seconds. Because the preborn child is now larger, the mother usually begins to feel her baby's movements during this month.

Month Five: Half the pregnancy has now passed. The baby is about 12 inches long. If a sound is especially loud or startling, she may jump in reaction to it. Babies born at this stage of development (**19 - 20 weeks**) are surviving at an increasing rate, thanks to advances in medical technology.

Month Six (24 weeks): Oil and sweat glands are functioning. The baby's delicate skin is protected in the amniotic sac by a special ointment "vernix."

Month Seven: The baby's brain has as many cells as it will have at birth. The preborn child uses the four senses of vision, hearing, taste and touch. Research has documented that she can now recognize her mother's voice.

Month Eight: The skin begins to thicken, with a layer of fat stored underneath for insulation and nourishment. Antibodies increasingly build up. The baby swallows a gallon of amniotic fluid per day, more if it is sweetened. She often hiccups. She has been urinating for several months.

Month Nine: Toward the end of this month, the baby is ready for birth. The average duration of pregnancy is **280 days** from the first day of the mother's last menstrual period, but this varies. By this time the infant's heart is pumping 300 gallons of blood per day. In response to signals from the brain the child triggers labor, and birth occurs. **After birth new brain cells are being formed for nine months. Likewise, other organ systems are still maturing.** Of the 45 generations of cell divisions before adulthood, 41 have taken place in the womb. Only four more will come - during the rest of infancy and childhood, but before adolescence. In developmental terms we spend 90% of our lives in the womb.

Life Begins at Conception

"Each of us has a very precise starting moment which is the time at which the whole necessary and sufficient genetic information is gathered inside one cell, the fertilized egg, and this is the moment of fertilization. There is not the slightest doubt about that and we know that this information is written on a kind of ribbon which we call the DNA."

Dr. Jérôme LeJeune

Jérôme LeJeune, M.D., Ph.D. tells us much about the intricacies of the beginning of human life. Contrary to the popular view that the baby becomes more and more "developed" as the weeks of pregnancy go on, Dr. LeJeune says that the very first cell, the fertilized egg, is "the most specialized cell under the sun." No other cell will ever again have the same instructions in the life of the individual being created.

In the words of Dr. LeJeune, "Each of us has a very precise starting point which is the time at which the whole necessary and sufficient genetic information is gathered inside one cell, the fertilized egg, and this is the moment of fertilization. There is not the slightest doubt about that and we know that this information is written on a kind of ribbon which we call the DNA."

He explains that the fertilized egg contains more information about the new individual than can be stored in five sets (not volumes) of the Encyclopedia Britannica (if enlarged to normal print). To further emphasize the minuteness of this language, Dr. LeJeune states that if all the one-metre-long DNA of the sperms and all the one-metre-long DNA of the ova which contain the instructions for the 5 billion human beings who will replace us on this planet were brought together in one place the total amount of matter would be roughly the size of two aspirin tablets.

When Dr. LeJeune testified in the Louisiana

Legislature (House Committee on the Administration of Criminal Justice, June 7, 1990) he stated, "Recent discoveries by Dr. Alec Jeffreys of England demonstrate that this information (on the DNA molecule) is stored by a system of bar codes not unlike those found on products at the supermarket... it's not any longer a theory that each of us is unique."

"I see no difference between the early person that you were at conception and the late person which you are now. You were, and are, a human being."

Dr. LeJeune states that because of studies published within the last year we can now determine within three to seven days after fertilization if the new human being is a boy or a girl.

"At no time," Dr. LeJeune says, "is the human being a blob of protoplasm. As far as your nature is concerned, I see no difference between the early person that you were at conception and the late person which you are now. You were, and are, a human being."

In the testimony Dr. LeJeune gave on The Seven Human Embryos (Circuit Court for Blount County, Tennessee at Maryville, Equity Division, August 8-10, 1989) he compared the chromosome to a mini-cassette, in which a symphony is writ-

ten, the symphony of life. He explained that if you buy a cartridge on which a Mozart symphony has been recorded and insert it in a player, what is being reproduced is the movement of the air that transmits to you the genius of Mozart. In making the analogy he said, "It's exactly the same way life is played. On the tiny mini-cassettes which are chromosomes are written various parts of the opus which is for human symphony, and as soon as all the information necessary and sufficient to spell the whole symphony (is brought together) this symphony plays itself, that is, a new man is beginning his career... as soon as he has been conceived, a man is a man."

Dr. Jérôme LeJeune died on April 3, 1994. Dr. LeJeune of Paris, France was a, medical doctor, a Doctor of Science and a professor of Fundamental Genetics for over 20 years. Dr. LeJeune discovered the genetic cause of Down Syndrome, receiving the Kennedy Prize for the discovery and, in addition, received the Memorial Allen Award Medal, the world's highest award for work in the field of Genetics. He practiced his profession at the Hospital des Enfants Malades (Sick Children's Hospital) in Paris.

Dr. LeJeune was a member of the American Academy of Arts and Science, a member of the Royal Society of Medicine in London, The Royal Society of Science in Stockholm, the Science Academy in Italy and Argentina, The Pontifical Academy of Science and The Academy of Medicine in France.

Legalized Abortion Based on Lies and Fraud

Norma McCorvey was the "Jane Roe" of *Roe v. Wade*.

Early in 1970 Norma McCorvey claimed that she had been gang-raped and became pregnant. Attorneys Sarah Weddington and Linda Coffee, newly graduated from the University of Texas Law School, needed a "client" in order to challenge Texas' 100-year old law that banned abortions. They convinced Norma that she should be seeking an abortion.

The case was subsequently argued all the way to the Supreme Court which resulted in legalizing abortion in all 50 states in 1973. In the meantime, Norma's baby was born and released for adoption. In 1987, McCorvey admitted that the gang-rape was a lie. In August 1995, she joined Operation Rescue stating that she was tired of being exploited by the abortionists.

*While *Roe v. Wade* legalized abortion, on the same date, *Doe v. Bolton* provided for abortion-on-demand for the entire nine months of pregnancy and was the legal vehicle which provided Court sanction for the over 2200 abortion mills across the country.*

Sandra Cano was "Mary Doe" of *Doe v. Bolton*

Sandra Cano now says she was an unwitting participant in fraud on the highest court in the land. Sandra was a young expectant mother with three children facing a divorce from a husband who was in jail for child molestation. Cano's three children had been taken from her by family service workers. They were being shunted from one bad environment to another. Cano loved her children dearly. She was almost insane with grief when she turned to Legal Aid Services for help. The offer of N.O.W. lawyers to take the whole mess off her hands, obtain a divorce and regain custody of her children sounded too good to be true.

