PRINTED BY JOHN P. MORTON AND COMPANY, 156 W. MAIN STREET. 1873.

KENTUCKY UNIVERSITY.

GENERAL PLAN OF THE UNIVERSITY.

Kentucky University embraces several Colleges, each under the immediate government of its own Faculty and Presiding Officer. The general supervision of the University as a whole is committed to the Regent, who is elected from among the Curators, and is *ex-officio* chairman of the Executive Committee. He is the representative of the Board of Curators before the donors and the public, and it is his duty, in connection with the Executive Committee, to see that the general laws and statutes of the University are faithfully executed.

Each College is divided into several Schools or Departments of Study; and each School is under the immediate government and instruction of a competent Professor, assisted, when necessary, by subordinate Instructors and Tutors.

The Colleges of the University are severally styled—

- 1. The College of Science, Literature, and the Arts.
- 2. The Agricultural and Mechanical College of Kentucky.
- 3. The College of the Bible.
- 4. The Normal College (not yet organized).
- 5. The Commercial College.
- 6. The College of Law.
- 7. The College of Medicine (not yet organized).

While the course of study and instruction in each College is complete, yet the four first named above are so associated that a student, regularly matriculated in any one of them, may have the benefit of instruction in the others without additional charge for tuition.

There are some features in the plan of Kentucky University which are peculiar. The general superintendence of the whole Institution by the Regent, who is not connected with any Faculty, but who is the representative of the Curators and Donors, gives unity to the whole plan; while the distribution of the executive labor and responsibility among the Presiding Officers of the several Colleges secures efficiency in every department. The several Colleges thus associated furnish the most liberal provisions for education, whether collegiate or professional, general or special; and that too without the expense and embarrassments that would result from a duplication of professorships. If a young man desires to pursue a classical course exclusively, he can do so, and receive a certificate of graduation for the same. If he desires to devote himself to Science or Arts, to receive a good Commercial and Business Education, to graduate as a Civil Engineer, or to study Mining or any other specialty, he will enjoy the like facilities without additional expense. Should a student desire to reduce the ordinary expenses of board and tuition, the Agricultural College presents to him the opportunity for laboring, at a reasonable compensation, on the College Farm or in the Mechanical Shops, while he is receiving thorough instruction in Science and Literature. This union of study and labor is thus not only economical, but also conservative of health and good morals.

The Agricultural and Mechanical College also embraces a thorough course of instruction in Military Tactics, which is made valuable as a means of physical development, as well as of collegiate discipline.

This general plan of the University, with its peculiar features of government and discipline, with its associated Colleges and their separate Schools, and with its various Elective Courses of Study, including Industrial Education, with all its economic arrangements, makes it emphatically an Institution for *the People*.

GENERAL GOVERNMENT.

The general government of the University is vested in the Board of Curators, which consists of not less than thirty members, representing the donors, under the conditions prescribed in the charter.

The delegated and representative powers of the Corporation are vested in the Regent and the Executive Committee. This Committee is composed of the Regent, and four other Curators chosen annually by the Board.

For purposes of counsel and co-operation in regard to the general interests of the University, the Faculties of the several Colleges assemble as one body, under the name of the Senate of the University; but the immediate government of the students of each College is committed to the Faculty thereof—each student being amenable to the Faculty of that College to which he belongs by virtue of his matriculation.

The Board of Visitors of the Agricultural and Mechanical College of Kentucky consists of six members, who are appointed by the Governor of the state, with the advice and consent of the Senate of Kentucky, and whose powers and duties are prescribed in the Act of the General Assembly establishing this as one of the Colleges of the University.

ROBERT MILLIGAN, A. M.,

Presiding Officer of the College of the Bible, and Professor of Sacred Literature.

HENRY H. WHITE, A. M.,

Presiding Officer of the College of Arts, and Professor of Mathematics and Astronomy.

JAMES K. PATTERSON, A. M.,

Presiding Officer of the Agricultural and Mechanical College, and Morrison Professor of Civil History and Metaphysics.

MADISON C. JOHNSON, LL. D.,

Presiding Officer of the College of Law, and Professor of Evidence, Pleading, and Practice.

HORACE P. PERRIN, A. M.,

Presiding Officer of the Commercial College, and Professor of Commercial Law and Ethics.

JOHN H. NEVILLE, A. M.,

Professor of the Greek Language and Literature.

ROBERT PETER, Ph. D., M. D.,

Professor of Chemistry and Experimental Philosophy.

JOHN W. McGARVEY, A. M.,

Professor of Sacred History and Sacred Didactics.

JOHN B. HUSTON, A. M.,

Professor of Common and Statute Law.

TAMES O. HARRISON, A. M.,

Professor of Equity Jurisprudence, and Constitutional and International Law.

JOSEPH D. PICKETT, A. M.,

Professor of English Literature and Sacred History.

Professor of Geology, Zoölogy, and Botany.

ALEXANDER R. MILLIGAN, A. M.,

Professor of the Latin Language and Literature.

JOHN SHACKLEFORD, JR., A. M.,

Professor of English Literature in the Agricultural and Mechanical College.

S. M. SWIGERT, U. S. A.,

Professor of Military Tactics, and Civil Engineering in the Agricultural and Mechanical College.

D. G. HERRON, A.B.,

Principal of Preparatory Department of the Agricultural and Mechanical College.

FRANÇOIS M. HELVETI,

Professor of French and German.

JAMES G. WHITE,

Adjunct Professor of Mathematics.

WILLIAM H. MARQUAM,

Adjunct Professor in the Commercial College.

OTHER OFFICERS AND INSTRUCTORS.

E. DENNING LUXTON, Secretary to the Regent.

JAMES CLARK,

Superintendent of the Mechanical Department.

Superintendent of the Horticultural Department.

COLLEGE

· OF

SCIENCE, LITERATURE, AND THE ARTS.

1872-73.

COLLEGE OF SCIENCE, LITERATURE, AND THE ARTS.

Course of Instruction.

1. School of the English Language and Literature.

PROFESSOR PICKETT.

FRESHMAN CLASS.

FIRST TERM.—Quackenbos' Rhetoric; Exercises in Composition and Elocution. SECOND TERM.—Quackenbos' Rhetoric; Exercises in Composition and Elocution.

JUNIOR CLASS.

FIRST TERM.—Kames' Elements of Criticism; Essays, Criticisms, and Declamations.

SECOND TERM.—Whately's Logic, with Practical Exercises.

SENIOR CLASS.

FIRST TERM.—Whately's Rhetoric, with Practical Exercises.

Second Term.—Shaw's Manual of English Literature, with Lectures; Readings in the English Classics, with Critiques; Theses, Orations, and Forensic Disputations.

11. School of Mental and Moral Philosophy.

PROFESSOR PATTERSON.

FIRST TERM.—Metaphysics; Hamilton's Lectures.

SECOND TERM.—Moral Philosophy; Blackie's Four Phases of Morals; Alexander's Lectures.

III. School of Mathematics.

PROFESSOR WHITE.

FRESHMAN CLASS.

FIRST TERM.—Towne's Algebra.

SECOND TERM.—Davies' Legendre's Geometry, Books I., II., III., IV., V., VI.

SOPHOMORE CLASS.

FIRST TERM.—Davies' Legendre's Geometry, Books VII., VIII., IX.; Davies' Plane Trigonometry and Mensuration.

SECOND TERM.—Loomis' Surveying and Navigation; Loomis' Analytical Geometry.

JUNIOR CLASS.

FIRST TERM.—Loomis' Calculus.

