Education In Relation To Industry

By FRANK L. McVEY, President of the University of Kentucky

To speak at a dinner given by an organization that is specifically interested in a distinct group of activities brings one in contact with numerous possibilities. The speaker may, in fact, miss the point of the occasion or he may overstress the interest of members in some technical subject. It is, therefore, with some hesitation that I talk on the subject of education in relation to industry. In the minds of many, I have no doubt, there is no specific relationship but if I can show that there is a very close connection between education and industry. I shall be satisfied with the opportunity and the occasion.

Let me ask you to think of a definition of education. When the word is used what is in your mind? What associations does it bring up? Does it suggest a process closely related to life and one which concerns you during all your days?

To some people education is the acquirement of a mass of knowledge and in their opinion that man is educated who knows a great many things. The old definition of science was a body of classified knowledge, but this definition of science is no longer accepted by the scientists themselves, and it is as old fashioned as the early automobile appears to modern users of that form of transportation.

Another group thinks of education as precepts and axioms which the student learns for the purpose of guiding his own conduct and behavior. In the accumulated wisdom of the world the supposition is that there are enough precepts and axioms to guide us in what we do, and the acquirement of these is education. There is, however, another view which looks upon education as a developing process and it might be defined as the growth and development of the inquiring mind. If this view is accepted, education is not the accumulation of a great mass of knowledge or the acquirement of precepts and axioms, it is rather an attitude—the acquirement of an intellectual curiosity. Science in relation to this view of education is not classified knowledge but a procedure, the technique and method of dealing with problems in every field. If, then, education is the development of the inquiring mind, it has a very definite relationship to industry, because industry today is confronted by vast problems that are scientific, economic, social and technical in character. The solution of these

problems can only be gained by analyzing the facts and placing these facts before the inquiring mind. In that way progress is made and every new step in the field of industry has a foundation upon which to rest.

This country of ours has passed through a very interesting material development. Waves of population have swept across its plains and mountains, the frontiers have rolled westward, one after another, until the last frontier is gone. In this period lasting almost to the close of the nineteenth century, the problems were largely problems in utilization of natural resources—refinement of method was unnecessary. But now a great many difficult and serious questions have arisen in the field of industry. It has been found that physics and chemistry, biology and geology, all have contributions to make to the scientific phases of industry. In fact, industry depends upon what these physical sciences are able to develop. It is hardly necessary to refer to the progress that has been made in radio and chemical industry, to say nothing of many others that grow only as scientific knowledge of the factors that are involved in the problems are laid down as foundations. Competition between groups as well as between nations has brought the scientifically trained man into an important place in the field of industry. Vast laboratories have been built by corporate organizations and in these laboratories scientific men labor to find out anything that will be of value to the industry.

But modern problems of industrial character are not limited to the contributions which are made by science; they carry over into economic and social fields as well. This statement may be illustrated by reference to the problem of transportation. We have built many roads in this country and nowhere is so extensive a road system to be found as in the United States. To say, however, that we have solved the transportation problem is to claim more than anybody is willing to accede. Even the character of roads and road-building is not yet determined, and when it comes to the movement of traffic there is much confusion of thought concerning it. We are just now entering into the problem of inter-state control of motor traffic. All of this means that it is necessary to find the facts and then to analyze these and come to our conclusion. This

is the scientific method.

The illustration might be further extended by reference to problems of organization, of marketing and of salesmanship. The recent depression in this country shows very clearly that there is much to be done in the field of banking, that rural banking, for instance, has in a large measure broken down, and we have yet to build up a satisfactory system of financial assistance to agriculture. So with the problems in marketing and salesmanship, the heavy costs of getting the products to market militate against standards of living and happier conditions among the population.

In the social field many adjustments are to be made. We have just begun to work with insurance and the country is much agitated over the problem of unemployment and the difficulties which follow in its train. Old age dependency is another factor, so that industry is confronted with the question of social problems as well as scientific and economic ones. What is it going to do about it? All of this raises the question of education. The inquiring mind is needed to pry into these problems, to look at them, to get the facts, to analyze and to come to conclusions. Then in turn these conclusions must be tested by experience, reformed, and finally set up as procedure.

In what I have said thus far it appears that there are many social, legal, and economic problems that confront the different states in this country. Theorizing about them will not get us anywhere. Half-baked proposals will not solve difficulties. The first step is the finding of the facts.

In every state, with a half-dozen exceptions, there is a state university. These institutions were established by the people of the commonwealth to carry on certain functions, one of these is the instruction of the youth that gather upon the campus of the institution, but little by little new functions have been added. Provisions through acts of Congress and the state legislature have made the state university an important agency in experimentation and the organization of agriculture. The function of studying facts, however, calls us beyond this point. A state university should be and generally is a free agent. It ought to be the institution to which the people may look with confidence for the finding of facts and for their interpretation.

The administrative duties that are placed upon courts, states, county and municipal officers are so great that they have no time to work at the fundamental facts underlying many problems. Yet the solution of these problems depends upon the knowledge of the facts and understanding them. A state university ought to be the agency through which the people of the commonwealth can come into the knowledge of the facts about resources, economic problems and social questions. In many states something of this sort has been done, but in the long run a great deal more will have to be done if we are to deal with the problems which confront a state.

Mr. Hoover made a remark about three years ago to the effect that the reason why industries in the United States have advanced so far has been due to the recruiting of these industries from college students. These students have brought into industry new attitudes and on the whole, a higher type personnel than could be secured from any other source. Industry, complicated

as it is, and particularly in view of modern developments, needs the results of education. It needs the inquiring mind and the problems which confront industry after all are not problems like those of the nineteenth century, but rather social problems whose solutions require the gathering of information, the analysis of it and the testing of the conclusions by extended experience.

The University of Kentucky has maintained for some years a College of Engineering. The purpose of that college is not so much to develop technical men but to lay a broad foundation so that when the student graduates he will have had discipline, training of mind, and an attitude of curiosity toward the problems with which he may be confronted. This school has been highly successful in placing its graduates in industries but unfortunately the student must find his employment outside of the state. In other fields the University of Kentucky prepares students to enter industry as well as the professions, but those who are trained in the fields of chemistry, physics, bac-

teriology and so on, must go elsewhere to find a place.

Kentucky is confronted by numerous problems. The progress which we will make in the future depends upon our understanding of these problems, and the understanding of the problems depends upon the gathering of the facts and the analysis of these by the inquiring mind. The University can be and of assistance to state officers, members of different calling throughout the State, and it should be called upon more and more often to deal with questions involved in the growth of the commonwealth. In the nineteenth century it was possible to get along fairly well without technical knowledge, but in this century it is the foundation of progress and growth. The inquiring mind must be put to work upon our state problems, social, economic, legal, and technical. This education in use. It is the answer to the relation of education to industry.

*An address delivered in Louisville at the annual dinner of the Southern Division of the American Mining Congress, March 17, 1930.

Reunion And 1907 Class

Depression or no depression, the 1907 class of the University of Kentucky will return in June with the largest enrollment we have ever had from any class. Out of an original class of 71, nearly fifty have promised that they would be here with bells on when the curtain goes up for the programs of the annual reunion. Isn't this a record of which many classes will be envious?

According to Howell Spears, acting secretary of the class, he has heard from fifty members of the class. Out of the fifty, forty-five are sure that they will be here. The other five are anxious to come, but due to the difficulty of distance, they are not sure that they will be able to make the trip at that time.

Two members of the class, Andy Craig and Clarence Fish, are deceased. Seven members of the class have not been located and we are in doubt about finding them. Seven more are lost but we believe that we will be able to locate them before June and have them here with us at that time. Seven more of the members of the class have been located but not heard from. They have ignored all correspondence and we do not know whether or not we shall be able to make them write to us before the big celebration. However, we could advise them to wake up and answer all correspon-

dence pertaining to class reunions unless they are anxious to miss what we know will be the best time they have had since leaving the campus. We are quite sure that they will be very envious and regretful if they do not return to their Alma Mater in June.

Think of the fun they will miss. All of the reunion program, the class luncheon, and we are planning to have an unusually eventful program, something for the amusement and entertainment of everyone present. We promise that no one will be bored by a single feature of the procedure.

And can you imagine any thing that will give you more of a thrill than to come back and meet fifty people whom you have not seen for 25 years? Those people who were in school with you, sharing your joys and your sorrows, friends you made who, though still loyal, you may not have seen nor heard from for many years.

Recent visitors to the campus from the class of 1907 include Slim Denham, Logan Lewis, Jack Yager, Boston Lawson, Gordon Summer, Beef Brewer (Major B. E. Brewer), Flora Gordon, Minnie (Walter) McKinney, Ben Scherffius, and John G. Allen. All of them, with the exception of John Allen, will be back again in June.