When the attorneys hinted that they would like to strike a deal which would include aborting the child Sandra was carrying she made it very clear that she could never do that. Yet, her attorneys ignored her objections and ran roughshod over her. When she realized her case had been used to obtain abortion-on-demand she said, "...why would I stretch my imagination to include a plan so bizarre that it would give people in a civilized society permission to kill their own babies? ... I surely never thought they would tie my personal anxieties about retrieving my children to a scheme to make abortion-on-demand legal." Ironically, the Cano baby, like the McCorvey baby, was carried to term and relinquished for adoption. Yet, 35,000,000 other babies have lost their lives to surgical abortion because of these two cases.

Sarah Weddington was the Attorney

Sarah Weddington, the attorney who argued *Roe v. Wade* before the U.S. Supreme Court, gave a speech at the Education Ethics Institute in Oklahoma. She explained why she defended the sketchy story and false rape charge of a Texas waitress "Jane Roe" all the way to the Supreme Court: "My behavior may not have been totally ethical. But I did it for what I thought were the right reasons." *Tulsa World 5/24/93.*

Playboy Provided the Funding

Hugh Hefner, founder of *Playboy* claims to have done one great thing for women: "*Playboy* probably had more to do than any other company with *Roe v. Wade*. We supplied the money for those early cases and actually wrote the *amicus curiae* for *Roe*."

Miami Herald 11/18/92

Do You Hear What I Hear?

"With no hype at all, the fetus can rightly be called a marvel of cognition, consciousness and sentience."

"She slides into the world with eyes alert, the tiny ridges of her ears living antennae scanning the conversation frequencies in the room. She finds her mother's voice with her ears, and her eyes."

The baby's alertness and awareness begins with early development in the womb. The preborn baby can hear and respond to sound. Car horns can make the baby jump. Her heartbeat quickens.

When Peter Hepper of Queens University in Belfast repeatedly played to 30-week-old fetuses the theme song from a popular soap opera, they relaxed. After

birth, the babies became "quite alert" when they heard the tune.

"...When a loudspeaker directs speech syllables at a mother-to-be's abdomen, the fetus's heart slows, a sign of attentiveness. The heartbeat speeds up as the fetus gets bored with the sounds, then slows again if new ones flow into the womb."

A fetus remembers some experiences and may alter her behavior as a result.

Local Crisis Pregnancy Help

Many women seeking abortions feel they have no choice. The following agencies offer a wide range of services to any women, of any age, who is experiencing what she considers to be an unwanted crisis pregnancy. Many of these services, including pregnancy testing, counseling, and referrals for medical assistance, housing, and social services, are available at little or no cost. We strongly believe that no women should ever feel she has to choose abortion for her child. Help is just a phone call away.

The Wound Heals, a Scar Remains...

Beyond the battle of ideals and rhetoric, the hard reality exists that women suffer mental and emotional anguish of abortion. For some, it takes years before they experience a profound reaction. Dr. James Fogel, a psychiatrist and obstetrician, as well as an abortion provider, acknowledges the effects of abortion on the mother:

"Abortion is an impassioned subject... Every woman—whatever her age, background or sexuality—has a trauma at destroying a pregnancy. A level of humanness is touched. This is part of her own life. She destroys a pregnancy, she is destroying herself. There is no way it can be innocuous... It is totally beside the point whether or not you think a life is there. You cannot deny that something is being created and that this creation is physically happening... But it is not as harmless and casual an event as many in the pro-abortion crowd insist. A psychological price is paid. It may be alienation; it may be a pushing away from human warmth, perhaps a hardening of the maternal instinct. Something happens on the deeper levels of a woman's consciousness when she destroys a pregnancy. I know that as a psychiatrist." 1

Linda Bird Francke, a professional journalist and feminist describes how, when faced with an unplanned pregnancy, the decision to abort seemed logical and practical until she and her husband were sitting in the waiting room:

"Suddenly the rhetoric, the abortion marches I'd walked in, the telegrams sent to Albany to counteract the friends of the fetus, the Zero Population Growth buttons I'd worn peeled away, and I was all alone with my microscopic baby..." She recalled how intellectually, she tried to concentrate on how small the fetus was, and therefore how impossible it was for it to be human... her own body kept telling her that there was real life growing within her. "Though I would march myself into blisters for a woman's right to exercise the option of motherhood, I discovered I was not the modern woman I thought I was." She longed for her husband to valiantly "burst" through the door and stop it from happening. When he failed to do so, she begged the doctor to stop. But it was too late... "the hum of the machine signaled that the vacuuming of my uterus was completed; my baby sucked up like ashes after a cocktail party." Francke revealed how, during times of relaxation, when she had time to reflect on the beauty of the world, she experienced the common reaction of "visitations" from her aborted child. Her benign "little ghost" would come to her and wave. And she would tearfully wave back to reassure her lost baby that if only he could return, now they would make room for him in their busy lives.²

Five years later, Francke wrote *The Ambivalence of Abortion*, in which she transcribes reactions to the abortion experience of other women, couples and men. The interviews were consistent with the findings of other researchers. The majority expressed guilt, remorse and negative feelings toward their abortion. Most saw that abortion involves a baby.

1. From an interview with columnist Colman McCarthy, "A Psychological View of Abortion," *St. Paul Sunday Pioneer Press*, 3/7/71. Dr. Fogel, who continued to do abortions for the next two decades, reiterated the same view in a subsequent interview with McCarthy, "The Real Anguish of Abortions" *The Washington Post*, 2/9/89.
2. Jane Doe [Linda Bird Francke], "There Just Wasn't Room In Our Lives For Another Baby," *NYTimes*, 5/14/76

Glamour, the popular women's magazine, received input from 3000 women and in Feb. 94 reported that, "Virtually all of those who'd had abortions in the past said that if they'd only known how much they'd regret having an abortion after the fact, they never would have agreed to the procedure." The magazine also noted, "The births of subsequent children or some other exposure to the intricacies of child development were often listed as experiences that helped them see just how misguided they had been in deciding to abort." One woman said "Society told us it (abortion) was safe and legal. And the abortionist and her crew never counseled me on anything—the procedure itself, the risks, the alternatives...I wondered why, if I had participated in this wonderful, self-liberating experience, I did not feel a sense of deliverance, but a loss of self respect, and little by little a loss of myself."

Breast Cancer and Abortion

Almost all of the known factors which increase the risk of breast cancer are associated with excess exposure to the main female sex steroid hormone, estrogen. For several years, the tie in between abortion and breast cancer has been recognized. However, it is unknown to the general public how and why they are interrelated.