SECOND TERM.—Snell's Olmsted's Mechanics.

SENIOR CLASS.

FIRST TERM.—Davies' Spherical Trigonometry; Snell's Olmsted's Astronomy, begun.

SECOND TERM.—Astronomy, completed.

IV. School of the Greek Language and Literature.

PROFESSOR NEVILLE.

FRESHMAN CLASS.

FIRST TERM.—The Iliad; a daily Exercise in writing Greek. SECOND TERM.—Herodotus; the Exercise continued.

SOPHOMORE CLASS.

FIRST TERM.—Thucydides; Hadley's Grammar.

SECOND TERM.—Thucydides; the Olynthiacs and the Philippics of Demosthenes.

JUNIOR AND SENIOR CLASS.

FIRST TERM.—Selections from the Republic of Plato; Greek Composition.

SECOND TERM.—The Antigone of Sophocles; the Iphigenia in Tauris of Euripides; the Knights of Aristophanes.

TEXT-BOOKS AND BOOKS OF REFERENCE. — Owen's Xenophon's Anabasis; Weale's Lucian; Owen's Homer's Iliad; Arnold's Thucydides; Blakesley's Herodotus; Heslop's Olynthiacs and Philippics of Demosthenes; Smead's Antigone of Sophocles; Green's Knights of Aristophanes; Crusius' Homeric Lexicon; Yonge's English-Greek Lexicon; Goodwin's Greek Modes and Tenses; Long's and Kiepert's Maps.

V. School of the Latin Language and Literature.

PROFESSOR MILLIGAN.

FRESHMAN CLASS.

FIRST TERM.—Five Books of Virgil's Æneid, with Exercises in Scanning; Latin Prose Composition; History of Rome.

SECOND TERM.—Two Books of Livy's History; Latin Prose Composition; History of Rome.

JUNIOR CLASS.

FIRST TERM.—Selections from Horace and Lucretius, with Scanning; Latin Prose Composition.

SECOND TERM.—Portions of Tacitus, with Exercises in written Translation; a Comedy of Plautus or Terence; Latin Prose Composition, with the study of Synonyms.

SENIOR CLASS.

FIRST TERM.—One of Cicero's Philosophical Works, with Exercises in Retranslation.

SECOND TERM.—Select Satires of Juvenal; Selections from Catullus.

Text-books and Books of Reference.—Anthon's or Frieze's Virgil's Æneid; Chase's Livy; Anthon's or Macleane's Horace; Munro's Lucretius; Anthon's Tacitus; Harrington's Plautus or Weale's Terence; Anthon's Cicero de Officiis; Anthon's Juvenal; Weale's Catullus; Arnold's Latin Prose Composition; Crombie's Gymnasium; Liddell's History of Rome; Madvig's Latin Grammar; Smith's English-Latin Lexicon; Andrews' Latin-English Lexicon; Anthon's or Smith's Classical Dictionary; Smith's Dictionary of Greek and Roman Antiquities; Becker's Gallus; Long's Classical Atlas, or Kiepert's Atlas Antiquus.

VI. School of Sacred History and Evidences of Christianity.

PROFESSOR PICKETT.

JUNIOR CLASS.

FIRST TERM.—Old Testament History, begun.
SECOND TERM.—Old Testament History, continued.

SENIOR CLASS.

FIRST TERM.—New Testament History.
SECOND TERM.—Evidences of Christianity.

TEXT-BOOKS.—English Bible; Milligan on Reason and Revelation.

VII. School of Chemistry and Experimental Philosophy.

PROFESSOR PETER.

FIRST TERM.—Elementary Chemistry and Physics; instruction given by daily lectures, fully illustrated by experiments, specimens, etc., and impressed by daily examination. Considerable attention given to the application of these branches of science.

SECOND TERM.—Lectures on Chemistry, illustrated by experiments; Elementary Physics, with experiments.

VIII. School of Natural History.

PROFESSOR SWIGERT.

JUNIOR CLASS.

FIRST TERM.—Human Anatomy and Physiology. SECOND TERM.—Botany.

SENIOR CLASS.

FIRST TERM.—Zoölogy, commenced.
SECOND TERM.—Zoölogy, finished; Geology and Paleontology.

IX. School of Civil History.

PROFESSOR PATTERSON.

JUNIOR CLASS.

FIRST TERM.—Schmitz's Manual of Ancient History.

SECOND TERM.—Weber's Outlines of History; History of the United States.

SENIOR CLASS.

FIRST TERM.—The Student's Hume; the English Constitution.

SECOND TERM.—Yonge's Three Centuries of Modern History; Constitution of the United States; Political Economy.

X. School of Modern Languages.

PROFESSOR HELVETI.

JUNIOR CLASS.

		German.—Otto's Grammar, Part I.; Exercises.
7	FIRST TERM	French.—Fasquelle's Grammar to Lesson 100; Exercises.
		Italian.—Cuore's Grammar; Foresti's Reader.
		Spanish.—Schele de Vere's Grammar; Velasquez's Reader.
		German.—Otto's Grammar, Part I.; Otto's Reader.
	Second Term	French.—Fasquelle's Grammar; Fasquelle's Reader.
		Italian.—Cuore's Grammar; Foresti's Reader; Tasso.
		Spanish.—De Vere's Grammar; Velasquez's Reader; Don

SENIOR CLASS.

German.—Otto's Grammar, Part II.; Schiller's Jungfrau von Orleans, Wilhelm Tell, or Maria Stuart.

French.—Borel's Grammaire française and Cours de thêmes française; Em. Souvestre's Un philosophe sous les toits; Erckmann-Chatrian's Le Conscrit de 1813.

Italian.—Tasso; Goldoni. Spanish.—Don Quijote.

Quijote.

German.—Whitney's Grammar; Lessing's Nathan der Weise; Goethe's Herrman and Dorothea; Composition and Conversation in German.

SECOND TERM....

FIRST TERM.....

French.—Borel's Grammaire française; Racine's Athalie, or Molière's Le Misanthrope; Modern French Plays; Composition and Conversation in French.

Italian.—Dante.
Spanish.—Calderon.

SESSION, TERMS, COMMENCEMENT.

The collegiate year consists of a single session of nine months, divided into two equal terms. It begins on the second Monday in September, and ends on the second Thursday in June, which is Commencement-day.

REQUISITES FOR ADMISSION.

Every candidate for admission must present satisfactory evidence of good moral character; and, if previously connected with any other College, a certificate of honorable standing in it. He must be at least fourteen years of age for admission into the Freshman class of any School; for advanced standing a corresponding increase of age is required.

To enter the Freshman class of the Schools named below, he must give evidence of a fair acquaintance with the following Preparatory course, or its equivalent:

SCHOOL OF THE ENGLISH LANGUAGE.—English Grammar; Composition. SCHOOL OF MATHEMATICS.—Arithmetic; Algebra to Quadratic Equations.

School of the Greek Language.—The whole of Kühner's Elementary Grammar, the English Exercises to be written in Greek, with the accents; the whole of Xenophon's Anabasis; Selections from Lucian's Dialogues.

School of the Latin Language.—Bingham's Latin Grammar, the English Exercises to be written in Latin, with the quantities marked; Three Books of Cæsar's Commentaries; Sallust's Conspiracy of Catiline; Three Orations of Cicero.

For admission into the Junior class of the School of Natural History a knowledge of Organic and Inorganic Chemistry is required; and into the Junior class of the School of Civil History a knowledge of Ancient and Modern Geography.