Those of the 1907 Class who have written Howell Spears, signifying their intention to be present in June are printed below as an incentive for your returning. We are sure that you will not be able to resist coming back when you see so many are returning from one class alone. Think how many there will be to represent the eleven classes who have their reunions in June.

Howell Spears, Viola Lewis, Arthur Crenshaw, Charles Mahan, W. D. Nichols, Elizabeth Wallis, E. Hart, Swift Parrish, Lewis Hillmeyer, Josh Reese, Stanley B. Roger Ammerman, Bob Acker, S. Denham, Dave Estill, Louise K. Mary Lockridge, Jack Yager, W. Brown, Copus Donan, Antimo Coleman, Jim Stigers, Boston Lawson, Gordon Summer, Don Pebranson, Alice Crawley, Beef Brewer, Ina K. Smith, Flora Gordon, Fritz Rankin, Red Woodward, F. Scherffius, Perrin Rule, Marg Webster Bennett, George G. Scott, Jim Dumps Carse, J. W. Thomas, Mary Bagby, J. M. Sprague, P. Grunwell, Walter McKinney, B. Towery.

The following are in doubt about returning but will try to be present: Brown McClelland, Mildred Scott, Florence Maddocks, Phil Shambaugh, John G. Allen, A. M. Kirby.

KENTUCKY'S 1932 BEAUTY QUEEN

Due to the fact that no names appeared on the recent publications, "A.B.C. Facts" and "Our University, Kentucky," the Alumni Association wishes to take this opportunity to give credit where credit is due. Miss Marguerite McLaughlin was chairman of the Committee in charge of these publications and we are grateful to her for her splendid work. Also, we wish to thank her for her gift of \$300.00, given through her by the Lexington Alumni Club.

Acting upon Miss McLaughlin's suggestion, the Lexington Club has donated \$100.00 to the University Student Loan Fund.

Chosen from a group of 43 entrants, Miss Margaret McAlister has been designated winner of the 1932 beauty contest of University of Kentucky at Lexington. Her home is in Lexington.

College Heads Urge Higher Grid Standard

A 12-point program urging higher standards for intercollegiate athletics, especially football, was recommended recently to the Association of American Colleges by its commission on athletics.

Nearly 600 delegates, most of whom were college and university presidents, heard the report delivered by Dr. Thomas S. Gates, commission chairman and president of the University of Pennsylvania.

Highlights of the recommendations were:

- Shorten the season to six or seven games.

- Eliminate pre-season practice.

- Ban subsidizing.

- Abolish recruiting and proselytizing.

- Reduce coaches' salaries to the general faculty scale.

- Return the game to students.

- Abolish drudgery in training.

- Eliminate training houses.

- Schedule only competitors of equal strength.

Other points the commission championed included educating alumni to respect well developed athletic programs rather than lopsided stress on one sport, full publicity because publicity is a test of honesty.

Dr. Gates said he believed college athletics could be overemphasized by discussing them too much. Then he said that college officers, especially presidents, were responsible for the type of athletics and the physical education program that institutions maintain.

The report recommended that all

but natural rivals be eliminated from schedules. The commission did not look with favor upon inter-sectional contests between teams in "too far distant geographical sections."

Urging contests between teams of equal standard, the commission said the guiding principle should be

games between schools of equal physical and mental powers and of approximately the same size.

The report pointed out that standard equalization of competitors' physical powers existed in boxing, wrestling, racing, "and notably in yachting," but that such rating was absent in college athletics.

The Wildcat Basketeers

NIEL PLUMMER

Fifteen victories in 17 games, 745 points against 456 for the opposition and the accomplishment of being the best team to represent the University of Kentucky in years—those are some of the marks placed to the credit of the 1932 Wildcat basketeers and their affable coach, Adolph F. Rupp.

Averages figured, results obtained, the power displayed and the fight and sportsmanship all point to the inevitable conclusion: The Wildcats of 1932 were a mighty organization.

And the whole gang, with the members of the an undefeated freshman team, will be back together next season.

Just for a matter of perusal, here's the 1932 record:

- Kentucky 66, Georgetown 24
- Kentucky 36, Carnegie Tech 34
- Kentucky 52, Berea 27
- Kentucky 46, Marshall 16
- Kentucky 43, Clemson 24
- Kentucky 30, Clemson 17
- Kentucky 30, Sewanee 20
- Kentucky 29, Tennessee 28
- Kentucky 51, Chattanooga 17
- Kentucky 48, Washington - Lee 28
- Kentucky 61, Vanderbilt 37
- Kentucky 37, Duke 30
- Kentucky 50, Alabama 22
- Kentucky 41, Tennessee 27
- Kentucky 31, Vanderbilt 22
- Kentucky 50, Tulane 30
- Kentucky 42, North Carolina 43

The last two games were played in the Southern Conference tournament at Atlanta.

And for the benefit of the figure fiends, here's how the Wildcats performed as individuals during the season:

Name	G.	Fg.	F.	Tp.
Kreuter (f).....	16	21	20	62
DeMoisey (f-c)...	12	60	22	142

Totals..... 296 153 745

The season opened with a scrap with Carey Spicer's Georgetown College Tigers. Spicer, an All-Southern forward on Coach Rupp's 1931 conference finalist team, brought a hard-fighting team to

Lexington, but the small Tigers were unable to cope with the high-scoring offense opened up by Darby, Sale, and DeMoisey. Every man on the squad was given a chance to perform under fire and the fans began to wonder if the 'Cats didn't have a classy outfit.

Until the opening game there had been considerable doubt about the Wildcats. Four all-Southern players had been lost by Coach Rupp of his stellar 1931 team. Spicer was one of them; "Little" McGinnis, another all-Southern forward, was gone; George Yates, all-Southern center was lost because of illness, and Jake Bronston, all-Southern guard, had completed his allotted playing time. Yet here was an entirely new organization playing as if no players had been lost.

Carnegie Tech came next. They came into Lexington fresh from an overwhelming defeat of Kentucky Wesleyan at Winchester. They headed toward Pittsburgh that night, defeated, the score being 36 to 34. A feature of this game was the battle put up by Ellis Johnson, Kentucky guard and twice all-American scholastic guard, and Jagnow, Carnegie forward and himself an all-American scholastic player. Johnson had the best of the argument.

Berea took the count by a wide margin and likewise Marshall College, of Huntington, W. Va., and the Wildcats were ready for their first taste of Conference competition. Clemson College Tigers came to Lexington to furnish this test. The Wildcats rose up and smote them, 43 to 27.

At this juncture the Wildcats took to the road and headed South for a three-game trip. Catching trains, playing a game, grabbing something to eat, and hurrying on to play again many miles away the next evening, the Wildcats added three more victories to their string, while maintaining their perfect standing.

Clemson took another defeat on this trip, 30 to 17; Sewanee entertained the Blue and suffered, 30 to 20, and Tennessee's Volunteers tried manfully to repay the many football upsets suffered at the hands of the Wildcats, but failed. The score at Knoxville was Kentucky 29, Tennessee 28.

Home again the Wildcats entertained the Chattanooga five, members of the Dixie Conference, and the result was another Wildcat victory, 51 to 17. Chattanooga has

since won the Dixie title by trouncing all comers in the Dixie tournament.

Washington and Lee's Generals came to Lexington full of fury, perhaps remembering the 45 to 0 drubbing in football last fall. But they left with only another grievance. The score was Kentucky 48, W. and L., 28.

Here the Wildcats, now attracting genuine attention from a heretofore apathetic Southern fandom, hied themselves to Nashville to meet the Commodores of Vanderbilt. The game turned out into a track meet for the Wildcat scorers, among them John DeMoisey, sophomore center-forward. DeMoisey himself rang up 29 points, and the Blue accounted all told for 61 markers while the Commodores checked up 37. DeMoisey had already been called "Free-Wheeling" by Lexington fans because of peculiar twists shot that he sported. Following the Nashville game, a sports writer in the Commodore-land, suggested that he should be called "Floating Power."

Returning home once again the Wildcats cleared for action with four more games on the schedule. Talk of an undefeated season was in the air. Duke, Alabama, Tennessee and Vanderbilt remained on the schedule.

Duke put up a terrific fight but lost, 37 to 30.

Alabama was outclassed before 5,000 persons, with hundreds clamoring to get in the gym, 50 to 22, and Tennessee as overwhelmed, 41 to 27. In these last games tickets were sold out long before game time and hundreds were turned away at the doors of the gym.

Then, with a week to prepare for Vanderbilt and an undefeated season, disaster hit the Wildcats. Sale, the leading scorer of the South, took the "flu." DeMoisey, another high scorer, joined him the next day. Worthington, veteran guard, showed up with a bad cold. Practice was out of the question for Sale and DeMoisey and the Wildcat offense was shattered.

"We are in a bad spot, but we will shoot the works to win," Coach Rupp told the press the day before the game with Vanderbilt.

