

The University Faculty met in the Assembly Room of Lafferty Hall, Monday, February 16, at 4:00 p.m. In the absence of President Donovan, Vice President Leo M. Chamberlain presided. Members absent were H. P. Adams, C. A. Anderson, Adolph Bigge, E. G. Davis, H. H. Downing, J. P. Hammond, H. W. Hargreaves, John Kuiper*, L. E. Meece, J. W. Miles, Frank D. Peterson, D. M. Seath, Elvis J. Stahr, Jr., and Frank J. Welch.

The minutes of January 12, 1953 were read and approved.

Dean White presented recommendations from the College of Arts and Sciences concerning new courses and changes in courses which were approved by the University Faculty as follows:

I. ADD THE FOLLOWING COURSES:

Philosophy 160 Philosophy of Science. (3)

An examination of the logical and epistemological foundations of empirical science, including such topics as the unity and diversity of the sciences, methodology, theory and explanation, and current studies in the language of science.

Library Science 187 Non-Book Materials. (3)

Selection, organization, and use of non-book materials in various types of libraries.

Physical Education 85 Jumping (Horseback). (1)

Practice in jumping over different obstacles for show and hunting. Prerequisite P. E. 1-16 or consent of instructor. Two hours per week laboratory.

Physical Education 87 Intermediate Dressage. (1)

The techniques of training a horse for dressage in position and utmost collection. Prerequisite P. E. 86 or consent of instructor. Two hours laboratory.

Physical Education 184 Advanced Dressage. (2)

Advanced techniques in equestrian dressage leading up to the fundamentals of high school riding. Prerequisite P. E. 87. One hour lecture, two hours laboratory.

II. CHANGE IN TITLES OF THE FOLLOWING COURSES: (No change in credits or content.)

Library Science 121 from Introduction to Library Work to Libraries and Librarianship

MFL 191a, b from Tutorial Seminar to

Tutorial Seminar for Majors in the Romance Languages

MFL 21b from Simple Reading and Pronunciation to

Simple German Reading and Pronunciation

MFL 22a from Translation and Rapid Reading to

German Translation and Rapid Reading

MFL 22b from Translation and Rapid Reading to

German Translation and Rapid Reading

MFL 27a, b from Elementary Conversation and Composition to

Elementary German Conversation and Composition

* Absence explained

MFL 131a, b from Junior Tutorial to Junior Tutorial for German Majors
MFL 132a, b from Senior Tutorial to Senior Tutorial for German Majors
MFL 222a, b from 20th Century Literature to 20th Century German Literature

III. CHANGE IN DESCRIPTION:

Geog. 122 Applied Climatology. (2)
Studies involving the application of certain basic statistical techniques to the analysis of climate of small regions. Prereq. Geog. 22 or equivalent.

Dean White also presented from the College of Arts and Sciences a recommendation for a combined course in Arts and Sciences and Forestry which was approved by the Faculty, the requirements to be as follows:

A student who fulfills the conditions stated below may combine his courses in Arts and Sciences and Forestry, gaining the A. B. or B. S. degree after three years in the College of Arts and Sciences and one or more years in the professional school.

1. He must gain at least 98 credits in Arts and Sciences subjects, exclusive of physical education, with a standing of 1.0 or more, before transferring to the professional school.
2. He must have met the specified requirements of the College of Arts and Sciences and have gained at least 20 credits in his field of concentration before transferring to the professional school.
3. He must have been registered in the College of Arts and Sciences for at least one full year, immediately preceding the completion of his Arts and Sciences requirements, and must have gained at least 30 credits in Arts and Sciences subjects in the College of Arts and Sciences.
4. He must spend at least one year in an accredited College of Forestry.
5. He must secure sufficient credits in the School of Forestry to bring his total in the Arts and the professional work up to 128 credits, and must secure a standing of at least 1.0, or its equivalent, in the professional work. Professional courses duplicating Arts and Sciences courses, or duplicating courses elected in other colleges of the University by the student while registered in the College of Arts and Sciences, will not count in the total.