A Professor may, at his discretion, admit into his School a student on probation for a reasonable length of time, upon condition that if he shall fail to exhibit a satisfactory degree of diligence or proficiency his connection with the school shall cease.

A candidate not prepared for the Freshman class of any School may enter the Preparatory class of that School; but

Conversa-

thalie, or Composino one can be admitted into the College unless prepared for the Freshman class of at least one School.

EXAMINATIONS.

There are two classes of examinations: the first daily, in connection with the daily lecture or recitation; the second public, at the close of each term.

Immediately after an examination of either kind a number is affixed to the name of the student examined, designating the value of his performance. When perfect, the number is one hundred; when an entire failure, zero; when intermediate in merit, the proper relative percentage.

From these numbers the scholarship of each student for the term is ascertained and placed on record, and a report sent to his parent or guardian. This report also contains an estimate, on the same scale, of the student's conduct in the recitation-room, his general conduct or conduct outside the recitation-room, his industry, and his punctuality.

GRADUATION, DEGREES.

A student may graduate in any School on the following conditions:

- I. That he shall have been a member of that School at least one year, and shall have completed in a satisfactory manner the studies thereof, or what the Professor in charge may deem a fair equivalent; the record of his scholarship for each term being not less than seventy-five per centum of the scale on which one hundred denotes perfection.
- 2. That he shall have habitually observed the rules of the University.

Graduation in all the Schools, except in that of Modern Languages, is required for admission to the regular Degree of Bachelor of Arts; the candidate, however, being permitted, with the consent of the Faculty, to substitute for the Calculus, red for

or the Senior Latin, or the Junior and Senior Greek, the course in the French, German, Spanish, or Italian language; or to substitute for the Calculus and the Senior Latin the course in the Hebrew as taught in the College of the Bible.

A student may be admitted to the regular Degree of Master of Arts on the following conditions:

- I. That he shall have been admitted, at least one year previously, in this College, to the Degree of Bachelor of Arts.
- 2. That he shall have passed a satisfactory examination in at least three of the following languages: Hebrew, French, German, Spanish, and Italian; or in any two of these, and a course of Historical Study prescribed by the Faculty.
- 3. That he shall have paid ten dollars to the Library Fund. No honorary Degrees are conferred by any College of the University.

BOARDING.

A student can select his own boarding-house, subject in all cases to the approval of the Faculty. He can not, however, board at any house where intoxicating liquors are sold, or cardplaying or billiard-playing is practiced, or the rules of good order and decorum are, in other respects, disregarded. The cost of boarding in private families, including fuel, lights, and the use of furnished rooms, varies from five dollars to six dollars per week.

Unfurnished rooms in the College Dormitory may be occupied by students desirous of forming a club and boarding themselves; to such the cost of boarding, fuel, and lights is about two dollars per week. The expense of furnishing a room need not exceed forty dollars, or ten dollars for each of its four occupants. These rooms are assigned to applicants by the Presiding Officer in the order of application; they must be kept in a neat, cleanly condition, and at all times be subject to the inspection of any member of the Faculty. Damages' done to them must be repaired by the injurer, if known; otherwise, by the occupants.

EXPENSES.

Tuition coupon for the entire session, .	\$5 00	to	\$10	00
Matriculation Fee,			10	00
Room Fee (Dormitory),			5	00

No graduatian fee is required in any School, nor any fee for the Degree of Bachelor of Arts.

No tuition fee is required of any student in indigent circumstances, who has had at least one year's actual experience in teaching, and who designs to make it a regular profession.

All fees are payable in advance, and no deduction is made, however late in the session a student may enter.

SOCIETIES.

There are two Literary Societies regularly organized—the Cecropian and the Periclean—which have their respective halls and libraries, and which add to the facilities afforded by the School of the English Language for practice in Composition, Elocution, and Discussion.

AGRICULTURAL AND MECHANICAL COLLEGE.

The Congress of the United States, by an act passed July 2, 1862, granted to each state public lands to the amount of 30,000 acres for each Senator and Representative then in Congress, for the endowment of one or more Colleges, of which the leading object should be the promotion of the liberal and practical education of the industrial classes by furnishing instruction in all such branches of learning as relate to Agriculture and the Mechanical Arts, including Military Tactics, without excluding other scientific and classical studies. The portion granted to Kentucky amounted to 330,000 acres of land scrip; and the Legislature of the State, by an act passed January 27, 1863, accepted the grant with its conditions; and by another act, approved February 22, 1865, established the Agricultural and Mechanical College of Kentucky as one of the Colleges of Kentucky University. The Curators of the University accepted the trust with the conditions annexed; and with a full view of the responsibility thus incurred, and of the difficulties in carrying out what had hitherto been an educational experiment in this country, they hope to meet, within a reasonable time, any just expectation of the public, and make this College a success. The act of the Legislature required that the authorities of the University should raise at least \$100,000 for the purchase of an experimental and model Farm, and the erection of the buildings necessary for the various uses of the College. Through the liberality of citizens of Lexington mainly, the required amount was promptly secured by the Regent of the University. He accordingly purchased "Ashland," the home of HENRY CLAY, and the "Woodlands," an elegant tract adjoining it, and extending within the limits of the city of Lexington. The whole tract contains four hundred and thirty-three acres of first-rate land, with fine improvements. All of this property has been placed

at the disposal of the University as a site for the Agricultural and other Colleges. It is the purpose of the Regent, who has dedicated his life to the founding and upbuilding of the University, to raise as early as practicable additional means for the erection, on a liberal scale, of all the buildings necessary for carrying on the various Colleges. For the temporary uses, however, of the Agricultural College the present buildings will answer, and provision will be made for boarding, at a moderate price, a limited number of students upon the farm; while accommodations for others can be secured in the immediate vicinity.

CONDITIONS OF ADMISSION.

All applicants for admission to the regular collegiate course in the Agricultural College must be at least sixteen years of age, and must present satisfactory evidence of good moral character and industrious habits. They must, upon examination, show a fair acquaintance with the following subjects: English Grammar; Geography; Outlines of History; Ray's Arithmetic, Part III.; Ray's Algebra, Part I.

Course of Instruction.

1. School of the English Language and Literature.

PROFESSOR SHACKLEFORD.

FRESHMAN CLASS.

FIRST TERM.—Mulligan's Structure of the English Language, with exercises in Composition.

SECOND TERM.—Mulligan's Structure of the English Language, with exercises in Composition.

SOPHOMORE CLASS.

FIRST TERM.—English Lessons, with exercises in Composition.

SECOND TERM.—Kames' Elements of Criticism, with exercises in Composition.

JUNIOR CLASS.

FIRST TERM.—Sir William Hamilton's Lectures on Logic. SECOND TERM.—Day's Art of Discourse, with exercises.

SENIOR CLASS.

FIRST TERM.—Shaw's English Literature; Shaw's Specimens from English

SECOND TERM.—Chambers' English Literature.

lish

SECOND TERM.—Snell's Olmsted's Mechanics.

SENIOR CLASS.

FIRST TERM.—Davies' Spherical Trigonometry; Snell's Olmsted's Astronomy, begun.

SECOND TERM.—Astronomy, completed.

IV. School of Chemistry.

PROFESSOR PETER.

JUNIOR CLASS.

FIRST TERM.—Elementary Chemistry; instruction given by daily Lectures, fully illustrated by experiments, specimens, etc., and impressed by daily examinations. Considerable attention paid to the applications of this branch of science.

SECOND TERM.—Lectures on Chemistry, illustrated by experiments.

SENIOR CLASS.

