No. 180. [NOT NEGOTIABLE.]

July 18 1882

RECEIVED of

James V Brown
2 *Rocking chairs*

Value *\$9.00*

For which this Company charges

Marked *James M. Patterson*
Lexington Ky

Which it is mutually agreed is to be forwarded to our Agency nearest or most convenient to destination only, and there delivered to other parties to complete the transportation.

It is part of the consideration of this contract, and it is agreed, that the said Express Company ARE FORWARDERS ONLY, and are not to be held liable or responsible for any loss or damage to said property while being conveyed by the CARRIERS to whom the same may be by said Express Company entrusted or arising from the dangers of Railroads, Ocean or River Navigation, Steam, Fire in Stores, Depots, or in Transit, Leakage, Breakage, or from any cause whatever unless, in every case, the same be proved to have occurred from the fraud or gross negligence of said Express Company, or their servants; nor, in any event, shall the holder hereof demand beyond the sum of FIFTY DOLLARS, at which the article forwarded is hereby valued, unless otherwise herein expressed, or unless specially insured by them, and so specified in this receipt, which insurance shall constitute the limit of the liability of The Adams Express Company. And if the same is entrusted or delivered to any other Express Company, or Agent, (which said Adams Express Company are hereby authorized to do), such Company or person so selected shall be regarded exclusively as the agent of the shipper or owner, and as such, alone liable, and the Adams Express Company shall not be, in any event, responsible for the negligence or non performance of any such Company or person; and the shipper and owner hereby severally agree that all the stipulations and conditions in this receipt contained, shall extend to and inure to the benefit of each and every Company or person to whom The Adams Express Company may entrust or deliver the above described property for transportation, and shall define and limit the liability therefor of such other Company or person. In no event shall The Adams Express Company be liable for any loss or damage unless the claim therefor shall be presented to them, in writing, at this office, within thirty days after this date, in a statement to which this receipt shall be annexed. All articles of GLASS, or contained in glass, or any of a fragile nature, will be taken at Shipper's risk only, and the Shipper agrees that the Company shall not be held responsible for any injury, by breakage or otherwise, nor for damage to goods not properly packed and secured for transportation. It is further agreed that said Company shall not, in any event, be liable for any loss damage or detention, caused by the acts of God, Civil or Military authority, or by Rebellion, Piracy, Insurrection, or Riot, or the dangers incident to a time of war, or by any riotous or armed assemblage. If any sum of money, besides the charge for transportation, is to be collected from the consignee on delivery of the above described property, and the same is not paid within thirty days from the date hereof, the Shipper agrees that this Company may return said property to him at the expiration of that time, subject to the conditions of this receipt, and that he will pay the charges for transportation both ways, and that the liability of this Company for such property while in its possession for the purpose of making such collection, shall be that of Warehousemen only.

For the Company,

THE EASTMAN AND BILL SHORT MINES OF COLORADO.

S. P. Walters, President of the First National Bank of Richmond, Ky., having been selected by certain citizens of Richmond to visit and examine The Eastman and The Bill Short mines, belonging to Willard Davis and associates, submits the following report:—

TOMICHI, GUNNISON Co., COL., July 28, 1882.

To the Subscribers of the Capital Stock of The Eastman and The Bill Short Gold and Silver Mining Companies of Colorado:

In pursuance of your request, made on the — day of May, 1882, that I should go to Colorado and examine the mining properties of said Companies, and to state in writing thereafter whether Willard Davis, as part owner of said mining properties, and as the agent of said Companies, did, at the time you made your subscriptions to such stock, truly represent the facts as to the location of said properties, the richness of the ores taken from and found in the mines of said Companies, the condition of the development of said mines, and the titles thereto, have come to this place, and having performed the duty assigned me to the best of my ability, I respectfully submit the following as the result of my visit to and examination of said mining properties:

First, The representations made by said Davis, as contained in his personal statement printed and published at the time, and on which you made your subscriptions to the capital stock of said companies, are not only true in every particular, but more than true in the following points:

1. Developments made since his statement, prove beyond question that the ores in some of the mines are much richer than he represented them.