High levels of estrogen flood the woman's system in the first trimester of pregnancy. This stimulates a massive growth of breast cells to develop a system capable of producing milk. Toward the end of the pregnancy other hormones act to make the breast cells mature and eliminate cells that are not needed. Once the cells complete this period of growth and maturation, there are no further significant changes for the rest of the woman's life. Research shows that when a woman completes her first full pregnancy, the hormonal changes that occur permanently alter the structure of her breasts in a way that greatly reduces her risk of breast cancer. (E. Wertz, S.W. Duffy, *Br. J. of Cancer* 1988)

An abortion will not reverse the changes which have begun with pregnancy, it only interrupts them. Ultimately, an induced abortion of a first pregnancy circumvents the protective effects of a full-term pregnancy, possibly leaving millions of breast cells in vulnerable transitional states. (*Russo American Journal of Pathology*, Vol 100, 1980) The consequent sharp increase in the number of vulnerable cells thus elevates breast cancer risk. (Krieger, *American Journal of Epidemiology*, Vol 131, 1990)

Physical Risks Of Abortion

"People do not understand that there are thousands of serious physical complications from abortion every year in this country."

Dr. Bernard Nathanson, OB-GYN

Intense pain	Inability to become pregnant again
Punctured uterus	Miscarriage/Stillbirths
Excessive bleeding	Tubal Pregnancies
Infection	Premature births
Parts of baby left inside	Pelvic inflammatory disease
Shock/Coma	Cervical injuries
Damage to other organs	Hysterectomy
Death	Higher Risk of Breast Cancer

"Abortion has a painful aftermath, regardless of the woman's religious beliefs, or how positive she may have felt beforehand about her decision to abort."

Vincent Rue, Ph.D, Psychologist.

The above complications and their frequencies are documented in the following publications. These resources are only a fraction of the many studies published pointing to the risks involved with legal abortion. For a more complete listing, request a copy of *Major Articles and Books Concerning the Detrimental Effects of Abortion*, from The Rutherford Institute, P.O. Box 7482, Charlottesville, VA 22906-7482, 1-804-978-3888.

Miscarriages (spontaneous abortions) do not confer an increased breast cancer risk. One reason many spontaneous abortions occur is because the woman's ovaries do not secrete an adequate amount of pregnancy hormones and never generate the high estrogen levels necessary to maintain a pregnancy. A miscarriage is the natural termination of an abnormal pregnancy while an induced abortion is the artificial termination of a normal pregnancy.

There are at least two dozen published peer reviewed studies pointing to the abortion/breast cancer link that go back as far as 1957. Dr. Joel Brind, an endocrinology specialist and a team of researchers are currently performing a "meta-analysis," which compiles the results of every research study completed to date. As of Nov. 1993, based on work in progress, Brind reported that every study of induced abortions performed before the first live birth is consistent with an initial increase in breast cancer risk of at least 50%. If multiple abortions are involved, the risk can increase up to 400%.⁽¹⁾

Information continues to be released regarding the connection between abortion and the onset of breast cancer. In November 1994, Dr. J. Dahling published a study in the *Journal of the National Cancer Inst.* indicating a minimal 50% increased risk.

"Our data support the hypothesis that an induced abortion can adversely influence a woman's subsequent risk of breast cancer." This study also showed, as have others be-

fore it, that women experiencing naturally occurring spontaneous abortion (miscarriage) were not at a higher risk.

In his work, Dr. Brind points to the difference in severity of the cancer because of a woman's abortion history.

"There are several studies which show that women who have breast cancer and who have a history of abortion not only have a greater incidence of breast cancer, but the cancer grows more rapidly, is harder to treat, (2) is more invasive and is more aggressive.⁽³⁾ The cancer recurs, on an average, in a shorter period of time and death occurs more readily.⁽⁴⁾"

Annually, 800,000 women get abortions who never had a full-term pregnancy, thereby increasing their lifetime risk of breast cancer by at least 50%.

Twenty
Seconds
Before,
There
Was
One
More.

Every Twenty Seconds
A Life Is Taken By Abortion...
That's A Lot Of Love Lost.

I've been there too!

"Tim, I think I'm pregnant." It was New Year's Eve, 1973. My boyfriend sighed deeply, his gaze remaining fixed on the TV. He then muttered something that made me feel already deserted. I felt a sour lump in the back of my throat. Yes, I was pregnant, and I was scared!

I knew from first hand experience how tough it is raising a child as a single mother. I already had a 2-year old daughter, Jennifer, from an earlier unsuccessful marriage. We lived in the inner city and could barely make ends meet. When my pregnancy was confirmed, Tim's non-committal response to my distress and his move to Chicago, 400 miles away, left me despondent and leaning more and more toward abortion as the "easy way out." I was already struggling financially with one child. How could I raise two?

I drove to Chicago to try to convince Tim to marry me. He was deaf to my pleas and unmoved by my tears. Believing I had no viable alternative, I convinced him to give me money for an abortion.

As I sat in the abortion clinic waiting my turn, everything around me seemed like a nightmare. Women lounged on garishly printed couches as rock music played on the intercom. Everything seemed so casual, and there I was, feeling like I wanted to die.

When the nurse called my name, I changed

my mind, broke into tears, and left.

I felt desperately alone. Back at the university, I often cried myself to sleep. I decided to confide in a couple of college professors. They collected money to fly me back to Chicago to have an abortion. Now I was determined, even obligated, to go through with it. Still, I agonized!

Ironically, that semester, I was taking a class in fetal development. I knew there was a baby in my womb with her heart beating and her own circulatory system. Those pictures flashed in my mind as I sat there, clad in a paper gown and paper slippers.

I was summoned to the room where the abortions are performed. I could hear a woman sobbing hysterically in the recovery room. It reminded me of someone who had witnessed the death of a loved one in a fatal

accident. It haunts me still.

As the doctor was examining me, prior to performing the abortion, he suddenly stopped and said to the nurse, "Get her out of here! She's too far along!" Relief instantly washed over me! How odd! I had thought I wanted an abortion but now felt instantly relieved to know I was still pregnant.

I decided to use every ounce of courage I could muster to deal with my pregnancy. My ambivalence turned into love for my unborn child. When my beautiful daughter was born,

I named her Melanie.

It took energy and creativity to support the three of us. My two daughters inspired me to do great things. They never stood in the way of my career. They have only enhanced it. I finished my degree; then I went on to get my Master's and Ph.D. Besides being a proud mother, I am happily married, a published author, a motivational speaker for one of the largest seminar companies in the U.S. and a part-time musician.

