FOREWORD

The Kentucky High Schools 1972-73 Bulletin contains pertinent data relating to secondary education in all high schools within the state.

Included is information which clearly demonstrates increasing efforts to meet our responsibilities in secondary education.

As these responsibilities continue to grow, we hope that this publication will provide assistance to those working for improved educational opportunities.

LYMAN V. GINGER
SUPERINTENDENT OF PUBLIC INSTRUCTION

KENTUCKY HIGH SCHOOLS — 1972-73

Kentucky public and private high schools are classified and accredited by the State Board of Education. This requirement is set forth in the law which requires that each school district in the state provide an accredited twelve-grade program and that rules and regulations be adopted governing the quality of this program. The law also provides that the "Superintendent of Public Instruction shall annually prepare or cause to be prepared and submit for approval and publication by the State Board of Education a list of all public and private high schools or other secondary schools in the state, showing their classifications." Accredited classifications are given each year by official action of the Kentucky State Board of Education on recommendations of the staff in the Division of Supervision - Accreditation - Organization State Department of Education. The Committee on Secondary schools has worked in close cooperation with the Instructional staff in an advisory capacity on arriving at the recommended ratings.

This year there are 400 high schools. Table I which follows shows the number of schools classified according to the type of organization and the controlling authority under which they operate.

Of the 400 schools operating, 337 are high schools offering a Program of Studies through the twelfth grade, and are considered complete high schools. The complete high schools show a decline from year to year which means that the high schools are becoming larger making it practicable to offer a broader Program of Studies for the youth of the State.

Table II shows the number of complete high schools and the change in number for a fifteen-year period from 1958-59 to 1972-73. In this period of time, the number of high schools have decreased from 479 to 337 or 142 fewer than existed 15 years ago.

The common type of high school organization conforms to either a six-year high school, grades 7-12; or a four-year high school, grades 9-12. This year there are 86 six-year high schools and 217 four-year high schools. Last year there were 91 six-year high schools and 221 four-year high schools. By far the greatest number of these schools are organized as grades 9-12.

In Table III, there is an accumulation of information concerning the number of high schools representing the growth since 1963-64 to 1972-73. It is interesting to notice that since the school year of 1963-64 when there were 483 schools that there are now

only 400 or a decrease of 83 schools in this period of time. This is evidence that the high schools of the Commonwealth of Kentucky are becoming larger and therefore offering the potentials of providing a stronger program of instruction.