2. Recent developments prove increased richness in certain mines in both groups.

Second, So much impressed am I with the richness and value of these mines that I have doubled my subscription, and have no hesitation in making the investment.

Third, Had I not satisfied myself from personal observation as to the management of the companies by Mr. E. B. Prescott, President and General Manager, and of his integrity and business capacity, energy, push, and sound judgment in every particular, I would not have invested a dollar in them, however good the prospect of success.

Very Respectfully,

S. P. WALTERS.

P. S. I herewith submit a statement of E. B. Prescott, President and General Manager of said companies. The statement I believe to be true, and I have no hesitancy in saying that I believe that the dividend will be paid as stated in the resolution.

S. P. WALTERS.

CERTIFICATE OF DR. M. C. HEATH, OF RICHMOND, KY., AND DR. S. W. WILLIS, OF PINE GROVE, CLARK CO., Ky.

DENVER, COLO., July 28, 1882.

We, the under-igned, state that we did in person, and in company with S. P. Walters, examine The Eastman and Bill Short mining properties, and did superintend the assays made in the camp by J. S. Neal, and by Burlingame made at Denver, and we fully endorse all that Mr. Walters states in his report.

M. C. HEATH,
S. W. WILLIS.

(2)

STATEMENT OF E. B. PRESCOTT, GENERAL MANAGER.

TOMICHI, COLO., July 29, 1882.

PRODUCT OF THE BILL SHORT GROUP OF MINES.

As soon as a tramway is up and running, 120 tons every 24 hours, worth at least \$30 per ton in amount; total \$3,600. I make no mention of the first-class ore. This is based entirely on second-class ore only. Further developments will increase the product of these mines.

PRODUCT OF THE EASTMAN GROUP OF MINES.

I estimate as follows, per day of 24 hours:	
Sleeping Pet	\$1,400
Little Minnie	130
Grey Copper	65
Amount brought down—	
Bill Short	3,600
Total	\$5,195
Expense of running both properties	205
	\$4,990

To enable us to carry out this, we need a tramway from The Bill Short Mines to our Concentrating Works. A mill of a capacity of 120 tons of ore every 24 hours is now being built. We hope to have both completed and running by September 15th probably. I may state the time short, but with everything favorable, or seemingly so, I think not. I think the tramway will cost from \$17,000 to \$25,000. This tramway will save in cost of handling this ore per day, over and above the least possible figures it would cost to move it with teams, \$80 per day, and soon as running, costs only \$6 per day. No rain or snow will in any way prevent the running of the tramway. Regarding our facilities for getting our ores to market, I have to say, our nearest station is Sargents, on the D. & R. G. R. R., 14 miles from Tomichi, and a good wagon road. A station named Woodstock, on the Denver and South Park R. R., is only four and a half miles from this camp, but as yet no wagon road connecting us with it is built, but the County Commissioners have ordered one built, and that within ninety days. This road when built will give us good access to the best market for our ores. The result of a few moments' talk with Mr. Myers, Division Superintendent of the Denver and Rio Grande Railroad was, that as soon as he could give the matter attention, I should meet him at Sargents and visit our camp with the view of building a branch road from Sargents to this point. The road he promises to build on a guarantee of fifty tons per day. I told him that as soon as we were in running shape (I mean the tramway to move the ore and the mill to concentrate it), we could give them more than that ourselves. This road can be built at very little cost, as the grade is very easy and the use of a little judgment will confirm any one in the belief that that road will as a necessity be built. In my judgment the road will not have a better paying branch. I have carefully estimated the amount of ore that we have actually now taken out ready for transportation to the concentrating works, and will state, that in my judgment we have now on the dump at the Montgomery mine 1,000 tons of ore running from \$30 to \$55 per ton and are now taking out every twenty-four hours from twenty to thirty tons of such ore per day. We have at the Legal Tender mine several tons of low grade ore ready for the tramway. We also have at the Red Cloud ore suitable for the mill, all of which will be put into money as soon as transportation from mines to mill is provided. I have been asked at how much I would value the property. My reply is this: I should be disappointed if both these properties are not worth par inside of three years with good and careful management. The mineral is here and of good grade. What is needed is to take it out at a profit. I think as soon as our facilities for handling our ores

(3)

are completed, we can take out dollars for less than twenty-five cents. In closing will say, I take what reputation I have on the above statement and above my signature.

