

Suffocate wood at top
Fine letter

Sunday

Nov 27/87

Dear Mr Clayton.

Books all right - Thanks.

I am in the thick of the *Botherie* today

It is uncommonly good.

Have you done anything to the initials I sent

you? My designing powers are limited but I

have been trying to work out two panels to be

done in repoussé work for some bookshelves -

Something like this. —

One is alright - But the

fine Arts want something X

They have to represent my tastes

• Can you help me?

I should be awfully obliged if you
could.

The enclosed filled up half an hour
last night.

We are too busy as preachers now - I shall
be till Christmas to give me much time for
revising. However I have two or three
pieces in the paper, one an ambitious effort
in blank verse. I don't know whether this
definition is original - it's found not - but it
came into my head the other day.

Blank Verse is using six words to say one.

With kind regards,

Yours very truly

Edward V. Lucas
