GIRLS TO HAVE INTRA-MURAL RIFLE MATCHES

All Classes Will Have Teams in Spring Meets; Miss Skinner Is in Charge of the Organization

Intra-mural rifle matches will be held this spring for the girls of the school, according to Miss Helen Skinner, assistant physical director.

The first class in preliminary instruction will be held today in the women's gymnasium at 5 o'clock.

The preliminary classes will be devoted to instruction in the principles of the use of the rifle and all girls are urged to remember that it is absolutely necessary that they attend these classes before they are admitted to the rifle classes.

Leida Key has been appointed general manager of the rifle team with Kathleen Curran as her assistant.

SCHOLARSHIP IS GIVEN COLLEGE

Pullman Company Makes Award To College of Agriculture Because of Showing in Live-Stock Judging

Dean Thomas P. Cooper, of the College of Agriculture of the University of Kentucky received notice Wednesday that the university had been awarded a \$250 scholarship by the Pullman Company.

The award is a result of the livestock judging done by the University of Kentucky team at the International Livestock Exposition at Chicago.

The Kentucky team, under the tutelage of Prof. L. J. Horcher, won tenth place at the International in competition with teams from many of the state universities and Canada.

The scholarship given to the university by the Pullman Company last year was won by the team of Little Cypress.

To Give Concert

Philharmonic Orchestra Prepares for Sunday Musicales

The university philharmonic orchestra under the direction of Professor C. A. Lampert will begin rehearsing Tuesday night for their concert which is to be given toward the close of this month, according to an announcement from the music department of the university.

The announcement also stated that from now on concerts will be given each month, probably on Sunday afternoon.

Girls' Basketball

Practice Begun This Week; Many Co-Eds Report

Girls' basketball season entered along with the new year, and the first official practice was held in the women's gymnasium Monday afternoon, January 7, under the direction of Miss Helen Skinner.

Wreck Victim

LYNN B. EVANS KILLED IN WRECK

Lynn B. Evans, alumnus of the University of Kentucky, was killed in the wreck which occurred at the Ponce de Leon and Royal Palm Trains collision, on December 23 when the Ponce de Leon special, en route on his way to Lebanon, Ky., to spend the holidays. He was identified by means of cards which were found in his clothing.

Mr. Evans who was graduated from the university in 1915, was one of the prominent engineers of the day. He began his career by entering the employ of the Dunham Company of Marshalltown, Iowa.

Hold Annual Pledging Of Alpha Delta Sigma

Eight Men Chosen at Banquet Tuesday, December 21, at Lafayette Hotel

The annual pledging of Alpha Delta Sigma, national honorary advertising fraternity was held in the private dining room of the Lafayette hotel Tuesday night, December 21, at which time eight men active in advertising in the university were pledged.

The active members of the fraternity are Hunter Moody, Layton Keffler, Delos Nee, Francis Watson, and James Shropshire.

Following the pledging Professor Kyle Whitehead, of the Journalism department of the university made a very interesting talk in which he told of the history of the fraternity.

Kernel First to Hail Arrival of New Contribution to Literature

Funk and Wagnalls New Standard Dictionary is Highly Praised by Associated Editors of Magazine Editors

The Kernel with sufficient courage to come forward with this one of its own.

ASSOCIATION OF COLLEGES WILL MEET SATURDAY

Annual Meeting of Kentucky Organization Convenes at University; Good Program Has Been Arranged

The annual meeting of the Association of Kentucky Colleges and Universities will be held at the University of Kentucky, Saturday, January 8, in the Physics lecture room.

At 10:30 o'clock the meeting will formally open with an address by the president, Lewis Robertson Akers, president of Asbury College, Wilmore, Ky.

At 11:45 o'clock there will be a recess for lunch and the meeting will be called to order again at 2 o'clock.

After reports from various committees are heard and miscellaneous business attended to, the meeting will be adjourned until next year.

ATTEND MEETINGS OF PROFESSORS

Several University Professors Represent Kentucky at Educational Conventions; Some Make Talks

ALL HAVE RETURNED

During the holidays many of the university professors attended meetings and conventions held in various parts of the country. The following were among those out of town for a portion of the holidays:

Dean Charles J. Turck, of the College of Education, read a paper of the Association of American Law schools held in Chicago December 23, 30, and 31. He was accompanied by most of the law college faculty.

Prof. W. L. Roberts, Prof. Roy Moreland and Prof. H. J. Scarborough, Prof. Jesse Adams, of the College of Education, read a paper of the educational work he has done in rural communities before the educational section of the American Association for the Advancement of Science, Philadelphia, on December 29.

Dr. Morris Scheraga, head of the department of bacteriology, Dr. J. B. Miller, head of the department of psychology, Dr. W. D. Valleau, of the agricultural college, Prof. Frank T. McFarland, head of the department of physics, Dr. M. N. States, of the physics department also attended the Philadelphia meeting as delegates of the local chapter of the association.

Prof. L. L. Dantzer, head of the English department of the university, attended two meetings in Chicago.

LYNN B. EVANS IS KILLED IN WRECK

Graduate of Class of 1915 Is Victim of Southern Railway Train Collision in Georgia

ENROUTE TO LEXINGTON

Lynn B. Evans, who was graduated from the University of Kentucky with the class of 1915 was instantly killed in a train wreck near Rome, Georgia, Thursday night, December 22.

According to reports reaching Lexington, Mr. Evans was in the dining car at the time of the wreck and it was in this car that most of the deaths resulted. It is believed that he was killed instantly when the train crashed into the Royal Palm near the Georgia town.

Mr. Evans was a member of the class of 1915 taking his degree as B. M. E. He returned to the university after graduation and in 1918 received the degree of M. E.

At the time of the wreck he was on his way to Lexington to spend the Christmas holidays with his brother, Edward Evans, 17, who lives in Lexington.

Mr. Evans had been one of the most interested and active alumni of the university ever since his graduation and his loss to the association will be keenly felt.

CALENDAR

Chicago Alumni Club, luncheon third Monday in each month in the Men's Grill, Marshall Field Co. Buffalo Alumni Club, meeting second Saturday in each month at Chamber of Commerce, Seneca and Main streets, 2:15 p.m.

KERNEL MAILING PLAN IS CHANGED

Wrappers Will Be Used in Future To Replace Large Envelopes Which Were Unsuccessful

BETTER DELIVERY IS AIM

With the last issues of The Kernel the alumni office began a new system of mailing out the Kernel to the alumni subscribers.

With the system of envelopes that we used for some time, the changes in dimensions and the increased size of The Kernel it was often that an envelope failed to carry the paper to its destination.

While, with the new system, The Kernel does not present as good an appearance as it did in the large envelopes it will reach its destination more regularly than in the past.

The alumni office feels that this move will assure better delivery of the Kernel than in the past. During this year, under the present administration there have been numerous complaints arising from the failure of the Kernel to reach the subscribers.

Often those writing in said they had received only a very few Kernels the year before. This new system we hope will prove 100 per cent satisfactory and the alumni office will greatly appreciate a prompt notice if any of the subscribers fail to receive the paper every week.

Born to Mr. and Mrs. Maurice Black of Barbourville, Ky., a baby daughter. Both Mr. and Mrs. Black is a member of the class of 1925.

Dues Delinquents Don't Dare Disdain Demands

Machine Makes Mailing Monthly Messages Much More Merciful Many Maintain

The alumni office recently acquired an addressograph, a machine for addressing letters, postal cards and Kernels. This new piece of machinery was a gift from the Lexington club of the association.

The machine enables us to address mail to the members of the association at the rate of approximately 2,000 an hour.

In addition to addressing the envelopes short messages of about 50 words can be printed almost as rapidly. With this new machine we are better equipped to keep in touch with the members of the association than ever before.

We not only can address the Kernels faster and our form letters more rapidly but we can also keep after the delinquent ones more successfully. When your subscription expires in June of this year, if you have not renewed, you can be sure that we won't let you forget about it.

We will keep after you until you will send us your dues to stop our letters if for no other reason.

BIRTHS

Born to President and Mrs. James Park a daughter at the Good Samaritan Hospital on December 14. She has been named Elizabeth Rigby. Mr. and Mrs. Park are graduates of the university.

Born to Mr. and Mrs. Wallace Duncan Hamilton a daughter on December 10 at the Good Samaritan hospital. She has been named Jean Duncan Hamilton. Mr. Hamilton is a graduate of the university and a member of the class of 1914.

Born to Mr. and Mrs. Wallace Duncan Hamilton a daughter on December 10 at the Good Samaritan hospital. She has been named Elizabeth Rigby. Mr. and Mrs. Park are graduates of the university.

ALUMNI LOST LIST

The Alumni office would appreciate it if you would send into this office addresses of any of the graduates listed below.