I have learned that life is really about developing character. When we endure something tough, our character and self-esteem are strengthened. Many women who have confessed to me that they've had abortions have discovered that the "easy way out" is just an illusion. Some of them are in abusive relationships. Some are on anti-depressants. Others just seem detached from life. Some sadly remember their aborted child's "would be" birthday each year.

If you are in a crisis pregnancy, I cannot promise that it will be easy. I can only promise that the anguish will pass and there are people who will help you through this trying time. (pg. 5) As someone who has "been there" I understand the anguish you are experiencing. One day you will look back on the birth of your child, and say, as I do, "I did the right thing. And I feel proud."

Sincerely,
Dr. Angela Woodhull

Angela Woodhull Ph.D.

-Abstinence- Save the Marital Act for Marriage

Sex is not something you do, rather it is actually a sharing of persons - a commitment. Chastity is that virtue that integrates sexuality into the human personality. Chastity waits for marriage. Chastity is healthy, practical and possible.

Avoid the pitfalls of promiscuity

- Sexually-Transmitted Diseases
- AIDS (condom failure rate is 10-30%)
- Guilt, doubt and worry
- Deceptive relationships
- Loss of self-esteem
- Unwed pregnancy
- Abortion trauma
- Exploitation and emotional disorders

Enjoy freedom

that comes from abstinence

- Live free of all above complications
- Develop a meaningful relationship free from sexual obligations
- Develop rewarding skills and abilities
- Decide what you want for your future
- Become the best person possible!

Birthmother Opts for Adoption... The Loving Alternative

It was the beginning of my junior year in high school. I was excited, looking forward to another year of diving, gymnastics and track. But this excitement quickly came to an end when I realized I was pregnant.

When the pregnancy was confirmed, my mind went racing. It wasn't enough to just say that I was scared - I was terrified! The idea of having an abortion was never a consideration for me. I could not live with the realization that I was responsible for taking the life of my child - a death because of my actions.

My first instincts told me that I needed to raise my child on my own. I knew I could love and care for a child, but when I stopped thinking about myself, and thought about what was best for my child, I knew adoption was the right decision. I was sixteen at the time. I wanted to go back to school for my senior year and wanted to participate fully, in sports etc. I wanted to go on to college.

I knew I could not do all of this and raise a child at the same time. I did not want to have to live with my parents indefinitely and depend on them for everything. I did not want them to be thrust into the role of prime care-givers for my child. It just would not be fair for any of us, for them, myself or the baby. I knew that placing my child for adoption would be the right thing to do, the loving alternative!

The adoption procedure I opted for is not your ordinary plan. I chose to do an independent open adoption. Through this process I was able to select from among the prospective adoptive parents. I had the opportunity to establish a personal relationship with them as well as to develop a lasting friendship. The more I got to know them the more excited I was about placing my baby

Lisa O.

with this couple. They had so much love and security to offer my child. They were there with me in the hospital when my son was born. Their video camcorder ran non-stop. I will always treasure the three days I spent in the hospital with my son. Handing him over to his new parents was by no means easy, but I knew in my heart that this was the right decision for both of us.

Many tears were shed throughout the nine months and during the hospital stay. But, they were not all tears of sadness. I miss my son very much. I think about him every day and a smile comes to my face. I thank the Lord that He led me to two such special people to be adoptive parents for my child.

It has been several years since my son was born. He now has an adoptive sister. I keep in contact with the family through letters and pictures. I can't begin to explain the feelings of pride and contentment that I experience when I see the smile on his face.

I am now a junior in college majoring in paralegal studies. Relinquishing my son was the hardest decision I will ever have to make but I'm more confident than ever that it was the right one. While in the hospital I received a card which read, "Some people come into our lives, leave footprints on our hearts, and we are never the same." This is so true!

Testimony by Lisa O. of Minnesota.

(Printed with permission)

Every year over two million requests for adoption go unsatisfied.

18 week-old baby developing in the womb.

*If he is not alive,
why is he growing?*

*If he is not a human being,
what kind of being is he?*

*If he is not a child,
why is he sucking his thumb?*

*If he is a living,
human child,
why is it legal to kill him?*

The Abortion Experience for Victims of Rape and Incest

by David C. Reardon

Rape and incest are very emotional topics. They often elicit in the general populace feelings of revulsion; people draw back from the issue of rape and incest, even from the victims of rape and incest. People don't know how to handle a person who is in that much pain. There is no quick fix....

Some people who are otherwise very pro-life will condone abortion in rape and incest cases because they don't know what else to offer. And they will accept it as a rare case. This profile difficulty in defending the unborn even in rape and incest cases is largely due to ignorance because the facts, as I have found them, show that the victim's needs are not being served by abortion. In fact, rape and incest victims actually suffer considerably from the abortion.

The facts suggest that only a minority of rape and incest victims actually choose abortion—so right there, one should pause and reflect. Abortion is not usually chosen as the immediate solution by rape and incest victims but that is the prevailing belief of the general population. A woman has been raped and made pregnant: "Oh, she's got to have an abortion." No one has studied the rape and incest victims' needs; abortion is presumed to fill their needs.

Kathleen DeZeeuw states, "Having lived through rape, and also having raised a child 'conceived in rape,' I feel personally insulted and assaulted every time I hear that abortion should be legal because of rape and incest. I feel that we're being used by pro-abortionists to further the abortion issue, even though we've not been asked to tell our side."

The children conceived through sexual assault also have a voice which deserves to be heard. Julie Makimaa, conceived by an act of rape, works diligently against abortion. She believes every life has a value beyond measure, a purpose which only time can reveal. Not ashamed of her origin, Julie proudly proclaims: "It doesn't matter how I began. What matters is who I will become."

ABORTION ADDS TO THE PAIN OF RAPE
Various Studies and my own research indicate that rape and incest victims fall into the high risk category of aborters, and the existence of rape or incest is actually a contraindication for abortion. Jackie Bakker, whose

testimony is in my book,² says, "I soon discovered that the aftermath of my abortion continued a long time after the memory of my rape had faded. I felt empty and horrible. Nobody told me about the emptiness and pain I would feel deep within, causing nightmares and deep depressions. They had all told me that after the abortion I could continue with my life as if nothing had happened." This is the same story we hear from a lot of aborted women. But for the rape and incest victim it is an especially keen story, because they have been told, "In your situation that is the only thing you can do." And they have been betrayed by that advice.

I felt empty and horrible...They had all told me that after the abortion I could continue with my life as if nothing had happened."