DURING THE SESSION.—Experimental and Applied Chemistry and Chemical Physics; five Lectures a week, more thorough than during the Elementary Course, and illustrated to the greatest possible extent by experiments, models, diagrams, specimens, etc. The numerous applications of the science to Agriculture, the Arts, and Manufactures are specially indicated, and the Art of Testing in general and the Detection of Poisons considered. Organic Chemistry is discussed during the

latter part of the course, and such instruction given in the Chemistry of Vegetable and Animal Physiology as the allotted time allows.

Practical Chemistry.—Provisions will be made for instruction in Practical Chemistry, including the Chemistry of the Soil, as soon as students are sufficiently prepared.

TEXT-BOOKS.—Youman's New Class-book of Chemistry; Fowne's Chemistry for Students.

V. School of Natural Philosophy.

PROFESSORS PETER AND WHITE.

In the School of Natural Philosophy there are two classes—Junior and Senior. In the *Junior class* the object is to give the student a comprehensive general view of the department of Physics, and to familiarize him with its methods of investigation without the introduction of mathematical symbols. This class will meet the wants of those but little advanced in Mathematics, and will serve as a preparation for the *Senior class*, in which the same subjects will be studied, but with greater exactness, and with the use of mathematical demonstrations and formulæ. So that to enter this class the student must have such a knowledge of Mathematics as would fit him for the Junior class of that study in the University.

VI. School of Natural History.

PROFESSOR *

To enter this School students must have attended at least one course of Lectures upon Organic and Inorganic Chemistry, and must present a certificate of having sustained a thorough and satisfactory examination therein. Those wishing to enter any advanced class must sustain an examination upon the studies of the previous classes, or present proof of having done so elsewhere. In addition to which we have an Elementary Course in NATURAL HISTORY; and hereafter every student matriculating in the Agricultural and Mechanical College will be required to pursue one of the *Elementary* studies of the *School of Natural History*—either Botany or Zoölogy or Physiology—unless he has complied with the requirements mentioned above necessary to enter the *higher studies* of this school. In the latter case he will pursue the regular course in the order in which the sciences are here laid down, according to classes.

SOPHOMORE CLASS.

FIRST TERM.—Human Anatomy and Physiology, or the structure and laws of the human body, and the preservation of its health, both physically and mentally.

SECOND TERM.—Botany; Structural and Physiological Botany, or the anatomy and mode of life of plants, especially in reference to their cultivation and propagation; Systematic Botany, or the study of the species, varieties, races, etc., of plants, and their classification according to affinities.

*This vacancy will be filled by the opening of the next Session.

In this School will be taught Geometrical and Topographical Drawing, Tinting, Shading, and Lettering; Descriptive Geometry; Linear Perspective; Shades and Shadows; Practical Astronomy; Road Engineering; the use of Engineering Instruments; Leveling; Architectural Drawing; Geology of Mining Districts; Metallurgy; Mining Engineering; Construction of Furnaces; Determination; Mineralogy; and History of Mining Operations.

TEXT-BOOKS.—Church's Descriptive Geometry; Mahan's Civil Engineering and Stereotomy.

X. School of Military Tactics.

PROFESSOR SWIGERT.

The course will comprise Practical and Theoretical Instruction in the Tactics of the different Arms, Military Discipline, including the duties of Guards, Sentinels, etc., in accordance with the Tactics and Regulations prescribed for the United States Army.

METEOROLOGICAL OBSERVATORY.

A Signal Service Station of the War Department has been opened during the past year. Facilities are given for instruction in

Meteorology.

FIRST TERM.—Loomis' Meteorology, fully illustrated with standard instruments, including Barometers, Thermometers (Maximum and Minimum), Hygrometers (Wet and Dry-bulb Thermometer), Anemometers (with self-registering attachment), etc.

SECOND TERM.—Buchan's Meteorology, illustrated with complete set of Apparatus.

Telegraphy.

A department for instruction in Telegraphy, under charge of a competent operator, has been provided in the Agricultural and Mechanical College. Fees for a full course of instruction in this branch, ten dollars. All the students of the University may avail themselves of this provision. It must especially commend itself to matriculates of the Commercial College. One or two hours per day will make the learner sufficiently proficient to take charge of an office in six months. Quick perception of time, as in music, good memory, and steady nerve, with a competent knowledge of the rudiments of English, are all that is required for success in this department of study. With these the degree of proficiency attained will of course be proportional to the time applied to practice, all the facilities for which are afforded by the requisite amount of apparatus and wire connections.

Special instruction given in putting up batteries, use and management of ground wires, lightning arresters, galvanometers, etc.

STATE STUDENTS.

By a provision of the act incorporating the Agricultural and Mechanical College, each Legislative District in the State is entitled to send to this College, free of charge for tuition, three properly prepared students, who also have a right to receive, free of charge for tuition, the benefit of instruction given in any College of the University, except the Colleges of Law and Medicine and the Commercial College.

The law requires that the selection of the students shall be made by the Justices of the Peace in each Legislative District. This should be done at the regular meetings of the County Court, and the orders appointing them duly certified by the Clerk.

The appointees should be at least sixteen years of age, of good character and industrious habits, and should be versed in the elements of the English branches. It is earnestly recommended that the system of competitive examinations be adopted, and that one or more competent teachers be selected in each District as a Board of Examiners, thus giving all, especially the poor young men, a chance for the state honor.

n

ees

nd

ess

ich

nd

The recommendation of the County Judge, together with that of a majority of the magistrates, until the next meeting of the Quarterly Court, will entitle them to admission.

State students have priority in choice of rooms, but to exercise this privilege they should be present at the beginning of the session.

MILITARY INSTRUCTION.

The act of Congress granting the land scrip requires any Agricultural College receiving the benefit of the grant to give instruction in Military Tactics. In accordance with the provisions of this act, regular instruction is given to the students of this College in the Infantry Drill and Military Discipline and Police, in accordance with the regulations prescribed for the United States Army.

A uniform of cadet-gray cloth, such as is usually worn at the Military Schools in the country, is required, and can be obtained by students on their arrival at the College at a cost not exceeding that of an ordinary suit.

THE LABOR SYSTEM.

All students of the Agricultural and Mechanical College are required to spend a portion of their time in active labor, either in the Agricultural, Horticultural, or Mechanical Departments. They are distributed into these several departments according to their respective qualifications, and as far as practicable in harmony with their wishes and purposes in life.

Students who wish to defray a portion of their expenses while acquiring their education, are required to labor four hours upon the Farm or in the Shops, six days in the week. Students who apply for admission into the Shops must satisfy the Superintendent that they intend to remain in the Mechanical Department of the Institution not less than three years. The rates of compensation in these departments will vary from five to ten cents per hour during the first year, and from ten to fifteen cents per hour during the second and third years, according to industry and proficiency. Job-work is sometimes assigned to students, for which they receive wages according to stipulation.

All other students are required to work two hours per day, three days in the week, in the Horticultural Department, without compensation. All students applying for admission are left free to elect either the compensated or uncompensated labor.

0

th

ap

ole

Bi

During the Winter months out-door labor may be suspended in whole or in part by the Faculty, upon recommendation of the Superintendents.

Students desiring to remain upon the Estate during the vacation will find a pleasant home, and will have an opportunity of laboring a part of the time on the Farm or in the Shops. A Summer School will be provided during vacation for the benefit

of students wishing to prosecute their studies. Such students, however, will be required to matriculate, and are subject to the regulations of the Institution during the vacation.

Students in these working divisions are arranged in two classes, one laboring in the forenoon and the other in the afternoon, thus alternating labor and study.

