April, 1941

No. 2

FOREWORD

This bulletin contains considerable information regarding high schools in Kentucky. Some data are given regarding every high school in operation.

The official rating given the high schools by the State Board of Education was made on the recommendation of The Commission on Secondary Schools of The Kentucky Association of Colleges and Secondary Schools. This Commission is composed of the following members:

Henry A. Adams	J. H. Hewlett
M. E. Burton	Sister M. Aquinas Kelleher
Sister M. Casilda	R. E. Jagers
H. A. Cocanougher	Lee Francis Jones
J. M. Deacon	M. E. Ligon
Herbert Foster	W. G. Nash
Carl Fields	W. H. Vaughan
Mark Godman	Arville Wheeler
William O. Gilreath	S. S. Wilson
Dorothy Graff	Duke Young
T. A. Hendricks	

The material in this bulletin has been prepared by Mark Godman and L. N. Taylor of this Department.

J. W. BROOKER
Superintendent of Public Instruction

SECONDARY EDUCATION IN KENTUCKY

Schools and Types of Organization. There are 738 high school organizations in Kentucky. This number is in contrast to 758 high schools operating last year and 783 operating two years ago. Five years ago the state had 833 public and private high schools of various types.

Of the 738 high schools now operating, 659 are complete organizations; i.e., they offer a program of studies through the twelfth grade. Approximately one half of these complete high schools are organized on the six-year basis (grades 7-12). This number represents a decrease of nineteen of the six-year high schools during the past year. The number of eight-four organizations this year is practically the same as the number found last year. The state has thirty-five junior high schools, grades 7-9. Nineteen of them are found in independent districts while sixteen are located in county districts. There are only nine senior high schools, grades 10-12. Eight of them are in independent districts while one is a private secondary school.

The following table presents data regarding the number of the various types of high schools found in Kentucky:

TABLE I
Types of High School Organizations and Number of Each

Types of Organizations	County Districts	Independent Districts	Private Schools	State and Regional	Total
Grades 7-12	245	111	14	6	376
Grades 9-12	148	67	57	2	274
Grades 10-12	0	8	1	0	9
Grades 7-9	16	19	0	0	35
Grades 9-11	8	0	0	0	8
Grades 9-10	11	3	0	0	14
Grades 7-11	3	0	0	0	3
Grades 7-10	16	3	0	0	19
Total	447	211	72	8	738

The above table not only shows the number of different types of high school organizations but it also indicates the number of high schools under different types of control—county districts, independent districts, private, state and regional. It will be noted that 447 high schools are operated by county boards of education while 211 are maintained by boards of education in independent school districts. Seventy-two are private secondary schools. The other eight repre-

sent high schools operated in connection with state teacher training institutions, the state-supported high schools for colored at Paducah and Lincoln Ridge, the State School for the Blind at Louisville, and Ormsby Village School in Jefferson County, which is maintained by Jefferson County and the municipality of Louisville.

Size of High Schools. The following table gives a picture of the various types of high schools found in the state:

TABLE II
Size and Number of High Schools

Size Based on Enrollment	County Districts		Independent Districts		Private Schools		State and Regional		Total
	White	Colored	White	Colored	White	Colored	White	Colored	
Below 50	32	8	1	10	14	0	1	0	66
50-99	121	7	19	16	23	0	0	1	187
100-199	186	2	49	19	19	1	3	0	279
200-499	84	1	53	5	13	0	3	0	159
500 and above	9	0	32	4	2	0	0	0	47
Total	432	18	154	54	71	1	7	1	738

The above table shows that 66 high schools enroll fewer than 50 pupils. Last year 86 enrolled fewer than this number, a decrease of 20 in the number of these very small high school organizations. Of the 66 high schools enrolling fewer than 50 pupils, 14 are private and 18 are high schools for Negroes. This table also discloses that there are 253 high schools enrolling fewer than 100 pupils. Last year this number was 302 while two years ago this number was 348. Of the 253 high schools enrolling fewer than 100 pupils, 42 are public high schools for Negroes and 37 are private secondary schools. This table also shows that 206 high schools enroll 200 or more pupils. This number is in contrast to 194 high schools which last year enrolled 200 or more pupils and 182 such high schools year before last. It is apparent that we should no longer think in terms of small thirty-, forty-, or fifty-pupil high schools. It is clear that we are definitely headed in the direction of high schools that enroll 100 or more pupils.

The number of small public high schools which continue to exist are not continuing so much because of a conviction of their worth but rather on account of such factors as sparseness of population in areas where they are located, poor road conditions for transportation to larger and better centers, or inadequate financial ability to operate a better system of schools.

As has been pointed out, the number of small high schools is

decreasing. In this connection it should be pointed out that, with the beginning of the present school year, the State Board of Education through its regulations, will impose the following requirements in reference to the number of teachers employed and the number of pupils enrolled in the various types of accredited high schools:

Class A High Schools

(1) Four-year high schools (grades 9-12) and three-year senior high schools (grades 10-12) shall employ at least five full-time teachers and have a bona fide enrollment of at least one hundred pupils.

(2) Six-year high schools (grades 7-12) shall employ at least seven full-time teachers and have a bona fide enrollment of at least one hundred and fifty pupils, one hundred of whom shall be enrolled in grades 9, 10, 11, and 12.

Class B High Schools

(1) Four-year high schools (grades 9-12) shall employ at least three full-time teachers and have a bona fide enrollment of not fewer than sixty pupils.

(2) Six-year high schools (grades 7-12) shall employ at least four full-time teachers and have a bona fide enrollment of not fewer than eighty-five pupils, sixty of whom shall be enrolled in grades 9, 10, 11, and 12.

