

# THE KENTUCKY KERNEL

## UNIVERSITY OF KENTUCKY

VOL. XIV

LEXINGTON, KY., JANUARY 25, 1924

No. 15

### PHENOMENAL BASKET BY M'FARLAND TIES COUNT AND CATS WIN CONTEST

Free Throw by "Cowboy" Underwood Gives Wildcats 24-23 Victory

### "MAC" SCORES 16 POINTS

Kentucky Passing is Effective Against Moccasins Quin-tet

Throwing from a twisted position, with two men hanging over him, and swinging his arms back as if starting a swing for a discus throw, Jimmy McFarland caged a phenomenal basket that enabled Kentucky to defeat the University of Chattanooga at Chattanooga Saturday night, 24 to 23. The ball sped on a line with apparently no chance of ever reaching the thongs of the basket, hit the side rim, went straight up, and fell through the goal in the manner of a ball dropped from the ceiling. This goal was the margin of victory. McFarland caged eight goals in all. One or two of his shots came from behind or near the center circle and the others were long shots. He did the scoring for his team until, in the last three minutes of play, "Cowboy" Underwood broke a tie score and won the game with a cleanly thrown foul. It was not, however, that foul which directly won the game, for the shot of McFarland's put the Kentuckians in the lead after a tie of some minutes' duration had given the Moccasins pep, and gave his team life to continue their great play.

(Continued on Page eight)

### NEW GYM TO BE READY FOR PLAY FEBRUARY 23

Contractors Assure University Representative at Meeting

The new basketball building at the University of Kentucky, to be one of the finest in the United States, will be completed in time for the Kentucky-Georgia Tech game Feb. 23, contractors assured University representatives in a conference last Friday.

The date of the Kentucky-Centre game which was to have been played here February 9, has been changed to Feb. 25, so that it may be contested on the new court. There is always an enormous demand for seats at any game between teams of the University and its ancient rival, the Danville institution, so that the authorities are particular anxious to have that game played in the new building, where 4,000 spectators can be seated.

Those present at the conference were George B. Carey, chairman of the building committee; S. A. Boles, athletic director; O. A. Whipple, superintendent of the buildings and grounds at the University; Richard Shea, Lexington contractor, who has the contract for the brick work of the new structure, and Mr. Crockett, of the Blanchford Construction Co., of Dayton, Ohio, the firm having the contract for all the work except the brick work.

The promise that the building will

(Continued on page 4)

### DEAN ANDERSON, PROFESSOR O'BANNON ARE IN NEW YORK

Dean Paul Anderson and Professor L. S. O'Bannon are spending this week in New York City attending the meeting of the American Society of Heating and Ventilating Engineers which is being held at the Hotel Pennsylvania.

Dean Anderson, who is director of the Research Committee will give an address on Research and Industrial Progress, Wednesday, January 23. On the same day Professor O'Bannon will give a paper on Checking up the Kutter Formula and its application to the flow of liquids and gases through small pipes.

### REPORT OF EFFICIENCY COMMISSION IS FILED

Gives Urgent Needs of University And Solution of Problem

"The University of Kentucky," says a report of the Efficiency Commission, which was filed with the General Assembly at Frankfort, Monday, February 22, "is the capstone of public education in Kentucky."

The report says that from the graduates of the University will come the teachers for the rapidly growing high schools of the state, and also of the leaders in agricultural development, engineering, and the other professions. All of which are essential to the growth and welfare of the state.

"The immediate needs of the University are," to quote the commission, "very great." Among the most urgent is the necessity for a larger campus, more and better buildings, increased salaries for the teachers, a greater number of instructors, a large recreation building, a larger building for the department of education. A large assembly room, new engineering shops and equipment, another agricultural building, more dormitories, and a central heating plant.

"These needs can be met only by an increase in the general revenue of the state, increased tuition fee, and special effort on the part of the University alumni," says the report.

### CONGRESSMAN APPOINTS H. B. TILTON SECRETARY

University Student To Assume Duties At Once

Harry B. Tilton, a well-known member of the senior class of the University of Kentucky, has been appointed private secretary to Fred M. Vinson, of Louisa, congressman-elect of the Ninth district.

Mr. Tilton is the son of Judge and Mrs. A. B. Tilton, of Carlisle. He graduated from the Carlisle high school in 1920, as valedictorian of the class, and has since been a student at the University of Kentucky.

He is a member of Delta Sigma Pi, honorary economic fraternity and president of Kappa Alpha social fraternity. In 1922 and 1923 he was a member of the varsity tennis team, and this year is a representative in the Men's Administrative Council and a member of the Pan-Hellenic Council.

Mr. Vinson also appointed Hubert Hutton, of Cynthia, whose duties will be the same as those of Mr. Tilton. The young men leave this week for Washington.

### PRES. M'VEY PRESENTS UNIVERSITY NEEDS TO BUDGET COMMISSION

Asks For Additional \$120,000.00 Income To Meet Expenses

### COMMISSION FAVORABLE

Women's Dormitory and Recitation Building Vital Necessity

President Frank L. McVey, accompanied by the members of the executive committee of the University appeared before the budget commission Tuesday morning at Frankfort to present the needs of the University during the next two years. Members of the executive committee present were Senator H. M. Forman, of Ghent; Robert G. Gordon, of Louisville, and Judge Rainey T. Wells, of Murray. Commissioner W. C. Wilson, secretary of the Alumni Association, represented the alumni of the University.

President McVey presented the needs of the University in a very forceful manner, emphasizing the fact that the institution had increased in enrollment more than 300 per cent in the last ten years while building space and class rooms had not kept pace with the enrollment. He quoted from the report of the efficiency commission on University needs and showed the members how an outside organization looked at the University and its problems.

Doctor McVey specifically asked for \$120,000 additional income, to meet the running expenses of the University. In the line of permanent improvements, the president made a request for \$75,000 to complete the chemistry building, for which \$100,000 is already in the bank, a service building to cost \$30,000 and to be used to house carpenter shops, paint shops, store rooms and wagons and tools.

One of the most important things included in the report to the budget commission was the request for a new recitation building and a women's dormitory to cost \$250,000 each. The need for a dormitory is vital and should be remedied at once for a number of women are denied admission to the University every year on account of insufficient dormitory space. For 1925-26, requests were made for \$50,000 to enlarge engineering buildings and to take care of the Wendt gift. The president also asked for \$250,000 for a heating plant, \$200,000 for an agricultural building and \$150,000 for a men's dormitory. This is a total of \$650,000 annually for permanent improvements.

In the presentation of the needs of the University experiment station, requests were made for continuance of the appropriation of \$50,000 and to raise the annual appropriation for public service laboratories from \$18,000 to \$30,000. Funds were likewise requested for purchase of lands and

(Continued on page 4.)

### NOTICE!

According to long established custom, there will be no issue of the Kernel during examination week.