Vanderbilt came to Lexington primed for the battle of their lives. Two weeks before the Commodores had been the first team to hand Alabama a defeat for the season, and they had ideas of doing the same for the 'Cats. They did. But

(Continued on Page 15)

Alumni News

Combs-Peters

Mr. and Mrs. S. L. Combs, 121 Desha road, announce the marriage of their daughter, Lola, to Mr. Frank C. Peters, Springfield, Ky., January 30, 1932, in Newport. The marriage was solemnized at the home of the officiating minister, Rev. B. F. Foster and the attendants were Misses Elizabeth Duncan and Virginia Daugherty and Mr. William Woodruff.

The bride is a graduate of the University of Kentucky, a member of the Alpha Gamma Delta sorority and was prominent in campus activities. Mr. Peters also attended the University of Kentucky and was a member of Sigma Nu fraternity.

The bridal couple left for a trip through the north before going to make their home in Columbus, O., where Mr. Peters is in business. They have a wide circle of friends to wish them happiness.

Chapman and Vinson Preside Over House

For the first time since Champ Clark was speaker of the house 12 years ago, a Kentucky Democrat presided over that body. This honor, in fact, was not singular, but was meted out to two members from the Bluegrass state.

Congressmen Virgil Chapman, of Paris, and Vinson, of Ashland, both were invited to sit in the speaker's seat while the house was discussing the important reconstruction finance corporation bill. A Democrat can preside only when that party is in power in the house and this has not occurred since Champ Clark presided.

* * *

Wildrick-Matthews

Col. George Albert Wildrick, Fort Bragg, N. C., and Mrs. Wildrick announce the engagement of their daughter, Miss Carolyn Newcomb Wildrick, to Lieut. Church Myall Matthews, U. S. A., son of Dr. and Mrs. Edwin Matthews, Maysville, Kentucky.

Miss Wildrick was graduated from St. Mary's School, Peekskill, N. Y. She made her debut in Boston several seasons ago and is a member of the Junior League of that city. She is a granddaughter of Mrs. Warren Putnam Newcomb, and of the late Gen. and Mrs. Abram Calvin Wildrick and Mrs. Wildrick. She is a niece of Mrs. Donald Armstrong and of Mrs. Charles Frost Aldrich, Boston. She is a direct descendant of Gen. Jo-

seph Warren, Gen. Israel Putnam and of Gov. William Bradford.

Lieut. Matthews is a member of the Mayflower Society of New York and of the Phi Delta Theta. He attended the University of Kentucky and was graduated from West Point in 1928. While there he was secretary of the Dialectic Society. He is a member of the Howitzer and Pointer boards, and manager of the tennis team. He was born in Kentucky and comes from a pioneer family in this state.

The wedding will take place soon.

Hamilton Rice Named to Prosecute State Criminal Cases

The state's prosecution in criminal cases before the state court of appeals will be conducted during the next four years by H. Hamilton Rice, young Lexington attorney, who was appointed assistant to Attorney General Bailey P. Wooton.

Mr. Rice began his new duties when Attorney General Wooton took over the office from former Attorney General J. W. Cammack. He already has prepared a number of briefs supporting the side of the state in appealed criminal cases. He is the only member of the attorney general's staff attending to the criminal prosecution before the appellate court.

A graduate of the University of Kentucky College of Law in 1927, Mr. Rice has been practicing in Lexington as a member of the Fayette County Bar Association for the past five years. Prior to his appointment on the attorney general's staff, he was associated with the law firm of Forman and Forman, with offices in the Security Trust building, Lexington. While in the college of law he was a member of Phi Delta Phi, honorary legal fraternity. He completed his academic work at the University of Kentucky, after graduating from University High school.

As a member of the Young Men's Democratic club of Fayette county, Mr. Rice has been active in a number of political campaigns.

Mr. Rice and his wife, who was Miss Mae Alma Crutcher, are making their home in Frankfort at 106 Hughes street. His father is J. Hughes Rice, of Lexington.

* * *

Robert W. Bowden Wins \$3,000 Prize

Robert W. Bowden, professor of social science, Youngstown College, Youngstown, Ohio, and a former

student at the University of Kentucky, is the winner of a \$3,000 prize for a philosophical book, "In Defense of Tomorrow," according to Dr. F. Paul Anderson, dean of the college of engineering, University of Kentucky, who has received a copy of the book.

The prize was awarded by John Agar, New York, president of the National Arts club, and judges were submitted in the arts contest. Mr. Bowden is a native of Pilot Oak, Graves county.

* * *

Daughter Born

Mr. and Mrs. H. D. Paynter, Huntington, W. Va., are receiving congratulations upon the birth of a daughter, Betsy Frances, Feb. 6. Mrs. Paynter was formerly Miss Helen Holsclaw, Lexington.

* * *

Shirley Jo Davis

News comes from Ann Arbor, Mich., that Prof. and Mrs. Joe Lee Davis, formerly of Lexington, are the parents of a pretty baby daughter, born Sunday, February 7, at the general hospital there, who has been named Shirley Jo.

Prof. Davis is a graduate of the University of Kentucky and for several years was instructor in English there before going to Ann Arbor to become a member of the English department faculty.

* * *

U. K. Graduate Made Dean

According to announcement received from Bethel Junior College, Russellville, Marvin Baker, university graduate, has been elected dean of the college by the board of trustees.

* * *

Wedding Announced

Mr. Atonasia de Riancho, Santiago, Cuba, and Miss Amparo Perez, Cierrfuegos, Cuba, have announced their marriage, which took place on January 4, at Cincinnati, Ohio. Mr. Riancho is a junior in the college of Engineering, and has been associated with the Spanish club in its work.

The bride has been employed for some time as a Spanish correspondent in Cincinnati.

* * *

Grehan Appointed Council Chairman

The appointment of Prof. Enoch Grehan as chairman of the athletic council to succeed Dr. W. D. Funkhouser has been announced by Pres. Frank L. McVey. Professor Grehan in this capacity was

Kentucky's representative at the meeting of the Southern conference held in Atlanta, February 25 and 26.

Professor Grehan is the head of the department of journalism and has taught at the university for more than 20 years. He has served as a faculty member on the athletic council for the past several years.

Doctor Funkhouser has been Kentucky's representative for more than five years and has served as secretary of the conference. Because he is to receive his sabbatical leave beginning next September, Doctor Funkhouser resigned his position at the last meeting of the conference held in New Orleans in December.

Sam Kennedy Wins U. K. Fencing Crown

Sam Kennedy, Sigma Chi fraternity, was crowned the new fencing champion of the University of Kentucky in the Alumni gymnasium in the semi-annual tournament. More than 60 men competed in the eliminations and a large crowd watched the two and one-half hours of fencing.

The second place honors were won by Clyde Reeves, independent, while Haig and Miner, champion and runner-up respectively, last year, were out of the picture. Miner did earn a tie with Yancey for third place, but Haig was unplaced.

The women's championship was again won by Miss Dorothy Strother. She receives a pair of engraved foils for her triumph.

The prizes for the men semi-finalists were silver cups and will be awarded at a later date.

The tournament was held under the direction of the intramural department of the University of Kentucky, of which C. W. Hackensmith is the head. The fencers were members of the classes of Melvin Applebaum, of the physical education department.

Summer Sessions Will Begin June 14

The summer session of 1932, consisting of two five-week terms, will begin June 14 under the direction of Dr. Jesse Adams, head of the department of philosophy of education. Approximately 250 courses in both graduate and undergraduate work will be offered in all colleges by a faculty of nearly 150.

The first term will begin June 14 and end July 16, and the second term will begin July 18 and end August 20. Classes will begin at 7:00 a. m., and run until 12:30 p. m. The summer session bulletin for 1932 will be obtainable about the first of March.

Gamage Praised By U. K. Alumni

The University of Kentucky Alumni Club of Atlanta, on Monday, Feb. 8, voted the following resolution:

"Atlanta alumni of the University of Kentucky take this opportunity to extend to the present athletic administration at the university and to Harry Gamage, head football coach, in particular, their congratulations on four successful football seasons. Furthermore, we commend the work of Harry Gamage in bringing Kentucky football into the front rank of Southern Conference competition and for the high plane on which he has coached his teams.

We have found that Coach Gamage enjoys the respect and esteem of coaches all through the conference and is recognized as one of the best of the younger set, which includes Harry Mehre of Georgia, Chuck Collins of North Carolina, Chet Wynne of Auburn, Ted Cox of Tulane, and others.

"We commend the present athletic policy for playing as many conference teams as possible and see no point to reviving the backdoor feud with Centre College.

"Atlanta alumni are delighted to note the fine record of the basketball team and assure Coach Rupp and his boys a hearty welcome and best wishes for a championship when they come here late in February for the tournament.

"Committee:

"ED DANFORTH, Chairman,
"WARREN CLARE,
"ROBERT L. PORTER,
By ROBERT L. PORTER."