Very truly yours,
E. B. PRESCOTT,
President and General Manager.

OFFICE OF BILL SHORT GOLD AND SILVER MINING CO., OF COLORADO.
TOMICHI, COLO., July 25, 1882.

The Board of Directors met pursuant to call of the President.

On motion of Willard Davis, it was resolved that a dividend of four per cent. on the par value of all stock sold be declared on the first day of January, 1883, and three per cent. on the par value of said stock every ninety days thereafter, for the full period of five years.

Second, Resolved, that Willard Davis, the Secretary of this Company, be authorized to sell not exceeding ten thousand shares of the reserved stock at not less than six dollars per share, the proceeds of which are to be used in the building of concentration works, tramways and other machinery and appliances, necessary to the further development and operation of the mines of this Company.

WILLARD DAVIS, Secretary. E. B. PRESCOTT, President.

THE EASTMAN MINES.

Report of Examination by R. H. JOHNS, of Leadville, Colorado.

OFFICE OF GRANT SMELTING COMPANY,
LEADVILLE, COL., May 26th, 1882.

WILLARD DAVIS, Esq.,
TOPEKA, KANSAS.

Dear Sir:—In a conversation with you a few weeks ago, you asked me, "What I knew about the Eastman group of mines in Tomichi district, this State?" and having been employed by my uncle (Mr. J. P. Harley) last September to examine and report on said group, as he was negotiating with the owners for the purchase of the property,

(4)

I will give you the result of that examination, feeling more than a common interest in its exactness. I do not remember of telling you in that communication that I am not a mining expert, or a graduate from any school of mines, but I will tell you so now. My knowledge of mining is based upon the practical part of it, of over eighteen years of hard service in its various branches in California, Idaho, Montana and Nevada, and I do not hesitate in submitting this to your careful consideration, feeling very confident you will find the property better than is herein claimed for it.