- John Emerson Hestand, '00 Leslie Handley, '00 Thomas Almon Jones, '00 Charles Dickens Lewis, '01 Gibson Walker Taylor, '01 Leola Ditto, '02 (Mrs. Guthrie Chilton) Flemen Coffee Taylor, '02 Mary Wicklife Austin, '02 (Mrs. Francis Harrison Ellis) Clarence Albert Galloway, '03 John Ralph Lancaster, '03 Charles Leon Peckinpah, '03 Edward Rand, '03 Helen Louise Jaeger, '04 (Mrs. Carl G. MARRIAGES

Miss Virginia Earle Heizer, who will be graduated from the department of home economics in February and Mr. William Homer Rice, who was graduated last June were married Christmas day at the home of the bride's parents in Lexington. Mrs. Rice during her career at the university was a member of the Alpha Delta Theta, sorority; the Phi Beta, honorary music fraternity; president of the Y. W. C. A. and a sponsor in the R. O. T. C. Mr. Rice was one of the outstanding players on the football team during his four years at the university and earned the nickname of "Caveman" from his teammates. He is a member of the Triangle fraternity. After the bride's graduation in February they will make their home in Hazard where Mr. Rice is a representative of the District Goodman Manufacturing Company.

Miss Margaret Wetherill VanMeter, 25, and Mr. Loyd Baker Averett, 23, were married at the home of the bride's parents in Lexington, Wednesday evening, December 22. Mrs. Averett is a member of the Alpha Gamma Delta fraternity and was widely known and popular on the campus when she was a student at the university. Mr. Averett came to the university from the University of Richmond, Virginia. He was graduated in 1923 and in 1925 received his masters degree. He is in business in Lexington with the Mutual Benefit Life Insurance Company. After a wedding trip they will make their home in Lexington.

Saturday 7, Not open; High School Week.  
Friday 13, Lamp and Cross (?).  
Saturday 14, Sigma Beta Xi (?).  
Friday 20, Engineers Day.

The following beautifully engraved announcement has been received:  
Mr. and Mrs. Karl Nusbaum announce the marriage of their daughter

Hildegard  
to  
Mr. James Woodall  
on Sunday, December the nineteenth nineteen hundred and twenty-six  
Louisville, Kentucky

At Home  
after January first  
4226 West Broadway

**Announcement**  
The following announcements have been sent out:  
Mr. and Mrs. Charles L. Benaker announce the marriage of their daughter

Mary Susan  
to  
Mr. Allen Reese Ingles  
Friday, the twenty-fourth of  
December  
Nineteen hundred and  
twenty-six  
Dry Ridge, Kentucky

**Davis-Johns**  
The marriage of Miss Helen Morrell Davis, of Flemingsburg, and Mr. Francis Gerard John, of Lexington, was solemnized Friday afternoon in Frankfort. After a brief wedding trip they will return to make their home with Mr. John's mother, Mrs. Alice G. John, on Groveson avenue.

The bride is a very pretty and attractive girl, a graduate of the Flemingsburg high school. Mr. John is a former student of the University of Kentucky.

**Holloway-Pribble**  
The marriage of Miss Emily Cole Holloway and Mr. Richard Lee Pribble will be solemnized on the evening of January 11, at the Second Presbyterian church, Dr. Benjamin J. Bush officiating.

Miss Mary Cole Holloway will be

maid of honor; Mr. Leonard Rouse, the best man; Misses Josephine Skain, Katherine Best, Carolyn Bascom, Fessie McCormick, Rachelle Shachtel and Nanni Gay the bridesmaids; Messrs. John George Heber, Samuel Royster, William Rodes, Jack Winn, and Cross and voted the most popular member of the senior class.

At present Mr. Hughes is teaching and coaching athletics at Harlan High school, Harlan, Ky., where he and his bride will make their home.

**Delta Tau Delta**  
Active members and pledges of Delta Tau Delta entertained with a delightful dinner at their chapter house preceding Pan-Hellenic on Wednesday evening, December 22 at 8 o'clock. The rooms and table were beautifully decorated in crimson roses and holly. Professors and Mrs. Hawkins were chaperones.

**Alpha Delta Sigma**  
Alpha Delta Sigma entertained with a dinner in honor of their pledges Tuesday evening, December 21 at the Lafayette hotel. Mr. Kyle Whitehead was speaker of the evening.

The pledges who attended are: Messrs. Fred Conn, Herbert Wilkinson, Bill Lasing, Charles Honaker, Hayden Ogden, Raymond King and Virgil Couch.

The members of the active chapter: Messrs. Hunter Moody, James Shropshire, LeRoy Keffer, Delos Noce, Francis Watson.

**Sigma Nu**  
Sigma Nu fraternity entertained Wednesday evening at 7:30 o'clock with a dinner party at their chapter house on Winslow street.

Alumni members who attended were: Dr. Barkenbus, Dr. Bedford, and Dr. McHargue and thirty members of the active chapter and pledges.

**Party for Faculty**  
President and Mrs. Frank L. McVeY entertained Monday evening, December 20 with a Christmas reception at Maxwell Place in honor of the members of the faculty and staff of the University of Kentucky, before the university holidays.

The house was decorated with garlands and wreaths of cedar, and a large Christmas tree in the drawing room and small trees, lovely with colored lights, on each side of the pergola entrance. Many red candles added to the effect. President and Mrs. McVeY received in the drawing room.

They were assisted by the deans and heads of the departments and their wives:—Dean and Mrs. Charles J. Turck, Dean and Mrs. Paul F. Boyd, Dean and Mrs. F. Paul Anderson, Dean and Mrs. Edward West, Dean and Mrs. W. D. Fambouser, Dean and Mrs. W. S. Taylor, Dean and Mrs. Thomas F. Cooper, Dean Sarah Bland, Dean and Mrs. Columbus F. Melcher, Miss Thelma Buchanan, Dr. and Mrs. Wellington Patrick, Prof. Harry Best, Prof. and Mrs. S. A. Boles, Prof. and Mrs. L. L. Dantler, Dr. and Mrs. W. W. Dimock, Prof. and Mrs. W. E. Freeman, Prof. Harrison Garman, Prof. and Mrs. E. L. Gillis, Prof. and Mrs. Enoch Grohan, Col. and Mrs. Horace P. Hobbs, Miss Marie Hopkins, Miss Julia Hurd, Prof. and Mrs. T. T. Jones, Prof. and Mrs. Carl Lampert, Prof. and Mrs. Arthur McFarland, Prof. and Mrs. Frank McFarland, Prof. and Mrs. C. W. Matthews, Prof. and Mrs. J. B. Miner, Prof. and Mrs. Charles L. Norwood, Mr. and Mrs. D. H. Peak, Dr. and Mrs. Joseph W. Pryor, and Mrs. George Roberts, Dr. and Mrs. J. E. Rush, Prof. Carol M. Sax, Dr. and Mrs. Morris Scheraga, Prof. and Mrs. Geo. Roberts, Dr. and Mrs. Edward Tully, Prof. and Mrs. T. E. Tuttle, Prof. and Mrs. W. S. Webb, Prof. and Mrs. Alford Zembrod, Dr. Glanville Terrell, Miss Jane Nichols, Dr. and Mrs. Linwood A. Brown, Prof. and Mrs. Thompson Bryant, Prof. H. E. Curtis, Prof. and Mrs. O. E. Jesness.

The decorations were in red and green carrying out Christmas colors. Ten couples were present for the dinner.

**Alpha Chi Sigma Pledging**  
Alpha Chi Sigma honors chemistry fraternity of the university announces the pledging of A. Mayer, Joe Mayer and Harold Heuser.

The annual Pan-Hellenic dance of the men's fraternities of the University of Kentucky was given Wednesday evening December 22 in the new gymnasium.

The dance was a delightful and brilliant event, marking the opening of the Christmas holidays of the university.

The ballroom was adorned in the colors of all the fraternities in the Pan-Hellenic: Sigma Nu, Sigma Chi, Sigma Alpha Epsilon, Pi Kappa Alpha, Phi Kappa Tau, Phi Delta Theta, Kappa Sigma, Kappa Alpha Delta, Tau Delta, Delta Chi, Alpha Tau Omega, Alpha Sigma Phi, and the electric illuminations, hung on the walls, represented the emblems of each.

The programs were pretty souvenirs of the affair which is always the most distinctive of the season at the university.

Each of the twelve fraternities were allowed a special "no-break" dance.

Handsome leather pocketbooks bearing the Kentucky shield and the date of the dance inscribed on them were given to ladies as favors.

The music was furnished by Bradford's orchestra of Chicago.

**Van Meter-Averett**  
Dr. and Mrs. F. V. Van Meter have announced the marriage of their daughter, Margaret Wetherill, to Mr. Lloyd Baker Averett of West Virginia.

The wedding took place at Miss Van Meter's home on West Second street on Wednesday evening, December 28. The bride was graduated from the university in 1925 and was a member of Alpha Gamma Delta sorority.

Mr. Averett attended school in West Virginia and received his masters degree from the University of Kentucky in 1924. He is a member of the Theta Chi fraternity.

**Hagen-Hughes Wedding**  
The following announcement has been received: :  
Mr. and Mrs. Frank G. Hagen announce the marriage of their daughter  
Mabel Marie  
to  
Mr. Charles T. Hughes

on Tuesday, the twenty-eighth of December, 1926  
Eldorado, Illinois  
At Home  
January 3  
Harlan, Ky.