### UNIVERSITY LAW STUDENT RECEIVES VALUABLE BOOKS

By the will of the late Judge Evans, of Louisville, who was Federal Judge of the Western District. Robert Coleman, senior law student, has come into possession of a complete set of 291 volumes of Federal Reporter. Mr. Coleman is receiving the congratulations of his many friends, not only upon the possession of such a valuable set of law books but also upon the compliment paid him by Judge Evans.

### ROMANY THEATRE TO GIVE 'MR. PIM PASSES'

A. A. Miln's English Comedy to Play Week of February Tenth

The next offering to be given by the "Romany Theatre," the unique community playhouse on Winslow street, will be "Mr. Pim Passes," which will be presented the week of February tenth.

"Mr. Pim Passes" is a sparkling English comedy by A. A. Miln, one of England's premier writers, and its production in this theatre will inaugurate the custom of alternating light and heavy drama.

Though all of the parts have not been cast it is safe to say that one of the leading roles will be given to Marjorie Warden, that sterling little actress who played the part of "Julie" in "Lilliom" with a perfection which was wonderful. The part which she will probably carry in "Mr. Pim Passes" will be "Olivia."

Violet Young, who was also a success in the last play will play the part of Diana. The part of Lady Marden will be acted by Regina Stanfield. George Marden will be played by Mr. Morehouse.

Oscar Hambleton, the man that made the audience laugh in "Lilliom" will appear in a role which will cause no end of merriment to those present, when he presents himself as Mr. Strange. Troy Perkins will act the part of Mr. Pim and Ann will be enacted by Elizabeth Moorman, who acquitted herself splendidly in "Lilliom."

Tickets for this play will be placed on sale within the next few days and it is hoped by the management that enough students will buy them in order that two University nights may be held instead of one.

### EXTENSIVE PREPARATIONS MADE FOR FARMERS' WEEK

Extensive preparations are being made for Farmers' Week to be held this year January 29-February 1, inclusive. Many speakers and lecturers of national reputation are to appear. No expense has been spared in order that many of the best may appear. Oscar Erf, Ohio State, on dairying; C. M. Vestal, "Purdue," on feeding hogs; L. D. H. Weld, research worker with Swift & Co.; Dr. O. S. Kent, research worker with Quaker Oats, and the man originating poultry culling; Homer W. Jackson, editor of Reliable Poultry Journal, and Dr. C. J. Galpin, rural life worker, Washington and among those who will lecture. Some of these are costing the college \$100 a day and their expenses.

### FRED MURPHY YALE STAR IS CHOICE OF COUNCIL TO COACH CAT GRIDDERS

Former Northwestern and Denver Mentor to Come Here March 1

### CHOSEN FROM MANY

Was Great Athlete While A Bulldog—Captained Eli Baseball Nine

Frederick J. Murphy, Yale graduate and former mentor at Northwestern and Denver Universities, who was chosen football and baseball coach at the University of Kentucky by the Athletic council at its meeting Saturday night, wired his acceptance Monday. Murphy will come to the University March 1 to take charge of the spring football training.

The decision of the athletic council to offer Murphy the position came only after much deliberation. Several prominent coaches of the south and west were up for consideration and it was only after the council had gone deep into the matter that Murphy was selected for the position of resident football and baseball coach. A wire was sent to Murphy, who is residing in Chicago and the former Yale star sent in his acceptance Monday. Murphy will sign a three-year contract and will start on his duties in earnest next fall. The contract of Cy Barger, present Wildcat baseball coach, still has one year more to run.

Murphy graduated from Yale in 1910

(Continued to Page 8)

### DEBATING TEAM IN FORM FOR CURRENT SEASON

Sutherland Has Good Material For Debates With Other Schools

The members of the debating teams of the state will open their attack on February 15 with a debate between the University of Kentucky and Georgetown College, the subject for debate being, "Resolved that France is justified in the Ruhr occupation."

On the same date the University will be honored with a recital by Thomas C. Trueblood who will render a number of selections from Mark Twain. Dr. Trueblood is head of the department of Public Speaking at the University of Michigan, and will be remembered by many of the older members of the faculty of this institution, having been professor of Public Speaking here in 1884-5. Dr. Trueblood will also serve as one of the judges in the debate after his recital.

Professor William P. Sutherland has issued a call for a joint meeting of all debaters and speakers who are working on the World Court debate, the Ruhr debate, and the Washington Birthday Address, to meet in the Little Theatre on Monday afternoon at 4:30 p. m. when matters of importance will be brought before the members.

Professor Sutherland has been very active in not only the debating work of his department, but in all production work on the campus, and the student body feels assured that he will produce a winning team.

# Alumni Notes

Editor—Alumni Secretary

## CALENDAR

- \* Chicago, Feb. 18. (Third Monday—Regular) luncheon at 12:30 p. m., Marshall Field's Restaurant, Men's Grill.
- \* Detroit, Jan. 26. (Last Saturday—Regular) dinner, Dixieland Inn.
- \* Buffalo, Feb. 9. (Second Saturday—Regular) luncheon at 1:15 p. m., Chamber of Commerce, corner Main and Seneca Sts.
- \* Lexington, Feb. 9. (Second Saturday—Regular) luncheon at 12:15 p. m., Lafayette Hotel.

## FRIENDS IN ALL SECTIONS

### Alumni Behind Bond Issue Represent all Sections of State

The continual arrival of communications from alumni clubs and individual alumni pledging their loyal support to the \$75,000,000 bond issue is worthy of mention although the Alumni Page had a long article about it last week. There is a new list to quote this week and it is to be hoped that the influence they exert in behalf of the bond issue grows as fast as the pile of letters on the subject in the office has.

It is interesting to note that the former students are behind the University as firmly in one part of the State as in another. From the Jackson Purchase to Sandy Hook the sentiment among them is apparently the same. For instance D. C. Ross, class of '20, writing from Calhoun, in Western Kentucky, says:

"Those of us who are here are all ways loyal to the University and are all doing what we can to have the \$75,000,000 bond issue succeed. I have written to both our senator and representative, whom I feel will support the bill."

Two communications have been received from Madison county members of the association. "Madison county alumni wholeheartedly support the \$75,000,000 bond issue for good roads, adequate education and the honor and humanity of the state and we pledge assistance by all means in our power to this challenge to rally all Kentuckians to pull Kentucky out of physical, mental and moral mud," wrote the chairman of the Madison county club.

A letter written the same day from a member of the club at Richmond said, "Sentiment among the Madison county alumni seems to be strongly in favor of the bond issue. I think it likely that if the issue is submitted to the people, there will be much more interest aroused."

A former student, now county agent of Warren county, in the Penryle adds his district of the state to the different localities behind the University by writing in a recent letter:

"I am heartily in accord with a movement to organize alumni groups in every section as a booster for the University. Unless the grads make others feel that the University has been of some value to them there will be fewer of the younger students enroll for the work. I will talk to some of the other alumni here at the first opportunity and lend what assistance I can that will be of service."