ALUMNUS IS PROMOTED

O. K. Barnes, an alumnus of the university and former member of The Kernel Staff, has taken up his duties as re-write man at the Louisville branch of the Associated Press. Barnes, who until recently was on the reportorial staff of The Lexington Herald, is a member of the Alpha Tau Omega fraternity.

Name Billiter to City Post

W. O. Billiter, 411 Garrard street, Covington, was recently named assistant city engineer to replace Earl Dodds, who probably will be detailed to special work, H. D. Palmore, city manager, announced.

This confirms a rumor that Dodds' services were to be terminated with the waterworks department where he was serving as chief engineer. The position under the salary ordinance was transferred to the Public Works department.

Palmore said he had not made any definite plans for Dodds, but he might be used in connection with the water line survey.

Billiter is a son of Simon Billiter, Covington contractor and campaign committee chairman for the Original Charter League.

Young Billiter is a graduate of the Civil Engineering College at the University of Kentucky and of Holmes High school, Covington. For the last seven years he was connected with Billiter, Miller and McClure, Covington contractors, and other firms as an engineer.

His salary will be \$2100 a year. He will begin his duties Tuesday.

Holtzclaw-Walter

The following announcement has been received:

Mrs. and Mrs. J. P. Holtzclaw, Sr., announce the marriage of their daughter, Lucille Georgia, to Mr. Richard Preston Walter, on Friday, February the nineteenth, Nineteen hundred and thirty-two, Lawrenceburg, Ky.

At home: 124 East Maxwell, Lexington, Ky.

Lee-McLean

The marriage of Miss Frances Elizabeth Lee, daughter of Mr. and Mrs. Robert E. Lee, Aylesford Place, and Mr. Allan Daubeney McLean, New York City, was quietly solemnized Thursday, February 11.

The bride is attractive and accomplished. She is a graduate of the University of Kentucky, and obtained a master's degree in English at Columbia University, New York. She is a member of Kappa Delta social fraternity, and of Phi Beta Kappa, Mortar Board, Theta Sigma Phi and Chi Delta Phi, honorary sororities. She was president of the University of Kentucky Y. W. C. A. in her senior year, and a member of the national student council of the Y. W. C. A. She has been assistant professor of English in the woman's department of Centre College.

Mr. McLean is the son of Mr. and Mrs. Charles Hart McLean, Babylon, Long Island, formerly of St. Louis. He is assistant superintendent of the American Museum of Natural History in New York City.

Sheely-Zerfoss

Mr. George E. Zerfoss, son of Mr. and Mrs. L. F. Zerfoss, Lexington, and Miss Geraldine T. Sheely, daughter of Mrs. O. N. Sheely, York, Pa., were married January 23 at Lancaster, Pa.

The ring ceremony was performed in Trinity Lutheran church, Lancaster, by the pastor, Rev. A. B. MacIntosh. The bride was attended by Mrs. William Swenson, Poughkeepsie, N. Y. Mr. Swenson was Mr. Zerfoss' best man. The bride wore an attractive afternoon

Mr. Zerfoss is a graduate of the University of Kentucky, where he was a member of Phi Delta Theta fraternity, and prominent in athletics, winning varsity letters in football, basketball, baseball, and tennis. He was president of his class in his junior year. Mr. Zerfoss is a brother of Dr. Thomas Zerfoss, Nashville, and Dr. K. P. Zerfoss, Chicago. He has an engineering position with the York Refrigeration Company.

Graduate Appointed Testing Engineer

Robert C. Terrell, University alumnus and former professor of highway engineering at the university, was appointed testing engineer for the state at a meeting of the newly-selected highway commission.

From 1908 until 1912 Mr. Terrell was professor of highway engineering at the university and from 1916 until 1920 served as professor of highway engineering at the University of Oklahoma. Since 1921, following a year's term as highway engineer for the State of Oklahoma Mr. Terrell has following his profession as a private engineer.

Mary Carolyn Terrell, a daughter, is a freshman at the university and an assistant news editor on the staff of *The Kernel*.

Miss Helen M. Shelton

Miss Helen Marguerite Shelton, 26, 527 Boonesboro avenue, died at 7:15 o'clock, Friday, February 5, at the Julius Marks sanatorium after a long illness. She was a daughter of the late Charles B. and Maude Shelton. Surviving her are three sisters, Misses Esther, Marie and Hazel Shelton, and one brother, Louis Shelton, all of Lexington.

The body was removed to the Lowe and Barber funeral home. Funeral services were held at the residence, 527 Boonesboro avenue.

Ab Kirwan Offered Manual Contract

Ab Kirwan, former Male High school athletic star, University of Kentucky luminary, and for four years assistant football coach at Male High, has been offered a contract as head coach of football at du Pont Manual, it was announced recently following a meeting of the Red Athletic Board of Control. Ray Baer, former Manual athlete and University of Michigan standout, has been offered the position of assistant mentor, it also was announced.

These two men, the board confidently believes, will give Manual the best football coaching staff the school ever has had.

Ab was recommended by Frederick Archer, superintendent of schools. His work at Male High has been far above the average. Through his endeavors, Male's Purples have conquered the cream of Kentucky's football crop and have gained more than an even break with the Reds of Manual. He is not only an excellent coach, but is a wonderful influence over boys of high school age both on and off the football field. If he accepts the contract—and Manual has the assurance that he will—Manual is to be congratulated.

Ray Baer, too, is a most capable young man, one well versed in the art of working with and guiding boys of high school age. While at Michigan he spent his summers in Louisville doing recreational work. Since his graduation he has been employed by the Recreation Division of the Department of Public Welfare, as supervisor of a playground.

Ab will succeed Neal Arnston, who came to Manual in 1921, as a graduate of Minnesota. Arnston enjoyed unprecedented success, not only in football, but in basketball and baseball as well. He was asked to resign last month, because of the poor financial condition the Red Athletic Board was in.

Kirwan resigned as assistant to Tom Johnson at Male High about the same time because of his inability to agree with Tom on all subjects concerning the art they were hired to teach. Ab and Tom parted friends, but their systems of football, as taught at their respective universities, still do not agree.

Son Born

Mr. and Mrs. Roy A. Allison, 904 East High street, are welcoming a son, Roy A., Jr., born Saturday, January 30, at their home. Mrs. Allison was formerly Miss Virginia McKinney, Fayette county.

Daughter Arrived

Announcement is made of the birth of a daughter, Mary Ann Marsden, to Mr. and Mrs. C. T. Marsden, of Nicholasville on February 7, at the Good Samaritan hospital, Lexington.

Mrs. Marsden was formerly Miss Alice Knoble, of Nicholasville.

First Anderson Medal Given To Engineer

The first F. Paul Anderson medal was presented to Willis H. Carrier, Newark N. J., by the American Society of Heating and Ventilating Engineers, at a meeting of the organization in Cleveland.

The medal, which is named in honor of Dean Anderson, was pre-

sented in recognition of Mr. Carrier's services to the work of heating, ventilating, and air conditioning. He is chairman of the board of the Carrier corporation, and is known throughout the world for his achievements in the engineering profession.

The following address was given at the "Presentation of the Medal to Willis H. Carrier."

As chairman of the committee on award of the F. Paul Anderson Medal, the very pleasant duty and honor of presenting the first medal to be awarded by this society has evolved upon the speaker.

You have been made fully conversant with the history of the medal and the conditions surrounding its award for the year 1931, through the last September issue of the *Journal of this Society*.

The medal is given by the American Society of Heating and Ventilating Engineers in recognition of work done and meritorious services performed in the field of Heating, Ventilation or Air Conditioning.

The first award of this medal is made to a fellow member whose outstanding work and achievements in all of the three mentioned fields of endeavor are so well and favorably known both in the United States and foreign countries, that it would seem almost superfluous on my part to remind you of even a few of his major accomplishments. I refer to the gentleman, Scientist and engineer, Willis H. Carrier.

No appreciation that I could express can possibly add to the esteem and veneration with which he is held by his manifold friends and associates. History records but few men of scientific attainment who have combined research, invention and a successful business career. This, he has done.

Mr. Carrier's contributions to the field of heating and ventilation began very soon after his graduation from Cornell University in 1901.

As research engineer and later as the chief engineer of a nationally known corporation, he conducted tests and published the first scientifically conceived rating tables for blast heaters. The basic method he devised remains today the standard by which all types of indirect radiation are rated.

Early in his career he developed one of the first successful methods of conveying comparatively heavy materials by means of air, and which was the forerunner of the present pneumatic system of conveying coal and ashes.

He applied his genius to the improvement in the design of ventilating fans, blowers, blast radiation and centrifugal pumps.

Mr. Carrier, although not the first to employ a spray type air washer,

was the first apparently to appreciate or realize the great possibilities of this apparatus for the purpose of humidification and dehumidification. He found no existing theory or design formula which could be employed for these purposes.

