EDUCATIONAL BULLETIN

KENTUCKY HIGH SCHOOLS

Published by
DEPARTMENT OF EDUCATION
WENDELL P. BUTLER
Superintendent of Public Instruction

ISSUED MONTHLY

Entered as second-class matter March 21, 1933, at the post office at
Frankfort, Kentucky, under the Act of August 24, 1912.

POSTMASTER: SEND NOTICES OF
CHANGES OF ADDRESS ON FORM 3579

VOL. XXVIII

MAY, 1960

NO. 5

FOREWORD

This bulletin has been prepared by the staff of the Division of Instructional Services, Bureau of Instruction, primarily for the purpose of presenting significant information relating to the program of secondary education in Kentucky and the listing of classified and approved high schools for the 1959-60 school year. The information presented is based upon the application of the new accreditation standards.

It is a matter of general concern that some of our high schools, as indicated by emergency ratings, do not meet the minimum standards for accreditation. This concern is justifiable in light of the modern demands on American Education. Not only should minimum standards be met, but an even greater effort should be made at all levels to provide the kind of educational opportunities which will enable our youth to meet the challenges of this age. With the financing of the Foundation Program Law, great progress has been made. Additional financial support for education makes it mandatory that each school make every effort to improve the educational opportunities available for students. Many improvements both in breadth in offerings and in quality of instruction, are already apparent in our secondary education program.

I acknowledge with much appreciation the efforts that have been put forth in the compilation of the material and data contained in this bulletin both on the part of the Department of Education and local school personnel. I trust that members of the profession and others will find it useful and informative.

Wendell P. Butler
Superintendent of Public Instruction

KENTUCKY HIGH SCHOOLS – 1959-60

Kentucky public and private high schools are classified and accredited by the State Board of Education. This requirement is set forth in the law which requires that each school district in the state provide an **approved** twelve-grade school service and that rules and regulations be adopted governing the quality of this service. The law also provides that the "Superintendent of Public Instruction shall annually prepare or cause to be prepared and submit for approval and publication by the State Board of Education a list of all public and private high schools or other secondary schools in the state, showing their classifications." The classifications are given on recommendations of the Bureau of Instruction after consultation with the Commission on Secondary Schools of the Kentucky Association of Colleges, Secondary, and Elementary Schools.

This year, there are 527 public and private high schools in the state. Last year, the number was 533. Of the 527 high schools now operating, 470 are complete organizations in that they offer work through the twelfth grade. Of the 57 incomplete high schools, 46 are separate junior high schools organized as one distinct unit offering work exclusively in grades seven, eight, and nine. The remaining eleven high schools are incomplete organizations that offer work only through the tenth or eleventh grades.

Of the 470 complete high schools, 281 are operated by county boards of education while 115 are maintained by boards of education in independent school districts. The remaining complete organizations are either private secondary schools or schools that are maintained entirely by the state or federal government.

This year, the six-year high schools (grades seven to twelve) number 146. Last year, they numbered 148. This year, traditional four-year high schools (grades nine to twelve) number 296. Last year, they numbered 302. The remaining twenty-eight complete high school organizations represent modifications of the six-year and the traditional four-year plans.

The following table presents data regarding the various types of high school organizations to be found in the state.

**TABLE I
TYPES OF HIGH SCHOOL ORGANIZATIONS AND NUMBER OF EACH**

Types of Organizations	County Districts	Independent Districts	Private Schools	State, Regional, Federal	Total
Grades 7-12	83	56	3	6	147
Grades 9-12	189	44	61	1	295
Grades 8-12	5	5	3	0	14
Grades 10-12	6	8	0	0	14
Grades thru 11	2	0	2	1	5
Grades thru 10	6	0	0	0	6
Grades thru 9	18	26	1	1	46
Totals	309	139	70	9	527

The above table not only shows the number of different types of high schools that are found in the state but also indicates the number of such schools that operate under different types of control.

1958-59	463	—	70	533
1959-60	457	—	70	527

Table IV shows that there was a continuous growth in the number of high schools from 1915 to 1935. In 1935 there were 848 public and private high schools in the state. This represents the largest number of high schools that the state has ever had. Now that we have 527 high schools, public and private, it is clear that there has been a decrease in the number of high schools of 321 since 1935. This decrease has come about very largely through the merging of small high schools into larger school centers.

1952-53	129,345	11,323	12,861	153,529
1953-54	131,234	11,535	13,713	156,482
1954-55	143,984	12,306	14,230	170,520
1955-56	148,119	12,485	14,649	175,253
1956-57	163,715	-----	15,078	178,793
1957-58	166,886	-----	16,254	183,140
1958-59	172,991	-----	16,682	189,673
1959-60	179,487	-----	**15,690	195,177

* Beginning with the school-year 1932-33, the enrollment of the seventh and eighth grades of six-year high schools and of junior high schools are included.

** Decrease in enrollment resulted from changing one school to federal classification.

Table V presents an interesting picture in total high school enrollments in different types of high schools since 1915. High school enrollments increased rapidly until around 1941, then enrollments began to decrease on account of the second World War. The lowest total high school enrollment was for the school-year 1943-44. Today, the total high school enrollment is 195,177. This enrollment includes seventh and eighth grade enrollments in schools that incorporate these grades in their organizations.

There are 151,025 pupils enrolled in grades 9-12. The total high school enrollment for the current school year is 5,504 more than the total enrollment last year. An increase in enrollment of 4,078 took place in county high schools while there was an increase in enrollment of 916 in independent schools.

There was a decrease of 1,166 in the private high school enrollment due to the changing of one school from private to federal classification.

Table VI shows the situation as regards the number of accredited high schools by years since 1910. When we use the expression "accredited high school," we think of an organization that offers a program of work through the twelfth grade. High schools that do not give work through the twelfth grade should be looked upon as incomplete feeder schools for the regularly organized, complete high schools of the district.

Accreditation of high schools is primarily a means to an end. This end is that of stimulating growth and improvement in the schools. Originally, accreditation of high schools came about as a result of the need of institutions of higher learning for some satisfactory basis for admission to college. In recent years, however, as a result of increasing numbers of young people continuing through elementary school into high school, the emphasis upon accreditation as a basis for college admission has been shifted to that of better education for **all youth**. The rapidly changing social, industrial, and economic world and the marked increase in high school enrollment is challenging the schools to provide for a diversity of needs and capacities.

To better provide for these needs and capacities, a broader and more varied high school program is demanded. High schools should not only prepare some pupils for work in higher institutions, but they should also prepare a larger proportion of the pupils for direct entrance into business, industry, agriculture, and homemaking. It is at once apparent that small high schools cannot possibly offer an enriched program to meet the needs and capacities of all high school pupils unless it is done at excessive cost, hence the justification of requiring increased enrollment for accreditation of high schools.