Club-houses situated convenient to labor are provided upon the estate for such as wish to adopt a cheap system of boarding.

AGRICULTURAL DEPARTMENT.

The Ashland Estate is divided into the necessary plats of pasture and tillable lands for the handling of the various breeds of stock, and for the culture and rotation of every variety of crops, and is under the superintendence of a practical Farmer, who is competent to give instruction in Agriculture and in the care and management of Stock. In this department students have ample opportunities, while defraying a part of the expenses of their education, to apply practically the principles of science which they acquire in the class-room.

HORTICULTURAL DEPARTMENT.

This Department embraces the Ornamental and Experimental Grounds at Ashland and Woodlands, including Gardens, Orchards, Vineyards, Nurseries, Propagating - houses, Greenhouses, and Arboreta.

Students laboring in this Department are under the supervision of a skillful Superintendent, who is competent to give them thorough instruction in Horticulture and Landscape Gardening; and they have ample facilities for the practical application of the principles of Botany and Vegetable Physiology, and for a thorough knowledge of the art of Grafting, Budding, and Planting, and the general care and culture of all kinds of trees, shrubs, and flowers.

MECHANICAL DEPARTMENT.

The Mechanical Department of this College has been organized under the name of the "Ashland Mechanical Works," by the erection of fine, large buildings for shops of various kinds, which have been fitted up with the most approved machinery. In these shops employment will be given to a limited number of young men, who wish to defray a portion of their expenses by labor, while securing their education, and who are willing to enter into an apprenticeship for at least three years, subject to the regulations of this Department.

The compensation will be regulated by the Superintendent, and will be graded in proportion to the skill and proficiency with which they perform their work.

EXPENSES.

State Students (representatives f	rom coun	ties),	Tuit	tion	fre	e.	
Tuition Coupons (other Student					\$5		
Matriculation Fee,					10	00	
Room Fee (Dormitory), .					5	00	

All fees are required in advance, and no deduction made from the full fees, however late in the session a student may enter. For this reason attendance at the commencement of the Colleges is particularly urged.

It is desirable that students intending to enter the Agricultural and Mechanical College should bring at least seventy-five dollars.

BOARDING.

Students are allowed to select their own boarding, either in private families or in such buildings on the University grounds as may be set apart for their use; subject, however, in all cases, to the approval and supervision of the Faculty of the College to which they belong.

cati prac othe

tric will first

I

Cons

No student is allowed to board at any house where intoxicating liquors are sold, or card-playing or billiard-playing is practiced, or where the rules of good order and decorum are in other respects disregarded.

Rooms on the University grounds will be assigned to matriculates by the Presiding Officer. No partiality or preference will be shown in disposing of the same to any student, but the first applicant will be allowed to make the first selection.

Every student shall preserve order and decorum in his own room, and shall be responsible for any disorder in the same, unless he give information of the person or persons by whom it was created.

All damage to the buildings or any other University property shall be immediately repaired at the expense of those by whom it was done, when they are known; but if not known, it shall be assessed upon the occupants of the room or building in which the damage was done.

Rooms at all times are subject to inspection by the officers of the Institution; and negligence, carelessness, or violation of the rules and regulations will subject the student to discipline, and deprive him of his room.

Good boarding can be procured in private families at *five* dollars per week, including fuel, lights, and furniture.

CLUB SYSTEM.

Students occupying dormitories set apart for that purpose, by adopting the *club system*, can board themselves at prices not exceeding *two dollars per week*.

Each student occupying a dormitory must pay a room fee of five dollars; the cost of furniture need not exceed ten dollars; so that his expenses for boarding and room will vary from seventy-five to one hundred and fifteen dollars per session of forty weeks.

The Clubs are organized by the students, with a written Constitution, recognizing President, Secretary, Treasurer, and

Commissary. Regular weekly meetings are held for the transaction of business and arrangement of the bill of fare. The President of the Club exercises a general supervision over the dining-room, kitchen, dormitories, and grounds attached thereto; and also presides at the table and at the meetings of the Club. The Treasurer is required to report on the condition of the funds, and make necessary assessments. The Commissary provides and makes all purchases, keeping an account of his disbursements. The Secretary keeps the records of the proceedings, etc.

The military *régime* is extended over the club-houses, and a regular system of inspection and police is maintained by an orderly in each building.

Sessions, Terms, Commencements.

The collegiate year consists of a single session of nine months, which is divided into two equal terms. The session begins on the second Monday in September, and ends on the second Thursday in June, which is the general Commencement-day.

EXAMINATIONS.

There are two classes of examinations: the first is a daily examination in connection with the daily lecture or recitation; the second public, at the close of each term.

Immediately after the examination the Professor of each School affixes to the name of each student examined a number designating the value of his answers to the questions asked, or of his performance of the exercises proposed. For perfect answers or performance, the number affixed is one hundred; for an entire failure, zero; for any intermediate degree of merit, the proper relative percentage.

The public examinations are either oral or in writing, as each Professor may determine. At the close of the examination of each class, the Professor in charge makes out his estimate of the value of each student's answers or performance according

to the same scale of merit as in the daily examination. From this report, and the daily estimates of scholarship made in the lecture or recitation-room, the scholarship of each student for the term is ascertained, and is entered on the record, and a copy sent to his parent or guardian at the close of each term. This report also contains an estimate of the student's conduct in the recitation-room, his industry and punctuality, as well as of his general conduct, or conduct outside of the recitation-room, estimated on the same scale, from all the facts of which the proper faculty may have certain knowledge.

GRADUATION.

A student may graduate in any School on the following conditions:

I. That he shall have been at least one year a student of the University, and that he shall have completed in a satisfactory manner all the required studies of said School, or what the Professor thereof may judge to be a fair equivalent; the standard of graduation in each School being not less than seventy-five per centum of the scale on which one hundred denotes perfection.

2. That he shall have observed habitually all the rules and regulations of the University.

He will then be entitled to a Certificate of Graduation, signed by the Professor, in which may be stated his grade of scholarship in said school, and likewise his general standing with respect to conduct and application to study.

When any student shall have graduated in the Schools of English, Mental and Moral Philosophy, Mathematics, Chemistry, Natural Philosophy, Natural History, and Civil History, in the Agricultural and Mechanical College, he may receive free of charge the degree of Bachelor of Science.

A student may be admitted to the regular degree of Master of Science in the Agricultural and Mechanical College of Kentucky on the following conditions:

I. That he shall have been admitted, at least one year previously, to the degree of Bachelor of Science in Kentucky University.

2. That he shall have passed a satisfactory examination before the proper Faculty in an advanced course of two departments of Natural Science, and a course of historical study prescribed by the Faculty.

3. That he pay to the Library Fund a fee of ten dollars.

SOCIETIES.

The Union Literary Society, formed recently by the consolidation of two others, is young and vigorous, embracing a large number of the best students in this College, and possessing one of the finest society libraries in the University, lately increased by an appropriation of the Legislature of Kentucky.

MUSEUMS.

Through the energy and liberality of Regent Bowman, a Museum of Natural History has been created, and already contains about twenty thousand Specimens, including a large number of the birds and mammals of North America. A skillful taxidermist is constantly employed at Ashland in preparing the Specimens which are rapidly increasing by donation or otherwise. The friends of the Institution throughout the country will render valuable service to the cause of Science by their continued contributions of Geological and Mineralogical Specimens, and of Animals, Birds, Fishes, Reptiles, Insects, Relicts, Curiosities, etc.; all of which can be sent free of cost, by Express, and will be duly credited to them, and published in the Annual Catalogue.