This long list of correspondence represents men who are willing and in most cases alumni who have already communicated with their representatives at Frankfort. Coming as they will from all sections of the state there is every reason to hope that they will exert much influence in favor of old State.

## OLD GRAD GIVES HIS BALANCE

### Check Book Now Worthless, But Contribution Freely Given

Shortly before Christmas the Alumni Secretary sent out the second "Dear

Al" letter, in which he held the story of the alumnus who sent a \$5 contribution to the Greater Kentucky fund, leaving himself a balance of \$12.15.

That man, who won the esteem of the whole association, has been joined by others who made a similar sacrifice, even to the extent of mailing their entire balance to the campaign fund. For instance read part of a letter received from one of the class of '07 who is seeking his fortune in the Golden West.

"Your last appeal under the heading of 'Dear Al' has reached me, in more ways than one. I have no excuses to plead; I am merely placing myself on a level with the grad that was left with a bank balance of \$12.15, after sending his contribution of \$5, for by so doing I am doubling his gift, with no bank balance as a result; yet at the same time, it is more than freely contributed when I think of the piker who failed to send his little mite, rather than be called a piker; perhaps he labored under the same impression as I, for I thought it was the 1-2-5 or nothing, and I was unable to meet the demand."

Close upon the heels of this letter came another check for \$10.97, the entire bank balance of one of the recent graduates, now residing here in Kentucky. This is the spirit that built the walls of Rome and it will put the roof on the basketball building and keep the grass green inside the stadium.

Altogether the second "Dear Al" letter brought in 35 subscriptions in less than a month, more than one a day, a total of \$715.84.

## SOME IS SCATTERED

A recent communication from the mother of four former students seems to have been written under the impression that the Alumni Secretary is a woman. After several letters were sent to the different members of the family in regard to the stadium drive and other matters the mother wrote back, "Sis, its such a waste of time to keep writing to the boys. Some is dead, others is scattered out on farms. There was Henry and Robert and Roy, the twins. All went to State with their sister Margaret. They are scattered, Henry is dead, so I get the boy's mail and it is useless to waste time and postage."

That's right, Old State's sons and daughters are scattered. In a way it is sad to know they are so far away but think of the influence they can exert all over the face of the earth and write a story creditable to their Alma Mater in the distant sands of deserts and in the pure white snow of the highest mountain countries. But they need not get so far away that it "is useless to waste time and postage" for Old State is waiting to hear from them often through the Alumni office.

## WOULD ADVERTISE U. K.

### Former Student Discourses on Value of Publicity

Rufus Lee Weaver, class of '95, an attorney in New York City, wrote some time ago to offer the suggestion that the University might very profitably celebrate a little more and get itself on the map by advertising. In his letter he points out how some places are so well advertised, saying:

"Why cannot the University take up a few matters like other provincials, or like provincials, and celebrate. There was an old elm by the side of the way near Harvard under which, it was stated, Washington stood and accepted the command of the army. Now, they say, Washington did not stand there at all. Regardless of that doubt, the old elm has been a shrine—a shrine just because it happened to grow in Massachusetts. Even the birthplace of Washington is not ad-

vertised. That is because it is in Virginia. A birthplace like that in New England would be talked about by the people at home. A Bunker Hill, Lexington or Concord, noble, but of no great consequence as battles, are likewise advertised and celebrated in the province, but a Princeton or Yorktown goes without a monument for 140 years and more because the people of the locality do not claim the universe for themselves and their section."

It now looks like the University is going to celebrate and celebrate pretty strong when the bond issue and the request for appropriations for the next two years are passed by the legislature. And the University will have a place to hold the meeting, for the basketball building will seat 4,000 if it is raining and the stadium about 15,000 "if the sun shines."

## LETTER FROM SOUTH AFRICA

"H. W. Taylor '06 and his wife continue to reside at Salisbury, Rhodesia, where he is head of the Tobacco and Cotton Division for the Government of Rhodesia. Taylor is in a good position up there, and has the full confidence of the people.

"For the past four years I have been honored with an invitation from the Rhodesian Government to judge at their annual Agricultural Show; these visits have been most enjoyable, and both Taylor and I make full use of our spare time discussing the past, present and future of 'Old State'.

"O. B. Chisholm '69 and his wife live near Cape Town. Mr. Chisholm is one of the principal leaf buyers for the United Tobacco Company, Cape Town. Both Chisholm and Taylor came out to Africa with me fifteen years ago, and I am very pleased to say that both of them have been very successful.

"J. du P. Oosthuizen '12, wife and children are still living in Rustenburg, though he resigned as Assistant Chief of the Tobacco and Cotton Division of the Government, about four months ago, to accept a lucrative post as head of the Development Department of the United Tobacco Company. Oosthuizen's resignation was a serious blow to my staff.

"W. B. Wilson '11, wife and two children recently moved to Bulawayo, Rhodesia, where Wilson has accepted the management of the Glenville Tobacco Company. This company plants about 400 acres to Turkish tobacco annually. He appears to be 'on a good wicket' to make money, however, I was sorry to loose his services from my staff.

"Paul Koch ex-'13, wife and son have been transferred to Rustenburg. He was promoted to the post of Assistant Chief of the Tobacco and Cotton Division, and manager of the Experiment Station.

"H. R. Halbert '20, completed his two years contract last September and was re-employed for another twelve months. So he remains as manager of the Experiment Station at Piet Retief."

"V. F. Olivier '20, the most recent 'Kentucky State man' to join this staff, returned about two years ago and was placed at Oudshoorn, Cape Province, as Itinerant Officer for that area.

"Mrs. Mostert (Miss Lucy Stallings) ex-'20 arrived in South Africa with her husband about two months ago. They both took their B. S. degrees at the Kansas Agricultural College last June. He is a South African by birth, and therefore returned to his native land, where he is at present engaged in the Census Department of State.

"T. R. Hayes, ex-, is in the employ of the United Tobacco Company, assistant to Mr. Oosthuizen. He has been in our midst just over a year but he has made lots of friends and seems to be 'hale fellow' with all who know him."—Wm. H. Scheffius '99, Chief, Tob. & Cot. Div., Union of South Africa, also Director of the Cotton Institute, Transvaal University College, Pretoria, So. Africa.

## Betwixt Us

Every two years the alumni office receives from Joseph Graham Lewis a check to cover two years dues. Except during the period of the World War, Mr. Lewis has a clear record as an active member of the Association. He is logging engineer for the Madera Sugar Pine Company, address route K, box 172, Fresno, Calif.

"Herewith find check for alumni dues and my subscription to the Greater Kentucky campaign fund, which I hope will be of assistance."—Roy C. Hoppood, patent attorney with Western Electric Company, 463 West St., New York City. All mail should be sent to residence, 41 So. Hillside Ave., Glen Ridge, N. J.

L. S. Boggess, with the State Highway Department, asks that his Kernel and also that of O. F. Threlkeld '22, be sent to Calla, Ky., where they have recently been transferred.

