

W. H. Patterson

William P. March 1807

My dear Hannah

I am apprehensive that you are expecting a letter from me this day, & as you cannot again hear from William till Monday I am disposed to write tho! I have nothing more to communicate than the important fact that we are all charmingly, & that I am myself quite recovered - We have been to dinner at my Mother's to meet Mr. & Mrs. A. Patterson & the Nieces - There was nothing very brilliant, & the greatest part of the conversation & its life was derived from the rather quaint

observations, which some Benedictines
think themselves entitled to make upon
Miss Beatrice - Jay is a very good boy &
I have only the wish that William
may be his father's son - sure that because
and, his little engaging manner, he wins
our right good will - We hope you are
enjoying your visit & hope to hear tomorrow
- Little dear Jay is sitting near to me & playing
with the sand & water glasses - I sincerely know
the probable event of the book society, &
for we are too much of dependents we to
agree about it - Many projects, many objections
but none to my being my dear Hannah
I am sure you of the fond love of your
faithful subject. Yours &c. W. A. Patterson
My love to William & all friends - My father & mother love

Dear Mama
Hope dear mamma will, thank
dear mamma for things I mamma sent me, thank
uncle Howell for his about horses - William
got on in William's letters - Pray mamma
you send me a parcel on Monday my
birthday, I pay carriage, with please Grand
Pa put something in, and a letter -
- My love to William - Duty to Uncle
Howell, Grand Pa & Grand Ma Aunt Betsey
Yours truly
Wm. A. Patterson

My father intend writing early in next week but
his time is fully occupied with his visitors
who have her on Sunday - Pray thank your
father for his information respect: the
parcel of which I hope to hear some
thing, from Maloon - adieu

6. March 1807

Wm H. E. Patterson Esq

All well - say adieu to a hand from
you on this beautiful day & is a day
talking of you - I am your
affectionate friend