The group consists of seven claims, to-wit: The Sleeping Pet, The Grey Copper, The Little Minnie, The Mammoth, The Topeka, The Silver Gem and The Eastman—all of which are true fissure veins, in granite formation, solid wall rock, and what is called in mining parlance "at home." That is: there are no seams or crevices in the wall rock, making it flaky or shelly, but solid and firm, leaving no doubt about its being the primitive rock. The Sleeping Pet has a vein a little over four feet wide, and at a depth of seventy feet assayed one hundred and eighteen dollars and thirty-two cents (\$118.32) to the ton, taking the whole vein matter between the walls. A part of the vein (about 10 inches in width) would assay from \$1,600 to \$1,720 in gold and silver. I gathered some pieces from the dump that they had thrown aside as worthless, that assayed over \$400 to the ton, and the blast that I helped to put in threw out some splendid ore, one piece in particular assaying a little over \$2,700 to the ton. This of course was a specimen assay, and cuts a small figure in the examination of a mine; yet there was about 10 inches of the vein that contained that character of ore. I believe the whole vein will run from \$120 to \$150 to the ton, and increase in richness as depth is obtained. I brought up one hundred pounds of ore, including the whole vein matter of this ledge, made a mill run of it, which made a showing of \$127.40 to the ton, and I was told by the best of authority, that the vein was getting larger and richer as they went down—the silver decreasing, and gold increasing, which is characteristic of every vein in the district that has been developed. The Grey Copper is another splendid lode and a continuation of the Sleeping Pet. At the time I examined this property the tunnel was run in on the vein 32 feet, exposing a vein nearly 12 feet wide, and making a mill run of \$42.00 of the entire ledge matter. I selected specimens from this vein that assayed \$1,060 and \$1,132 to the ton. When taking into consideration the size of the vein (nearly 12 feet) the entire ledge milling \$42.00, we can easily see there is more money in it than a small vein that is much richer, for there is no waste to the former, while there is but little ore to the latter. The Grey Copper in my opinion is equally as good a ledge as The Pet, and with the same development will expose a much larger vein, and equally as rich. The Little Minnie was undeveloped at that time except a shaft sunk about 10 feet on the ledge which showed a three feet vein, the ore bearing an exact resemblance to that of The Pet at that depth, and assayed about the same. The Topeka is more developed than The Minnie, shows a vein of nearly four feet that assays very well, and promises very well. The Mammoth lies near The Pet, and at a depth of 26 feet showed a true fissure, full five feet wide, with only one wall rock, and the same character of ore and formation as The Pet. I only made one assay from this ledge, on account of the difficulty in obtaining ore, there being so much water in the shaft. The rock was taken from the face of the ledge, without regard to selection, and showed 42 ounces silver and 1 ounce gold, amounting to about \$67.00. The Silver Gem is developed with a tunnel running in on the ledge of over four feet in width and assayed from \$80 to \$400 to the ton. The ore in this vein predominates in gold, and resembles very closely the gold bearing ore of the celebrated Yellow Jacket mine of Nevada, being porous and of a dark yellow color. The Eastman is also developed with a tunnel 22 feet on the ledge, showing a vein of two feet, and being in close proximity to The Gem, contains the same gold bearing ore as The Gem. There is no doubt in my mind from the character of the ore, wall rock, and general formation, that the two ledges are identical, and only require a little development to make them first-class properties. The group taken as a whole, is the finest I have ever seen, for every claim has paying mineral in sight, and so situated that the advantages for working could scarcely be improved. I presume you know as well as myself that the property has been badly managed, for it is in the hands of parties who

(5)

have for years been addicted to dissipation, and these habits have fastened upon them so strongly that they are wholly unreliable. Had it not been for this, Mr. Harley would have purchased the property last September, but could never get them sober long enough to complete the bargain. In my judgment it is splendid property, and if properly managed will yield an immense amount of money. If the property was located in this district, I am very certain I could sell it inside of twenty-four hours for \$500,000 on its present showing. Just look at the Lewiston ledge, which is an extension of the Sleeping Pet, on the west. Last Spring this property was offered for \$6,000 and could have been bought for \$5,000, while The Pet was held for \$10,000. The two shaft houses, one on The Lewiston the other on The Pet, are only 16 feet apart, both on the same vein. Mr. Fields, the owner of the Lewiston, is a sober, industrious, energetic man. He has taken out over \$30,000 clear of all expenses since last July, and has a standing offer to-day of one hundred and thirty thousand (\$130,000) dollars for the mine. The Sleeping Pet and Grey Copper are just as good—all are the same vein, having even better facilities for working than the Lewiston, and ought to-day to be far better developed, but have been under different management. I candidly believe that The Pet and Grey Copper can be brought to the same standard as the Lewiston in sixty days with two shifts of four men each. [This was in September; since then the Pet has been brought not only to the standard of The Lewiston but is better developed and has better machinery for taking out the ore.—DAVIS] Mr. Fields was no miner, but acted under the advice and direction of Girardet and myself, and by following those directions but a few days brought the property from a prospect to a mine, and was offered \$30,000 for it. There is no doubt but the Lewiston, Pet, and Grey Copper are all the same vein, as I have satisfied myself beyond a doubt on that matter. There is no one who has examined the different mines of Tomichi district so thoroughly as myself, for I have had better facilities for doing so than most any one else. My assays were all made by our own assayer, a thoroughly competent man—must necessarily be so to hold such a position, and I have the satisfaction of knowing they were correct. I could have no interest in making anything but a truthful report and feeling assured that I have done so,

I remain respectfully yours,

R. H. JOHNS,

Weigh Master and Classifier of Ore for the Grant Smelting Works.

