Taxes and Fees

Whereas, Mrs. Mary E. Sayre, by a writing executed simultaneously herewith to the Security Trust & Safety Vault Company, has pledged to said Security Trust & Safety Vault Company, certain bonds, stocks and other securities, constituting a part of her legacy under the will of said E. D. Sayre upon the terms, conditions and for the purposes set forth in said writing, which said writing is now referred to and made a part hereof,-

NOW, Therefore, the undersigned hereby obligates and binds herself unto said Mary E. Sayre to pay to said Mary E. Sayre annually so long as she may live, a sum equal to four per cent per annum upon such an amount of the legacy of said Mary E. Sayre, under the will of E. D. Sayre, deceased, pledged to the Security Trust & Safety Vault Company, as aforesaid, as the Security Trust & Safety Vault Company under the terms and conditions of said writing, may be required ultimately to use and apply in executing the purposes expressed in said writing; which said sum, as contemplated by the parties will represent so much of the legacy of Mrs. Mary E. Sayre, under the will of E. D. Sayre, as will be consumed by the Security Trust & Safety Vault Company, in settling and adjusting the legal obligations of the Bank of D. A. Sayre & Co., in manner as provided and expressed in said writing.

WITNESS my hand this October 31st. 1899.

In order to finance cement plants, operate same and market the product in a most economical manner to insure the largest possible returns for investors, the following plan has been proposed:

It is proposed to form a holding, financing and operating company, to finance cement plants, hold their securities also the titles and patents and all rights pertaining to same, to organize and control selling companies and agencies and to operate all as a unit.

With this in view it is proposed to acquire the plant of the Atlantic Cement Company, now in the course of construction and about 90% completed. This plant has a capacity of about two million barrels of cement a year and is considered the finest example of cement mill construction in the United States.

It is proposed to finance the Atlantic plant for six hundred thousand Dollars cash to complete same and to provide the necessary working capital. For the money so advanced, the Finance Company is to receive notes or bonds bearing 6% interest from the Atlantic Company, said notes and bonds to be a first lien on over two million dollars worth of assets. The Finance Company will also receive the entire issue of common stock, one million dollars, in which rests the control of the Atlantic Cement Company.

In order to insure ready market for the product of the above mentioned plant, it is proposed to purchase from the General Cement Product Company, the cement gun patents for the territory that cement can be most economically delivered from the Atlantic plant, namely: a territory bounded on the North by Canada, on the East by the Atlantic Ocean, on the South by the Potomac River, and on the West by the Western line of Pennsylvania.

It is proposed to operate the cement gun rights either by lease or subsidiary companies, in the event of operating by subsidiary companies, the Finance Company will always retain 60% of such companies. Said leases or subsidiary companies to be made in such a manner as to make it necessary for individuals or corporations, handling the cement gun, to purchase cement from the Atlantic Cement Company.

For the above cement gun rights and the stock in the various subsidiary companies now organized or about to be organized in this territory, it is proposed to pay the General Cement Product Company five hundred thousand dollars cash and one quarter common stock of the holding company.

With the above in view, it is proposed to organize this Finance, Holding and Operating Company with a capital stock of

\$2,000,000 - 6% non-accumulative preferred stock,  
10,000,000 - Common Stock

It is further proposed to sell \$1,500,000 of the preferred stock at \$80.00 per share, with a common stock bonus of 100% par value, the balance of the Preferred Stock to remain in the treasury for future requirements.

The proceeds from the above sale to be placed in the treasury of the above described Company and to be disposed of for completing the Atlantic Cement Plant and financing same for operation, and also to pay the cash purchase price for the cement gun rights.

**ESTIMATED PROFITS:** It is estimated that the Atlantic Plant can earn \$500,000 with cement at 85¢ per barrel which would give the Finance Company a profit of \$344,000, the balance being absorbed by the fixed charges of this Company. The interest from the Atlantic bonds, or notes of \$36,000 would also be an earning to the Finance Company.

It is estimated by Mr. George L. Prentice, September 21, 1910, that the profits on the cement gun companies would be \$4.00 per barrel of cement over and above the present method of utilizing cement. This estimate we will reduce to \$1.00 for conservatism and as the Finance Company would hold 60% of all the stock of the subsidiary companies this would give the Finance Company on an output of 2,000,000 barrels per year, the capacity of the Atlantic Plant, \$1,200,000 less such administrative charges as might be incurred. This, *Thus* the total income of the Finance Company would approximate \$1,580,000 per year <sup>N</sup> of about 15% on the Common Stock.

The above results would be accomplished by the use of only 75 cement guns in the territory covered by the rights it is proposed to purchase, or about 7-1/2 guns to the State. It is a general belief that the State of New York alone will operate more than the total number mentioned.

The title etc. to the cement plant and property also the rights and patents to the cement gun have been thoroughly investigated and details of same can be secured.