Mr. Hughes was graduated from the University of Kentucky receiving his A. B. degree in 1925. He was Kentucky's first four letter man. He was a member of the Sigma Alpha Epsilon fraternity, president of the Men's Student Council, member of the Keys, Mystic Thirteen, Lamp and Cross and voted the most popular member of the senior class.

At present Mr. Hughes is teaching and coaching athletics at Harlan High school, Harlan, Ky., where he and his bride will make their home.

**Delta Tau Delta**  
Active members and pledges of Delta Tau Delta entertained with a delightful dinner at their chapter house preceding Pan-Hellenic on Wednesday evening, December 22 at 8 o'clock. The rooms and table were beautifully decorated in crimson roses and holly. Professors and Mrs. Hawkins were chaperones.

## LYNN BARKLEY EVANS

By DEAN PAUL ANDERSON  
College of Engineering, University of Kentucky

"For Lycidas is dead, dead ere his prime,  
Young Lycidas, and hath not left his peer,  
Who would not sing for Lycidas?"

Crushed to death by the very forces about which he knew so much, the death of Lynn Barkley Evans is one of the real tragedies of my life. During the 36 years of training men we have never known his superior. When he graduated in 1915 we celebrated him as the Apollo of Engineering. He not only possessed to the highest degree qualities of intellect but even more predominant were the graces of consideration and unselfishness expressed toward everybody under all circumstances.

All along the years since he entered the game of real life he endeared himself to all he met.

Immediately upon graduation, he entered the employ of the Dunham Company of Marshalltown, Iowa. A few months later, the president of the Franklin Manufacturing Company sent to the University of Kentucky a specification of his ideal man.

We made an appointment with Lynn Evans for him on neutral ground which happened to be Chicago. Evans came from Iowa, Swift came from Franklin, Pa., for the meeting. Swift found his human ideal and took Evans into his organization.

The World War came, Evans entered the navy and on account of his engineering judgment he soon was the second in command of all industrial activities in the Detroit district. Here he made his worth known and was drawn into the Studebaker organization at the end of the war.

He was put in charge of the Kansas City branch of the Studebaker Corporation with over three hundred branch sales houses under his immediate supervision.

The Florida awakening needed a master mind in the Studebaker Corporation and Lynn Evans was placed in charge of all the Florida and half the Georgia territory, with Jacksonville as headquarters.

It is an ill fate that brings to such an untimely end a superman like Evans. We cannot laud too much his ability but to us his qualities of heart were even greater. His traits of gentle demeanor and tender devotion to family and all work-a-day associates are the influences that will make hundreds of lives fuller and stronger.

Lynn Evans' devotion and appreciation was always fully expressed toward his Alma Mater. As a rule, youth accepts a training at the sacrifice of parents and the generosity of the state as a matter of course but Lynn Evans grew more grateful for his university life year by year as success came to him. We know this because we possess and prize dozens of letters frankly expressing his debt of gratitude to his university.

Lynn Evans' passing bears heaviest on the members of his immediate family, parents, sisters and brothers. The one glory supreme in Lynn Evans' life was his devotion to mother and sisters. He was as tender and considerate of them always as a lover.

Lynn Evans has bequeathed to all who knew him a treasure of intellectual qualities and character that will be fondly cherished to the end of life.

"Peace on earth and good will!  
Souls that are gentle and still  
Hear the first music of this  
Far-off, infinite bliss."

## A CLEAN SLATE

Once again kindly Father Time has taken his ever-ready sponge in his age-spotted hand and wiped spotlessly clean the slates of all his innumerable subjects. In celebration of the birth of the annus domini 1927, Father Time has erased from record and from memory all past sins of omission and commission, all mistakes, errors, and faults, and has left a spotless tablet on which the successes and failures, the loves and the hates, the hopes and the fears, the achievements and the disappointments, the noble sentiments and the base thoughts—all that is good, that is bad; that is wise, that is stupid; that is magnanimous, that is selfish; that is pure, that is depraved in the chronicles of 1927 will be recorded.

It is well-known that January, the month, was named from the god Janus, the two-faced, and was so called because it looks back over the year just past and looks forward for the new year just beginning. The Kernel does not like to think of the month in this two-faced aspect. To it the month seems rather to be symbolic of the old Latin motto—"Prospectio"—"Look forward." The old year is ended; what is past and gone can not be changed. But the new year is our own to do with as we please, and January is the time for making plans and beginning work in making the new year a success.

To students of the university, the early part of January has an especially important significance. It is not only a time for deciding to correct last year's mistakes, but it is also a time for preparing for approaching examinations. Exactly two weeks from today, final examinations begin.

Two weeks is a short span of time in which to prepare for the ordeal of final examinations. Yet perhaps if one begins today—not tomorrow—and applies himself diligently to a systematic and careful review of his subjects, wonders may yet be accomplished.

Let's try to make our 1927 records one of which we may be proud in after years.

## THIS AND THAT

We note that a professor at Marshall College breaks down and confesses that "there is no such animal as a bad boy or girl." There is no Santa Claus either.

"Go on and be collegiate if you want to," remarked the freshman, "but I'm going to put on my heavies."

And what are we going to do with the fellow who lets you get stuck with the girl he brought to the dance?

Our new year's resolution is to the effect that we will make no resolutions.

We hear that a lot of fellows tried to turn Lexington into a "hic" town the night of the Pen-Hellenic struggle.

A girl told us she filed her nails. We always cut ours and then throw them away.

And now with the mid-year exams rapidly approaching, we wish you all a happy new year, if such a thing is possible.

## LITERARY SECTION

VIRGINIA BOYD, Editor

### A POEM

Campfires shining through the dark  
Starlight gleaming through the clouds  
Crystal waters rippling  
From our oars dripping  
Jewels as sapphires, diamonds  
Coloring, gleaming, streaming  
From our oars. B. H. P.

### A REFRAIN

I would that my heart were old  
(Be still, be still, sad voice!)  
I would that a casket gold  
Pearled, ebionid, fast should hold  
My heart, now hot and grieved. . . .  
(Be still, be still, sad voice!)

I would that a quiet were mine,  
Ineluctable, still, a line  
Inviolable drawn, a sign  
Of life from life retrieved. . . .  
(Be still, be still, sad voice!)

### ART

Whether art is anything—I cannot know,  
Neither do I wish to learn—  
Only this is certain—  
That under its mystic cape  
With its pictures and images  
I can escape this tragic monotony.

### O SLIM FRAIL BEAUTY

O slim frail beauty, seized upon,  
Wounded by ruffian thrusts and deathly faint  
In mazed defecation from rapiers drawn  
Against thee where thou thought'st not! Thou  
My love, that diest! . . . Ah, and now  
Where cry help? Some dim god, or a far saint?

They hear not . . . hear not . . . and I bow my head  
Grieving, O slim frail beauty, thou art dead. F. D.

### THE SADIST

Come to me in beauty  
What care I if you must be sad,  
Over-burdened with sorrow,  
What care I  
If your heart sheds drops of blood  
At every beat?

It is not you, I love,  
Only your beauty  
And if you must purchase that  
With broken dreams and anguished soul  
What care I?

It is then that you are beautiful  
When you have been wounded by life  
When your tears, by a subtle alchemy  
Have become blood  
It is then that I would have you  
As my dream.

## RELIGIOUS DISCUSSION

JOSHUA RENEWING THE COVENANT

(By Hayes Farish, Pastor of Woodland Christian Church)

The covenant that Israel had made with Jehovah was a pledge to obedience and a chance to put God first. Moses had practiced this Covenant. Joshua's immediate successor had waged the conquest of the land promised to Israel. The people now held control over many other tribes. Joshua was nearing the close of his useful life as a leader. His plan is for a wise choice and an abiding loyalty and service to Jehovah.

All social conditions that exist are the result of the choice and will of persons. Bad conditions result from wrong and selfish choices. Through the ages many choices have been made which have resulted in establishing damaging negative conditions in human society. What Joshua is doing in this appeal is giving a challenge to right choice in social, civil and religious conduct that will establish righteousness as a prevailing power of the nation. He sees before him the marks of infidelity and knows full well that the influence of the viciousness of the heathen tribal practices is active in the new home of Israel. He is jealous for the purity of the life of Israel so seeks to pledge the nation to a divine loyalty as a nation's pledge to its tenets. Joshua sets God's marker to the roadway of life for all persons, nations and races of all time.

When we choose the right way and influence all others to walk therein we will see negative forces falling out of human affairs because there is no response to them.

### EXCHANGE NOTES

Coads at the Adventist College of Walla Walla, Washington, are required to wear their dresses within 12 inches of the floor. Three women who resented and refused to obey this edict were sent home.

## Home-Study

Lexington School Students Are Given Directions by City Board of Education

### VALUE OF STUDY STRESSED

Students of the junior and senior high schools of Lexington have received directions for home study from the city board of education. They are printed in such form that they may be pasted in the front of the school books, according to M. A. Cassidy, superintendent of the Lexington schools. The Kernel reprints them in hopes that they may be of some value or interest to the student body.

The directions are as follows:

1—Arrange your out-of-school time so that you will have a regular period each day for study, recreation and work. Don't waste your time.