On recommendation of the Arts and Sciences College the University Faculty approved a change in the requirements for the Arts-Dentistry degree by which the number of years in dental school was changed from four (4) to one (1), making this program conform to the requirements of the other combined programs.

The Faculty also approved a recommendation of the College of Arts and Sciences that the University Band be authorized to be absent from the campus February 26 to March 2 to play in various Kentucky communities.

Dean Slone presented for the College of Pharmacy a recommendation concerning the minimum of credits to be required for the degree in Pharmacy. After some discussion and an amendment, the recommendation was approved as follows:

The degree of Bachelor of Science in Pharmacy be offered on completion of a minimum of 136 credits with a standing of 1.0.

On recommendation of the College of Pharmacy the Faculty also approved changes in courses as follows:

The course title and description of Materia Medica 11a, b, Anatomy and Physiology, be changed to Materia Medica 11a, b, Physiology and Pharmacodynamics with the following course description:

Materia Medica 11a Physiology and Pharmacodynamics. (3)

Basic human anatomy and physiology with primary emphasis on the functioning of the nervous, muscular, endocrine, digestive, genitourinary, respiratory, lymphatic, circulatory, and reproductive systems, including the pharmacodynamics of typical drugs effective on these systems.

Lecture, two hours; lab, two hours.

Materia Medica 11b Physiology and Pharmacodynamics. (3)

A continuation of MM 11a. Lecture, two hours; lab, two hours.

Prereq: MM 11a

These changes are to be effective on September 1, 1953.

Dean Spivey presented for the Graduate Faculty a recommendation that graduate credit be allowed in the following courses:

- I. The Graduate Council recommends graduate credit for the following new courses:

Botany 124. Anatomy of Vascular Plants. (4 credits)

The nature and origin of primary and secondary tissues and their distribution in plant organs. Three lectures and one two-hour laboratory per week.

Prerequisites: 6 credits in Botany.

Modern Foreign Languages 191a, b. Tutorial Seminar for Majors in Romance Languages. (1, 1 credit)

A comprehensive literature survey course dealing with the period from 1600 to the present, with extensive reading of representative selections and frequent written reports. The work is confined almost completely to French or Spanish literature respectively, depending upon the student's major field. Required of all majors in the Romance Languages during the senior year and open to qualified graduate students.

Anatomy and Physiology 210. Principles of Physiology.
(3 credits)

Consideration of the physical and chemical principles applied to the various systems of the animal body. Designed to meet the needs of graduate students who are in associated fields, such as psychology and animal husbandry. Not open for graduate credit to majors in Anatomy and Physiology. Lectures, two hours; laboratory, one two-hour period per week. Prerequisites: One year of college chemistry, one year of college physics.

Geography 136. Applied Cartography. (3 credits)

Map compilation techniques as directed by Army Map Service specifications. Prerequisite: Consent of the instructor--for geography majors and selected students from related fields.

Civil Engineering 115. Engineering Interpretation of Aerial Photographs. (3 credits)

Fundamentals of aerial photography as applied to modern engineering surveys. Analysis and reports on soil patterns, geologic formations, and land-use studies using photographs.

Prerequisites: Advanced students majoring in engineering, agricultural engineering, geology, geography, or the equivalent.

The University Faculty approved the recommendation.

Dean Spivey also presented a recommendation from the Graduate Faculty that the Board of Trustees be asked to approve the offering of the professional degree of Master of Science in Library Science. After discussion, the University Faculty voted to request the Board of Trustees to approve the degree. The requirements for the degree are as follows:

- (1) 30 semester hours of graduate credit
- (2) An average standing of 2.0 or better on all work taken as a graduate student
- (3) 36 weeks of residence
- (4) At least one year (6 semester hours) of college credit in a modern foreign language; or, in lieu of that, a reading knowledge as demonstrated by the usual graduate examination

The University Faculty also approved an amended recommendation from the Graduate Faculty that "Graduate and undergraduate students taking short courses of less than eight weeks shall during this time earn a total credit not to exceed one semester hour per week. (A fraction of a week equalling half or more shall be construed as a whole week.)"