The announcement of the engagement of Dr. Philip Blumenthal to Miss Bertha Julia Kirtz of 120 St. James Place, Buffalo, N. Y., was received in the Alumni office this week. Dr. Blumenthal is secretary-treasurer of the Lactal Analytical Laboratories, 176 Franklin Street, Buffalo, N. Y. He is prominent in the civic affairs of Buffalo, a member of several clubs, civic and social, and last year was president of the University of Kentucky Alumni Club of Buffalo, and is a life member of the general Association. For several years he was research chemist at the Iowa Experiment Station and afterwards at the Kentucky Experiment Station. During the World War he had eight months of chemical warfare service and at the time of the Armistice was in officers' training school. Dr. Blumenthal has ever been a loyal and enthusiastic supporter of his Alma Mater and last year, in addition to other services, was chairman of the Placement Committee of the Buffalo Alumni Club, securing positions for University of Kentucky graduates in Buffalo. It is not anticipated that the wedding will take place until fall. The honeymoon will be taken in Europe where they expect to spend several months in travel.

The "lost list" published in the Kernel always attracts the notice of some who are able to put us in touch with someone of these "lost" ones. A letter from L. S. O'Roark regarding his classmate, Laurence Edward Brown, is quoted herewith in part. "Those who remember L. E. Brown will remember him as a very quiet, studious individual, who never made much noise but managed to go off with the highest honors of his class at the end of his senior year, and with all his later developments, he still remains the same quiet, purposeful individual. To look at him you would not think that this boy who had his start in Somerset, Ky., had covered so much of the earth's surface with

the sole purpose of enabling life to be 'sweeter' by selling and installing the proper sugar machinery. It is his philosophy to learn all these to know about the subject that is interesting to him. When he realized that sugar machinery engineering had such wonderful prospects, very soon after he had graduated from the University of Kentucky, he went down to Louisiana and studied sugar chemistry where he could see direct application to the sugar making industry. He has been in Cuba, Haiti, Porto Rico and several of the South American States during the last few years. I have enjoyed being with him quite recently when he was in New York, previous to sailing January 19 for Rio de Janeiro, Brazil, as the representative of Pretree & Dorr Engineers, Inc., 67 Wall Street, New York City. He is going down to Brazil to organize the company's interests there from the standpoint of sales and engineering in the development and installation of sugar making machinery. Mrs. Brown, who was from Somerset also, and the two small Browns, the light of their father and much of the reason for his advance in his particular profession, will sail from New York in May, to join L. E. in their new location, which undoubtedly will be Rio de Janeiro for the next two or three years."

W. E. Hobson, mining engineer with Creclius & Phillips, of Pittsburgh, asks that his Kernel be sent to 1420 Dormont Ave., So. Hills P. O., Pittsburgh, Penna.

"I have been very slow finding out just what I could do for the Greater Kentucky campaign and it cannot be much now for I am trying to finance my own 'student loan' to come back to Kentucky and re-enter school as soon as I possibly can. I am enclosing a check for the treasurer and I wish I could go on making circles to the right of it. Hoping that this campaign will be a big success."—Jesse T. Hendricks ex-, farming, Eden, Wyoming.

Richard W. Seacare is manager of the Kentucky Live Stock Improvement Association with office at 214 Exchange Bldg., Bourbon Stock

## Something Happened in 1891

What  
Engineering  
Owes To  
Sound  
Principles

PERHAPS no phase of electrical development is more fascinating than the events leading up to the practical use of electricity as the motive power for street railway transportation.

It is a story of "midnight oil", hard thinking, extreme perseverance. No better example of the value of sound principles to present day engineering could be cited than the Westinghouse No. 3 Motor, as introduced in 1891.

Its design was so fundamentally correct and the details were so soundly worked out that subsequent developments of railway motors all followed the principles embodied in it. Now let's see what bearing this has had on modern transportation.

In 1700 the first permanently fixed rails made their appearance. In 1831, in New York, horse cars began operation. In 1834, after fruitless attempts to apply steam, compressed air, gas, etc., to these cars, a Vermont blacksmith, one Thomas Davenport, sug-

Westinghouse Motor, No. 3, the Progenitor of the Present Universally-Adopted D. C. Railway Motor.

gested that electricity be used as the motive power.

The very first practical commercial dynamo, built by Gramme, in 1862, made this suggestion a possibility.

It was natural that George Westinghouse, with his intense interest in transportation, should take up this problem. From 1889 to 1891, he, with his organization, worked continuously to perfect a commercially practicable railway motor, and the famous No. 3, daddy of all street railway motors, was the result.

As mentioned before, the principles embodied in the No. 3, thirty-two years ago, are still in use, and at least ten prominent features of this remarkable motor are to be found in present-day types. A number of these early motors are still in operation—a tribute to sound engineering principles.

## WELCOME, COACH MURPHY

After careful consideration of all eligible material, the Athletic Council of the University has selected Fred J. Murphy, of Chicago, as resident football coach for the next three years. This selection is a wise one and portends a new era in athletics at this institution.

Murphy gained a reputation when he took over the job of handling the football team of Northwestern, a team which had not beaten its traditional rival, Chicago, since 1901. He produced a winning team in football and likewise rejuvenated baseball. As a player he was a letter man on the Yale team and also of Phillips-Andover. In his seven years as a player, Murphy was never in a game which was lost by his team.

Coach Murphy is a peculiar combination of gentleman, scholar and football coach. In his years at Yale he was high point man in scholarship. With such a man as resident coach, the University is assured of a high type of mentor.

The resident coaching system is to be inaugurated at Kentucky after trying various other systems, unsuccessfully. The showing made by our team last year was disappointing, although no fault can be placed with the coaching staff. It is the confident feeling of the Athletic Council and of the student body, that with the new system, and especially with the mentorship of Coach Murphy, the University will take its rightful place in athletics.

It behooves the alumni to lend their heartiest support to the system. It has been proved to be efficacious by many years of practice. Mr. Murphy will have sole charge of the coaching job—with the assistance of Coach Buchheit and a professional trainer.

The Kernel is confident that the student body and the faculty will welcome Coach Murphy to Kentucky. It assures him that in making his home here he will be received with that feeling of fellowship which has made the State of Kentucky famous.

Coach Murphy, Kentucky welcomes you.

K

## AN EVER BROADENING FIELD

A timely editorial in the Lexington Herald of January 17, referred to the needs of the Mining Department of the University of Kentucky for funds for research work in connection with

various problems connected with mining and of importance to our State, and mentioned as one of these the utilization of mine waste.

Investigations made through the Department of Mines and Metallurgy point to the needs of further research along this line. For example, in the mining field along the Eastern Kentucky division of the L. & N. Railroad from Jackson to McRoberts, over four million common bricks are sold annually and practically all of this brick is shipped from points outside of the State, requiring long freight hauls, with consequent delays and added cost at the point of delivery. And all this, notwithstanding the fact that investigations made indicate that the waste from the mines, such as sand slaw and clay, that is disposed in great heaps throughout this mining region will produce brick and hollow building tile of superior quality, and which can be produced for probably less than half the cost of the imported product.