2—Study the required time each day. Select a time when your body and mind will not be tired.

3—Select a quiet place for study.

4—Always have pencil, scratch pad, ruler, note book, dictionary and textbooks at hand.

5—The home student's schedule should include one-half hour in the afternoon, one and one-half hours in the evening, and one-half hour before leaving for school in the morning.

6—By acquiring the habit of making notes as you study you will be able to concentrate on your work.

7—If social activities excite your interest, and threaten to interfere with your schedule of home study, be firm and do your work ahead of time. Don't let pleasure interfere with duty.

8—Remember that in business as in study the man who succeeds and enjoys life best is the one who makes present small sacrifices for future larger profits.

the seniors from other students at Briham Young University.

University of Pennsylvania, Philadelphia, Pa.—Twenty students escaped uninjured when a fire destroyed the Sigma Alpha Epsilon house. Ropes made of bed clothing were used after flames had cut off retreat by the stairway.

Tokio, Japan—Japan is slightly shocked by the equality of the sexes displayed by the American students who are a part of the floating university which has arrived at its shore. Co-eds and men students both visited the public bar at the Imperial hotel, a place where women seldom are seen.

Oxford University, Oxford, Eng.—A plan for the organization of a university dance club is now awaiting the endorsement of the heads of the women's colleges. In such a club members of men's and women's colleges might meet and dance without fear of arrest by university protectors as has been the case in the past at public dance halls.

The circulation of The University Hatchet, the newspaper of George Washington University, of 5,500 copies is larger than that of any other college weekly publication in the United States.

University of California, Los Angeles, Calif.—The grades of two students here have been lowered by the men's affairs committee for receiving help in an examination. A third student was required to retake the examination on which he gave help before receiving credit for the course.

## SLAVES

In a quarter-century the General Electric Company has produced electric motors having a total of more than 350,000,000 man-power. Electric light, heat, and transportation have also contributed their part to the freeing of men. These are America's slaves. Through their service American workers do more, earn more, and produce quality goods at lower cost than anywhere else in the world.

The college-trained man is the first to grasp these facts which raise man from a mere source of physical power to be a director of power, thus realizing the true economic value of the human mind.

ANY FRAT MEETIN' ON THE CAMPUS

I can't resist tellin' you about some of the frat meetings as I Tappa Kegs have and I've got a sneakin' suspicion (since Akkie and I, being sophomores, know everything) that they're typical of all the Greek camp meetin's.

Well, the first thing accordin' to the sayin' on page ten, section seven, of parliamentary rules is that the president should shout, "The meeting will now come to order," which means that all as I Tappa Kegs have to shift our gurn to its home in the hollow tooth and act dignified and thusly come to order (but oh, my dear collegians, the thing we come to ain't order, as you all very well know).

"We will now have the minutes of the last meeting read by the secretary," says the chair. Groans from members of the chapter: "Do we have to have those things read?" or "I gotta hurry tonight, let's dispense with them." or "Oh, they're O. K., let them go."

However, since the president holds the hammer, she gets her way and protects the secretary as she have one darrer to read the minutes to that frothing mob.

"Any corrections," asks our sister with the hammer. "Yeh, she said we voted to have the

violinists play at the Music Shop and it was Wheeler's."

"There follows a heated discussion on Music Shop vs. Wheeler's which even wakes up those members who were lulled to sleep by the hammer as order was arrived at."

"Now, that we've settled that question by voting to have the violinists play at the Music Shop, let's see if we can't get some more corrections."

"She said 'chapter' is at it ought to be 'are'."

"I ain't 'are' right?" shouts one dearly beloved sister.

"Ain't 'are' right?" yells another. President rises hammer, "I'm sure 'is' is right, but will some one make a motion that she look it up for the chapter and report to us at the next sorority meeting."

Motion carried.

"We will now have the treasurer's report."

A tired harassed individual arises evidently suffering from malnutrition.

"Well, if the members don't mind, I'd like to have their dues as soon as possible. We have eight cents in the treasury and our grocery bill for two hundred dollars is due. Some of you must think this is a charity organization as you haven't paid any money since September."

Treasurer sits down amid dirty

looks, mean cracks, and remarks that it is cold.

"Any new business," asks the president.

Silence, broken by telephone bell and Akkie yells, "Please, madam president, that's for me, I must answer."

President refuses permission but Akkie leaves, regardless.

"Any new business," repeats the president. "No," says one member, "Let's hurry. I gotta date."

"Will someone make a motion we adjourn?"

Grand scramble! Chairs knocked over! Flash meets flash in fiery combat for exit! Evidently the nine hundred and seventy-first meeting of us I Tappa Kegs is adjourned.

Well, well, here we are again; back to the same old grind. How many of you still believe in Santa Claus?

Electrician (from roof) "Just hang on to those wires, two of them, George."

Electrician—"Feel anything?" George—"No."

Electrician—"Well, don't touch the other two, 'cause there's two thousand volts in them."—Passing Show.

"Jim certainly has some line, eh?" "Land, O yes! After I've been around him for awhile I hardly know whether to believe myself when I'm telling the truth."

A—"Statistics show that five out of every ten college men get married within two years after graduation."

B—"And the other five live happily ever after."—Penn. State Fresh.

"Just to think," said the husky in football togs, "I promised my mother I would never be a football player."

"Well," said the outspoken coach, "You've kept your promise."

Useless Improvements Prof.—"This machine can take the place of forty girls."

Eored Student—"Yeh, but who wants a date with a machine?"

Willy—"What's on your mind?" Tilly—"Thoughts."

Willy—"Treat them kindly, they are in a strange place."

Waiter, I smell fresh paint. "That's a moment more, sir. The coats at the next table are almost ready to leave."

Western Reserve University, Cleveland, Ohio.—Ralph S. Tyler, editor-in-chief of the Reserve Weekly, was removed from that position by Dean James, head of the faculty student activities committee, because of an article charging the faculty with unfairness in cutting 10 per cent from the paper's share of the student activity assessment.

The Maryland department of the American Legion has gone on record favoring the printing of a reproduction of the American flag on the fly leaf of all text books used in the schools of the state.

PREVIEWS OF LOCAL SHOWS

STRAND THEATER

"TENTACLES OF THE NORTH" In "Tentacles of the North," Rayart production playing at the Strand Theater Saturday, the producers have brought to the screen the vast gray expanse of Arctic waste described in the great story by James Oliver Curwood. Gaston Glass and Alice Calhoun have the principal roles.

No more timely production has come to the screen in view of the recent expeditions to the Pole, which attracted world-wide attention. A capable cast presents a flaming story of intrigue and passions in the waste places north of the Arctic circle.

"BARDELYS THE MAGNIFICENT" The genius of King Vidur, famous screen director, in making his characters human, appearing real and not as actors is exemplified in "Bardelys the Magnificent," his Metro-Goldwyn-Mayer production starring John Gilbert which opens at the Strand theater Sunday for three runs.

"Bardelys" deals largely with the most casual royalty and even the most difficult situations. It makes the species of character appear human, and the difficulty is aggravated when it is a romantic plot. King Vidur, as Von Stroheim, in "The Merry Widow," put the royal family into a petty, middle-class squabble, with the prince and princess as the principals soundly boxed by the queen. It was a touch that made them at once real human beings.

"LOVE 'EM AND LEAVE 'EM" A peculiar bit of psychology is contributed by the heroine of "Love 'Em and Leave 'Em," Paramount's latest, Frank Tuttle production, featuring Evelyn Brent, Lawrence Gray and Louise Brooks, which arrives at the Strand Theater Wednesday for a three day run.

"You've got to love 'em and leave 'em" he decides to walk out, but him to the gate. When one leaves, get another. Aim for the man higher up and if you can't take an elevator—walk. You'll get there just the same!"

Louise Brooks plays Janie, the flapper who fools and forgets. In fact, she fools her sister, Mamie, to such an extent that Mamie's sweetheart forgets her and falls for Janie. Then Mamie wakes up. If one can play, play. Among those in the cast are Lou Tellegen, Kathryn Perry, Ralph Graves and Margaret Livingston.

In addition the regular vodvil program H. S. Fielder and his Barn Dance Radio Entertainers will appear.

"THE BELLS" Lionel Barrymore, brother of John and Ethel, the eldest son of the great Maurics Barrymore, has recently completed his most pretentious screen offering, "The Bells," which will be the feature attraction at the Ben All Theater next Thursday, Friday and Saturday. "The Bells," which will be the immortal Sir Henry Irving with his greatest role, was adapted for the screen and directed by James Young. It was produced by Chadwick Pictures Corporation, sponsors of several of Barrymore's finest photodramas.

"THE HONEYMOON EXPRESS" Is forty-five the indifferent age? This is the question propounded in "The Honeymoon Express," the Warner Bros. film which now shows at the Kentucky Theater featuring Willard Louis and Irene Rich with a host of other Warner stellas silver-screen.