THE BILL SHORT MINES.

OFFICE OF GRANT SMELTING COMPANY, }
LEADVILLE, COL., July 31st, 1882. }

GEN. WILLARD DAVIS,
RICHMOND, KY.,

My Dear Sir:—Having just finished my report on the Bill Short property, I cannot well forward it, without saying a few words to you of our mining interests, in a friendly, neighborly way. Colorado's mining interests have become one of the lead-

(6)

ing elements of growing wealth to this country, and mining is no longer considered the hazardous adventure it was a few years ago. In 1876, Colorado produced less than five millions from her mines, while in 1880 her product was over twenty millions. The increase has been greater in proportion since then. Even at that time it was over four millions more than any other State or Territory in the Union. As the mines of Leadville become exhausted, others take their places, and it is a conceded fact that Colorado stands pre-eminent as a mining center. Among the most promising, and I believe I am safe in saying the most promising camps are those of Gunnison county. Our mining men generally seem to have more confidence in those veins than any others in the State. They are yet in their infancy, but two or three years hence and they will be beyond the reach of men with moderate means. Wishing to be kindly remembered to your good wife,

I am truly your friend,
R. H. JOHNS

OFFICE OF GRANT SMELTING COMPANY,
LEADVILLE, COL., July 31st, 1882.

GEN. WILLARD DAVIS,
RICHMOND, KY.

Dear Sir:—The group of mines in the Tomichi District, Gunnison county, Colorado, known as the "Bill Short group," which I have thoroughly examined, I find as follows: The group consists of five full claims, located on Clover Mountain, near the town of Tomichi, and are named as follows: Red Cloud, Allie Bell, Montgomery, Legal Tender and Alta, and are among the best, if not the best properties of the district. The

RED CLOUD,

Is a mammoth vein, fully sixty feet wide on the surface, in lime formation, and assays from the surface from twelve to sixty dollars to the ton. The vein is being opened by a tunnel running along the ledge, which is now in sixty feet, showing a body of mineral in face of tunnel that assays from thirteen to twenty-three ounces to the ton. One hundred feet from mouth of tunnel one open cut has been run, showing the ledge to be well defined, with solid walls, and paying mineral in sight. We next come to the

ALLIE BELL,

Lying one hundred feet east of the Red Cloud, where the vein has been uncovered, but crossing the Red Cloud at nearly right angles at the open cut. This is also a large well defined ledge measuring five feet eight inches between the walls. At a depth of ten feet we find the ledge solid, with both walls and rock taken from the face of the vein at this depth, without regard to selection, assays from ten to twenty-seven ounces silver with a trace of gold. The

MONTGOMERY,

Next in the group, is an unusually large vein, running due north and south, and measures eighteen feet wide on the surface. This vein is traceable fully five hundred feet on the surface by its out-croppings, and where it has been uncovered has exposed a wonderful body of mineral that pays from the surface down. This ledge is also being opened by a tunnel running due east to cross-cut the vein. The tunnel is now in three hundred and five feet and I believe in close proximity to the vein, for I find the general appearance in the face of the tunnel materially changing, indicating that of nearing a vein. The tunnel will tap the vein at a depth of one hun-

(7)

dred and twenty seven feet from the surface, and there can be no doubt from the appearance of the vein on the surface, from the rich body of mineral exposed at the upper opening, that when the tunnel reaches the vein a large body of good mineral will be the result, with superior advantages for working. Another valuable feature in connection with this vein, is the fact of its being in the great mineral belt of the celebrated Murphy mine, the Pomeroy group, the Livingston, and the Mason, and Gulch mines, all of which are shipping large quantities of ore every day, except the Mason and Gulch, and they cannot get transportation. The Montgomery is less than three-quarters of a mile from the Mason and Gulch mines, in the same formation, and are unquestionably continuations of those veins. Our assays from this vein run from seven to thirty-nine ounces in silver, from surface rock. We next come to the