Specimens of this converted mine waste in the form of brick and building tile may be seen at the Department of Mines and Metallurgy of the University. One specimen of brick is especially interesting, in that, after it had been burned in a kiln with other bricks, this particular brick was left in the kiln to determine at what temperature it would "fuse" or melt; this brick withstood the highest temperature attainable in the kiln, and instead of being destroyed came out a highly vitrified and impervious product, an excellent brick suitable for street paving or highway construction.

Considering the very great and every increasing demand for clay products in building construction, and the close proximity to a ready market, it is seen that Kentucky is not only wealthy in the products shipped from its mines, but it seems to be potentially rich in its mine waste.

K

## HONOR WHERE HONOR IS DUE

As the Kernel has been asked so many times to give the name of the author of the editorial entitled "Modernism vs. Fundamentalism" and because of the excellence of the utterance, it feels that it can no longer accept credit for a piece of work belonging to some one else. The article in question was written by Miss Katherine Elliott, a senior, who prepared the paper for her senior class in journalism. It was submitted to us and we gladly printed it for its real worth.

The word "Kernel" should have been substituted for the word "Myth" which appears in the article. It was an oversight. The word "Myth" represents a hypothetical paper used by the journalism class for their editorial class work.

K

## LAGNAPPE

When the president of Albion College, in Michigan, greeted his student body at chapel exercises last Friday, he was made the recipient of an enthusiastic barrage of hymn books, ink bottles, hisses and booes.

President Laird's offense consisted in the expulsion of a young lady, who he declared, was addicted to cigarettes and auto-driving rides. The vehement manner in which the male students championed the young lady's cause indicates that the days of chivalry are not gone; that men can yet fight for woman's rights; or else indicates that the male students felt obligated to the young lady for favors received.

Chivalry has not yet gone, even though the modern knights may not fight as cleanly and openly, or the damsel in distress be not so worthy of extensive combat.

That reminds us of the chap who wanted to know if the fact that Alpha Xi house is next door to an undertaker proved that sorority girls set a killing pace.

Professor Leland's opinion that under certain conditions every man in Kentucky is dishonest may have been gained from his experience in conducting examinations.

A tragedy in one semester. He left

because they thought it best; it sees he could not stand the Test.

With this issue of the Kernel this writer seeks new fields. Or to use an elegant figure, the bull will seek new pastures.

To the Kernel staff we extend congratulations on our departure. To the 14 readers of this alleged column—good by.

## PRES. McVEY PRESENTS UNIVERSITY NEEDS TO THE BUDGET COMMISSION

(Continued from page 1.)

appropriations to investigate the diseases of dark and burley tobacco.

In making these requests of the commission, President McVey impressed them with the fact that these demands were very moderate in consideration of the urgent needs of the University. The commission seemed to be favorable to the requests of Dr. McVey, but have so many phases to consider that immediate action is improbable.

K

## AGRICULTURE NOTES

During Farmers' Week, the Agricultural Engineering department with the cooperation of Kentucky Retail Lumber Dealers' Association will stage a Farm Buildings School. It will be the first ever given at the University and the idea has received much favorable mention by the press. Recently the St. Louis Globe Democrat carried an article giving it considerable space.

February 1 Carl Buckler, head of the Junior Club Work, leaves the Experiment Station to accept a position with Junior Achievement Bureau, Springfield, Mass. His work will be promotion of junior industrial clubs in the city.

Wyman S. Smith, B. S., "Wisconsin" class of '20, has arrived at the Station and assumed charge of the office of publicity. He writes for such well known magazines as Scientific American, in addition to stories of the Mississippi river. He is a member of Alpha Zeta, honorary Ag. fraternity, Sigma Delta Chi, and Phi Kappa Pi fraternities. While in college he acted as assistant to Dean Russell.

## NOTICE!

The Catholic Club of the University of Kentucky will meet Sunday morning at 10:30 in the Assembly Rooms on Barr St. All Catholics are urged to come.

## STUDENT SPEAKERS TELL NEEDS OF UNIVERSITY AT CHAPEL EXERCISES

### Kentucky is Forty-First State in Amount of Money Spent

## WRITE TO LEGISLATURE

### Students Are Urged to Lend Aid in Securing Large Appropriations

The chapel exercises on Tuesday were in charge of the Student Speakers' Bureau of the University. The speakers were H. H. Johnson, S. B. Neal, K. H. Tuggle and C. M. C. Porter. H. H. Johnson presided as chairman. The purpose of the talks was to put before the students a better understanding of what the University means to the State and to bring before and impress upon them the needs of the University.

S. B. Neal was the first speaker and told the importance of an education and something of the positions and professions the engineers, miners, lawyers and teachers are capable of filling after graduating from the University. K. H. Tuggle was the next speaker and in his talk gave the principal needs of the University. Kentucky ranks forty-first in the amount of money spent on education. One and a half million dollars is spent by Kentucky for education while other states spend from six to nine million for such purposes. The student must use every force in securing the assessment and thereby have the state fulfill its duty of the past and future.

C. M. C. Porter was the last speaker. Mr. Porter dwelt principally upon how the people of Kentucky may get what they want and what they need. It was asked that every student write a letter to the senator and representative of his or her district of Kentucky and point out to them the needs and necessity of more money for an enlarged and better University. It was also asked that a representative of every sorority and fraternity house and of all the dormitories take one of the papers containing the names of the senators and representatives of the state and post on the bulletin boards of the respective places.

## NEW GYM TO BE READY FOR PLAY FEBRUARY 23

(Continued from first page.)

be finished Feb. 23 assures the keeping of the Kentucky high school tour-

namment, which is annually held here. Louisville has been making strong bids for the tournament and might have succeeded in taking it from Lexington had not the completion of the new building given the University facilities vastly superior to any other place in the state.

K

## FROM X TO O

A colored mammy came into the office of the estate for which she worked to receive her monthly wages. As she could not write she always made her mark on the receipt—the usual cross. But on this occasion she made a circle.

"What's the matter, Linda?" the man in charge asked. "Why don't you make a cross as usual?"

"Why," Linda explained earnestly, "Ah done got married yesterday an' changed mah name."—Dry Goods Economist.

K

## EXPENSIVELY GOOD

A matter-of-fact father of an embryo poet handed some of the lad's efforts to a distinguished author of verse, and asked for his opinion.

"Well, what's the answer," queried the successful stockman.

"Alas," sighed the real poet, "those things are so good I'm afraid you'll have to support Henry the rest of his life."—Writer's Monthly.

## EYE DEFECTS

It is the ideal intention of the resident physician of the University to do all that lies within his power toward safeguarding the health and physical equipment of the students, in order that they may not be handicapped in their work here or in their various lines of endeavor after leaving this institution.