COLLEGE OF THE BIBLE.

The design of this College is to prepare young men for the work of the Christian Ministry. Those who enter it must be at least sixteen years of age, and must present satisfactory testimonials of their good Christian character.

The course of instruction is adapted to two classes of students: first, to those who have completed the course in the College of Arts, or in some other College of equal rank, and who desire to obtain a thorough and critical knowledge of the Holy Scriptures in the original languages; and secondly, to those who have little or no acquaintance with the Greek or Hebrew, and who desire to obtain only a general and practical knowledge of the English Scriptures. The course of instruction designed for the former is comprehended in the three following Schools, except that they are not required to study the course of English Exegesis.

COURSE OF INSTRUCTION.

1. School of Sacred Literature and Christian Doctrine.

PROFESSOR MILLIGAN.

FRESHMAN YEAR.

Hebrew Grammar and First Lessons in Reading.

JUNIOR YEAR.

Hebrew, continued; Hellenistic Greek; and Greek and Hebrew Exegesis.

SENIOR YEAR.

Exposition and Defense of the Scheme of Redemption as it is taught and illustrated in the Holy Scriptures.

Text-books and Works of Reference.—Instruction in this School is given partly by Lectures and partly by the use of the following text-books and works of reference: Green's Hebrew Grammar, Hahn's Hebrew Bible, Milligan on Reason and Revelation, Milligan.on Scheme of Redemption, Bagster's Critical New Testament (Greek and English), Alford's Greek Testament, Bagster's edition of the

Septuagint, Robinson's Greek and English Lexicon of the New Testament, Liddell and Scott's Greek and English Lexicon, Winer's Grammar of the New Testament, and Gesenius' or Fürst's Hebrew-English Lexicon.

II. School of Sacred History and Evidences of Christianity,

PROFESSOR M'GARVEY.

FRESHMAN YEAR.

FIRST TERM.—Pentateuch, begun.
SECOND TERM.—Pentateuch, finished; Job, Joshua, and Judges.

SOPHOMORE YEAR.

FIRST TERM.—Remainder of the Old Testament History begun, with the Poetical and Prophetical Books introduced in their chronological order and studied historically.

SECOND TERM.—The same completed, and a course of Lectures on the Intermediate History of the Jews.

JUNIOR YEAR.

FIRST TERM.—Narratives of Matthew and Mark. SECOND TERM.—Narratives of Luke and John.

SENIOR YEAR.

FIRST TERM.—Acts of the Apostles, and a brief Historical Outline of the Epistles.

Second Term.—Discussion of the Authenticity, Integrity, Inspiration, and Authority of the Books of the Old and New Testaments; with an examination and refutation of the most prevalent forms of Modern Infidelity.

TEXT-BOOKS AND WORKS OF REFERENCE.—English Polyglot Bible, Coleman's Sacred Atlas, McGarvey's Commentary on Acts, Milligan's Reason and Revelation, and Smith's Dictionary of the Bible.

III. School of Homiletics and Hermeneutics.

JUNIOR YEAR.

FIRST TERM.—Hermeneutics and English Exegesis.

Second Term.—English Exegesis, continued, with a course of Lectures on the Duties and Habits of Preachers.

SENIOR YEAR.

FIRST TERM.—Homiletics begun, with frequent exercises in the Composition and Delivery of Sermons.

SECOND TERM.—Homiletics finished; Discussion of Topics; Composition and Delivery of Sermons.

TEXT-BOOKS AND WORKS OF REFERENCE.—English Polyglot Bible, Milligan's Reason and Revelation, Broaddus on the Preparation and Delivery of Sermons.

Engli Ti

connand and Scharence.

The same course of instruction is designed also for students of the Second class, except that they are not required to study the Hebrew and the Greek. They must, however, in order to regular admission, be well versed in Arithmetic, Geography, English Grammar, and the outlines of History; and in order to graduation they must also stand an approved examination on all the branches pertaining to the School of English Literature.

IV. School of English Literature.

PROFESSOR PICKETT.

FRESHMAN YEAR.—Philosophy of Grammar and Rhetoric.
JUNIOR YEAR.—Criticism and Logic.
SENIOR YEAR.—Rhetoric and the English Classics.

TEXT-BOOKS.—Quackenbos' Rhetoric, Kames' Elements of Criticism, Whately's Logic, Whately's Rhetoric, and Shaw's English Literature. Special attention will be given to Composition and Elocution during the entire course in this School.

REGULAR COURSE OF STUDY.

I. Classical Course.

FIRST YEAR.—Freshman Sacred History; Sophomore Sacred History; Junior Sacred History; and Freshman Sacred Literature.

Second Year.—Senior Sacred History; Junior Sacred Literature; Senior Sacred Literature; and Senior Homiletics.

II. English Course.

FIRST YEAR.—Freshman Sacred History; Sophomore Sacred History; and Freshman English Literature.

SECOND YEAR.—Junior Sacred History; Senior Sacred History; and Junior English.

THIRD YEAR.—Junior Homiletics, etc.; Senior Sacred Literature; Senior Homiletics; and Senior English.

ECCLESIASTICAL HISTORY.

Some attention is given to Ecclesiastical History, chiefly in connection with the course of instruction in Christian Doctrine and the Evidences of Christianity. The works of Neander, Schaff, Mosheim, and Gieseler are all used as books of reference.

CERTIFICATE OF GRADUATION.

No degrees are conferred in this College; but certificates of Graduation will be given to all who complete either the English or the Classical Course; provided that during their connection with the University they shall have complied strictly with all its rules and regulations.

EXPENSES, ACCOMMODATIONS, &C.

In order to encourage poor and pious young men to enter this College with the view of better qualifying themselves for the work of the Ministry, the Board have appropriated for the exclusive use of such the large Brick Dormitory on the University premises. It consists of twenty-four large, well-ventilated rooms, and will conveniently accommodate eighty-four students, besides furnishing a good kitchen and dining-room. In the Adelphian Club—composed wholly of the matriculates of this College a student can board for about \$1.60 a week, that is, for about \$65.00 a session. His bill for washing during the same time is about \$10.00, and for fuel and lights about \$10.00. Besides these expenses, every student has to furnish his own room, and to pay to the Treasurer, on his arrival at the University, a matriculation fee of \$10.00, and a room fee of \$5.00. The cost of furnishing a room is about \$40.00, that is, about \$10.00 for each occupant; but the articles purchased will of course, with proper care, last for several years.

No charge is made for Tuition, and hence the entire expenses of a student in the Adelphian Club, exclusive of what he may spend in traveling and for clothing, are about as follows: For matriculation fee, \$10.00; use of furniture, \$5.00; room fee, \$5.00; boarding, \$65.00; washing, fuel, and lights, \$20.00; books and stationery, \$20.00; making in all \$125.00 for a session of forty weeks.

Students are received at any time; but if possible all should be present and have their rooms secured on Saturday preceding the new nor The dire

are, last

ll should receding

the opening of the session. No room can be secured for any new student in anticipation of his arrival at the University, nor until he shall have obtained his *Permit* from the Regent. Those who design to enter the College of the Bible should come directly to the Brick Dormitory and inquire for the Steward of the Adelphian Club. By so doing they will save both trouble and expense.

Students occupying a room may, by applying to the Presiding Officer, secure the same for the next session; *provided* that they be present at the beginning of the session. But after that any vacant room will always be given to the first applicant.