ALTA,

Located a little higher upon the mountain, with but little development, but showing a well defined ledge with both walls, and assays from twelve to twenty-two ounces in silver. With the same development the vein promises equally as good as the Red Cloud or Allie Bell. We now come to the

LEGAL TENDER,

Located near the mouth of the Montgomery tunnel, and certainly a wonderful property. On account of a recent cave, I could not make as thorough an examination as I desired, but found a large body of mineral in sight, in fact mineral in every part of the claim and twenty tons on the dump. From the body of ore on the dump and in the shaft I made five different assays, running from fifty to one hundred and twenty-six ounces in silver, with a trace of gold. The ore on the dump will average from sixty to eighty dollars to the ton. When we take into consideration the large body of paying mineral so easily obtained, and so easily treated (for the ore is mostly decomposed) it is certainly a wonderful property, and more than self-sustaining from the first day's work. Again I wish to call your attention to the

MONTGOMERY TUNNEL.

At a distance of one hundred and thirteen feet from its mouth, another vein was struck measuring thirty-five feet between its walls, and containing a large body of paying mineral, which is being taken out daily and put on the dump, awaiting treatment. This group of mines is nicely located for work, the tunnel affording drainage as well as superior facilities for obtaining the ore, and with the amount of paying mineral on the dumps will recommend itself as very valuable property to any person.

These mines differ materially from the Leadville mines, for they are true fissure veins, while the latter are only deposits. Those deposits are soon exhausted, as for instance the Little Pittsburg, Little Chief, Little Giant and Chrysolite mines of this district, when two and three years ago they occupied the highest positions of any mining property in the world. To-day they are almost worthless, their deposits having been exhausted. Then again, it takes a fortune to sink a shaft to paying mineral in the Leadville district, and when the shaft has attained the depth required to reach the body of ore, we find the mineral is not there, and our forty or fifty thousand dollars are gone. I can refer you to many instances of that kind during my four years, connection with these works.

Respectfully yours,

R. H. JOHNS.

Wingo, Ky., Aug. 14. 1882.

Prof Patterson

Dear Sir

We have a young man in our county, who is desirous of attending the session of the A + M College.

The Magistrate have never appointed a board of examiners, and the County Judge will not.

The Magistrate will not have a session before the middle of October. The young man wishes to enter the school at opening of the term, and I am very anxious to have our Co represented in your school.

Now in the absence of all these requisites how will he proceed, in order to enter at opening of the school? Can you not take him without being examined by the Co board. This young man is strictly moral, and well advanced, and altogether a promising young gentleman, just such as you would like to have in your school

Yours Respectfully Henry George

STATE COLLEGE OF KY.

Opens Sept. 13, 1882. Full course of Instruction under a Faculty of fifteen Professors in Agricultural, Mechanical, Scientific, Classical, Commercial and Normal School Departments. New College and Dormitory buildings. Tuition, \$15.00; Matriculation, \$5.00; Unfurnished room, \$5.00. For catalogues and other information, apply to JUDGE W. B. KINFAD, Chairman Ex. Committee, or to JAS. K. PATTERSON, Ph. D., President, Lexington. 160 161
Mention this paper.

Telegraph,

N. W. COR. SIXTH AND IOWA STS.

Dubuque, Iowa, August 1882

Dear Sir:

We invite your attention to THE DUBUQUE TELEGRAPH, Daily and Weekly—which as an advertising medium has no superior and few equals in the West. THE TELEGRAPH is emphatically a newspaper, its pages being always filled with the latest home and foreign news. The city department is especially attractive, and it is conceded even by its rivals, that as a local paper it is without a peer in Iowa. THE TELEGRAPH is the organ of no sect nor party, but is, in the fullest sense, a paper for the people, and the fearless independence with which it is conducted has made it a favorite with thinking men of all parties and creeds. The undeniable merit of this paper and the low price at which it is furnished to subscribers—12 cents per week for the Daily and \$1.00 per year for the Weekly—have combined to increase its circulation until it is now read by more than twice as many persons as any other paper published in Iowa.