He set about to apply the principles of thermodynamics and Dalton's law of partial vapor pressures supplemented by original research, and which, ultimately resulted in the enunciation of his rational psychrometric formula.

He was first to announce and prove the new well known scientific fact that the saturation of air is an adiabatic process.

He produced the first accurate psychrometric chart and heat exchange diagram, and today the design of all air conditioning apparatus employing a liquid as the medium for humidification or dehumidification is based on the original Carrier formulae.

He invented and developed the well known dew point control now so universally employed in the control of air conditioning apparatus, and founded the corporation which bears his name.

Mr. Carrier's original paper entitled, "Rational Psychrometric Formula," presented before the American Society of Mechanical Engineers in 1911, is considered one of the clasises of that Society and has been translated into many languages.

He has been a contributor to the Transactions of this Society since 1918, as well as serving on numerous committees.

His advice and counsel concerning matters of research to the various past directors and present director of this society's research laboratory are acknowledged to have been of the utmost importance to its success. He has contributed many articles to technical journals dealing principally with air conditioning problems.

Mr. Carrier represented both the American Society of Refrigerating Engineers and this Society at the World Engineering Congress held in Japan in 1930, and at which time he read a paper entitled, "The Control of Humidity and Temperature as Applied to Manufacturing Processes and Human Comfort."

Mr. Carrier is a past president of the American Society of Refrigerating Engineers and is best known in the field of refrigerating engineering for his invention and development of the Carrier Centrifugal Compressor.

He was awarded the John Scott Medal in 1931 by the City Trusts of Philadelphia for his inventions and development of apparatus in the field of air conditioning.

KENTUCKY ALUMNUS

He was the unanimous choice of both the committee on award and the council of this Society for the F. Paul Anderson Medal.

I here state, without fear of being contradicted, that the name "Carrier" will pass down the lane of air conditioning." Truly, the result of his work has substantially contributed to the comfort, health and happiness of millions of people now living and doubtless will continue to so contribute to unborn millions through centuries to come.

Humphreys-Shropshire

The following announcements have been issued:

Mr. Llewellyn Humphreys announces the marriage of his daughter, Nell Davis, to Mr. William Wallace Shropshire, on Friday, January 29, 1932, Georgetown, Kentucky.

The bride is a graduate of Sayre College, Lexington, and of Georgetown college.

Mr. Shropshire is a graduate of the university and is a member of Alpha Tau Omega fraternity.

After a short wedding trip they will make their home in Lexington.

Paynter-Tebbs

Miss Jane Paynter and Mr. Graves Tebbs, Winchester, were married at 5:30 o'clock Friday, February 5 at the Maxwell Street Presbyterian church, by Dr. Howard M. Morgan.

The bride is a member of Chi Omega sorority and attended the university. After a short honeymoon, the couple will make their home in Winchester.

U. K. Alumni Cooperate

The University of Kentucky Alumni club of Washington has been asked to cooperate with the American Association of University Women in sponsoring a college day in Washington, D. C. Mr. Elmer D. Hayes, president of the club, has asked Dean Sarah Blanding to send pamphlets and other news of the university in planning the program. All of these are publications of the planning the program.

Dean Blanding will send the following: "Going to College;" "Our University of Kentucky;" "Radio Programs;" "Radio Talks on Parental Education;" and "ABC Bulletin, Facts About the University." All of these are publication of the university.

Former Student Shot to Death

William McClure Miller, 25 years old, former university student, died Monday afternoon, February 20, at the Fort Sam Houston hospital, San Antonio, Texas, Cadet Miller was found unconscious, lying in his automobile, with a bullet wound in

his left temple. A gun was found by his side.

"Billy" Miller, as he was known on the campus, was registered in the College of Engineering and was a member of Kappa Alpha fraternity. He left the university the spring semester of 1929, and later went to San Antonio, Texas, where he entered the flying service at Kelly field. He was to have graduated Wednesday but was held over until the next class to complete his training, delayed because of an ear infection. He is the son of the late Dr. W. M. Miller, Millersburg, and a graduate of Millersburg Military Institute.

The theory that Miller committed suicide has been abandoned and the police are seeking a man who is said to have been seen running from the place where the cadet was found.

The cadet's mother, Mrs. W. M. Miller, a teacher at the University of Maryland, arrived at the home of Major and Mrs. Baffington, Muir Station near Lexington. A brother, Hart Miller, left Sunday morning for San Antonio, and accompanied the body back to Kentucky. Before leaving Texas a military funeral service was held. Regular funeral services were held at the home of Major Baffington. Burial was in the Millersburg cemetery.

Dinner for Legislators

Dr. and Mrs. Frank L. McVey were dinner hosts January 20, 1932, at Maxwell Place, entertaining for members of the Kentucky general assembly, who are alumni or former students of the University of Kentucky.

The centerpiece was a large silver bowl of yellow calendula. Silver candelabra held ivory tapers.

The guest list included Lieut. Gov. A. B. Chandler, Senators Arch L. Hamilton, M. N. Flippin, John Holloway, Silas Jacobs, Ray B. Moss, E. S. Moore, M. F. Pogue, O. M. Rogers, E. D. Stephenson; Messrs. John Y. Brown, speaker of the house; Leer H. Buckley, James W. Chapman, Tyler Munford, Denny P. Smith, Marshall Barnes, Joseph P. Bosworth.

Publication of the ALUMNUS was delayed because of the Southern Conference Basketball tournament. We wished to give our readers the latest Kentucky scores.

The latest Alumni Club news will be given in detail in the next issue of the ALUMNUS.

Campus News

65 Get Degrees During Mid-Year Commencement

Sixty-five students were awarded degrees at the annual mid-year commencement exercises held January 29, in Memorial hall. Dr. James Thomas Cotton Noe, College of Education, delivered the commencement address on the subject, "Your Alma Mater."

Rufus Lisle, candidate for the degree of Bachelor of Laws, was graduated "with distinction." This honor is given only to graduates who have attained a standing between 2.4 and 2.6 and have attended the university for at least three years.

The academic procession began the exercises. It was led by Major Owen R. Meredith, marshal of the day, and the assistant marshals, O. B. Kazanjian, S. M. Harper, B. C. LeRoy, L. M. Mahan, S. E. Milliken, H. V. Smith, P. H. Woods, and C. R. Yeager, R. O. T. C. cadets. The president of the university and the speaker of the day were next in the order of the march. They were followed by the chairman of the board of trustees, the trustees and official guests, the deans of the colleges, the alumni, the candidates for the advanced degrees, and the candidates for the bachelor degrees.

Pres. Frank L. McVey presided over the commencement. Dr. R. H. Daugherty, pastor of the First Methodist church, pronounced the invocation and benediction. Dr. McVey awarded the degrees and administered the class oath. Mrs. William Hansen, Lexington, sang a solo.

Following the exercises, President and Mrs. McVey were hosts to the graduates, alumni, and friends at a tea given at their home, Maxwell Place.

A banquet was prepared in honor of the graduates by the university Alumni association at the University Commons. John Y. Brown, '26, speaker of the Kentucky house of representatives, was the principal speaker, and Leon K. Frankel, '00, presided as toastmaster.

Baccalaureate services for the graduates were held Sunday, January 24, in Memorial hall by the Rev. Homer Carpenter, First Methodist church, Louisville. His subject was, "A Mind to Match the Age."

One doctor's, eleven master's, and fifty-three bachelor's degrees were conferred upon the graduates at the commencement exercises. The list of graduates and their degrees are:

College of Arts and Sciences

Degrees of Bachelor of Arts: Margaret Louise Alexander, Mary Susan Armstrong, Nannie Louise Best, Malinda Owsley Bush, Richard Coleman Carr, Milton James Cavana, Ellen Langino Goode, Fred Morgan Foss, Sarah Lillian Jones, Robert Joseph Kee, Alvin McGary, Pearl Louise McIntyre, Kermit Allen Pack, Mabel Aleene Palmore, Rosena Catherine Rogers, Lizzie Mary Shipley, Thomas Lee Smith, Charles Thomas Stewart, Mary Frances Young.

Degree of Bachelor of Science: William Paul Haller, Claude Lynn Nesbitt, Travis Bun Pugh, Jr.

College of Agriculture

Degree of Bachelor of Science in Agriculture: Noble Everette Bailey. Degree of Bachelor of Science in Home Economics: Martha Juanita Chapman, Julia Ann Dugan, Mary Hood Gillaspie, Eudena Hamby, Sarah Jane Wheeler.

College of Law

Degree of Bachelor of Laws: Oliver Lander Bright, William Napier Dixon, Martin Richardson Glenn, Harry Ligon Green, Rufus Lisle.

College of Education

Degree of Bachelor of Arts in Education: Vivian Mae Burke, Lucille Finneran, Frances Cunningham Herndon, Adelia Williamson Jackson, Sallie Joe Bodkin Lawrence, Jane Lyle Rhorer, Katherine Robert Shivell, Soris Dee Smith, Benjamin Stark, Kathryn Elinor Watson, Helen Dorothy Weber, Madalyn Ruth White, George Wallace Whitlow.