Those only who matriculate regularly in the College of the Bible, and such matriculates in the College of Arts as have been at least one session in the College of the Bible and members of the Philothean Club, and who are still prosecuting their studies with reference to the work of the Ministry, are permitted to board and lodge in the Brick Dormitory.

Students of this College are not allowed to work on the Farm or in the Shops. This is the exclusive privilege of those who matriculate in the Agricultural and Mechanical College.

STUDENTS' PRAYER MEETING.

On the afternoon of every Lord's-day during the session the students of this College have a Students' Prayer Meeting in the College Chapel. It is well attended, and the occasion is generally one of much interest to all present. Many a heart is here made to realize by a joyful experience that "they who wait upon the Lord shall renew their strength."

COMMERCIAL COLLEGE.

The studies in the Commercial College of Kentucky University have been selected for their practical value. The course is well adapted to the wants of all who expect to become merchants, farmers, and others who desire to fit themselves for the practical duties of life. The greatest liberty of choice consistent with thorough discipline is allowed, and the course of study is so arranged as to meet the pecuniary wants of young men.

The *First Course*, which may be completed in one term of twenty weeks, is intended for those who have but little time at their disposal, or whose means are limited, and it is designed to qualify the student for Book-keeping, and to give him a general knowledge of business.

The *Second Course* is more thorough and extended, and will require two years for its completion.

The Third or Post-Graduate Course is for such as have completed the Second, and who desire to accomplish themselves in any of the special branches indicated in the schedule, and will require one year for its completion.

Geography

The preceding table will be better understood from the following explanations.

1. Book-keeping Course.

This is arranged for two terms; but students who enter prepared to pass an examination in Grammar and Ray's Arithmetic, Part III., can complete it, and in one term get a diploma. The first term is therefore to be regarded as preparatory.

The First or Preparatory Term then in the Book-keeping Course will be Ray's Arithmetic, Part III.; Butler's Grammar; Composition; Penmanship; and Book-keeping, theoretical.

SECOND TERM.—Bryant & Stratton's Arithmetic; Rhetoric and Composition; Penmanship; Book-keeping, practical.

Students who complete this course are entitled to graduate in this department.

II. Bachelor of Commerce Course.

JUNIOR CLASS.

FIRST TERM. — Algebra; Commercial Arithmetic; Rhetoric; Penmanship; Book-keeping, theoretical; Philosophy; Physiology.

SECOND TERM.—Algebra; Geometry; Kames' Elements of Criticism; Penmanship; Book-keeping; Commercial Law; Botany.

SENIOR CLASS.

FIRST TERM.—Geometry; German; Chemistry; Mental Science; Physical Geography.

SECOND TERM.—Surveying; History of the United States and Political Economy; German; Chemistry; Moral Science.

Students who complete this course are entitled, on payment of fees for diploma, to receive the degree of Bachelor of Commerce.

III. Master of Commerce Course.

Students who have taken the degree of Bachelor of Commerce are admitted to this course. These studies are optional, and the student can choose any three with the advice of the Presiding Officer, and having prosecuted successfully his studies for one year is entitled to the degree of Master of Commerce. The studies in this course are as follows:

FIRST TERM.—Engineering; Logic; Constitutional Law; Hume's History; German; French; Sacred History; Zoölogy.

SECOND TERM.—Engineering; International Law; Gibbon's History; German; French; Sacred History; Zoölogy.

REQUISITES FOR ADMISSION.

Every candidate for admission into the Commercial College must present satisfactory evidence of good moral character. If previously connected with any other college he must produce a certificate of honorable standing from the authorities thereof.

TIME OF ENTRANCE.

Students may enter this College at any time for the Book-keeping Course, but for the Bachelor of Commerce Course or for the Master of Commerce Course they should enter either at the beginning or middle of the school-year.

Time required to Complete the Different Courses.

Students who have a good knowledge of Grammar and Arithmetic can complete the Book-keeping Course in five months. They can take the degree of Bachelor of Commerce in two years, and the degree of Master of Commerce in three years from time of entrance.

BOOKS.

The books required in the Commercial College will cost about twenty dollars per year.

FEES.

This College is not endowed; therefore the fees must be paid in cash.

DIPLOMAS.

When any course of study has been completed a diploma will be given upon the payment of three dollars.

Good board can be had in private families at from four to five dollars per week.

CLUBS.

Students who desire can, with the consent of the Faculty, organize clubs for boarding and reduce the expenses to two dollars per week. Those desiring to enter into this arrangement should come prepared to board for a few days until clubs can be organized. Students, reporting to the Presiding Officer immediately upon arrival, will be assisted in obtaining good boardinghouses, and as soon as the requisite number is obtained a club can be organized.

COLLEGE OF LAW.

The design of the College of Law is to provide a complete and thorough Course of Instruction—except in merely local law and practice—for young men preparing for the Bar in any part of the United States. Instruction is given by lectures, with examinations upon them, or by recitations, with familiar expositions by the Professor. The Course of Study is so arranged as to be completed within two sessions. No examination or particular course of previous study is required for admission.

A diploma issued by this College is a license to practice law in the Courts of Kentucky.

Course of Instruction.

1. School of Common and Statute Law.

PROFESSOR HUSTON.

JUNIOR CLASS.—Blackstone's Commentaries. SENIOR CLASS.—Kent's Commentaries.

II, School of Evidence, Pleading, and Practice.

PROFESSOR JOHNSON.

, Junior Class.—Smith on Contracts; Smith's Mercantile Law. Senior Class.—Stephen on Pleading; Code of Practice; Starkie on Evidence.

III. School of Equity, Constitutional and International Law.

PROFESSOR HARRISON.

JUNIOR CLASS.—First volume Kent's Commentaries on International Law; Story on the Constitution.

SENIOR CLASS.—Adams on Equity Jurisprudence and Pleading.

The session of the College of Law commences on the second Monday in September, and terminates the third Wednesday in January, which is Commencement-day.

FEES AND EXPENSES.

Tuition (in cash),				\$50	00
Matriculation, .				IO	00
Books, about .				20	00

Boarding in private families, four to five dollars per week; by club system, two dollars per week.

Students attending the College of Law can enter the classes of the College of Science, Literature, and the Arts, or those of the Agricultural and Mechanical College or of the Bible College, and receive instruction without additional charge.

KENTUCKY UNIVERSITY.

TRANSYLVANIA MEDICAL COLLEGE.

1873-74.

TRANSYLVANIA MEDICAL COLLEGE.

The Executive Committee of Kentucky University announce to the friends of medical science throughout the country that, in accordance with the programme of organization adopted by the Curators, the Medical Department has been established under the name of the "Transylvania Medical College of Kentucky University," and will open on the second Monday in September and close on the second Thursday in June, the sessions being nine months, and continuous with those of the the associated Colleges of the University.

The Course of Instruction is thorough and comprehensive, and a full and able Faculty has been selected, embracing several of the distinguished Professors who were connected with the old Transylvania Medical College in its palmy days, many of whose pupils now fill honorable positions in the profession throughout the Mississippi Valley. It is the purpose of the Board to restore as far as possible the prestige of this the first and most popular Medical College in the West. In this endeavor they appeal to all the sons of their venerable Alma Mater for their assistance and patronage.

The success of this College, once so eminent, can be assured again by its reorganization as one of the Colleges of a great University already in full tide of success, with its endowment and real estate amounting to nearly a million of dollars, its valuable Libraries, Museums, and Apparatus, with its several Colleges located on the splendid estates of Ashland, the home of Henry Clay, and Transylvania.

