

The Living Room

2

The Providence Place living room is a study in classic design using an inspired assemblage of English, Italian, and old world furnishings. Wonderful over-stuffed, comfortable upholstery throughout the space beckons you into the room. Here you can enjoy the many beautiful fabrics, antique prints, accessories, and hand-painted drapery hardware. Additional details include the mirrored eglomise' coffee table and the visual element of the contrasted color of the baseboard. These details will add to your appreciation of the living room and showcase tour.
