

519103

The University year for receipts and expenditures, other than salaries of professors, begins July 1st and ends June 30th of each year.

Salaries of ordinary professors begin with the beginning of the collegiate year, viz: Second Thursday of September, and end with the close of the collegiate year, viz: The first Thursday of June, payable in ten monthly payments, two payments, viz: May and June, being made at the end of May of each year. The President's fiscal year, according to my construction, begins with the beginning of the collegiate year, viz: September, and ends with June 30th of each year, but the salary is payable in twelve monthly payments. The service for which salary is paid is completed June 1st, though three of the payments are deferred until the end of June, the end of July and the end of August respectively. The deferred payments at the end of the collegiate year were on more than one occasion allowed by the Executive Committee to be anticipated. This was the case, on motion of Mr. Stoll, in July 1909.

In July 1909, on motion of Mr. Stoll, the salary of the President was ordered paid thereafter in ten monthly payments instead of twelve as heretofore.

If I understand Mr. Nichols' contention correctly, the fiscal year of all the faculty, the President included, begins with July 1st of each year, instead of September. If this construction be allowed, then instead of being overpaid, the University owes me a substantial balance. The proper method of reaching a just and equitable conclusion would be to compute the amount of money which I should have received from the University from July 1st (or September 1st,) 1894, at which time salaries were ordered to be in monthly installments, until July 1909, at which time ten monthly payments were substituted for twelve, then to add to that amount the amount due from July 1909 to January 15, 1910,

when my resignation became effective, plus the amount due on my retiring allowance in ten monthly payments, until July 1st, 1910. A correct aggregate of moneys due during that period would thus be obtained. Then compare the gross amount due, as shown by the records, with the gross amount paid, as shown by the books. If these balance, then the settlement made with the Business Agent may be held to be correct. If not, the difference can be adjusted by paying or refunding the difference.

It may be well to add that my salary from 1894-5 was \$3300. The salary was increased in 1906-7 from \$3300. to \$4400., to take effect July 1st of that year. The salary was increased 1907-8 from \$4400. to \$5000., to take effect July 1st of that year.

[1911]

AN ACT to provide additional income to the State University of Kentucky and to appropriate money for the erection of necessary buildings upon the University grounds.

WHEREAS in consequence of the sacrifice of the public lands, amounting to 330,000 acres granted to the State of Kentucky by Act of Congress in 1862 for founding and endowing the State College or University, the income derived therefrom is comparatively small;

AND WHEREAS the income derived from the Morrill Act of 1890 and the Nelson Act of 1907 is cut short to the amount of \$7,250., annually, because of the obligation to divide these funds with the colored people in proportion to population;

AND WHEREAS the necessities of the State University are growing each year, concurrently with the expansion of the institution and the establishment of new departments and courses of study, made imperative by the constantly increasing demands of higher education;

AND WHEREAS the State University is urgently in need of additional buildings and equipments for the use of Mechanical and Electrical Engineering, and it is also urgently in need of a central heating plant, whereby to economize the consumption of fuel and the employment of labor;

T H E R E F O R E ; BE IT ENACTED by the General Assembly of the Commonwealth of Kentucky that Twenty-five Thousand Dollars (\$25,000.), be and the same is hereby appropriated for the current fiscal year and for each succeeding year thereafter, as additional income for current expenditures for the State University of Kentucky; and that the sum of One Hundred Thousand Dollars, (\$100,000.), be appropriated for the erection and equipment of buildings for the use of the College of Mechanical and Electrical Engineering; and any other building or buildings which the necessities of the University may require; and that the sum of Seventy Thousand Dollars, (\$70,000.), be and the same is hereby appropriated for the erection and installation of a central heating plant, whereby heat and light can be produced for the lighting and heating of the buildings upon the University Grounds, now fifteen in number, and for the lighting and heating of the home for

young women known as Patterson Hall.

And be it further enacted that the money thus appropriated for buildings be paid to the Treasurer of the State University in two installments, one of which shall be due upon the first of December 1910 and the second upon the first of December 1911, and that the money thus appropriated shall be used for the erection and equipment of the said building by the Board of Trustees and for no other purpose.

And be it further enacted that the Board of Trustees shall employ an architect or architects ^{to prepare plans and specifications} for the erection and installation of such buildings and heating plant, after the necessary advertisement has been made for the submission of plans and specifications from architects who wish to compete for the same, and that bids for the erection and installation of the buildings shall be let to the contractor whose bid is, all things considered, lowest and best, after opportunity has been made by advertisement for a reasonable length of time for bids upon the construction and installation of the same.