The story deals with the discontented parents of three New York young people and with the youths themselves and their various love affairs. Willard Louis plays John Lambert, the husband who seeks primrose paths and pretty girls far from his own fireside. Irene Rich as Margaret, his wife, contents herself with the conditions solely for the children's sake. When she awakens to her true position, she realizes that they, too, are becoming indifferent to her. Her rebellion and transformation lift the story to a splendidly dramatic climax, a merry heartening climax, loud with wedding bells and well wishings, and rainbow promises of happy days and sunny skies!

"THE MAGICIAN" The dance of the film is one of the most elaborate episodes of Rex Ingram's production of "The Magician" for Metro-Goldwyn, which will be at the Kentucky Theater Sunday for three day run, with Alice Terry in the leading role.

More than five hundred trained dancers appeared in the reproduction of this famous dance staged by Ingram in a forest setting on the studio grounds near Nice, France, where a great part of the Somerset Maugham story was made.

Another particularly interesting episode of this production was filmed in the interior of an Arab snake-charmer's tent at the Fair of Lion de Belfort. Some of the most deadly of reptiles found in Africa were handled by the snake charmers before the camera for scenes of this picture.

The Fair of Lion de Belfort, an annual carnival staged in the square which surrounds the famous Lion de Belfort, was the setting for many of the scenes of "The Magician."

"THE STILL ALARM" Several thrilling fire scenes are vividly portrayed in "The Still Alarm," a Universal-Lewis picture, which comes to the Ben All Theater Sunday. On the screen is shown all the incidents of a great fire from the alarm apparatus leave their station to the dash through crowded streets, the arrival at the fire and the work of the firemen. Forty Los Angeles firemen participated. Into this picture Universal has placed such players as Helene Chadwick, William Russell, Richard C. Travers, John T. Murray, Dot Farley, Edward Hearn, Edna Marian, Jacques d'Aray and Erin Le Bissacore. Edward Lemme directed "The Still Alarm."

"WOMANPOWER" Mysterious forces rule the world and chief among these are electricity, love and womanpower. Electricity operates the world, while love rules the mind and heart, and all motion and emotion in the human race clicks under the guiding hand of womanpower.

Eve made Adam eat the apple—

U. K. Grad Praised By Bell System

Hiester H. Lowry Is Lauded For His Work in Telephone Development

Hiester H. Lowry, who was graduated from the College of Engineering of the University of Kentucky in the class of 1909, was lauded for his efficient work in an article published in the December issue of "The Bell Laboratories Record."

After Mr. Lowry was graduated from the university in 1909 he entered as a Western Electric student at Hawthorne the following fall. After becoming associated with the Bell Telephone System Mr. Lowry was assigned to the equipment branch of the service and became head of his department in 1918.

He has under his supervision six men and departments. Three of these are in the service of the Bell Telephone System. His work since entering the service of the Bell System has been very interesting. Among his most notable achievements was the planning of the present system of the New York City telephone service.

His work ever since—womanpower. Lorelei sat on a rock, combing her hair and singing—while the sailors drowned. She just laughed—womanpower.

Deliah invented bobbed hair—and made a baldheaded monkey out of Senanon, the strong man—womanpower.

Helen of Troy had the face that launched a thousand ships—womanpower. Catherine of Russia, queened it over that once great nation, and an able executive and leader of sentiment—womanpower. A. and, incidentally, "Womanpower" will open at the Ben All Theater Monday for a three day run.

Among those in the cast are Lou Tellegen, Kathryn Perry, Ralph Graves and Margaret Livingston. In addition the regular vodvil program H. S. Fielder and his Barn Dance Radio Entertainers will appear.

"THE BELLS" Lionel Barrymore, brother of John and Ethel, the eldest son of the great Maurics Barrymore, has recently completed his most pretentious screen offering, "The Bells," which will be the feature attraction at the Ben All Theater next Thursday, Friday and Saturday.

Eve made Adam eat the apple—

MAKING PICTURES FURNISHES WORK

Students' Industries Association Started Under Auspices of Art Department Is Expected to Be Permanent

11 STUDENTS EMPLOYED

The Students' Industries Association of the University of Kentucky is progressing so rapidly that there seems little doubt that the group will proceed to a permanent organization, according to officials of the association.

At present, it is furnishing work to eleven students and is taking the total available time of six students. Ten of these students are art students, but the organization is not limited to students in the art department.

The first picture to be published by the new association is nearing completion and with each successive color, the richness and beauty of the work is enhanced. The picture, entitled "Japanese Nocturne," represents a lake in the moonlight with a full moon glittering reflected in the blue water. A boat is gliding over the surface of the water and the whole is seen through the weeds and grasses of the nearby shore. The placid beauty of the night and the romantic glow of the moonlight are effects that have been ingeniously achieved.

Although this type of reproduction is based on an old and well-known process, effects never before achieved are being attained through the application of new principles which have been worked out by Mr. Lester Cook, manager of the association. Hitherto, this process has been capable of reproducing only flat, poster-like colors. But under the new method, the most subtly gradations of color and hue may be reproduced. The first subject, "Japanese Nocturne," has been chosen to illustrate these effects. Another feature of the reproductions is that they are as

As soon as the first edition is off the press, work will be begun on the second publication as it is planned to publish a new subject each month. The Students' Industries Association will be glad to hear of those who are expert in making picture frames and it expects to be able to furnish work for a larger number of students in the near future.

Students who desire to work for the Students Industries Association are advised to write in what they can do or what they are interested in learning to do. Aside from producers, the association is interested in salesmen who will be given an opportunity to try out the product before they make definite arrangements.

West Point, N. Y.—Cadet Adrian J. VanLeeuwen, Plebe, suffered a broken neck in an attempt to stand as straight as he was required by a fourth-year man. The fracture can be cured and the upper-classman was exonerated.

permanent as any oil painting. They are waterproof and sunfast, can be cleaned with soap and water and only the highest grade of pigment and color are used. The edition of "Japanese Nocturne" will be positively limited to 112 copies, only 100 of which will be offered for sale. Each of these copies will be numbered and signed on the back and although the exact price will not be known until the process is taken, it is expected that they will be sold at between \$2.00 and \$2.50, with possibly an additional \$1.00 for frame. The edition is complete today and is offered for sale at the Campus bookshop and at the art department. No profit will be made on these editions, the sole purpose of the organization being to furnish jobs for students working their way through the university. Those who have seen the edition, even in its incomplete state, feel that if it were offered commercially for profit, the price would at least be trebled.

As soon as the first edition is off the press, work will be begun on the second publication as it is planned to publish a new subject each month. The Students' Industries Association will be glad to hear of those who are expert in making picture frames and it expects to be able to furnish work for a larger number of students in the near future.

# KENTUCKY WINS FIRST CONFERENCE TILT, 44-36

## FLORIDA TEAM VICTIM OF 'CATS

History of 1926 repeated itself as far as the University of Kentucky Wildcats are concerned when they defeated the University of Florida, 44 to 36, in their first Southern Conference game of the year Monday night. True, Florida did not play Kentucky in the first conference game last year, but history repeated itself in that the Wildcats waited this season until they had lost four games before winning one—just what they did in 1926.

One could call Monday night's game a comedy of errors and describe it pretty well. It was more or less a succession of personal fouls, too tromping, walking with the ball and what not, with each team sharing honors. Florida committed 15 personal fouls to Kentucky's 12.

One sitting on the sidelines could do nothing but admire the playing of Clair Dees at backward, he helping the cause of Kentucky possibly more than any other Wildcat. Clair held

the 'Gators' crisp shots down extremely well, forcing them to resort to long shots, with which they gathered in the majority of their points.

As usual Kentucky missed many crisp shots—enough to win the game by a 20 point margin—but, as they made enough to win it by 8 points one should not be dissatisfied.

The Wildcats will undoubtedly be heard from again—and in faster company—if they become more sure of themselves and bank their crisp shots so they will fall into the mesh instead of outside the basket. They worked the ball down the floor perfectly, although Florida had little defense against such an attack, but did not seem to know how to stand under the basket and tip the ball in. "Toots" Knadler got more craps than any other Wildcat.

Smith, of Florida, scored first with a goal from the foul line, but Knadler received a pass from Jenkins under the basket and made a lightning shot to tie the score. Walker sent Florida's stock soaring five points with a long goal, a crisp and a free throw, but Ropke, Jenkins and Ropke again put Kentucky in the lead 8 to 7. The rest Clair Dees at backward, he helping the cause of Kentucky possibly more than any other Wildcat. Clair held

Walker, of Florida, started the scoring in the second half, but successive goals by Knadler, Jenkins and Ropke again put Kentucky in the lead, 20 to 19. Jenkins, Helm, Ropke and Knadler then began a bombardment of the basket which put Kentucky in the lead, 32 to 23, before the 'Gators' could check the attack. Smith bore the brunt of the comeback with three baskets and a foul throw but the game was too far gone. Letakus squeezed in a field goal just a few seconds before the final gun sounded.

Helm, substituting for Heizer, appeared the steadying influence to the team. He made two field goals and two foul throws during the short time he was in the game during the last half, besides getting the jump on Dell practically every time. Helm started the rally which gave Kentucky the victory.