This particular article has to do with one of the most insidious, and, at the same time, one of the most handicapping ailments with which a student has to deal—Defective Vision.

At the outset, defective vision must be divided into two classes: that due to some organic disease or injury of the eye; and that due simply to abnormalities in the refracting media of the eye, the cornea, the lens and the vitreous humor. Regarding the first class, it is, of course, imperative that the sufferer be under the care of a competent physician in order that the disease or injury may be relieved, if possible. Most patients who are in this class realize their condition, and therefore, need no warning.

It is to those students who are in the second class that this article is written, in the hope that it may save one or more from some present or future handicap or discomfort. It is to those students particularly where

the recommendation "Refraction" appears on cards to parents that this article is also addressed. Errors of refraction are of several distinct classes, the principal one being:

1. Near-sightedness, or Myopia.
2. Farsightedness, or Hypermetropia.
3. Astigmatism, with or without Myopia or Hypermetropia.

1. **Myopia**—In this condition, a person is unable to distinguish, with clearness and detail, small objects at a distance, and is unable to read small type or fine manuscript clearly at a normal distance of fourteen inches from the eyes. To see small objects in detail, he must go closer to them than his fellow with normal eyes, and, in order to comfortably read small type or manuscript, must bring it closer to his eyes than fourteen inches. Persons suffering from Myopia sometimes have persistent headache, while more often there is no discomfort of any kind. The note of warning which this article wishes to sound is that Myopia, if allowed to remain uncorrected with glasses, is a progressive condition, becoming worse as the years go by. Some of the most pathetic cases of near-blindness that we see are in middle-aged and old people, wearing glasses an eighth to a quarter of an inch thick on the edges—cases of simple Myopia in

youth which were given no attention till the condition became so far advanced that it was beyond control.

2. **Hypermetropia**. A person suffering with far-sightedness sees as well or better than any of his fellows at a distance. If he is doing outside work which requires no reading, or very little, the chances are that he will have no discomfort of any kind. On the other hand, if he does a moderate amount or more of reading, drawing, microscopic work, etc., sooner or later he will begin to have certain symptoms. In the main these are: Burning of the eyeballs and lids; fatigue, headache, blurring and running together of words, figures or lines. This renders the person unable to study or work as long as his fellow, or as long as he should, and so handicaps him in getting all that is possible out of his work.

3. **Astigmatism** is a condition in which all parts of the same object the same distance from the eye are not seen with equal clearness. Often the internal musculature of the eye compensates for this with the result that the person does see all parts with equal clearness. But this muscular compensation requires effort, and the effort thus expended results in eyes which itch and burn, get red and inflamed and fill up with tears whenever they are called upon for any effort. There are various degrees of Astigmatism. In the higher forms, the patient is never free from the above symptoms, and, in addition, has very imperfect vision. In the lower forms, symptoms will vary with the degree of the Astigmatism, and also with the amount of work which the eyes are called upon to do. In any case, Astigmatism should be corrected as it makes fatigue, discomfort and inefficiency.

A very good rule to bear in mind for the young adult is a "checking up," so to speak, of glasses every two years particularly if just recently fitted. Many older people, largely on a mistaken idea of economy, wear the same glasses year after year, even for a decade. This may or may not be an error in judgment; it is an individual equation pure and simple. Some people with apparently perfect vision may have latent errors of refraction causing "red eyes," headaches and a lowering of general efficiency. Such defects are detected only by the skilled oculist.

You students owe it to yourselves and to your future to leave no stone unturned which will handicap your chances for success in any way. The resident physician is ready and more than willing to aid, in any way possible, in removing any obstacles to your efficiency.

Drop in and talk it over.

K

## Y.M. & Y.W.C.A. NOTES

The Y. W. C. A. wishes to extend a hearty welcome to all girls who are entering the University this semester, and seeks to help them in every way in enrolling in the University and becoming settled in their new surroundings. In order that a special feature may be made of the arrival of new students Y. W. has planned a luncheon in their honor, to be given Monday, February 3, in the rest room of White Hall. All new girls are urged to attend this luncheon, as it will enable the members of the Y. W. C. A. to meet them and to take a personal interest in their welfare on the campus.

The Y. W. C. A. will give a rummage sale Saturday, February 9, and in order to make this sale a success, a great many donations are needed. Let's each one of us contribute some the office in Patterson Hall between bit of wearing apparel and leave it at now and the date of the sale.

There will be no Y. W. C. A. service held Sunday night in Patterson Hall, because of the approaching examinations.

## CATS HAVE OFFDAY AND LOSE TO UNIVERSITY OF TENNESSEE FIVE 20-13

**Volunteers Score Seven Points Before Kentucky Gets Started**

**MILWARD COUNTS FIRST**

**McFarland and Milward Lead Blue and White Scoring**

Opening with a volley of field goals and breaking through the defense of the Kentucky quintet with little difficulty, the Tennessee Volunteers captured at 20 to 13 victory at Knoxville last Friday night. Tennessee's rushing attack in the first few minutes of the game piled up a seven point lead which the Cats were never able to overcome.

Harkness started the scoring for the Orange and White when he looped a crisp in the first minute of play. Following close behind this, he hung another double and Captain Hatcher cashed in on a free shot. Keister, guard, made the most sensational shot of the evening when he swooped up a dribble and hurled the ball through the iron from midcourt. This brought Tennessee's total up to seven points and the Blue Grass quintet had not yet located the basket.

In the second half the Wildcats, strengthened by an array of subs injected before the first half had ended, staged a feeble but telling comeback. Bove for the Volunteers led off the scoring in the second semester followed closely with three doubles by Underwood and Milward, the former getting two. Underwood's shot was the best of the Kentucky shooting as he evaded a mass of guards and looped the net from a long angle.

**Cat Comeback Shortlived**  
Kentucky's comeback was shortlived when Hatcher started the scoring for Tennessee again. He looped two doubles straight; and cashed in on two free tickets. McFarland added two more counters to the Kentucky list, bringing the total score to 13.

The last five minutes of the game were listless and neither team showed a great amount of pep. Kentucky failed to take advantage of opportunities in the last half and time after time missed short, easy shots. The Vol team was forced to work fast while at the net. McFarland and Milward tied with four points each as high scorer for the Wildcats. Underwood followed with three while Boren accounted for a single. Harkness and Hatcher led the Vol scoring attack while Johnson was the defensive luminary of the game.

The summary:  
Tennessee 20      Kentucky 13  
Bowe 2      Riefkin 2  
Forward  
Harkness 7      McFarland 4  
Forward  
Hatcher 7      Underwood 3  
Center  
Johnson      Boren 2  
Forward  
Keister 4      Rice  
Forward  
Substitutions: Kentucky—Hughes for Riefkin; Wilward (2) for Underwood; Helm for Boren; Riefkin for Hughes.

Referee—George Barber.  
K  
Too Cheap

Bobby—"Mamma, did you buy me from the stork?"