And be it further enacted that the Board of Trustees of the State University shall make an itemized statement to the next General Assembly of the expenditures incurred in the erection and equipment of the building for Mechanical and Electrical Engineering and for such other building or buildings as they may erect within their discretion, out of the money thus appropriated and for the installation and equipment of the central heating plant.

This act shall take effect from and after its passage.

May 30, 1911

The President of the University submitted to the Executive Committee the following plan for the reorganization of the Academy:

Present Cost of Maintaining the Academy:

Principal	W. K. Patterson	\$ 1,200
Professor	McGregor	1,100
"	Jamieson	1,000
"	Wilson	750
"	Schnaiter	750
"	Wallace	750
		<u>\$5,500</u>

Cost of Maintaining the Sub-Freshman School as recommended by the Council:

Principal	McHenry Rhoads	0000
Asst. Principal	J. T. C. Noe	0000
Prof.	Jones, 2d Latin, 1 hour a week	0000
"	Terrell, 1st & 2d Greek, 2 hours	0000
"	Zembrod, 2d German, 1 hour	0000
"	Melcher, 1st German, 1 hour	0000
Deñ	Hamilton, 2d English, 1 hour	0000
Prof.	McKenzie or Farquhar, 3d English, 1 hour	0000
"	Tuthill or Asst. in History, 1 hour	0000
"	Miller, Physical Geography, 1 hour, 2d & 3d	0000
"	Matthews or Prof. Gilbert, Botany, 1 hour 3 times, two terms	0000
Asst. in Physics Dept.,	Physics, 2 hours, in 2 sections	0000

A Teacher in Mathematics, Algebra, Plane and Solid Geometry, 4 hours	\$1,200
A Teacher in Latin and History, or Latin and German, or Latin and English, Latin 2 hours and 2 hours in other subjects	1,200
	<u>\$2,400</u>

Total Cost of Sub-Freshman School

This saving will enable the Board to establish two new Professorships, one in Philosophy, initial salary \$1500 or \$2000, and one in Zoology, initial salary \$1500; total cost \$3000 or \$3500.

This saving can be accomplished without any sacrifice of efficiency of work done in the Academy. In fact the experience of the University of Illinois and the University of Chicago proves that there is an increase of efficiency where the work is done by competent men under the supervision of the heads of Department. Seniors in the College or School of Education may be assigned to instruction in the Sub-Freshman School, usually one term in a single subject, and they work directly under the supervision of the regular teacher and have the benefit of his counsel and direction. The result has proved that the teacher spurred on by the knowledge that his work is on trial and that he is to be given credit for the success which he reaches, puts forth his utmost effort to do a high class of work, and this added stimulus of the teacher is imparted to the students, resulting in an increased efficiency of work done in the school.

As may be seen from the schedule of studies showing the apportionment of classes to the Professors in charge, all the instruction now given in the Academy can be given under the reorganization with the employment of only two men devoting all their time to the Sub-Freshman School instruction or supervision. This new plan puts the instruction

under the direct supervision of the heads of the Departments in the College having charge of that line of work and permits of additional subjects being offered in Science, not now offered in the School.

As successor of Dr. Snow, Professor Noe, who will also be Assistant Principal of the Academy, should be designated by the appropriate title of Professor of Education, in charge of the School of Education, and his salary should be the same as that received by Dr. Snow, viz., \$2,000.

The plan of apportioning the work of the present Academy to the teaching force now in the College has been carefully considered and it is certain that with only two additional teachers, the whole work can be handled without placing any undue burden upon the College professors. If the plan here presented of reorganizing the Academy into a Model Preparatory School be authorized, you should at the same time direct that the President of the University in co-operation with the Principal and Assistant Principal of the Sub-Freshman School be empowered to assign the various professors in the College to the charge of classes in the Academy, which according to the present schedule it is evident they can take without conflict.

Upon motion, made, seconded and carried, the above was adopted.