Smith, of Florida, scored first with a goal from the foul line, but Knadler received a pass from Jenkins under the basket and made a lightning shot to tie the score. Walker sent Florida's stock soaring five points with a long goal, a crisp and a free throw, but Ropke, Jenkins and Ropke again put Kentucky in the lead 8 to 7. ## BEARCATS WIN FIRST FROM WILDCATS

Coach Basil Hayden's Wildcat basketball team went down to defeat by a score of 48 to 10 in their first game of the season against the University of Cincinnati Bearcats on the home floor on the night of December 18. The red terror, Bolton, was high scorer, ringing up fine field goals and three fouls for 21 points, although the work of Meyers, at running guard, was superior to that of the gangling boy who stood under the basket and dropped the ball in for goals at regular intervals.

The Bearcats, with Bolton outjumping Helm, who came just to the corral topped boy's shoulders, leading the attack, launched an offensive drive at the start which swept the Kentucky team off its feet, and within one minute and fifty seconds Cincinnati had seven points to Kentucky's none. From this point to the end of the half the visitors rapidly increased their lead until they led by a score of 28 to 7 at the end of the first period.

Kentucky's first score was made by Ellis, who came down the floor to take Jenkins' pass for a crisp shot. It was the prettiest play of the game. With the score 17 to 2 against them, Jenkins dribbled almost the whole length of the floor to sink another crisp, bringing the score 17 to 2. Ellis' field goal and Ray Ellis' foul throw were the only other points contributed by the 'Cats during the half.

The band played right merrily during the intermission but it didn't seem to have any effect on the Wildcats, who were tamed down to such a degree that they made only three points in the final half, while the Bearcats were scoring 20, half of them by Bolton. Jenkins' field goal and Dees' foul shot were the only points made by Kentucky in this period.

Jenkins was the only Wildcat who showed any semblance of form although Dees did fine work, considering that it was his first varsity basketball game. Their teamwork was remarkably ragged.

## IMPROVEMENT IS SHOWN AGAINST INDIANA

Kentucky showed a great improvement against the Indiana University five in the third game of the season, losing by the score of 38 to 19, after putting up a pretty battle.

They displayed more of the teamwork that smacked of their effort against the Bearcats and this, plus the hard fighting of each man, allowed them to make a showing against Indiana that was most respectable in every sense of the word.

If Indiana is not favored to win the Western Conference crown, the team that is must be the quintet of the century. The Hoosiers had a team of fast, brilliant floor men who worked together to carry the ball down the floor to within scoring distance where they weaved in and out searching for an opening for a crisp shot.

The Crimson did not always find this opening and had to resort to sharpshooting, at which Krueger excelled and made five such baskets, because of the hard guarding of the Wildcats. The locals tried hard to get in for short shots, which show Hayden's steady coaching is finding effect, and when in possession of the ball they were careful in their passing. Practically all of Kentucky's field goals were made on craps, the Wildcats striving hard to find an opening before shooting. This was not always forthcoming. However, all

**We Achieve Our Ideal Through HEATHIZATION**

We want to make this fact clear—that there may be no misunderstandings and misrepresentations.

This company controls exclusively for this territory the right to manufacture ice cream under the Heath process.

This tremendous improvement in ice cream manufacturing methods is patented. It costs us a lot of money a year to control the right to manufacture Heathized Ice Cream in this territory. But it is worth it! We believe that every dollar spent to further protect the health of the people is well spent.

In making Heathized Ice Cream, common air in the freezers is replaced by an atmosphere one hundred times purer. Thus we achieve our ideal in sanitation, purity and safety. This hygienic process also intensifies the flavors and protects the precious vitamins—those mysterious and necessary growth-promoting elements in food.

Ours is the only Heathized Ice Cream made in this city.

It is sold through the Dixie Dealer near you

## 'CATS WEAKEN, LOSE SECOND TO CINCY

After holding the University of Cincinnati to a 12 to 12 score in the first half at Cincinnati on December 26, the University of Kentucky team went down to defeat, 51 to 22, before their heavier opponents.

Kentucky fought bravely against the Bearcats throughout, but, like every other team this far in season, failed to turn back the Cincinnatians. The moment the referee tossed the ball into the air in the second half the fireworks began. Mickey Dine turned loose from mid-floor and on the next tip-off repeated his performance. Then, when Dine and Bolton drawing the scoring honors, the Red and Black hit their pace and it was only a matter of time.

To Frank Phippis was entrusted the task of trying to stop big Red Bolton. And to that youth's credit, it might be said that he did a very good job in the first half, only to weaken after the intermission.

Bolton played his usual game, which means accounting for at least a score of points. Between Dine and Bolton there were something like 36 points scored.

Captain Paul Jenkins, defending his laurels as all-Southern player last year, led the Wildcat attack with 10 points. Knadler and Ropke turned in creditable games.

tried shots from afar with little or no success.

Knadler and Ropke were outstanding for Kentucky on offense, Jenkins doing fine work in directing the attack. Phippis and Dees did their part of the guarding with the former showing offensive ability that no one knew he had.

Krueger, Correll and Winston were the mainstays for Indiana. Correll was the key man on offense with Krueger depended upon for the quick work near the basket. Winston, who needs an extra length bed when he sleeps, jumped center or rather reached on his tip-toes to get the tip-off, returned to the back guard position, where his efforts were inappreciable. ## MARYLAND TILT WITH 'CATS CANCELLED

According to an announcement made by S. A. "Daddy" Boles Monday night, the next game that the Wildcat basketball team will play will be with Vanderbilt, January 15, on the local floor. A game with Maryland University, which was to be played to night, was called off by the Maryland authorities Saturday night.

Because the Wildcats are eager for action after their notable victory over the Florida Alligators, "Daddy" Boles has been casting around for a suitable opponent to offer the Cats some amusement before the Vanderbilt encounter. A tentative game was arranged with Wesleyan to be played tomorrow night at Winchester, but some unforeseen difficulties arose in connection with the Panthers that caused the playing of this game an impossibility. Probably some team, which has an open date, will satisfy the desires of the Cats and fans and play the Felines the first part of next week.

**CHOOSE YOUR JOB AS YOU CHOOSE YOUR COURSE**

By E. B. ROBERTS  
Westinghouse Electric & Manufacturing Company

A young engineering graduate faced a leader of industry.

"Supposing," said the young graduate, "that I am ambitious, am in good health, and have probably more than average intelligence, what chance have I of 'getting somewhere' in the field of engineering?"

"Well sir, ninety percent of the executives of this company, including its vice-president, its departmental managers, district sales managers, works managers, service managers, and engineers entered the company directly from the engineering schools. How many of the work to be done? Only fifty-five percent of the people of the United States live in electrically lighted dwellings. Less than two percent of the railroad mileage of this country has been electrified. Forty-two years have carried the central stations of the country from a single station of 600 kilowatt capacity to 23,000,000 K.W. and the end is not yet. Only a fraction of our water power has been exploited. It is reasonably estimated that within the next ten years the total output of electrical energy will be three times that of the present. The engineering work of the future will be managed by technical graduates. Your opportunities

are limited only by your vision, ability, and courage."

**The Work of the Engineer**  
The engineering field, for economic reasons, has been divided and subdivided into various branches. From one viewpoint it is divided according to Engineer Applications into such lines as power generation and transmission, land and marine transportation, industrial applications, domestic applications and communications.

From another consideration the field has been divided according to the occupation or vocation of the engineers engaged in it.

It is felt that interest and specific opportunities are the best guides in making a decision as to the field of engineering application to be entered. More important is it for careful thought to be given to the selection of the vocation within that field. The following is a vocational classification of the major types of engineering work.

- (a) Commercial Engineering.
  - (b) Application Engineering.
  - (c) Design Engineering.
  - (d) Research Engineering.
  - (e) Works Management (production).
  - (f) Service Engineering (Installation and Maintenance).
- All these apply to both mechanical and electrical engineering graduates. Any one of them represents a proper field to develop into work of an executive character.
- The vocational classification of engineering work is usually well understood by the engineering graduate. For this reason delay of the decision in this regard is urged until a study of the requirements of the job as to technical ability, physical qualities, and personal characteristics.
- Commercial Engineering offers a

field of varied opportunity for the young man with engineering ability, marked social instinct, and a personality commanding confidence and inspiring respect. A commercial engineer must know the goods which he is selling, how they are manufactured, their design, the materials, and workmanship entering into the construction, as well as the performance. He must know their applications and requirements. He must be able to speak the language of the trade with which he is dealing. He must have resourcefulness, for important work is frequently done on the spur of the moment. He must continually devise new ways of finding business, presenting proposals, and of making friends. He must be a persuasive talker, be logical, honest, and truthful. Tact and ability to cooperate, plus open mindedness are essential. Vision he must have, for in the last analysis he is responsible for the guiding of the design and development of engineering activities of his Company. Essentially he bears a consulting engineering relation with his customers who rely upon him to see that the apparatus furnished is correctly applied and that the relationship should be representative of the best engineering practice.

Training as it applies to preparation for commercial work should involve experience relating broadly to the product. Anticipating that in his customers, the salesman will be charged with complete responsibility for that relationship, he should study his company's engineering and commercial policies, its methods of operation, the general laws of contract, shipping, accounting, advertising, etc. Training in methods of market analysis should be emphasized. Business English and Business Psychology should be a part of any general commercial training.