Dr. Thomas D. Clark read the following Resolution on the death of President Emeritus Frank L. McVey.

Whereas, the death of Frank LeRond McVey on January 4, 1953, has removed from the staff of the University of Kentucky one of its most vital personal influences, it is fitting that his services to this University be reviewed.

Frank LeRond McVey was a man of major educational leadership capacity, and his accomplishments in this field were of immeasurable importance to the world of scholars. With quiet dignity, vision,

constructive curiosity and the power of decision he ever promoted the cause of learning.

Dr. Frank LeRond McVey became President of the University of Kentucky at a historical moment in both national and world history. World War I was drawing to a close and already the United States and Europe were beginning a program of reconstruction. The University itself had suffered the ravages of war, and at the same time it was undergoing a transition from a state college to an institution of university status. Dr. McVey brought to Kentucky that vision so necessary to the establishment and direction of the University's progress in the disturbed post-war world.

President McVey's personal contributions to the University are represented in the orderly organization of the various colleges, the creation of the University Senate, the tenure of staff members, the drafting of the Governing Regulations of the University, the change-of-work plan for University staff members over seventy years of age, the formulation of the group insurance plan, and the provision for the sabbatical leave of absence to encourage faculty members to do research. He brought to this campus many outside influences in the form of lectures, dramatic events, musical programs and art exhibits.

Intellectually and culturally Frank LeRond McVey gave great personal stimulus to university life. He encouraged the organization of the Research Club; in 1926 the Alpha Chapter of Kentucky of Phi Beta Kappa was organized in his home, and in the early 1930's he explored the possibilities of establishing a university press. As a result of this latter interest a special committee was entrusted with the responsibility of publishing scholarly works by a grant given it from the Haggin Fund. Later this committee under his chairmanship developed the plan for creating the University of Kentucky Press. The enlarged University Library is the result of his work and encouragement. In 1931 it was moved from cramped quarters to its new home and the collection was greatly expanded before he retired. He took genuine pride in having been one of the pioneers among southern college presidents to promote art and music education, and to stimulate public interest in these cultural arts by public exhibits and recitals.

President McVey developed three colleges and one division of the University during his administration. These were the Colleges of Education, Commerce, the Graduate School and the division of University Extension. The older colleges felt his influence in the process of their growth and the expansion of their staffs and curricula.

In the cause of freedom of learning, Frank LeRond McVey publicly exhibited great courage and intelligence in opposing the anti-evolution bill proposed to the Kentucky General Assembly in 1925. While the University and the freedom of its classrooms were under bitter attack from an unreasoning and unrelenting band of fundamentalists, Dr. McVey showed himself willing doggedly to defend the right of investigation. By his courageous action on this occasion he saved Kentucky from enormous future embarrassment, and helped to teach his people the sanctity of freedom of thought and speech.

Outside the University of Kentucky, Frank LeRond McVey took his place of leadership. He was the first vice-president of the American Economic Association and president of the Association of Land Grant Colleges and Universities, the National Association of State Universities, the Southern Association of Colleges and Secondary Schools, and the Kentucky Educational Association. He was the first president of the southeastern conference. He made surveys of the following institutions in attempts to assist them in reorganizing their programs: University of Oklahoma, Indiana University, University of Florida, Louisiana State University, and the University System of North Carolina. He also made an educational survey for Rhode Island and the College of William and Mary. In 1943 he was asked by the United States Department of State to visit Venezuela as educational advisor in the reorganization of that country's university. He prepared a plan for reorganization of the University of Venezuela which has now been completed.

