

UNIVERSITY OF KENTUCKY

FACT BOOKLET

2002-2003

## January 2003

I am pleased to provide you with this profile of facts and statistics about the people and programs at the University of Kentucky. The 2002-2003 Fact Booklet contains a summary of current facts about enrollment, retention, degrees conferred, tuition and fees, faculty salaries, and other items of interest to policy makers and citizens alike. Also included is a summary of the University of Kentucky's 2002-2003 Operating Budget.

The University of Kentucky achieved several academic milestones during the past year. For the first time, *U.S. News & World Report* ranked the university among the top 50 public universities in the nation. We succeeded in attracting the largest class of first-year students in our history. Many of these students arrived at the university with very strong academic credentials, which reflects, in part, the benefits of our new Governor's Scholars Scholarship Program and Legacy Tuition Program. We also witnessed a record number of students enrolling in graduate programs. Stepped-up efforts to improve graduation rates are also showing signs of success. Last year, the percentage of students graduating within six years was the highest in our institution's history.

In the area of research, the University of Kentucky moved up two slots in the annual rankings published by the National Science Foundation. The university is currently ranked 47<sup>th</sup> among all research universities and colleges in research expenditures. The university reported over \$200 million in research expenditures for the fiscal year 2000, an increase of 16 percent over the previous year. In recent years, the university has surpassed its previous records in the number of new grants and contracts acquired by faculty.

Unfortunately, faculty salaries continue to lag well behind our benchmark institutions. In 2001-2002, the average salary paid to faculty was 10 percent below the median of our benchmarks. Our vision of a top-20 public research university hinges upon our ability to attract and maintain high quality faculty members. Increasing faculty salaries will be difficult to accomplish given Kentucky's poor economic picture. We must, however, find a way to reward our faculty for their expertise and hard work.

Several much-needed buildings were constructed during the past year, and work continues on a number of other capital

projects. The Health Sciences and the Ralph C. Anderson Mechanical Engineering buildings were recently completed. Among the projects under construction are the Agricultural Plant Sciences facility, the Biomedical/Biological Sciences Research Building, the UK Center for Rural Health, and the Linda and Jack Gill Heart Institute. All of us are anticipating the reconstruction and improvements planned for the Administration Building following the disastrous fire in the spring of 2001.

During the past year, the University of Kentucky has been engaged in systematic planning efforts in its quest to become one of the nation's top-20 public research institutions. The Futures Task Force has assessed the current status of our scholarly and educational strengths and recommended areas where the university should invest new or reallocated resources. A university-wide task force has recommended integrating the Medical Center into the Provost Model, an organizational change that will help us be more competitive in the health care marketplace and allocate fiscal resources in a more effective manner.

Our legislators, educators, and citizens should know whether or not their investments in the University of Kentucky are paying off. The Top 20 Task Force has recommended criteria and measures that the university will use to assess progress toward our goal of becoming one of the country's premier public research institutions. Of special note, the task force has proposed measures that will monitor our success in solving many of Kentucky's "Uglies," including poverty, illiteracy, and a myriad of health-related ailments that afflict our citizens. The work of the Top 20 Task Force provides the framework for the university's next strategic plan—The Dream and The Challenge. The University of Kentucky is dedicated to improving the lives of all Kentuckians. We support the Commonwealth's strategic agenda for an educated citizenry, a thriving economy, a safe environment, a healthy population, and a culturally enriched society. Ultimately, we shall judge our success by the degree to which we make this vision a reality for all the citizens of our state.

Sincerely,

Lee T. Todd, Jr.  
President

## VISION

We aspire to enhance the University of Kentucky's stature as one of the nation's great universities: *an institution recognized nationally and internationally for excellence in teaching, research, and public service, and a sustaining resource for the intellectual, social, cultural, and economic development of the Commonwealth.*

## MISSION

The University of Kentucky is a comprehensive, public, land grant university dedicated to preparing students for an increasingly diverse and technological world, and to improving the lives of people in the Commonwealth, the nation, and the world through teaching, research, and service.

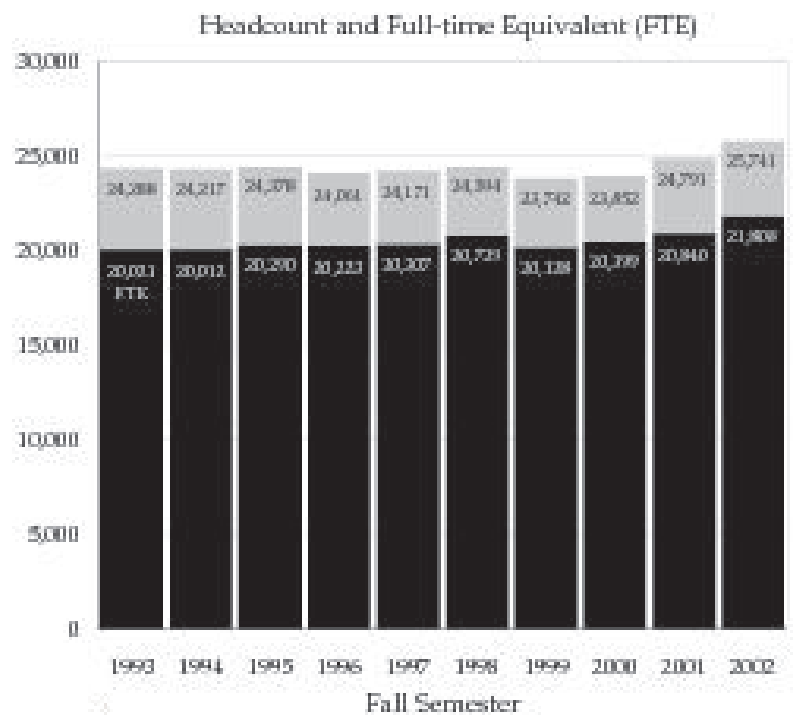

- *Our instructional mission includes undergraduate, graduate, postgraduate, professional, and lifelong education informed by scholarship and research, and guided by a spirit of integrity and mutual respect.*
- *Our research, scholarship, and creative activities promote human and economic development through the expansion of knowledge and its applications in the sciences, social sciences, arts, humanities, business, and the professions.*
- *We have a unique responsibility for outreach and public service to support the citizens of the Commonwealth. We collaborate with our educational, professional, business, health care, and agricultural partners here and abroad to disseminate, share and apply knowledge.*

— UK Strategic Plan, adopted by the Board of Trustees, May 1998

Microforms	6,202,256	1,570
Audio-visual Materials	82,722	2,804

In addition to the above, the Library's collections include 235,036 maps; 5,750 Oral History program interviews; 226 current state, national, and international newspapers; the University Archives and Records Program; Audio-visual Archives; the Wendell H. Ford Research Center and Public Archives; the Bert T. Combs Appalachian Collection, including the Appalachian Regional Commission Archives; and the W. Hugh Peal Collection of 19th century English and related literature. The library is a regional depository for U.S. government publications and is also a depository for European Communities and Canadian publications, British Parliamentary Papers, Kentucky government publications, and technical reports from federal agencies, all selectively collected. Numerous CD ROM and online databases are accessible in the main and branch libraries. Library sites include the William T. Young Library and 15 branch libraries. The Voyager library system provides an online catalog for the holdings of all university libraries.