We will insert the inclosed advertisement in Daily, for one month, for \$10.50, or every other day one mo. for \$6.00. We will pay you at these low rates. Try it.

We send you by this mail specimen copies of THE TELEGRAPH which, as you will see by examination, possesses more than all the merits claimed for it. If you conclude to accept our offer please send copy and solid cut for advertisement by return mail. Hoping that you will use the columns of THE TELEGRAPH to secure for yourself a large trade in the great and growing Northwest, we remain,

Respectfully Yours,

DUBUQUE TELEGRAPH CO.

SUPPLEMENTARY ANNOUNCEMENT.

DEAR SIR : We shall publish, about Aug. 20, a small edition of the work described below. Two of our leading Universities have examined the advanced sheets of the book, and one has already expressed its decision to use it. The other highly commends it, and may use it as an elective. The first edition will be small and expensive, and we are obliged to adopt the following plan in sending out copies for examination : —

First. It will be sent to College Professors, postpaid, on receipt of the introduction price, \$1.80 ; or,

Second. It will be sent to College Professors for examination without charge, provided they will return the book within a short time, and pay return postage ; or,

Third. It will be sent to College Professors on receipt of \$1.80, and an extra copy will be included for professor's use when the books are ordered for introduction.

Vibratory Motion and Sound.

By J. D. EVERETT, M.A., D.C.L., F.R.S., F.R.S.E., Professor of Natural Philosophy in the Queen's College, Belfast. With 48 Woodcuts in the Text and 4 Lithographic Plates of Diagrams. 8vo. Cloth. Mailing Price, \$2.15; Introduction, \$1.80.

This Treatise is intended to open up the subject of Vibratory Motion to students who have mastered the elements of dynamics.

The key to the whole subject is Simple Harmonic motion, to which accordingly a large amount of space has been devoted. Its definition and leading properties are discussed in Chapter I.

Chapter III. discusses the composition of two Simple Harmonic motions of the same period, and contains some novelties in the shape of simple geometric proofs of propositions usually established by trigonometry (see especially §§ 24-28). Chapter II. has cleared

the way by some explanations regarding the general subject of composition of motions.

These first three chapters lead straight to the geometry of Simple Harmonic waves, which is accordingly discussed in Chapter IV. The proofs of some of the most important properties of waves are given in duplicate; first, by general reasoning, and then by differentiating the equation of a wave. This Chapter is based on Chapter I.; and in like manner Chapter V., which treats of the composition of the two systems of Simple Harmonic waves of equal wave-length, is based on Chapter III. Stationary undulation is shown (by proof in duplicate, as above) to be the resultant of two opposite systems of waves, and the production of beats by waves in the same direction is also explained.

Chapter VI. discusses the general subject of the composition of two Simple Harmonic motions, and gives the mathematics of Lissajou's curves, with accounts of some methods of tracing them.

Chapter VII. breaks the monotony of a continuous thread of mathematical deduction by describing some very interesting mechanical illustrations of Simple Harmonic motion, including Sir WILLIAM THOMSON'S tide-predictor and DONKIN'S harmonograph. A novel method of combining two motions by a jointed parallelogram, which has been described in Chapter II., is here applied to the composition of two opposite circular motions.

Chapters VIII. and IX. discuss in a popular way the propagation and reflection of sonorous undulations.

Chapters X. and XI. contain accurate investigations (some of them novel) of the rapidity of stationary vibrations of strings and columns of air, the velocity of propagation of sound along a column of air, and the energy of sonorous undulations.

The last two Chapters, XII. and XIII., may be regarded as a musical appendix, the former being devoted to simple and compound tones, and the latter to musical intervals.

Though the work is mainly addressed to students at a particular stage of advancement, it is hoped that the line of treatment adopted will render it attractive to the general mathematical reader.

Dear Sir

Please find enclosed
estimate as desired of shed for college.
This is a correct one as far as we can judge;
however it may take something more or less to
complete it. No one can tell just how much
material in a building. We would be glad
to furnish you with lumber, and should
the cost will not exceed the estimate.