College of Commerce

Degree of Bachelor of Science in Commerce: Elden Edwin DuRand, Jr., Wilbert Wesley Holtzclaw, Philip Michael Minor, Corinne Cassell Moore, Douglas Druin Nunn, Glenn Frederick Weinman.

Graduate School

Degree of Master of Arts: English, Sam Jackson Denney; Education, Albert Robinson Evans, Thomas Neville Warwick Finsel, Hallie Katterjohn Griffin; English, Cora Katherine Megibben; Education, Clarence Nichell; Political Science, Pemberton Johnson Ross, Jr.

Degree of Master of Science: Agricultural Economics, Thompson Ripley Bryant.

Degree of Civil Engineer: Elgan Brooks Farris.

Degree of Mechanical Engineer: Robert W. Spicer, Ernest Allen Welch.

Degree of Doctor of Philosophy: Education, Oscar Fitzgerald Galloway.

Sulzer Is Appointed

Elmer G. Sulzer, director of the university band, has been made a member of the NBC education committee by Judith C. Waller, assistant Association of the NBC radio station, WMAQ, Chicago. The National Association of Broadcasters has changed the set-up of its various committees, and education has been put under the program section. Miss Waller, who is the discoverer of Amos and Andy, famous fun-makers of the air, has been appointed chairman of the committee on which she has asked Mr. Sulzer to serve.

Military Fraternity Gives Loan Fund \$50.

The University of Kentucky student loan fund, which has been depleted by an unusually large number of demands during the present college year, was presented \$50 by the University chapter of Scabbard and Blade, national honorary military fraternity. Alpha Gamma Delta sorority distributed 2,000 mite boxes in an endeavor to procure money for the loan fund and other organizations have indicated they would aid the fund.

* * *

Faculty, Coaches Continue To Squabble After Game

Although the "Battle of the Ages" was supposed to have been over Tuesday night, February 23 after the colossal contest staged in the Euclid Avenue gymnasium between the faculty and coaches, this battle seems to be still raging, for both sides claim victory.

Even though the score board at the end of the game showed 20 to 16 in favor of the coaches, the faculty still claim victory—and more than a moral victory at that. They say that the new rules passed by the Kentucky Fish and Game Commission just before the contest specified that long shots would count four points instead of two. Accordingly the faculty won 16 to 20. However, this doesn't agree in any sense with the feelings of the coaches. They say that they won and can do it again; so this may lead to a new battle.

R. D. McIntyre decisively defeated Henri Beaumont in the peanut-selling contest by the enormous margin of one-hundred and six cents (\$1.06). The McIntyre club sold \$23.09 worth of peanuts, and the Beaumont team sold peanuts to the extent of \$22.03. In all, 500

pounds of peanuts were sold with a total profit of \$32.82.

Sixteen hundred people, men, women, children, etc., paid their two bits to see the event. This served to bolster the deflated Student Loan fund to the extent of \$435.25.

Manager Paul K. Walp played every member of the Faculty Players, Wrecking Crew, and Auxiliaries, and the continued substitutions served to muddle the coaches. The Daffodils and Butterflies (personnel of the Auxiliary) staged a preliminary exhibition of some sort. We don't know whether to call it a basketball game or a spring gambol. The uniforms and actions certainly reminded us of a spring frolic. Either the Butterflies or the Daffodils won 8 to 0. We never did know which was which, but they didn't either; so why worry?

The officiating at this event, accomplished by Miss "Margie" McLaughlin, Mrs. "Baldy" Gilb, and Miss Rebecca Averill, was extremely cunctatory, as well as slightly exasperating. Miss "Margie" had unparalleled ability to hit the rafter of the gym on the toss-up at center. Mrs. Gilb and Miss Averill showed remarkable ability in staying out of the way of the contestants, but that was about all. The principal game was a cross between basketball, football, and soccer.

There was loud and hilarious cheering when the coaches, headed by their 120 piece band, marched upon the floor. Where Shively and "Skipper" Mann found their red and green underwear is still a subject of discussion. The combination of football and basketball formations exhibited by these worthies before the game was put to good use during the contest.

The faculty band, small in comparison with the mammoth musical coaches, showed to great advantage in playing "On, On, U. of K." They made everybody stand up no less than a dozen times. The crowd had decided that that was all they could play, when they suddenly burst into "The Old Gray Mare Ain't What She Used to Be." We believe that this was a very appropriate number. The formations at the half were uncanny, to say the least. M. Applebaum showed that he is a close rival of Elizabeth Jones for the band sponsorship. His beauty (or her beauty) was indescribable.

Prof. L. L. Dantzer made an excellent majordomo, and made a big hit when he presented the "Garbage" Trophy to Miss "Margie" for giving the most A's to flunking athletes.

The photographer who rushed madly about with a 2" by 4" camera should have some excellent pictures to say the least.

Faculty Increases Donation to Chest

Almost a 100 per cent contribution by the administrative staff and faculty of the university was shown in a final report of the campus community chest drive issued from the office of Pres. F. L. McVey. The total amount given by that group was \$4,494.69.

This amount exceeds by \$1,930.64 the amount donated by university staff members in 1930. The number of pledges received this year also outnumbers those of last year.

"The way in which the faculty and staff responded was remarkable, and I appreciate the interest shown in that respect," said Dean W. S. Taylor, College of Education, who was in charge of the drive on the campus.

Net Game Adds \$420 To U. K. Loan Money

The University of Kentucky student loan fund will receive \$420.81 as a result of the benefit basketball game at the men's gymnasium Tuesday night between teams representing the faculty and the athletic coaches. This amount was derived from sale of admission tickets and peanuts, according to Miss Marguerite McLaughlin, who was in charge of ticket sales.

A total of \$387.99 was received from ticket sales, and the net proceeds from sale of peanuts were \$32.82.

Prof. R. D. McIntyre and his assistants won a peanut-selling contest in which Dr. Henry Beaumont, and his aides were their opponents. Prior to the game, Professor McIntyre, of the College of Commerce, had announced that his salesmanship would result in more peanut sales than the psychology employed by Doctor Beaumont, of the psychology department. Professor McIntyre's crew sold \$23.23 worth of peanuts and the sales of Doctor Beaumont and his assistants totaled \$22.09. Professor McIntyre, however, had four helpers, while Doctor Beaumont had three.

The student loan fund also has received a gift of \$100 from the Lexington Alumni club. This donation was presented to the fund several days ago but was not announced until today.

Lexington Girl Is U. K. Beauty

Selection of Miss Margaret McAlister, daughter of Mr. and Mrs. George McAlister, 1711 Fairway drive, as the winner of the annual University of Kentucky beauty contest was announced by Frank Stone and James Lyne, editors of the Kentuckian, student yearbook which conducted the contest.

Miss McAlister, a sophomore and a member of the Kappa Kappa Gamma sorority, was chosen by George White, nationally famous showman, from a group of 43 contestants. The contest was judged from photographs sent to the judge in December.

Seven other University of Kentucky co-eds were chosen as alternates to Miss McAlister. They were Misses Floy Bowling, Lexington, member of the Delta Delta Delta sorority; Virginia Young, Lexington, Kappa Delta; Jane Shelby, Danville, Kappa Kappa Gamma; Carleen Grant, Winchester, Chi Omega; Marjorie Weaver, Louisville, Kappa Delta; Sylvia Zimmerman, Ft. Thomas, Alpha Gamma Delta, and Eugenie Beck, Louisville, Delta Delta Delta.

In his letter announcing his decision, Mr. White said that he had judged the entries with extreme care and that Miss McAlister was chosen because she had "the greatest beauty from the standpoint of finely chiselled features and personality."

"She shows soul and depth of feeling and has a wealth of beautiful hair and a pair of fine, penetrating eyes," he commented.

Photographs of Miss McAlister and her eight alternates will be reproduced in the 1932 Kentuckian.

McVey Named Officer Of College Society

Dr. Irving Maurer, Beloit, Wis. was elected president of the Association of American Association of American Colleges. He succeeds Dr. Ernest H. Wilkins, president of Oberlin College.

Dr. Frank L. McVey, Lexington president of the University of Kentucky, was selected vice-president.

Employment Sought for U. of K. Co-Eds

Part-time employment for women students at the University of Kentucky is being sought by Miss Sarah Blanding, dean of women. Miss Blanding announced that many women students would be unable to continue their work at the University if they were unable to find some part-time employment to assist them.

The dean of women asked residents of Lexington knowing of any part-time positions which women students could fill to call her office at the University. Work now being done by women students includes typing, tutoring, clerking, reading, taking care of children, doing work about the house and other similar tasks.