VICTIMS GAVE REASONS TO FOREGO ABORTION

Perhaps the best study was done by Dr. Sandra Mahkorn, published in *Psychological Aspects of Abortion*⁶. Dr. Mahkorn was an experienced rape counselor who, in 1979, identified 37 pregnant rape victims who were treated by a social welfare agency. Of these 37, only five chose to have an abortion. Of the 28 who gave birth, 17 chose adoption and 3 kept the child themselves; for the remaining eight, research was unable to determine where the child was placed.

"I was being sexually attacked, threatened by him and betrayed by mom's silence...the abortion which was to be in 'my best interest' has not been...it only 'saved their reputations,' solved their problems and allowed their lives to go merrily on."

Several reasons were given for not aborting. First, several women felt that abortion was another act of violence—that it

was immoral or murder. One said she would only suffer more mental anguish from taking the life of a baby. Second, some saw an intrinsic meaning or purpose to the child. Somehow this child was foisted into their lives, but, on the other hand, they sensed some sort of hidden purpose behind it. And although not responsible for having brought the child into being, it had happened, and the consequences could be lived with. Third, at a subconscious level, the rape victim feels that if she can get through the pregnancy she will have conquered the rape. Outlasting pregnancy shows she is better than the rapist who brutalized her. Giving birth, then, is the way rape victims seek to reclaim their self-esteem. It is a totally selfless act, a generous act, especially in light of the pressure to abort. It is a way for them to display their courage and strength to survive even a rape.

In her study, Mahkorn found that feelings or issues relating to the rape experience were the primary concern for most of the pregnant rape victims—not pregnancy. While 19%—a significant number—placed primary emphasis on their need to confront their feelings about the pregnancy, including feelings of resentment and hostility towards the unborn child, the primary difficulty they experienced with the rape pregnancy was pressure from other people who saw the pregnancy as a blot to be eliminated. Family and friends just weren't supportive of the woman's choice to bear the child.

Dr. Mahkorn also found that in the group who carried their pregnancies to term, none, at the end of pregnancy, wished she had decided on an abortion. Abortion therefore inhibits the healing to the rape victim and reinforces negative attitudes.

ABORTION REINFORCES WOMEN'S POWERLESSNESS

Another example from my book is Vanessa Landry, another rape victim who said, "I didn't really want to have the abortion. I have always been against abortion all my life. People think that whenever anyone is raped, they have to have an abortion. My social worker just kept telling me all kinds of things to encourage me to have the abortion. They didn't give me any other option except to abort. They said I was just another minority bringing a child into the world and there were too many already." Here is a

(Continued on page 10)

Abortion Techniques Described

From a compilation of works by W. Colliton MD, Dr. J. Willke, Dr. B. Nathanson and Planned Parenthood.

SUCTION-ASPIRATION

The abortionist inserts a hollow plastic tube into the dilated uterus. "This tube is attached to a suction machine. The suction machine is turned on. The uterus is emptied by suction."⁽²⁾ The suction tears the baby's body as he/she is being pulled through the hose.

DILATATION AND CURETTAGE (D&C)

After dilation of the cervix, a ring forceps is inserted into the womb and the baby is extracted in pieces. Then the abortionist inserts a curette, "a rod shaped instrument with a sharp edged spoon on the end"⁽¹⁾, into the uterus to scrape the after-birth (placenta) from the wall of the womb and confirm that the womb is empty. Bleeding is usually profuse.

DILATATION AND EVACUATION (D&E)

Used after 12 weeks. The baby is too large to fit through the cervix. The baby "must be removed with instruments and suction curettage."⁽²⁾ A pliers-like instrument is needed because the baby's bones are calcified, as is the skull. The abortionist inserts the instrument into the uterus, seizes a leg or other part of the body and, with a twisting motion, tears it from the baby's body. The spine must be snapped and the skull crushed in order to remove them from the womb. Body parts are then reassembled and counted to make certain that the entire baby has been removed from the womb.

SALINE INJECTION ("SALTING OUT")⁽¹⁾

This is used after 16 weeks. A long needle is inserted through the mother's abdomen into the baby's amniotic sac. Some fluid is removed and a strong salt solution is injected. The solution is swallowed and "breathed" and slowly poisons the baby. He/she kicks and jerks violently as he/she is literally being burned alive. "The uterus begins to contract, as in labor. The contractions continue until it pushes out the fetal and placental material."⁽¹⁾

HYSTEROTOMY

Used mainly in the last three months of pregnancy, the womb is entered by surgery, as in a caesarean section. An incision is made through the abdomen. "The fetus and placenta are removed, and the incision is closed with stitches."⁽²⁾ The tiny baby is allowed to die by neglect or direct act.

PROSTAGLANDIN CHEMICAL ABORTION

This form of abortion uses chemicals, developed by the Upjohn Pharmaceutical Co., which cause the uterus to contract intensely, pushing out the developing baby. In one article, one of the complications listed with this method was "live birth." In fact, the two most "dreaded" complications for an abortionist are a dead mother or a live baby.

1. Planned Parenthood of New York City, Inc. *Abortion, A Woman's Guide* Pocketbook Press 1973
2. Planned Parenthood Federation of America, Inc. *Abortion: Questions and Answers* August 1991

DILATATION AND EXTRACTION (D AND X - PARTIAL-BIRTH ABORTION)

At a September 13-14, 1992 meeting of the National Abortion Federation, a trade association of abortion providers, an Ohio abortionist, Dr. Martin Haskell, described the D&X technique he has perfected. With the D & X method the unborn baby is alive until the end of the procedure when the child is killed by suctioning the brain tissue through a hole at the base of the skull while the baby's head is still inside the birth canal. Then the intact aborted child, minus brain content, is removed. The late Dr. James McMahon, a former abortion colleague of Dr. Haskell's, admitted that he used this D&X technique to abort unborn children up to 32 weeks "or more."

After three days of preparations, the abortionist places an ultrasound transducer on the mother's abdomen and locates the child's legs and feet. The abortionist then uses a large forceps to grasp one of the baby's legs. He pulls firmly, forcing the child into a feet-down (breech) position. He continues pulling until the baby's leg is drawn into the birth canal.

Next, using his hands instead of forceps, the abortionist delivers the baby's body in a manner similar to a breech birth. First, the child's other leg is delivered, followed by the torso, shoulders, and arms. The baby's head "usually" remains inside the uterus.

The abortionist then performs the last step which Dr. Haskell calls "fetal skull decompression." Using blunt-tipped surgical scissors in a closed position, he pierces the child's head at the base of the skull. He then forces the scissors open to enlarge the skull opening. The abortionist then inserts a suction catheter into the brain and vacuums out the child's brain tissue (in Dr. Haskell's words, "evacuates the skull contents") causing the baby's death. The skull collapses and the dead baby is removed.

