Dear Sir:

I hope you will pardon the delay in replying to your favor of the 21st ultimo, calling my attention to H.R. 9230, introduced by Mr. McKinley of Illinois, and providing for the establishment and endowment of an Engineering Experiment Station in connection with each of the colleges and universities established under the Act of Congress of 1862. I beg to assure you of my willingness to support this measure, believing that the establishment of these experiment stations would result in much benefit to those various colleges and universities and, therefore, to the people themselves.

My attention has also been called to one or two other measures now pending in Congress extending Federal support to educational institutions.

I note with great pleasure the action of the recent Legislature in appropriating half a million dollars for the advancement of institutions of higher learning in our State.

My Secretary, Mr. Fred A. Vaughan, has taken exceptional pains to keep me posted on educational measures here in Congress, and has also kept in touch with educational matters before the recent Legislature, and was delighted to see the successful outcome of the bill appropriating the large sum above referred to.

Very respectfully,