E 19113

A few days ago Mr. R. C. Stoll, a member of this Board, informed me by a special messenger that a rumor was current that the Calvert property fronting 101 feet on Limestone Street and lying between the property known as Patterson Hall and the recent purchase made from the McLaughlin heirs, had been sold to one Mr. Cropper, for the purpose of erecting a laundry thereon. He requested that I should send Prof. W. K. Patterson to Mrs. Calvert to ascertain the truth of the rumor. This I did. In conversation with Mrs. Calvert, she informed him that she considered the property as good as sold, that the man had agreed to give her \$5100. for it and would return on the Monday following (December 5th), to complete the transaction. She stated, however, that he had not returned, that she had entered into no written obligation to convey the property, that no money had passed between the parties, and that she therefore considered herself free to entertain any alternative proposition. After some conversation she agreed to give him an option for the University for one week on the basis of \$5250. On his return he reported the result of his conversation to me.

Next morning by telephone I requested Mr. Stoll to prepare the option, if he concurred in the propriety and expediency of purchasing the property at that figure. He expressed his gratification and willingness, but said that he had to go to Frankfort and suggested that I call up Mr. Nichols, Chairman of the Executive Committee. In conversation with Mr. Nichols, he concurred entirely in the desirability of securing the property and suggested that Mr. Clay be consulted. I requested him then to consult Mr. Clay and report the result to me. Mr. Clay's

2/9/13

opinion agreeing with the other members consulted, I then requested Judge Lafferty to prepare the option. Prof. W. K. Patterson took the papers to Mrs. Calvert and obtained her signature to an option of ten days, on a basis of \$5200. instead of \$5250., the condition which she had made upon the previous day.

We now have an opportunity of acquiring for the University the piece of property intervening between Patterson Hall and Winslow Street, and coming into possession of the entire ~~frontage~~ frontage on Limestone Street from the property owned by Mrs. Wooley, and making it, except for the intervention of Winslow Street, a part of the larger property on which the University buildings now stand. I respectfully urge the completion^{of} the transaction thus auspiciously begun. If we allow this property to slip from us now, the probability is that a serious inconvenience will be established in our immediate neighborhood, of which we could not rid ourselves except at great additional expense in the future.

The thanks of the Board of Trustees are due to Mr. Richard C. Stoll and to his brother John, through whom the intelligence was first obtained.

Respectfully submitted,

DEATH IN HIS FAVORITE ROBE.

discharging. I was attended by doctors in Liverpool, Havre, New Orleans, New York, and at the Hospital on Staten Island (where the doctors wanted to take one leg off). Finally, after spending hundreds of dollars, I was persuaded to try your "Golden Medical Discovery," and now in less than three months after taking the first bottle I am thankful to say I am completely cured, and for the first time in ten years can put my left heel to the ground. I am at home nearly every evening and shall be glad to satisfy any person of the truth of this information. I am, sir, yours respectfully,

WILLIAM RYDER,
87 Jefferson Street, Buffalo, N. Y.

DEATH IN HIS FAVORITE ROBE.

In a previous article I have shown that the liver is the great depurating, or blood-cleansing, organ of the human system. When this great "housekeeper" of our health becomes torpid or inactive a vast amount of noxious poisons accumulate in the blood. Nature tries to work off and free the system of this poison through other channels and organs, and largely through the exhalations thrown off through the lungs in respiration. The blood is in a measure oxygenated and purified by the lungs, but in this effort and overwork these organs become irritated, and nervous cough, bronchitis, and consumption itself, are the natural results. The tissues of the lungs being irritated by the bile-poisoned blood circulating through these most delicately-constructed organs, scrofulous humors of the blood are invited to the lungs, and local scrofulous disease is established. The general health becomes broken down, and the person feels languid, weak, faint, drowsy, and confused. Pain in the right side, in the region of the liver, and sympathetic pain in the shoulders and spine, and through the lungs, is generally experienced. The patient soon has a dry hacking cough. Minute tubercles are developed in the lungs, and perhaps exist for months unknown to their victim. Nothing is done to remove tubercles by the ordinary treatment. Cough is only a symptom of the disease, yet this only is aimed at. There is no rational way to cure consumption except to purify the blood. Set the liver actively at work, and the foul corruptions which have accumulated in the blood, and which eat out the vital machinery, are gradually expelled from the system. The poisonous materials in the blood which cause the tubercles are thereby thrown off and vitality supported, the system nourished and built up, and the development of tubercles thus prevented. Remove the blood-poison by restoring the action of the liver, and the cough, which is only a symptom of the real disease, is relieved. You thereby strike at the root of incipient consumption and cure the patient.

GOLDEN MEDICAL DISCOVERY will not raise the dead, nor will it cure consumption when the lungs are almost wholly consumed, but it will, as has been demonstrated in hundreds of cases, positively arrest pulmonary