Barbara Radford, Executive Director of the National Abortion Federation said of this abortion technique, in a 6/18/93 letter to NAF members, "Don't apologize: this is a legal abortion procedure."

(The preceding information has been taken from the *American Medical News*, July 5, 1993 edition).

What the nurse saw...

In September, 1993, Brenda Pratt Schafer, a registered nurse with thirteen years of experience, was assigned by her nursing agency to an abortion clinic. She considered herself "very pro-choice," and didn't think her assignment to an abortion clinic would be a problem. She was wrong. The following is what Nurse Schafer witnessed:

"I stood at the doctor's side and watched him perform a partial-birth abortion on a woman who was six months pregnant. The baby's heartbeat was clearly visible on the ultrasound screen. The doctor delivered the baby's body and arms, everything but his little head. The baby's body was moving. His little fingers were clasping together. He was kicking his little feet. The doctor took a pair of scissors and inserted them into the back of the baby's head, and the baby's arms jerked out in a flinch, a startle reaction, like a baby does when he thinks that he might fall. Then the doctor opened the scissors up. Then he stuck the high powered suction tube into the hole and sucked the baby's brains out. Now the baby was completely limp.

I never went back to the clinic. But I am still haunted by the face of that little boy. It was the most perfect, angelic face I have ever seen."

The Abortifacient Nature of Contraceptives

The birth control pill causes 150 different chemical changes in the woman's body. This fact is documented in the *Textbook of Contraception* by Malcom Potts, Director of Planned Parenthood of England (Cambridge Press 1983, p.144). The "pill" works in three ways:

- 1) Temporary Sterilization - preventing ovulation; however, it is estimated that the low dosage pills now in use, fail to suppress ovulation 50% of the time!
- 2) Contraception - The "pill" thickens the cervical mucus slowing the transportation of the sperm to the ovum.
- 3) Abortion - altering the lining of the womb, making it hostile to a newly conceived child and preventing implantation in the womb.

The Intrauterine Device is sold as a contraceptive, but, in reality, the I.U.D. does not prevent conception. Neither does it prevent ovulation. The I.U.D.'s mode of action is to create a hostile and inflammatory environment in the womb so that a newly conceived child cannot implant and grow there. The fertilized ovum is thus expelled from the womb.

Other "contraceptives" that can act as abortifacients: Depo-Provera, Norplant, Cytotec etc.

Human Life Alliance of MN Education Fund (612) 484-1040

Human Life Alliance of Minnesota, is a non-profit, non-denominational organization committed to the intrinsic value of human life. HLA is dedicated to advancing true justice by protection of **ALL Human Life**, whatever the age, race, sex, physical condition, economic status or place of residence (including the womb). HLA provides incentives to action through education, political awareness and promotion of alternatives to violence in order to create a society in which all Human Life is held sacred.

☆☆☆ American War Casualties ☆☆☆

Each cross represents 50,000 people killed.

The war casualties represent all American combat-related deaths.

Revolutionary War	(25,324)	+
Civil War	(498,332)	+++++
World War I	(116,708)	++++
World War II	(407,316)	+++++
Korean War	(54,246)	++++
Vietnam War	(58,655)	++++
Gulf War	(298)	+
War on the Unborn	(35,000,000)*	+++++

*This number and the subsequent crosses represent only those children killed by surgical abortion. Chemical abortions would increase the number of casualties by about 400%. (See page 9).

Rape and Incest (continued from page 8)

woman who is being victimized not only because she is a rape victim, but also because she is black and a minority and she has a low income. That is one of the stories that upsets me the most.

Childbirth can be a victory. For the majority of pregnant rape victims who wisely choose to forego abortion, childbirth is the choice of triumph over rape. It is a choice that says, "Rape will not dictate my life." It allows them to show their own courage and generosity. When the need of pregnant rape victims is carefully examined, it can be shown that the abortion is not necessary, and indeed is very likely to hinder recovery by increasing feelings of guilt, shame and low self-esteem.

LIKE INCEST, ABORTION PROMOTES SILENCE

Incest victims face similar problems. Incest is a very complex issue and it is hard to say much in a very short period of time, but the vast majority of incest victims want to carry their pregnancy to term. These are young girls for whom pregnancy is a way to break out of an incestuous relationship with their father, whom they may love despite their confusion and resentment about the way they have been used as sexual objects. Since they still love the father, having the child can, not only help expose the incestuous relationship, but also give hope of beginning a truly loving relationship.

In studies of incest victims, the vast majority choose to carry the pregnancy to term.⁸ Those in the minority who have an abortion do so only under pressure from their parents to conceal the incestuous relationship. Because incest is a family pathology that involves father, mother and daughter, all are involved in a conspiracy of silence.⁹

I interviewed Edith Young, now 38 years old, who was a rape and incest victim at 12 years of age. To cover up the incident, her parents procured an abortion for her without telling her what was to happen. The emotional and physical scars of incest and abortion still last to this day. She said, "I was being sexually attacked, threatened by him and betrayed by Mom's silence...the abortion which was to be in 'my best interest' has not been...it only 'saved their reputations,' solved their problems and allowed their lives to go merrily on."¹⁰

Pro-life persons don't have any reason to be ashamed to defend a pro-life view in the case of rape or incest. The ones who need to be ashamed are the pro-abortionists who have been exploiting the problems of rape and incest victims, confusing the public and promoting abortion for their own social engineering goals.

To my knowledge, pro-abortionists have never yet brought together a group of rape and incest victims who carried their pregnancies to term who said, "Oh, that was the worst thing I ever did. Why didn't somebody give me an abortion when I needed it?"

We, on the other hand, can produce women who took the advice of the pro-abortionists, had the abortion and now say, "This abortion ruined my life. What were you telling me?" We need to join rape and incest victims in demanding that pro-abortionists stop exploiting the pain of innocent women's problems for their own political and financial ends.

Planned Parenthood Ignores Own Advice

In 1963, a Planned Parenthood publication, *Plan Your Children For Health and Happiness* stated: "An abortion kills the life of a baby after it has begun. It is dangerous to your life and health." Yet, Planned Parenthood now operates the nation's largest number of abortion mills.

Carol Everett was involved in the abortion industry in the Dallas/Ft. Worth, Texas, area from 1977 until 1983. As director of four clinics, owner of two, Ms. Everett was responsible for the clinics' daily operation. Everett, who had an abortion soon after it became legal in 1973, now speaks out on...

Carol Everett

"What I Saw in the Abortion Industry"

Q What is the governing force behind the abortion industry?

A. Money. It is a very lucrative business. It is the largest unregulated industry in our nation. Most of the clinics are run in chains because it is so profitable.