Mamma—"Yes, dearie; why do you ask?"

Bobby—"Oh, I've often wondered why you didn't pay a few more dollars and pick out a little boy without freckles."—Kansas City Star.

## SCRAPS

The scheduled Kentucky-Centre clash, slated to be played in Danville tomorrow night has been postponed until February 9, and the local contest between the Cats and the Colonels scheduled for that date has been put off until February 21, so that the game may be played in the new gym.

With the Centre game off, the Cats will have a little "vacation" until Monday, February 4, when the first University of West Virginia five will meet the Blue and White in the local gym. Coach Buchheit will take advantage of the rest and put the Wildcats through another week of strenuous workouts to get them ready for the Mountaineers.

Unofficial statistics show that the Cats have played to 4,200 basketball fans in their four contests in the local gym. The Mexican and Aggie games were played to capacity houses and many were turned away unable to get even standing room. The Vandy game would undoubtedly have been played under like conditions had school been in session, but even with a greater part of the student body home, the Cats had about 800 fans on hand to watch the opener. About the same number witnessed the Sewanee game. Approximately 1,000 have seen the two Kitten contests making the total around 5,200 for the season thus far.

The Kittenettes meet Louisville Cardinals Saturday night for the first game on the home floor. Louisville has defeated Georgetown and Wesleyan at Louisville, and Kentucky has defeated the same teams on the opponents' floor by smaller scores. The contest promises to be fast and close judging by past experience and this season's data.

The next game for the Kittens will be tomorrow night when the Green and White squad will go over to Georgetown and try to follow in the footsteps of the Varsity and hand the Tiger Kittens a decisive defeat.

Robert Lavin, football and basketball player of great renown arrived in Lexington Wednesday to take charge of the sporting goods department of the Van Deren Hardware Company. "Bobbie" spent the day on the campus renewing old acquaintances. We are glad to welcome him back to our fair city.

## KITTENETTES TO PLAY U. OF L. SATURDAY

**U. K. Girls Undeclared This Season—To Work for State Championship**

The girls' basketball team of the University of Kentucky is undeclared so far this season, and if the Kittenettes continue the pace they have set they will make a strong bid for the state championship. Saturday the Kittenettes will play their first game at home, stacking up against the University of Louisville quintet in the local gym. A good game is expected.

The Kittenettes are captained by Lucy Wilson, who is playing her third year of varsity basketball. At the stationary guard position Lucy is hard to beat.

The other guard position is held down by Leola Klopp, captain last year of the Transylvania championship team. Helen Keifer, for two years all-Kentucky prep school center, is always a good bet at the pivot position.

The team is coached by Bart Peak and managed by Eugenia O'Hara.

## FIRST YEAR COURT TEAM DEFEATED CUMBERLAND FIVE BY NARROW MARGIN

**Ragged Playing of Kittens Endangers Game For While**

**HENDRICKS HIGH MAN**

**Defensive Work of Captain Scrivner is Feature of Game**

Playing very ragged ball up to the last two minutes of play the University of Kentucky Freshmen basketball team came from behind to defeat Cumberland College quintet by the score of 26 to 22. With the score three points against them and only two minutes to play, Hendricks scored a foul and immediately followed it with a goal from mid-floor that tied the score. At this stage of the game Poigrove was put in for Stevenson and immediately made a beautiful shot from the center of the floor that gave the Kitten a two point lead. Just before the final whistle Smith made a basket that gave the additional two points.

The game was very rough from start to finish with numerous fouls being called on each team. The Kittens missed many baskets as did the visitors. The passing of the freshmen was inaccurate, the main trouble was that of passing to men who were covered.

The outstanding feature of the game was the defensive work of Captain Scrivner. He was always on the job and most of the visitor's shots were made from the center of the floor. He was in most of the plays and was directing his men at all stages of the game. His brand of playing is of varsity calibre. Hendricks was high point man for Kentucky making 15 points. Captain Ellison played the most consistent game for the visitors with Rodehaven high point man with eight points.

The freshmen started the first half with a series of goals and after a few minutes the score stood 10 to 2 in favor of the Kittens. Just before the end of the half Cumberland uncovered a strong attack and when the half ended the score stood 13 to 9 in favor of the first year men. Soon after the second half started the visitors took the lead and held it until the last three minutes of play when the freshman took a new lease on life and won the game.

The summary:  
Cumberland 22      Freshman 26  
Rodehaven 8      Stephenson 1  
Forward  
Ellison (c) 4      Hendricks 15  
Forward  
Gatliff 4      Besuden 2  
Center  
Wilson 3      Farrington 3  
Forward  
Perkins 1      Scrivner (c)  
Guard  
Substitutes: Freshmen—Ramer for Stephenson, Polsgrove (2) for Ramer, Stephenson for Polsgrove, Polsgrove for Stephenson, Smith (2) for Farrington; Cumberland—Estes (2) for Perkins.

Referee: Peak of Kentucky.  
K

## U. K. STUDENTS MAY SERVE IN REGULAR ARMY

**Military Department Given Authority to Nominate Seniors For Service**

In a recent bulletin received by the Military Department of the University it was announced that the War Department of the United States had empowered this institution to nominate a few of the highest ranking

seniors in military science for service in the Regular Army or Marine Corps as Second Lieutenants. The selection will be made at the end of the Senior year and will comprise only a small percentage of the graduating class.

The opportunity being offered in this way to the students by the War Department gives the students selected the same opportunity enjoyed by a West Point graduate, that of entering the regular service as a commissioned officer without taking an examination.

Another recent announcement of interest to all men aspiring to enter the service as officers is that the number of commissioned officers will be increased about one or two thousand within the next four years. It is the desire of the government that a large percentage of these officers be college men.

Many college men will welcome this opportunity to enter the service as an officer, for it is a well known fact that a college man's chances for advancement are greater than those of an enlisted man who has not had a college education.

## KITTENETTES WIN FAST GAME FROM WESLEYAN

**Keifer Features in Hard Fought Game at Winchester Last Saturday Night**

The University of Kentucky Kittenettes defeated Wesleyan at Winchester with a score of 16-15 after a hard fought contest Saturday night.

The game was one of the fastest ever participated in by the Kittenettes. Kentucky showed much better form than in the first game at Georgetown. Keifer, center, a star on Henderson high school team last year, shot four goals from difficult angles in quick succession before Wesleyan guards could spot her. The first half ended with Kentucky in the lead by five points.

In the second half Wesleyan came back fighting. They slipped in several long shots from the side. Kentucky was passing in good form and carried the ball thru Wesleyan's defense repeatedly, but failed to score. Kentucky kept the lead by one point until the score was tied 15-15 by Wesleyan's shooting a foul in the last quarter. Kentucky tried in vain to take the ball to their goal, but in the struggle Wesleyan fouled Helm, and Helm scored one point making the score 16-15. With a few minutes of play left, Wesleyan shot wild, but kept Kentucky from scoring.