**Application**  
The Application Engineer works up engineering proposals on negotiations and goes into the field to assist salesmen. He is essentially a Consulting Engineer for his customers. It is his duty to see that the apparatus specified is applied to application and representative of the best engineering practice. The application engineer, in addition to his engineering ability, must possess commercial instincts, must be a convincing talker, and must be able to present engineering arguments with the force and personality necessary to insure confidence.

The application engineer furnishes the design engineer the requirements as to capacity, size, and location of the apparatus for a specified service. His activities may pertain to the generation, transmission, and distribution of power, electrification of railroads, ship propulsion, and the use of electricity on board Naval and Merchant ships, coal and iron mines, steel, textile, and cement mills, electrochemistry, electrometallurgy, metal and wood workings, etc.

**Design**  
The engineer who conceives the idea of the machine and makes the calculations involved, and who is responsible for the construction of the finished products is called a Designer in the sense in which the term is used in industry. His work is in creating, formulating his ideas into designs, and supervising the fabrication of the materials into the finished product. After the line of apparatus has been completed, the design engineer's responsibility has not ended. He must make changes to correct troubles and keep the apparatus up to date. He must initiate and carry through new developments to keep abreast of the times. The young man who would succeed in machinery design first must have a strong liking for construction—genuine pleasure in making things—and, second, a desire to know and to know thoroughly. He must have analytical ability and then have the vision and courage to act on the conclusions reached by his study.

**Research Engineering**  
Research might be called pioneer work. It may involve such lines as metallurgy, metallography, general physics, insulation, chemistry, magnetic work, illumination, and radio. From time to time special researches have to be undertaken, but the fundamental work which proceeds at all times includes researches in heat conductivity, magnetism, installation, high vacuum, metallurgical problems, and mechanics.

The research worker must be in close harmony with designing and application engineers. The prime prerequisite, in addition to the technical ability necessary, is a fundamental interest in the investigative side of scientific work.

**Works Management**  
Manufacturing organizations offer opportunities for technical men who are interested in the field of factory management and production. This is the field of the "engineering" of men of human materials as contrasted with the engineering materials of construction. For success in this work the requisites are an analytical mind, sound judgment, and a profound sense of humanity and justice. Some of the major lines of factory management are storekeeping, which has to do with the maintenance of requisite stocks of finished and raw materials; production, which has to do with the loading of the various plants and sections of plants; particularly where the finished product of one plant or section is the raw material of another; and Rate making which has to do with problems of wage payment.

There are other branches in this vocational arrangement of the field-space does not permit a discussion of technical advertising, patent work, erection, merchandising, contract supervision, purchasing, personnel, and many others. All of these are spheres for expressing individuality and for the creative work.

**Suggested Approach**  
The essential thing is to gather the facts so that an intelligent decision among the functions may be made. Every engineering student took a long step toward selecting his life's work when he decided to study engineering. A further great stride was taken

when he decided to study Electrical Engineering. Mechanical Engineering or whatever field he has followed. But still another decision, fully as important as either of these, and perhaps more so, remains. What shall he do with his engineering training? What job shall he choose? Shall he become a Research worker, a Designer, a Commercial Engineer, a Manufacturing Engineer, or what not?

Several suggestions may not be out of the way. The eminent engineer, John Hays Hammond, prepared a list of the book entitled "The Engineer". It is genuinely helpful. Another publication of interest is entitled "Your Vocation." It is a series of chapters by four eminent engineers—one in the field of Design, one in the field of Application, one in the field of Selling, and one in the field of Publicity. The company, with which the writer is associated, took the occasion to reprint these chapters, so helpful have they been to young men here. It will be a pleasure to mail a copy to anyone requesting it. "Popular Research Narratives", a series of short stories of Research, Design, and Invention, directly from the men who did it, pitifully told, is especially valuable to any inclined to technical work. "An Autobiography" by Benjamin Garver Lammie, is a gold mine for any young engineer seriously seeking the direction into which his own bent and tastes lead him.

Much of the advertising by the larger manufacturing and public utility companies, in the college papers, is exceedingly valuable as a source of information about engineers and their jobs. The representatives who come during the spring of the year from industry to interview seniors may be made sources of information exceedingly helpful. Inquire diligently of them regarding the representative fields of work, the characteristics essential to success in each, what the opportunities are, by what process increased responsibilities may come, and what are the personal satisfactions to be gained.

In a word, choose your job in the same way that an engineer should attack any problem—gather the facts, set them down, arrange them in the order of their importance, and reason through to conclusions by the same analytical process which you have been taught to use in school.

**PRINCETON FIVE IS LUCKY TO WIN**

Princeton University defeated the Wildcats, 30 to 25, in the fourth game of the season, on the night of December 31, the defeat coming because of the inability of the Kentucky players to shoot set-up shots. It was the fourth consecutive loss for the Wildcats since the opening of the 1926 season.

Jenkins played a brilliant floor game, possibly his best this year, but he did not have his eye for the basket. Ropke, while he was in the game, did fine work, as did Knadler until he had to be removed on account of an injury. Heizer playing his first varsity game, was slow and showed his inability to dribble in for shots, being open more than once. He contributed two field goals, however. Frank Phipps seemed more sure of himself with the ball, although he did not seem able to get going during the game. Clair Dees, playing back guard, was in a consistent hang-up game, preventing the visitors from making but few crips and taking the ball off the backboard with regularity. The Tigers, however, turned one of his mistakes into a field goal when he batted the ball away from the backboard in the second half, Gartner sinking the oval from beyond the foul line.

**Princeton Takes Lead**  
Princeton took the lead with McCabe's crip at the start of the game but Jenkins and Dees tied the score with two foul throws. Gartner got a spot shot from the foul line and Knadler came back with a lightning crip to again tie the score. The Tigers forged ahead from this point, however, until they had a 14 to 5 lead. Kentucky rallied and, with Knadler again leading the fight for points, ran the score to 14 to 11 as the half ended. It brought a loud burst of applause.

Pook, tall center, started the fireworks in the second half with a field goal, but Jenkins came back with two points. The Tigers ran the score to 22 to 14 before the Wildcats were able to stop them. Heizer started the ball to rolling with a field goal. Ropke made a foul throw good and Jenkins dribbled in for two consecutive crips to make the count 22 to 21. Ropke

(led the score again with a foul throw, 22 all. Jenkins then missed his easy crip, which was the turning point of the game, and Gartner made two easy shots in succession. Evans made another and McCulloch still another before time out was called by Captain Jenkins. Ropke's two foul shots made the score 24 to 30 and Phipps contributed a field goal which ended the scoring for both teams.

**Just Ordinary Team**  
Princeton brought to Lexington a team nothing out of the ordinary and Gartner, playing at forward, was the fastest Tiger on the floor, while McCulloch, who replaced McCabe, was a crafty floor man and a good shot.

Pook got the jump on Heizer most of the time, although the Princeton center was just out of luck while Ropke was jumping with him.

Captain Alexander and Miles, Princeton guards, were put out of the game on account of excessive fouling. All in all the visitors contributed 15 personal fouls. Kentucky made seven, five of which were committed in the second half. Princeton made 11 field goals to Kentucky's nine, and connected for eight out of 11 foul shots, while the Wildcats could make good only eight out of 18 tries.

(CONTINUED FROM PAGE ONE)

Texas, Kansas, Florida and some other states in their leagues, and there is a possibility of one or more of them being invited to compete with the State Championship team at the close of the tournament held at the university.

The championship has been won in the past years by Lexington in 1921, Madisonville in the following year, Dry Ridge in 1923, Hopkinsville in 1924, Paris in 1925 and by Somerset last year. The teams must be composed of three bona fide students of the schools they represent but are not required to use the same team in all of the debates and may have alternate teams.

The entries for the league closed the first of December and the debaters will commence in January on the preliminary round which will carry well into the middle of February. The state is divided into 16 districts averaging eight counties in each. Some of these counties have all of their schools enrolled, and vary in size from Louisville Male with an enrollment of 1,600 to schools containing only 20 students.

### KERNEL BRINGS FORTH ITS OWN BOOK REVIEW

(CONTINUED FROM PAGE ONE)

the proper treatment of the subject demands it.

One can hardly predict for this able work a widespread popularity or appreciation. The natural superficiality of the reading public precludes any such possibility. Discriminating readers will, however, instantly recognize its value and accord it the rightful measure of appreciation. Educators will delight in it and students and lovers of English find much of instruction and interest in it. It is a book that should, and no doubt will, become a fixture of our literature.

### PATTERSON SOCIETY TO ELECT NEW OFFICERS

(CONTINUED FROM PAGE ONE)

26 of each year it holds an oratorical contest for its members and gives a handsome medal to the winner. All men students of the university are eligible for membership in the society and all wishing to join are invited to attend the meeting in White Hall Thursday night. The present officers of the society are John R. Bullock, president; J. W. Jones, vice president; H. H. Davis, secretary-treasurer; and R. E. Meuth, sergeant-at-arms.