In the service of the public Dr. McVey was a member of many boards and commissions including the Loyalty Board of this region, the National Consumer's League, and the Sixth Regional Civil Service Commission. During World War II he was director of the Kentucky War Fund and State Chairman of the United Service Organization. He was an important lay churchman and gave much time to religious affairs, and he was a member of the Executive body of the International Council of Religious Education.

Frank LeRond McVey not only encouraged scholarly activity on the part of others, but he was also himself a productive scholar. He was the author of eleven books and many articles in the fields of economics, government, history and educational administration. Not only did he leave behind an impressive achievement in the fields of writing and research, but an excellent private library. He was a diarist of consequence, and his personal observations fill twenty-three large volumes and constitutes a notable record of life in the University and Kentucky since 1930. He regarded his definition of a university as one of his finest literary achievements. Along with this was his memorable charge each year to the graduating class. In the field of art, President McVey was an enthusiastic painter with a keen love of color and form. His landscapes brought great joy to him and his friends.

These accomplishments in the field of education and public service are vast. He was a devoted public-spirited man, and his institution and state will be indebted to him for all time to come. He brought to the performance of his duties a sense of dignity, of progress, and of inspiration of both heart and mind. He was devoted to those enduring principles set forth in his classic definition of a university that: "It believes in truth, protests against error and leads men by reason rather than by force."

Therefore, In Recognition of these masterly accomplishments, and in gratitude and respect for the rich legacy of Frank LeRond McVey, late President and President Emeritus of the University of Kentucky, it is hereby unanimously

Resolved, by the University of Kentucky Faculty that these words be

1004 Minutes of the Meeting of the University Faculty, February 16, 1953

spread at large upon the minutes of this body, and that copies hereof be furnished by the President of the University to members of the family of Frank LeRond McVey.

Committee:

Elvis J. Stahr, Jr., Chairman
Thomas D. Clark
J. W. Martin
E. L. Gillis
D. V. Terrell
E. S. Good
M. E. Ligon

The Faculty approved the motion that the Resolution be spread upon the minutes of the Faculty and that copies be sent to Dr. McVey's family.

Miss Helen King, Executive Secretary of the University Alumni Association, appeared before the Faculty to present a request from the Association that special efforts be made to have the Alumni Day during Commencement Week of broader interest to returning alumni. She suggested that certain departments in the University hold open house so that returning alumni could get some idea of the work being done by the University in various fields. The Faculty approved a motion that President Donovan be asked to appoint a committee to make plans according to the suggestions of the Association.

Mr. George Lawson, President of the Student Government Association, presented a request from that organization that the University Faculty rescind Sections 1, 2, 3 and 4 of its action of April 21, 1952 regarding fraternity academic standings. After considerable discussion the Faculty approved a motion that the request be referred to the Rules Committee and that the Rules Committee be asked to consult with members of the Interfraternity Council before reporting to the University Faculty.

Dr. Chamberlain announced the Eighth Annual Founders Day observance to be held in Memorial Coliseum, Sunday Afternoon, February 22. He urged the attendance of all members of the Faculty and staff.

The Faculty adjourned.

R. L. Tuthill
Secretary

Minutes of the Meeting of the University Faculty, March 9, 1953

The University Faculty met in the Assembly Room of Lafferty Hall, Monday, March 9, 1953, at 4:00 p.m. President Donovan presided. Members absent were C. A. Anderson, E. G. Davis, H. H. Downing, Merton England, G. P. Faust, J. W. Gladden, Carsie Hammonds, John T. Masten, W. L. Matthews, Jr., C. N. Mount, A. E. Slessor, Lee H. Townsend and E. G. Trimble.

The minutes of the meeting of February 16 were read and approved.

Dean White presented recommendations from the College of Arts and Sciences as follows:

1. That the Department of Physical Education be allowed to take its major students to visit Chicago schools March 23-25.