Summary:

Kentucky 16      Wesleyan 15  
Kerth 1      Hulse 8  
Forward

Helm 3      Harned 4  
Forward

Keifer 10      Lewis  
Center

Klopp 2      Gilbert 1  
Guard

Wilson (c)      Sint 2  
Guard

Substitutions: Kentucky—Hill for Kerth; Kerth for Hill.

## Calendar

Friday, Jan. 25—Beginning of final examinations for semester ending Feb. 2.

\*\*\*

The regular monthly meeting of "Le Cercle Francais" was held last Thursday afternoon, in room 201 of the Administration building; Miss Patsy McCord, president of the club presided, and introduced Professors A. C. Zembrod head of the department of Romance Languages, who has just returned from a six months leave of absence abroad.

Professor Zembrod gave an interesting lecture on his travels, giving detailed descriptions of the particular places of interest he visited while in Paris; at the conclusion of Professor Zembrod's talk, refreshments were served.

The newly elected officers of the club are: Patsy McCord, president; Anna Dodd, vice-president; Virginia Duff, secretary; Bernice Bonar, treasurer; Elizabeth Gassar, chairman of refreshment committee, and Helen King, chairman of publicity.

## University of Kentucky Tea

The girls at the practice house of the College of Agriculture, University of Kentucky, entertained Wednesday afternoon with a delightful tea.

In the receiving line were Misses Mary E. Sweeney, Maybelle Cornell and Minnie Kennedy. The hosts

were Misses Pauline Park, Edith Rowland, Favola Dundon and Elizabeth Morris, who were assisted in entertaining by Misses Clover Coleman, Sadie Wilgus, Florence Brewer and Nellie Riley.

The guests were: Misses Dorcas Lyons, Margaret Moody, Emma Bell Price, Pauline Prather, Irma Bain, Eleanor Hall, Lucy Smith, Iva Dudgeon, Corinth Taylor, Irene Morgan, Lenore Thompson, Helen Weems, Elizabeth Graddy, Dorothy Bonar, Betsy Heilburn, Ruth Prewitt, Irene Barnes, Lorina Weathers, Emma Fawker, Helen Hall, Mary Brand, Sarah Curle, Mary Katherine Riggins, Mary Barrow, Elizabeth Cromwell, Margaret Dungan, Eleanor Tapp, Katherine Evans, Ruth Singleton, Lavergne Lester, Lucille Dobbins, Ritchie Stevenson, Mabelle Horlacker, Virginia Newman, Fanny Daines Metcalf, Mary Murray Harbison, Mary Bell Vaughan, Mary Lee Taylor, Dayle Casner, Virginia Heizer, Anna Marie O'Connell, Mary Gormley, Betty Wickham, Edith Farmer, Mary Katherine Gormley, Laura Martine Coates, Josephine Hughes, Sarah Myers, Eugenia Herrington, Esther Gilbert, Eleanor Smith, Mesdames Frank L. McVey, Edith Barnes and R. H. Hanson.

\*\*\*

The annual "K" dance was held Saturday night in the University gymnasium, under the auspices of the Kentuckian staff. The Blue and White orchestra furnished the music for the occasion and about three hundred students were present.

\*\*\*

Mr. Miller Manier, of Nashville, a member of Phi Delta Theta fraternity and president of Gamma province,

which includes the States of Kentucky and Tennessee, is a visitor at the Phi Delta Theta Chapter house, on East Maxwell street.

## HALLEY'S TOBACCO SEED

Three varieties of Burley all standard and guaranteed. Select a variety best suited for your land and which will make you the most money.

If you want pounds we've got the seed; if you want color we can furnish that; if your land is sick or tired we can furnish you seed that will get the best results on such soil.

"IMPROVED HALLEY" the whitest Burley grown, harder than the original type and a better yielder. This seed produces color on all lands. Cigarette wrappers on fresh land.

"COLORY DISEASE RESISTANT" developed by the University of Kentucky and recommended for all lands which have grown considerable tobacco and soils where disease has appeared.

"COLORY TWIST BUD" an excellent variety where a heavy yield is desired. A great many people are calling for seed which produce more pounds. This tobacco combines color with yield.

PRICE \$1.50 PER OUNCE

**FRED MURPHY, YALE STAR, IS CHOICE OF COUNCIL TO COACH CAT GRIDDEES**  
 (Continued from Page 1)

with a Bachelor of Science degree. His athletic career at the New Haven school was a brilliant one which included three years participation in football, basketball and baseball. Murphy was captain of the baseball nine in his junior year and was re-elected to that office the following year, but declined in favor of a teammate. When he graduated from Yale in 1910 Murphy received several flattering offers to coach but decided in favor of a business career.

**At Northwestern Five Years**  
 In 1914 Murphy reversed his decision on coaching and accepted the position as head coach at Northwestern University. He coached at the Illinois school until 1919, having exceptional success both as a gridiron and diamond mentor, but at the conclusion of his fifth year again decided that he preferred a business career.

In 1919 Murphy left Northwestern and went to Denver. He had been in that city but a short time when he was offered the job of gridiron instructor at Denver University, at that time in a very low position in the athletic world. More out of civic pride than because of a desire to re-enter the coaching game, Murphy became football coach at Denver University and began to turn out powerful elevens and put the school back at the top of Colorado schools. He coached three years at Denver and then again re-entered the business world, going to Chicago this time.

**Accepts State's Offer**  
 On learning that the University of Kentucky was seeking a coach, Murphy sent in his proposition and when offered the position wired his acceptance.

Murphy will come to Lexington with his wife and three children, on March 1, by Cy Barger's contract to coach baseball does not run out until after the 1924 season and Murphy will not take charge of the baseball squad until the following spring. He will, however, have charge of spring football practice at the University and will start in on his duties as resident coach next fall. Murphy will reside in Lexington, as specified in the contract.

**PHENOMENAL BASKET BY McFARLAND TIES COUNT AND CATS WIN CONTEST**  
 (Continued from first page.)

L. Cate, Wyatt and Dyer played best for Chattanooga, while Underwood was McFarland's co-star.

**Underwood Wins Game**  
 About the end of the game, McFarland's shot had put the visitors in the van, 23-22. A foul was called, Harry Cate, for the first time in four years, dropped the ball into the basket and the score was tied. The Moccassins failed to take advantage of the many Kentucky fouls. Of the two fouls called in the last three minutes, Underwood made his winning point, and Dyer, with a chance to tie the count, gave a repetition of what every local player had been doing all night by throwing wild.

The summary:

Kentucky 24	Chattanooga 23
McFarland 16	Anderson 3
Milward 3	Forward
Underwood 5	Rogers 2
	Forward
	Wyatt 10
	Center
Helm	Dyer (c) 3
	Guard
Rice (c)	Cate 1
	Guard
Substitutions — Kentucky: Boren, and Hughes; Chattanooga: Keegan, Hackett, Barnes (4).
