Mr. R. E. Galbreath  
Supt. Wisconsin Steel Co., Inc.  
Benham, Kentucky

Dear Sir:

It is possible for us to take in ten cars of coal per day at the Steel Works provided they are flat bottom gondola cars and not more than ten cars are received in a day at the Steel Works. Coal in these cars would be unloaded with our bridge grabs and carried up on the dock storage.

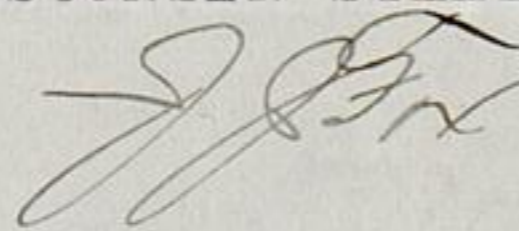

We have discussed the possibility of obtaining this class of equipment with the Traffic Department, and they have requested that we ask you to put in an order with your local L & N agent ordering ten flat bottom gondola cars for shipment to the Steel Works.

These flat bottom cars are to be used only in the shipment of "C" seam coal, and the tonnage shipped in them will be in excess of your present shipping order.

We request that you advise us if you are unable to obtain the flat bottom gondola equipment.

Yours very truly

WISCONSIN STEEL COMPANY