Yours Truly

To be forwarded to

(UNDER THE FOLLOWING CONDITIONS.)

It being expressly understood and agreed that in consideration of issuing this through Bill of Lading, and guaranteeing a through rate, the White Line Central Transit Company reserves the right to forward said goods by any Rail Road line between point of shipment and destination. The White Line Central Transit Company, or carriers over whose line the goods are transported shall only be responsible as warehousemen, not as common carriers while the goods are at any of their stations awaiting delivery to the consignees. They will not be liable for injury to any articles of freight during the course of transportation, occasioned by the weather, accidental delays, or natural tendency to decay, nor for any loss arising from leakage, improper packing, insufficient cooerage, or strapping; nor for loss or damage on any article or property whatever, by fire, or other casualty, while in transit or while in depots or places of transshipment, or at depots or landings at point of delivery; nor for loss or damage by fire, collision, or the dangers of navigation while on seas, rivers, lakes, or canals. No responsibility will be assumed for damage resulting from chafing of goods packed in bales. All necessary cooerage and baling to be at owners' cost.

No guarantee of special time for the delivery of the goods is given—Carriages and Sleighs, Eggs, Furniture Looking Glasses, Glass and Crockery ware, Acids, Machinery, Stoves and Castings, Wrought Marble, Musical Instruments, Liquors put up in glass or Earthen ware, and all other frail and brittle articles, Fruit and all other perishable goods—will only be taken at the owners' risk of fracture or injury during the course of transportation, loading and unloading, unless specially agreed in writing to the contrary. Gunpowder, Friction Matches, and like combustibles and explosives, will not be received except by special agreement, and all persons procuring the reception of such freight without the knowledge of the carrier, will be held responsible for any damage which may arise from it. In the event of the loss of any property for which responsibility attaches under this Bill of Lading to the carrier, the value or cost of the same, at the time and point of shipment is to govern the settlement for the same, except the value of the articles has been agreed upon with the shipper, or is determined by the classification upon which the rates are based, and said carrier shall have the benefit of any insurance affected by or on account of the owner of said goods. It is further stipulated and agreed that, in case of any loss, detriment or damage done to or sustained by any of the property herein receipted for, during such transportation, whereby any legal liability or responsibility shall or may be incurred, that Company alone shall be held answerable therefor in whose actual custody the same may be at the time of the happening thereof. No claim will be allowed for deficiency or damage on packages if receipted for in "good order" at the point to which they are contracted by this Bill. No claim will be allowed that arises from insufficient packing or incorrect or inadequate marking. The acceptance of this Bill of Lading or receipt for goods, made subject to the conditions of this Bill of Lading, makes this an agreement between the White Line Central Transit Company and carriers engaged in transporting said goods and all parties interested in the property. In witness whereof, the agent affirms to

33 1/2
 Bills of Lading, of this tenor and date, one of which being accomplished the other to stand void.

Dear Sir -

Since meeting with you this evening I saw my local Agent from Berlin who is going to spend ballance of this week in this country. Hence I will probably be here a few days yet. I hope you will favorably consider the offer I made you and ^{that} you will please not speak to any one about the rebate I offered you in your first payment.

Please remember if you intend insuring soon you gain one year by taking the advantage of going in at age 49 -
Yours respectfully

R. S. Bullock, Treasurer, State College of Kentucky,
Lexington, Ky.,

Dear Sir:-

We beg to call your attention to our account against your Institution for school furniture supplied them November 21st 1881, amounting to \$1204.00 and which was sold on sixty days time. By request of your President we carried the account longer than that, he agreeing that we should be allowed interest and that we should have our money as soon as the funds from the State came into the Treasurer's hands. July 17th we received on account of the above \$604.00 leaving a balance of \$600.00 and interest still due. In as much as we have carried this account so long now we feel as though effort should be made by you to meet this obligation at once, especially as we are in urgent need of the funds at the present time.

Hoping that you will comply with our request, we remain

Yours very truly,