Sports

U. K. Will Hold Coaching School

After two years discontinuance, the University of Kentucky coaching school will be resumed next summer, it was announced by Coach Harry Gamage, who will conduct the six-day course. The school will be held June 13 - 18, inclusive, and Coach Gamage will be assisted by other members of the football staff.

Registration fees were charged at the other three coaching schools held by Gamage, but the 1932 school will be free to those wishing to attend. The Kentucky mentor said the tuition charge was abolished because so many coaches will suffer a cut in salary as a result of the financial depression.

Two sessions will be held daily. Lectures will be given during the morning period and practical work will be carried on in the afternoon. A number of University athletics will assist with the demonstration work.

* * *

U. K. Council Renews Pribble's Contract

The University of Kentucky athletic council renewed its contract with Freshman Football Coach Birkett Lee Pribble for a two-year period, and deferred action on the 1932 Wildcat baseball team.

The final scores for the games played so far this year are as follows:

Kentucky 66, Georgetown 24.
Kentucky 36, Carnegie Tech 34.
Kentucky 52, Berea 27.
Kentucky 46, Marshall 16.
Kentucky 43, Clemson 24.
Kentucky 30, Clemson 17.
Kentucky 30, Sewanee 20.
Kentucky 29, Tennessee 28.
Kentucky 51, Chattanooga 17.
Kentucky 48, W. & L. 28.
Kentucky 61, Vanderbilt 37.
Kentucky 37, Duke 30.
Kentucky 50, Alabama 22.
Kentucky 41, Tennessee 27.
Kentucky 31, Vanderbilt 32.

* * *

U. K. Workers Are Notified of Salary Cut

A reduction of from five to 10 per cent in the salaries of all University employes, effective immediately and for the remainder of the year, was announced by Dr. Frank L. McVey, president of the University. Salaries of \$1,300 or less will be reduced five per cent and salaries of more than \$1,300 will be reduced 10 per cent.

The following statement was sent by Dr. McVey to all University employes:

Since October the income of the University from tax sources has declined steadily until now the University income is \$220,000 below estimated and budgeted receipts. Consequently it is necessary not only to cut operating expenses, but also to reduce salaries for the remainder of the year beginning with the payroll for February. The executive committee has decided on a five-per-cent cut on salaries of wages of \$1,300 or less, and 10 per cent on payments above that.

I trust all will acquiesce in this action which is taken under great necessity and after careful consideration of the best interests of the University and staff.

Dr. McVey said the reduction was made necessary by a decline in the University's income this year and was not instituted because of the proposal of the legislature to reduce the budget. A decline in collection of real estate and inheritance taxes during the past year was the cause of the salary-reduction move, he said.

University officials had figured on a lower income, but the actual income was far below the estimate. Dr. McVey said he did not know whether there would be further decline in the University's income between now and the end of the fiscal year, July 1.

No announcement was made regarding what steps would be necessary if the University's income were reduced further by a cut in the state budget.

Dr. McVey declined to state how much would be saved by the University as a result of the salary cuts. He said, however, that all members of the faculty and everyone employed by the University in any capacity would receive the cut.

The University of Kentucky Directory of Faculty, published by the University registrar's office in December, 1931, listed 549 officers of administration, instruction, Experiment Station and clerical staff employed at the University. This number does not include members of the staff on leave of absence or non-resident attaches of the Experiment Station.

Council Votes to Discontinue Baseball Team

The Athletic council decided that Kentucky would not participate in intercollegiate baseball this year.

One of the main reasons given for the discontinuance of baseball this year was that most of the other colleges and universities which Kentucky plays, have announced that they will not have teams this spring and this would have made it exceedingly difficult to get a full schedule with the usual number of games. After the decision by the council not to have baseball, several of the schools Kentucky generally plays, were notified so that they might make out their schedules without including the university.

Members of the athletic council are: Louis Hillenmeyer, Dean W. D. Funkhouser, John Stoll, Prof. Enoch Grehan, E. A. Bureau, Prof. M. E. Ligon, Ed Ackerman, and student representatives, Ellis Johnson and E. L. Asher.

Sale is Second High Scorer in Conference

ATLANTA—The Southern Conference high scoring basketball crown for 1932 goes to a sophomore, Harris Samuels, Louisiana State University forward.

He has amassed 130 points in 16 games, an average of better than eight points per contest. His season's total, however, is 18 points shy of the all-time record of 148 points made last year by Bill Perkins, Georgia Tech center, and one point behind the mark made in 1930 by Cox, forward, and Williams, center of Washington and Lee.

Forrest Sale, playing his first season as regular center for Kentucky, comes next with 126 points, while Jack Torrance, who also is a sophomore at Louisiana State, has 125. He alternates between center and forward.

Text Book Written By U. K. Professors

"An Introduction to Education and the Teaching Process," a 600-page book by Dr. Jesse E. Adams and Dean W. S. Taylor, of the College of Education, University of Kentucky, has been published by a New York publishing house and the first copy to reach Lexington has been received by Dr. Adams.

Dr. Adams also is author of a speller and a spelling tablet. The speller has been adopted by the state education departments of Kentucky, Tennessee and Florida.

Club News

The following news letter has been received from Bob Mitchell, ex-'21, who is now living in Louisville and is a member of the Louisville Alumni Club:

The Louisville Club has not had a 1932 meeting, but it will likely hold a gathering early this month and elect officers for the present year. Down here we carry our year from January to January instead of observing the collegiate year, as we did on the Campus.

As affairs are now operated, an Executive Committee controls. Effective as of our last meeting the evening of October 30, 1931, by-monthly gatherings will be the future plan. The Executive Committee, as appointed by Ben Garr King, president, at the October meeting is composed of: Chairman Ben J. Collings, Earle Graf Grabfelder, J. M. Robinson and Ben Garr, who by virtue of his office as president of the local club.

Merrill Dowden and Mrs. Dowden of Louisville, have been mighty busy since January 15, 1932, playing host and hostess to a "youngster" in their home in the Greenbrier apartments at 1604 Stevens avenue.

This young son, Donald Smith Dowden, selected for his daddy a young man who was quite active at the university. A graduate with the class of '26, College of Arts and Science with Journalism for his major, Merrill Dowden was quite active in Track with distance runs as his hobby. Six nights of the week you will find him in the news rooms of the Courier-Journal and the Louisville Times at Third and Liberty streets, Louisville.

Mrs. Dowden formerly was Miss Regina Popham, of Louisville.

Mr. and Mrs. Herndon Evans (she formerly was Mary Elizabeth Downing of Louisville) of Pineville, attended the meeting of Kentucky Press Association at the Brown hotel January 22 and 23. Evans, editor of the Pineville Sun, was on the program of the Louisville Board of Trade banquet Friday evening with "In Defense of the Kentucky Mountains," in which he set forth the wonderful beauty of Harlan and Bell counties.

Those days in which they were on the campus were colorful days of wonderful student activity and they will be specially remembered for their outstanding work in student dramatics. Mary Elizabeth was, in the memory of the writer, the first to enjoy the distinction of a Freshman earning the role of leading lady in a Stroller production and occupied the star's dressing room in the old Opera House, Lexington, when Strollers presented "The Climbers," 1920 production. Again, she went to the star's dressing room in the same old Opera House the next year as Lady Mary in Stroller offering of "Admirable Crichton." Evans was Stage Manager upon both the above mentioned offerings and, in addition, was one of the producers of "Robin Hood" and "The Mikado," productions of the Music department in 1921-'22, respectively, under direction of "Old Prof." Lampert.

Hoping that this news will be of interest and use to you, I am,

Yours for Kentucky,
BOB MITCHELL

Vaughn Dabney, a student at the University of Kentucky in 1904 and 1905 and formerly of Paducah, Ky., was a visitor at the office of Bart Peak, secretary of the University Y. M. C. A., recently. Mr. Dabney is now dean at Andover-Newton Theological School, at Newton Center, Mass, near Boston.

TOTAL OF 8,000 HEAR CADMAN

Dr. S. Parkes Cadman, noted clergyman, who concluded his series of local addresses February 18 at Memorial hall, was heard by approximately 8,000 persons during the three-day stay in Lexington. Approximately 1,600 persons were present for his address Thursday night and hundreds were turned away. Memorial hall was filled 40 minutes before Dr. Cadman was scheduled to begin his address.

His addresses were the features of religious-emphasis week at the University of Kentucky. He appeared, under the auspices of the University of Kentucky and the University Y. W. C. A. and Y. M. C. A.

Dr. Cadman, previously known to thousands of Lexingtonians through "Everyday Questions," his daily contribution to The Lexington Leader, and through his radio addresses, attracted far more interest than any other theologian recently visiting this city.

Thursday night he reviewed the history of the foundation of the United States, declaring that each state was built on spiritual and religious foundations. "The principles of religion, not politics and commerce, were uppermost in the minds of those who settled this country," he said. The great leaders of the early history of the United States were spiritually-minded men. "Where are our great leaders today?" he asked. "All we are owe to our ancestors and we must get back to the spiritual foundation of the great leaders of the past if we are to lift the world from its troubles."

