

June 29th. 1935

Mr. William Sampson,
Harlan, Kentucky.

Dear Mr. Sampson:

The attached is a copy of some changes we wish to make in our Safety Rules governing miners and other employes at Benham. Before sending these to the State Department of Mines and Minerals, for approval, we thought it advisable to have you read them over with the idea of making any suggestions you might have from a legal standpoint.

A copy of the old rule book (1928 Edition), which is being revised, is enclosed. You will note we have used a red pencil to cross-out all existing rules that are to be changed.

Very truly yours,

WISCONSIN STEEL COMPANY, Inc.
R.E. Galbreath - Superintendent.