Q How much money were you making in the abortion industry before you quit?

A. I was getting a commission of \$25.00 on every abortion I "sold". In 1983, the year I got out, I would have pocketed approximately \$250,000. But, in 1984 we expected to be operating five clinics, terminating about 40,000 pregnancies, and with that projection I planned to net \$1 million. Money, Money, Money — that's where my heart was.

Q Why do you refer to "selling" abortions?

A. The product, abortion, is skillfully marketed and sold to the woman at the crisis time in her life. She buys the product, finds it defective and wants to return it for a refund. But, it's too late. Her baby is dead.

Q In what way is the woman deceived?

A. In two ways — the clinic personnel and the marketers must deny the personhood of the child and the pain caused by the procedure. Every woman has two questions, "Is it a baby?" and "Does it hurt?" The abortionist must answer "NO". He/she must lie to secure the consent of the woman and the collection of the clinic's fee. The women were told that we were dealing with a "product of conception" or a "glob of tissue". They were told that there would be only slight cramping, whereas, in reality, an abortion is excruciatingly painful.

Q What type of counseling was offered at the clinics?

A. In the clinics in which I was involved we didn't do any real counseling. We answered only the questions the woman asked and tried not to "rock the boat." We did not discuss alternatives to abortion unless the woman forced us to. We sold abortions.

Q What method of abortion did your clinics use?

A. For the most part, the abortion industry stopped using saline and prostaglandin procedures because of the number of live births. A live birth means you have to let the baby die, or dispose of it in some distasteful way. Most second and third trimester abortionists use the D & E (dilation and evacuation) method. The abortionist uses large forceps to crush the baby inside the mother's uterus and remove it in pieces. The side effects of live births and the mother going through labor are avoided. But it is a horrible procedure in which the baby must be re-constructed outside the uterus to be certain all the parts have been removed.

Q How did you dispose of an aborted baby?

A. In our clinics, we put them down the garbage disposal. We used the heavy duty model. Some second and third trimester babies' muscle structure is so strong that the baby will not come apart, so they must be disposed of through trash receptacles.

Q Abortion is supposed to be a "safe" experience. What complications did you witness?

A. We were doing a one-day traumatic dilation, which has a higher rate of complication. In the last 18 months I was in the business, we were completing over 500 abortions monthly and killing or maiming one woman out of 500. Common complications that take place are perforations or tears in the uterus. Many of those result in hysterectomies. The doctor might cut or harm the urinary tract, which then requires surgical repair. A complication that is rarely publicized is the one in which the doctor perforates the uterus and pulls the bowels through the vagina, resulting in colostomy. Some of those can be reversed, some must live with the colostomy for the remainder of their lives.

Q How did you keep these complications and deaths from the public?

A. The woman would be loaded into my car (an ambulance outside an abortion clinic is terrible advertising) and transported to a hospital that would protect the doctor and the abortion clinic's reputation. The concern is not with the patient only in keeping an unblemished reputation. You have a built-in cover-up with the patient's family. They are dealing with their guilt and emotions over the situation and do not want to deal with the added pressure of exposing the truth through the media.

Q Why did you get out of the abortion business?

A. Two things came into play at about the same time. I experienced a profoundly religious transformation—a conversion. At about the time I was having second thoughts a Dallas television station did an expose disclosing the abortions performed at my clinic on non-pregnant women—all for money! I finally realized, "We weren't helping women—we were destroying them—and their children." By then my transformation was complete and I knew that I not only had to stop being involved with abortions but I had to help promote the truth.

WORLD POPULATION CAN BE HOUSED IN TEXAS

According to the World Almanac and Book of Facts 1993 and the 1994 World Population Data Sheet from The Population Reference Bureau, the entire population of 5.6 billion people could be housed in the state of Texas.

Consider these facts: The land area in Texas is some 262,000 square miles and current estimates of the world population are about 5.6 billion. By converting square miles to square feet—remember to multiply by 5,280 feet per mile twice—and dividing by the world's population, one readily finds that there are more than 1,300 square feet per capita. A family of 5 would thus occupy more than 6,500 square feet of living space.

These numbers apply to just one story ranch house-type dwellings. With a housing mix of multi-story buildings, including town houses, apartment buildings and high rises, appreciably greater living space could be provided. Such an arrangement would allow ample land for yards and all the necessary streets and roads.

Meanwhile, the rest of the world would be available for farming, manufacturing and recreation. The World Health Organization continually announces that there

is more than enough food for the world's people. In an executive summary accompanying the main report, Donald Mitchel, a senior economist at the World Bank, stated: "Prices of agricultural commodities are at their lowest level in history and crop yields continue to rise faster than population." The problem is distributional, not populational.

Throughout the history of the U.S., it has been the experience of the American people that population growth produces plenty—not poverty. Population growth has continually proved to be a sign of health and well being for the country and its citizens. Unfortunately, throughout the world birth rates and total fertility rates are plunging faster and further than ever recorded in human history. Despite the predictions of over-population theorists, the fact is that population growth rates in many countries are already below replacement levels and the world's growth rate

is rapidly approaching that figure. According to an April 1994 report of the U.S. Census Bureau, there are 59 nations that have total fertility rates that are below replacement level. The following are some statistics from the report on world population, *World Population Profile: 1994*:

- "The world's population growth rate has declined to about 1.5 percent at present," the lowest rate in some 50 years. (p.5) (Replacement level is 2.2)
- "Fertility levels have fallen so low in some countries, mainly in Europe, that no return to 'replacement level' fertility is expected in the foreseeable future" (p29).
- "Fertility rates throughout the world have been dropping so rapidly that the Census Bureau has just cut its three-year-old estimate of world population in the year 2000 by 120 million, and in the year 2020 by more than 300 million" (p.A-1 in both the '94 & '91 editions).

Men & Abortion: Forgotten Fathers

There is no denying that men are affected by the abortion decision, and men, like women, often experience post-abortion trauma. This is a fact that is seldom discussed or dealt with. The truth is that many men suffer silently, deeply, and often alone.

If the decision to accept or terminate a pregnancy rests solely on the caprice of the mother, is it fair to speak of paternal responsibility? If the woman chooses to allow the child to live, we condemn the father if he runs away from responsibility and financial obligations. But if she chooses to abort, he is expected to remain silent while his child's life ends. This severs the natural, devotional bond between man and woman and parent and child.

