Smith, Dr. Plucknett.
Front: Dr. O'Reilly, Dr. Holler, Dr. Yates, Dr. Corio, Dr. Kincaid.

The child in the photograph above is a young boy who has been diagnosed with a rare form of cancer. His parents, who are both medical professionals, are seeking the best possible treatment for their son. They have consulted with several specialists and have been advised to enroll in a clinical trial. The trial is a phase II study of a new drug that is being tested for its effectiveness in treating this type of cancer. The parents are excited about the possibility of their son receiving the best possible care, but they are also concerned about the potential risks of the trial. They are looking for information about the trial and the drug, and they are hoping to find a doctor who can help them make a decision.