### Strict?

Modern Eds and Co-Eds May Review Rules Under Which Their Progenitors Suffered, and Take Heart

### SABBATH RULES ARE RIGID

To the student who feels that his personal liberties are being encroached upon when the suggestion is made that he might go to assembly once in a while, we offer this: In the catalogue of Columbia University, now George Washington, for the year 1885, under the heading "DISCIPLINE," one finds that "a merit-roll is therefore kept, and when any student has fifty marks of demerit his parents or guardians will be informed of it,—and when he shall have one hundred such marks for any one term, or one hundred and fifty for any one year he must leave the institution." And a demerit of from one to 10 in number might be imposed for violation of College laws!

Among these College laws are two groups which have particular interest to the student of 1926—and we wonder how it would feel to have to abide by either.

"All students are required to abstain from whatever is inconsistent with a due observation of the Sabbath, and regularly to attend every Sabbath morning, such particular place of Divine Worship as may be chosen by themselves, or by their parents or guardians. On Sabbath night they must attend religious service at the College Chapel, when such service shall be appointed. But any student may for sufficient reason be occasionally excused by the president, or in his absence by one of the professors, to attend each morning or night other places of worship."

But the masterpiece, and one which is all inclusive is this—"All immorality in word or deed and all ungentlemanly conduct are strictly forbidden. No student is allowed to attend the theater or any such place; or to visit any bar-room or similar establishment; or to visit any hotel but for special and adequate reasons. No student is allowed to have at his command any deadly weapon or gun-powder; any cards or other means of gambling; or any intoxicating liquor. No champagne or burning fluid is allowed in the college building.—Exchange.

### FEATURE WRITER SUMS UP HOLIDAY REACTIONS

(CONTINUED FROM PAGE ONE)

cat, ride, and gossip. Perhaps a bit of study will mix with it in the odd moments of holiday boisterousness. If the staff is at a loss to name this the writer would suggest as a title "The Examined Holiday Advisory Miscellany."

## KNOW YOUR FACULTY

DEAN P. P. BOYD

Paul Prentice Boyd, the son of Milton and Florence Boyd, was born in Cameron, W. Va., February 26, 1877. He received his A. B. degree from Oberlin College in 1898 and taught in the public schools the following year at Isle St. George, Ohio. For the next five years he was professor of mathematics and astronomy at Park College, Parkville, Mo., while in 1905-06 he had a fellowship in mathematics at Cornell, from which institution he received his M. A. degree in 1907 and Ph. D. in 1911. From 1906 to 1912 he was professor of mathematics at Hanover (Ind.) College. In 1912 Dean Boyd came to the University of Kentucky as professor of mathematics and was chosen head of

the department the following year, in which position he held until 1917, when, on the retirement of President Barker, he was elected Acting President to serve until a president could be obtained. At the same time he was chosen Dean of the College of Arts and Sciences to succeed Dean A. M. Miller, and was elected by the faculty to represent the College of Arts and Sciences on a joint committee of trustees and faculty to elect a new president. Dean Boyd is a fellow of the American Association for the Advancement of Science, a member of the American Mathematics Society, American Association of University Professors, National Educational Association,

Kentucky Educational Association, Kentucky Academy of Science, of which he was president in 1919-1920, and Sigma Xi, honorary scientific society. He is a Kewanee, a Mason and a member of the Presbyterian church. Dean Boyd is also the author of the Boyd-Davis & Rees Analytic Geometry and is a contributor to various magazines on educational subjects. Dean Boyd married Miss Cleona Bell Matthews, of Parkville, Mo., and has two daughters, Miss Virginia Boyd, a senior in the College of Arts and Sciences, University of Kentucky, and Miss Martha Elizabeth Boyd, a student of the Lexington Senior High school. He resides at 119 Waller Avenue, Lexington.

### Here's Your Chance

Kernel Will Give Theater Pass Free Each Week

Someone once said, "it pays to advertise," all of which may be all right so far as we are concerned. The Kernel wishes to say, however, that "it will pay someone to read The Kernel advertisements." The university's one name will be printed in an ad on one of the pages of The Kernel each week and if, on discovering his name, he (or she) will call at The Kernel office he will be presented a double pass to the Kentucky Theater to be used as he sees best. You may be the ticket winner this week, or perhaps next week—just read The Kernel ads, and make the Goats do it.

We see that among the various other clubs at Auburn College the students have an "A" club.

A chain of alumni hotels throughout the country is the newest and most unique movement started by the Inter-collegiate Alumni Extension Service, Inc. Eighty-four colleges and universities have joined the movement and 33 hotels have already been secured for the purpose.

The girls' rifle team at the University of Maryland recently defeated the boys' team in a shooting match by the score of 498 to 497 out of a possible score of 500. Looks good for the weaker sex.

We learn from The Tower of Catholic University, that the word "campus" dates back to the Roman days. It was then applied to a vast space in or about the city, and used for shows, public combats, etc. In the year 60 B. C., it was limited to the section between the Tiber and the Via Lata, and later it became a public patrician ground, with beautiful paths, gardens, many edifices and public buildings. After the reign of Adrian it received the connotation that it has retained to the modern day.

Dating from 2356 B. C., a butcher's bill for three lambs delivered to the temple the second day of the month is the oldest "book" in the Pennsylvania University library. The relic is actually a small pillow-shaped stone on which the letters are inscribed in the cuneiform or wedge-shaped form of writing. This curio was found a few years ago at Jolika, in central Babylonia. It is now on display at the library in Philadelphia.

Dot—"I've fixed Kitty so she will answer my letter at once." Charlotte—"How did you do it?" Dot—"I wrote her a lot of gossip and forgot to send the middle pages."

## GIRLS TO HAVE RIFLE MATCHES

(CONTINUED FROM PAGE ONE)

Poage; sophomore, Elizabeth Dupree; junior, Geneva Rice; senior, Bessie Broughton.

This is the first attempt at the university in the sponsoring of intramural rifle matches for university women. There have been women rifle teams representing the university in inter-collegiate contests at various times, the last such team being organized in 1923.

### PROFS ATTEND MEETINGS DURING XMAS HOLIDAYS

(CONTINUED FROM PAGE ONE)

the convention of the Modern Languages Society and the annual meeting of the Dialect Society.

Dr. J. C. Jones, head of the department of political science and Prof. A. Vandebosch, associate in the same department, attended the meeting of the American Political Science Association in St. Louis, December 28, 29 and 30.

Dean Edward Wiest, of the College of Commerce, went to St. Louis during the holidays to attend the American Economics Association. He was accompanied by Simeon E. Leland, professor of economics, Walter W. Jennings, professor of economics, Paul C. Taylor, assistant professor of accounting and R. D. McIntyre, associate professor of marketing and salesmanship.

Dean William S. Taylor, of the College of Education, read a paper on "Qualifications of a Commercial Teacher" before the National Commercial Teachers Federation in Chicago on December 29.

Dr. Paul C. Taylor also read a paper before the American Association of University Instructors in Accounting, which convened at St. Louis December 28 to 31.

Dr. Jesse E. Adams, in addition to addressing the American Association for the Advancement of Science also represented the university in the American Association of University Instructors in Philadelphia. Dr. Scherago attended the Society of American Bacteriologists which met in Philadelphia at the same time as the science meeting.

Prof. W. R. Sutherland, of the public speaking department, attended the National Association of Teachers of Speech which was held in Chicago December 28, 29 and 30.

Prof. Enoch Grehan, head of the department of journalism, attended a meeting of journalism professors in Columbus during the holidays.

### U. K. STUDENTS ATTEND NATIONAL CONFERENCE

(CONTINUED FROM PAGE ONE)

liott, Union Theological Seminary, New York City; Timothy T. Lew, Peeking, China; and Howard Thurman, a Negro from Oberlin, Ohio. The theme of the conference was "What Resources has Jesus for Life Today." One interesting feature of the conference was the international teas to which the foreign students were hosts. During the entertainment they played, sang and gave readings in their respective tongues. Displays were made of the products of the various countries represented. During the afternoons informal discussions of various problems of interest were held in which all the delegates participated. Trips to the different social and industrial centers of the city were also made. One of the most impressive features of the conference was a pageant, "A Quest for Truth," which was given twice, showing the comparative religions of the countries represented. The conference which was reported to have been a complete success, was enjoyed by all who were in attendance.

Freshmen at Kenyon College must jump over the post at the entrance of the campus when they wish to enter the college grounds.

### ROMANY OPENS TICKET CAMPAIGN

(CONTINUED FROM PAGE ONE)

son ticket, a reduction of 25 per cent will be given. \$5 for Double Tickets. It has been announced that the double season ticket will be sold for \$8. Several contests to stimulate the student campaign are being sponsored by the Romany. Each student selling 15 or more season tickets will be given a ticket without cost. In addition double season tickets will be given to the two men and women students selling the most tickets. Members of the student body are being canvassed individually and organizations are being addressed by those interested in the Romany campaign to give an opportunity to all to purchase a ticket. The date for the opening play and the name of the play which will be presented has not been definitely selected. The season will open during the early part of February and several plays are under consideration. Excellent progress has been made

A roller skating contest began the two-day homecoming celebration at the Ohio State University.