Consider the following letter to the editor printed 3/29/96 in the *University of Minnesota Daily* after the Supplement was distributed on the U of M campus:

"Rarely is the male's side of the story explored. Many of the same emotions felt by the would-be mother are also felt by the would-be father. I am speaking from first-hand experience. My girlfriend became pregnant when we were 18-years old. This

fact was concealed from me until after the pregnancy was already terminated... Our relationship deteriorated in the months after because of behavioral problems not unlike those mentioned

in the insert (*She's a Child, Not a "Choice"*). For many months, and even years, after this experience I sometimes try to imagine what our child would look like. What would be his/her name? Would I be a good father? These and many others are the questions that still go through my mind.

I am not suggesting that my pain, or any pain felt by males, can equal that of the female, but it should be addressed. After all, abortion is an issue that touches us all."

College of Liberal Arts senior, UM

Abortion: The Inside Story

Further shocking testimony on practices within the abortion industry is revealed in the video "Abortion, the Inside Story." The video features former abortion providers—women who had worked in abortion mills as administrators, directors, assistants, nurses, even one who had anesthetized patients and performed abortions though she had no medical training. It is an expose of the lies, cover-up, greed and criminal negligence within the abortion industry, and also gives insight into the effect and power of side-walk counselors.

In the Video, Hellen, a former administrator of an Atlanta abortion clinic confessed, "In the abortion clinic there are women exploiting women and I was one of them. There are a lot of things that go on in a clinic that you would not tolerate if they happened in other branches of medicine." (Comment: An understatement, for sure, like non-physicians performing abortions. Also, why is informed written consent as to the risks involved required for all other surgical procedures, but not for abortion?) Hellen stated, "You may hear abortionists say 'We're standing up for women's rights...for the right for you to choose abortion. That sounds so wonderful. The American public has bought into that pack of lies. Behind closed doors we used to joke about the term 'pro-choice.'"

Hellen also talked about the complications and cover-ups. She said, "Incomplete abortions happen very, very frequently. I kept a file in my office. It was under lock and key; absolutely no one had access to it but me. Those were our problem patients, purged from the normal filing system... You need to understand when you stop and look at CDC (Center for Disease Control) statistics or other statistics on just how safe abortions are, who reports those statistics." (Comment: So much for "safe and legal" abortions.) HLA recommends you get your own copy of this powerful testimony. The video is available from Pro-LifeAction League, 6160 Cicero Ave.#600, Chicago, IL 60646, for \$19.95 plus \$2.00 for shipping and handling.(312)777-2900

Back Alley Abortions?

Since illegal abortions are not reported, the most accurate statistics are the reports on the number of maternal deaths from illegal abortions. In 1972, the year prior to Roe vs. Wade, 39 women died from illegal abortions. That same year, 25 women died from legal abortion (abortion-on-demand was legal in 2 states). There is ample evidence that there is underreporting of deaths from legal abortions. Often, another cause of death is listed. For instance a 1991 abortion death in Maryland was reported as "Cause of death - therapeutic misadventure."

Either there were not many illegal abortions or illegal abortions are extremely safe! The above info. is taken from the brochure, *Never Again? Never Was!* Hayes Pub. Co., 6304 Hamilton Ave, Cincinnati, OH 45224

How Developed Is Your Baby?

Baby at Approximately Six Weeks

This remarkable photograph of a tiny preborn baby in his unruptured amniotic sac was taken after surgery (for a tubal pregnancy) at the University of Minnesota by medical photographer, Robert Wolfe, in 1972. This picture demonstrates the remarkable early development of a preborn baby at only six weeks after conception.

Consider This Testimony

"Eleven years ago while giving an anesthetic for a ruptured ectopic pregnancy (at 8 weeks gestation). I was handed what I believe was the smallest living human ever seen. The embryonic sac was intact and transparent. Within the sac was a tiny human male swimming extremely vigorously in the amniotic fluid, while attached to the wall by the umbilical cord. This tiny human was perfectly developed, with long, tapering fingers, feet and toes. It was almost transparent, as regards the skin, and the delicate arteries and veins were prominent to the ends of the fingers.

"The baby was extremely alive and swam about the sac approximately one

time per second, with a natural swimmer's stroke. This tiny human did not look at all like the photos and drawings and models of 'embryos' which I had seen, nor did it look like a few embryos I have been able to observe since then, obviously because this one was alive!

"When the sac was opened, the tiny human immediately lost his life and took on the appearance of what is accepted as the appearance of an embryo at this stage of life (with blunt extremities etc.)."

Statement by Paul E. Rockwell, M.D., anesthesiologist, as quoted by Dr. and Mrs. J.C. Wilke in *Handbook on Abortion*.

The Feet of a Baby at Ten Weeks

Dr. Russell Sacco of Oregon took this picture of the perfectly formed feet of a 10-week-old aborted baby waiting for disposal in a pathologist's laboratory. The feet in the picture are held between the doctor's thumb and forefinger.

Don't Make My Mistakes

Some people say that abortion is "an informed decision between a woman and her physician." You hear that a lot. But the fact is that most women never meet the abortionist until they are on the table, as happened in my case.

I was 18 years old when I got pregnant. I wasn't serious about my boyfriend. It was a casual relationship. Since I had already enlisted in the Air Force, I thought I had to have an abortion in order to make something out of my life.

My best friend drove me to the abortion clinic. I was there for about four hours. It was like an assembly line. When the ultrasound was being done I asked to see it. But this wasn't allowed (so much for "an informed decision"). Then I asked how far along I was. I was told I was **nine-and-a-half weeks** pregnant. That hit me hard. I knew then that my baby was further developed than I had thought. I started doubting, and wanted to talk to my friend. But, I wasn't allowed to do that either.

When it was my turn the nurse told me that I was going to feel some discomfort, like strong menstrual cramps. **The truth is that the abortion was more pain than I've ever felt in my life. It felt like my insides were literally being sucked out of my body. Afterwards I went into shock!**

After the abortion, I tried to make up for the abortion by trying to get pregnant again. I wanted my baby back. I never got pregnant again. I don't know if I can ever have another baby. I named my baby. I found out later that this is part of the grieving process.

Two-and-one-half years later, I ended up in the hospital with bulimia. I felt that no one had punished me for what I had done so I was punishing myself. I became obsessed with women who were pregnant, with women who would talk about their pregnancy. My life was in shambles! I was suffering from post-abortion trauma.

When I was 21 years old God brought me help through a woman who was involved in pro-life activism. She helped me a lot. I went through a post-abortion counseling program called "Conquerors." God not only forgave me, He challenged me to help others. I answered the challenge!

I started sidewalk counseling. There is a healing process that comes from getting involved in the pro-life movement. I talk to youth groups and students about abstinence and I share my testimony. To them, and to you, I plead, "Please don't make the same mistakes I did."

See pages 5 & 8 for alternatives to abortion!
