TO THE BOARD OF DIRECTORS
OF THE ROBERTS BROTHERS COMPANY
CHICAGO, ILL.
FROM THE BOARD OF DIRECTORS
OF THE ROBERTS BROTHERS COMPANY
CHICAGO, ILL.

We believe all questions have now been settled in connection with the construction of Railroad Tracks required for our new mine at Benham, Ky. and you may consider this confirming order for you to do the following work.

You are to do all of the grading, concrete work, track-laying, ballasting and such other work as we direct and to furnish such material as we direct in connection with this project on the basis of actual cost of work plus 10%.

This percentage will apply upon the labor and general expense in connection with the work as well as any material that may be purchased in connection with same, but does not apply to track material or steel girders, which we are to furnish.

You agree to furnish a competent Superintendent to take direct charge of this work - also a competent clerk to take charge of the accounts - the cost of same including traveling expenses, also traveling expenses of members of your firm to be considered as part of the cost of the work, but no salary is to be paid to any member of your firm, nor is any proportion of your general office expense to be charged to this work.

It is understood that rental of any equipment other than small tools, etc. will be charged at the following net rates:

- 1 Steam Shovel - - \$600.00 per month.
- 2 Dinky Engines- - 165.00 " " each
- Cars - - 12.00 each per month, we understand 16 to 20 will be required.
- Concrete Mixer - 125.00 per month - we understand it may be more economical for you to buy this mixer and then sell it when the job is finished, rather than pay straight rental, in which event you will do so.