Prior to this year, local school authorities were notified from time to time regarding the fact that these new regulations were to go into effect with the beginning of the present school year. The Division of Supervision of the State Department will continue to cooperate with the local school authorities in their efforts to adjust their high school program to meet these requirements. It should be mentioned in passing that during the past months county school authorities and the Division of Supervision have worked out satisfactory programs by which practically all of the small county high schools failing to meet the class B requirements will be provided for at larger high school centers next year.

Table IV shows a continuous growth in the number of high schools from 1915 to 1935. Since 1935 there has been a decrease of 110 in the number of public and private high schools in the state. Ninety-three of this number have been public high schools while seventeen have been private secondary schools. The decrease in the number of public high schools has come as a result of their merger into larger centers.

1940-41	123,822	10,440	10,185	144,447

* Beginning with the school year 1932-33, the enrollments of the 7th and 8th grades of six-year high schools and of junior high schools are included in the totals.

Table V presents an interesting picture of the increase in high school enrollments in the different types of high schools since 1915 to the present day. In this increase in high school enrollments, one finds an increase that is many times greater than the increase in the state's population during the same period. Only one conclusion can be drawn from these figures and that is the growing success of the idea of high school education for all boys and girls of high school age in the state. In this connection it is interesting to note that along with this increase in enrollment has gone a decrease in the number of high schools. This is a fact which proves that there is a very definite movement throughout the state in the direction of fewer and larger high schools.

The character of our high school population has changed greatly since 1915. Then the high school was thought of only as a school for the few rather than an institution for the many. In fact, prior to 1908 there were fewer than 50 high schools in the state. They were small, enrolling fewer than 5,000 pupils, and all were located in cities. Practically all boys and girls who lived in rural areas were without high school advantages except in so far as private schools were organized. Many of these private schools did not offer work beyond the eighth or ninth grades. It was not until 1908 that the counties were legally bound to establish high schools and it was not until 1914

that districts independent of the county system were required by law to provide high school education for their boys and girls. Since the date of these legal demands on county and independent districts, the growth in numbers of high schools and enrollments has been phenomenal.

1939-40	529	59	73	661
1940-41	516	61	72	649

Table VI shows the situation as regards the number of accredited high schools, by years, since 1909. When one thinks of a high school in its true sense, one thinks of an institution that offers a program of work through the twelfth grade. High schools that are organized to give work which does not extend through the twelfth grade, excepting junior high schools (grades 7-9), should be looked upon as incomplete, feeder schools for regularly organized high schools; i.e., schools that offer pupils a complete high school program through the twelfth grade.

The Library. The school library should be a service center and unifying agency of the school. As such it demands major consideration on the part of school authorities, teachers, and pupils. Boards of education should not only appropriate money each year for the purchase of new books but the money should be spent as well as appropriated for the purpose. In this connection it is pleasing to note

required by law
girls. Since the
ent districts, the
ments has been

that this year boards of education appropriated \$91,471 for their high school libraries while the private secondary schools set aside \$9,630 for this purpose. It seems appropriate at this point to restate the regulations of the State Board of Education for high school libraries.

Regulations of the State Board of Education: High School Libraries

a. *Books.*

High schools with an enrollment of 100 or fewer pupils shall have a minimum of 500 well-selected books, exclusive of government documents and textbooks, selected to meet the needs for reference, supplementary and recreational reading. Schools having a greater enrollment shall increase the number of books at the rate of five volumes per pupil enrolled.

b. *State-Approved List of Books.*

The state-approved list of library books for secondary schools is The Standard Catalog for High School libraries, published by H. W. Wilson Company, 950-972 University Avenue, New York City. The price of this publication is \$4.00 for schools having an enrollment of 100 or less. This amount may be paid in two payments if necessary. (Sold on service basis: cost greater for larger schools.)

c. *Appropriation.*

An annual appropriation of at least one dollar per pupil shall be spent for books, periodicals, etc.

d. *The Librarian.*

The amount of service of the librarian shall be:

(1) A full-time librarian shall be provided in schools that have an enrollment of 500 or more pupils. The professional preparation of the librarian should include a four-year college course. The library training shall consist of one year of work in an accredited library school.

(2) A part-time librarian (who teaches not more than three classes) shall be provided in schools that have an enrollment of from 300 to 500 pupils. A minimum of eighteen semesters hours' training in library science is required.

(3) A part-time librarian (who teaches not more than four classes) shall be provided in schools that have an enrollment of from 100 to 300 pupils. A minimum of at least twelve semseter hours' training in library science is required.

(4) A part-time librarian (who teaches not more than five classes) shall be provided in schools that have an enrollment of less than 100 pupils. A minimum of at least six semester hours' training in library science is required.

e. *Organization.*

The library shall be satisfactorily located, shelved, cataloged and classified by a simplified form of the Dewey Decimal system. Careful, systematic and thorough instruction in the use of the library must be given, and evidence must appear that the library is being used properly.

Inspection

For accreditation, increased emphasis will be given to the support, organization and administration of the library service.

Increased emphasis will be given also to wholesome and decent sanitary conditions. The school building, rooms, hallways and premises must be clean, and the toilets maintained above reproach. The toilet floors and seats must be kept clean and dry and free from filth and vandalism.

* Interpretation of High School Ratings.

A—Accredited through the entire high school course (through grade twelve).

B—Accredited through the entire high school course (through grade twelve).

T—This initial when attached to the designation of any rating indicates that such rating is given in the face of some deficiency, that it is temporary for this year only, and that the school should be discontinued at the close of this school year or reorganized in full compliance with regulations for accrediting.

E—This initial suggests that an **emergency** is recognized to exist that may justify the operation of the school even with an observed shortage in the number of pupils or of teachers.

U—Unaccredited.