Dr. Cadman's address Thursday night marked the closing of the first state ministers' conference at the university and many ministers were on the stage at the final meeting. The conference, an event for representatives of all denominations, was called a success by those attending. Many ministers requested that such a conference be held annually.

The Lexington Ministerial Association cooperated with the University Y. M. C. A. and Y. W. C. A. in presenting the conference. Dr. R. H. Daugherty, Dr. H. H. Pitzer and Rev. Harry J. Berry composed a committee representing the association in making arrangements for the meeting.

The religious-emphasis-week program was described as the best ever offered at the university. It was in charge of Bart Peak, secretary of the University Y. M. C. A., and Miss Augusta Roberts, secretary of the Y. W. C. A.

U. K. Radio Program

Wednesday, March 2: 12:45 to 1 p. m.—Agricultural program; 1:00 to 1:15 p. m.—Mountain Melodies; 1:15 to 1:30 p. m.—Margaret King, librarian; subject, "Monthly Book Reviews."

Thursday, March 3: 12:45 to 1:00 p. m.—Agricultural program; 1:00 to 1:15 p. m.—The Blue and White orchestra; 1:15 to 1:30 p. m.—Parental Education, No. 7; Dr. James B. Miner, head of the department of Psychology; subject, "Choosing a Vocation."

Friday, March 4: 12:45 to 1:00 p. m.—L. C. Brewer, College of Agriculture; subject, "What Farm Folks Are Asking"; 1:00 to 1:15 p. m.—The Phi Beta Musicale; 1:15 to 1:30 p. m.—Reid P. Meacham, assistant professor of Geology; subject, "Witchcraft in Geology, No. 1."

Monday, March 7: 12:45 to 1:00 p. m.—Agricultural program; 1:00 to 1:15 p. m.; Fine Arts Program; 1:15 to 1:30 p. m.—Profs. R. S. Allen and T. C. Sherwood; presenting, "The University Question Box."

Tuesday, March 8: 12:45 to 1:00 p. m.—Agricultural program; 1:00 to 1:15 p. m.—The Blue and White orchestra; 1:15 to 1:30 p. m.—Lloyd B. Averett, instructor in Economics; subject, "Popular Talks on Insurance, No. 4; The Beneficiary."

Wednesday, March 9: 12:45 to 1:00 p. m.—Agricultural program; 1:00 to 1:15 p. m.—Mountain Melodies; 1:15 to 1:30 p. m.—Dr. H. H. Downing, professor of Astronomy; subject, "Popular Astronomy, No. 5."

Thursday, March 10: 12:45 to 1:00 p. m.—Agricultural program; 1:00 to 1:15 p. m.—The Blue and White orchestra; 1:15 to 1:30 p. m.—Parental Education, No. 8; Hon. James Richmond, State Superintendent of Schools; subject, "Newer Tendencies in State School Administration."

Friday, March 11: 12:45 to 1:00 p. m.—L. C. Brewer, College of Agriculture; subject, "What Farm Folks Are Asking"; 1:00 to 1:15 p. m.—The Phi Beta Musicale; 1:15 to 1:30 p. m.—Reid P. Meacham, assistant professor of Geology; subject, "Witchcraft in Geology, No. 2."

Monday, March 14: 12:45 to 1:00 p. m.—Agricultural program; 1:00 to 1:15 p. m.—Fine Arts Program; 1:15 to 1:30 p. m.—Profs. R. S. Allen and T. C. Sherwood; presenting, "The University Question Box."

Tuesday, March 15: 12:45 to 1:00 p. m.—Agricultural program; 1:00 to 1:15 p. m.—The Blue and White orchestra; 1:15 to 1:30 p. m.—Dr. E. Z. Palmer, associate professor of Economics; subject, "The Current Business situation"

Wednesday, March 16: 12:45 to 1:00 p. m.—Agricultural program; 1:00 to 1:15 p. m.—Mountain melodies; 1:15 to 1:30 p. m.—Dr. Frank L. McVey, president of the University of Kentucky; subject, "World Events."

Thursday, March 17: 12:45 to 1:00 p. m.—Agricultural program; 1:00 to 1:15 p. m.—The Blue and White orchestra; 1:15 to 1:30 p. m.—Parental Education, No. 9; Dr. R. E. Jagers State Department of Education; subject, "Newer Tendencies in Rural School Organization."

Friday, March 18: 12:45 to 1:00 p. m.—L. C. Brewer, College of Agriculture; subject, "What Farm Folk Are Asking"; 1:00 to 1:15 p. m.—The Phi Beta Musicale; 1:15 to 1:30 p. m.—L. L. Dantzer, head of the English Department; subject, "The Gallery of Literary Portraits, No. 1."

Monday, March 21: 12:45 to 1:00 p. m.—Agricultural program; 1:00 to 1:15 p. m.—Fine Arts Program; 1:15 to 1:30 p. m.—Profs. R. S. Allen and T. C. Sherwood; presenting, "The University Question Box"

Tuesday, March 22: 12:45 to 1:00 p. m.—Agricultural program; 1:00 to 1:15 p. m.—The Blue and White orchestra; 1:15 to 1:30 p. m.—Rodman Sullivan, assistant professor of Economics; subject, "The Stock Market, No. 1—Stocks and Bonds."

Wednesday, March 23: 12:45 to 1:00 p. m.—Agricultural program; 1:00 to 1:15 p. m.—Mountain Melodies; 1:15 to 1:30 p. m.—Dr. H. H. Downing, professor of Astronomy; subject, "Popular Astronomy, No. 6."

Thursday, March 24: 12:45 to 1:00 p. m.—Agricultural program; 1:00 to 1:15 p. m.—The Blue and White orchestra; 1:15 to 1:30 p. m.—Parental Education, No. 10; J. W. Ireland, superintendent, Frankfort City Schools; subject, "Juvenile Protection."

Friday, March 25: 12:45 to 1:00 p. m.—L. C. Brewer, College of Agriculture; subject, "What Farm Folks Are Asking"; 1:00 to 1:15 p. m.—The Phi Beta Musicale; 1:15 to 1:30 p. m.—L. L. Dantzer, head of the English Department; subject, "The Gallery of Literary Portraits, No. 2."

Monday, March 28: 12:45 to 1:00 p. m.—Agricultural program; 1:00 to 1:15 p. m.—Fines Arts Program; 1:15 to 1:30 p. m.—Profs. R. S. Allen and T. C. Sherwood; presenting, "The University Question Box."

Tuesday, March 29: 12:45 to 1:00 p. m.—Agricultural program; 1:00 to 1:15 p. m.—The Blue and White orchestra; 1:15 to 1:30 p. m.—Rodman Sullivan, assistant professor of Eco-

nomics; subject, "The Stock Market, No. 2—The Rise of the Stock Market."

Wednesday, March 30: 12:45 to 1:00 p. m.—Agricultural program; 1:00 to 1:15 p. m.—Mountain Melodies.

WILDCAT BASKETEERS

(Continued from Page 6)

wasn't the same Wildcats that smacked the Commodores, 61 to 37 at Nashville who lost to the Commodores at Lexington. The team was a bunch of dazed and sick basketball players, who fought almost to victory, only to see a last half-minute goal give the Commodores a 32 to 31 victory.

It was a glorious night for the Commodores and they fought as only an inspired team can fight.

Every effort was then turned to getting the Wildcats in condition for the tournament at Atlanta. Still off form, the 'Cats went to Atlanta, trounced Tulane 50 to 30 in the opening round and then lost a heart-breaker to North Carolina, 43 to 42, in the quarter finals. The Tarheels won on a long goal, fired in the last few seconds as the 'Cats led, 42-41.

Looking ahead already, the 'Cats will meet Coach Rupp for a brief session of spring practice in April. Then the undefeated freshmen will be initiated into the varsity ranks by the veterans.

On the way back to Lexington, Coach Rupp announced the winners of the radios, offered to players who played best in the Alabama and Tennessee games.

Darrell Darby won the prize for the Alabama game and Ellis Johnson was given the award for playing the best game against Tennessee.

TOTAL OF 3,022 STUDENTS ENROLL FOR SEMESTER

Final registration figures for the second semester were announced by Professor Ezra Gillis, registrar of the university. A total of 3,022 students have registered for the second semester, it was announced. Of this total 406 are students who were not in the university last semester, Professor Gillis said.

A decrease of 208 from the first semester was noted in the comparison of the figures of the two semesters. The present total of 3,022 is 80 less than the enrollment made last February.

Enrollment figures for first semester freshmen were not available, but approximately 100 have matriculated in the university for the first time, Dean C. R. Melcher announced. The freshmen were under the direction of Dean Melcher, who directs the orientation of all new students.