The benefits of instruction in the Classical, Scientific, and Technical courses of study pursued in the associated Colleges of the University will be extended *without charge* to the matriculates of this department; thus giving students, at a very moderate cost, peculiar advantages for both general and professional education.

The location is a favorable one—in the midst of one of the most beautiful and healthy regions on the continent, and among a people celebrated for their hospitality and refinement, and whose houses are open for the reception of young men at moderate prices for boarding.

The necessary clinical advantages will be secured by the Faculty, and the fine Medical Library and Anatomical Museum of old Transylvania will be available to students.

COURSE OF INSTRUCTION.

School of Surgery and Anatomy,

JAMES M. BUSH, M.D., W. O. SWEENEY, M.D.

School of Principles and Practice, W. S. CHIPLEY, M. D.

School of Physiology and Hygiene, H. M. SKILLMAN, M. D.

School of Obstetrics and Diseases of Women and Children, IOSEPH SMITH, M.D.

School of Chemistry and Toxicology, ROBERT PETER, M. D.

School of Materia Medica and Pharmacy,
To be filled.

Demonstrator of Anatomy,
To be filled.

EXPENSES.

KENTUCKY UNIVERSITY.

MISCELLANEOUS INFORMATION.

1872-73.

HISTORICAL SKETCH OF THE UNIVERSITY.

In the year 1855, John B. Bowman, of Mercer County, Kentucky, while quietly pursuing his profession as a farmer, conceived the plan of founding in his native state a University for the people. Appreciating the necessity of more liberal provisions in the way of education, both general and professional, than were presented at that time in the South and West, he resolved, though a young man, to devote his life to the founding and upbuilding of an Institution that should be especially accessible to the poor young men of the country. His main object was to reach the masses who, for the most part, were virtually debarred the privilege of a liberal education in consequence of the heavy expense attending most of the American colleges.

From the beginning Mr. Bowman's plans were liberal and comprehensive; and, though they were regarded by many as the chimera of a young man, he never seemed to doubt for a moment their ultimate realization. His purpose, in a word, was to establish a University, in its full and true sense, on a *Modern*, *American*, and *Christian* foundation. In one of his earliest addresses to the public he expressed his views and intentions as follows:

"Why should we not be as progressive in the cause of education as in our industrial and commercial enterprises; and why should we be dependent upon New England or Old England for our best educational facilities when we are so rich in ability to have our own, and when our wants in this respect are so varied and pressing? It is true that we have scattered all over the West and South scores of unendowed, half-starved, sickly, puny institutions called Colleges and Universities, many indeed of which have their piles of brick, stone, and mortar, making an imposing show; but how many of them, in the way of Endowments, Scholarships, Libraries, Museums, and literary and scientific men—the true apparatus of an education—are prepared

to furnish to our young men such a liberal education as the times and the peculiar circumstances of our age and country demand? And, above all, how few secure and enforce that effective discipline which at the same time is conservative of good morals and productive of good scholars? It is to be confessed and regretted that while our march has been onward and upward in other respects we have been lacking in this, and have as yet to be considered as empirics; so much so that it is a problem not solved whether colleges are a curse or a blessing. While then we have no spirit of antagonism to any other institution, but are kind and catholic in feeling to all, we would not be deemed arrogant in proposing to build upon a more modern basis an Institution equal to any in America — an Institution for young men instead of boys, with a high grade of scholarship, and which, especially in its Ministerial, Normal, Scientific, and Agricultural Departments, will meet the wants of our young giant West. For it does seem that, as the 'Star of Empire' is moving onward and westward, there is opened up a special missionary field for the Minister, Teacher, and educated Farmer and Mechanic. We only propose, in our day and generation, to lay the foundation of such an Institution, with the full hope and confidence that others to come will build upon and perfect the superstructure."

In a report to the Curators he says:

"I have but one desire in all this matter; I want to see accomplished through this Institution the greatest good to the greatest number of our poor fallen race, thus giving the greatest glory to God. I want to build up a people's Institution, a great free University, eventually open and accessible to the poorest boy in the land, who may come and receive an education practical and suitable for any business or profession in life. I want to cheapen this whole matter of education, so that, under the broad, expansive influence of our republican institutions, and our advancing civilization, it may run as free as our great rivers, and bless the coming millions. Hitherto our Colleges and Universities have been accessible only to the few, so great are the expenses attending them. We therefore want a University with its complement of Colleges affording education of the highest order to all classes. We want ample grounds, and buildings, and libraries, and apparatus, and museums, and endowments, and prize funds, and professors of great hearts and heads, men of faith and energy. Indeed we want every thing which will make this Institution equal eventually to any on this continent. Why should we not have all? I believe there are noble men enough all over this

land who will give us the means which God has given them, if we will only move forward to the work before us like true men."

In order to further these liberal views, he proposed to raise, simply as a foundation of the enterprise, an endowment fund of not less than half a million of dollars; and to secure this amount he devised a financial scheme novel in its details and successful in its operations, as the sequel proved. This scheme deserves particular mention, for it not only secured the immediate object in view, but at the same time identified the people in interest and sympathy with the Institution, and gave it in its infancy a patronage and a moral and pecuniary support which at once secured its success. The notes for money subscribed were made payable in easy installments, and when collected the principal was safely invested. A certificate of stock was issued to each subscriber, with coupons attached, bearing value equal to one year's tuition, and made transferable. The coupons were redeemable in tuition only, so that the stock, without interest, would be gradually refunded to the subscriber. Thus, while the capital subscribed was refunded in the form of tuition, it remained in the form of cash as the permanent endowment, the interest of which would pay the expenses of the Institution. In the course of a few years the coupons would all be redeemed, and the endowment and tuition funds would be free and unencumbered.

It was the policy of Mr. Bowman to found the proposed University on the ruins of Bacon College, an institution which, after flourishing for a few years under one of the ablest Faculties in the West, failed at last for want of sufficient endowment. Gathering up the wreck of this College, his own Alma Mater, Mr. Bowman, seconded by a few liberal-hearted citizens of Mercer in the inauguration of the enterprise, abandoned his farm and all the comforts of a pleasant home, and in the winter of 1856, with a firm reliance on Divine Providence, began his labors.

Without the usual heraldry of the pulpit and the press, and without the prestige of a name known to fame, and in the face of a strong and decided prejudice against the management of Colleges then prevalent in Kentucky, and amid the doubts and discouragements of friends, he made his appeal to the people. They responded with a degree of liberality unexpected, and indeed unprecedented in the state. In one hundred and fifty days of actual labor he obtained subscriptions to the amount of \$150,000, which sum he soon increased to \$200,000, a large proportion of which was secured in notes of \$500 and \$1,000, mainly from the substantial farmers of Central Kentucky.

Thus the Institution was founded, not by large donations and bequests of a few wealthy individuals, but by the active co-operative benevolence of the many donors who pledged their means and extended their sympathies to Mr. Bowman in carrying out the great work of his life. As soon as the amount of \$150,000 had been secured by Mr. B., he called a meeting of the donors and other friends of the enterprise at Harrodsburg, in May, 1857, for the purpose of counsel and co-operation in regard to the early organization of the University. This meeting was fully attended, was harmonious in action, and most favorable in results. It was important as having recognized the contemplated University as the property of the people at large, who had subscribed the money. They divested it of all local character, and suggested such provisions in the proposed charter as would give the donors a perfect representation in the Board of Curators. In accordance with their suggestions, and his own plans and purposes, Mr. Bowman drafted a liberal charter, which was granted by the Legislature in February, 1858, incorporating KENTUCKY UNIVERSITY.

During the year 1858 and 1859 the work of endowment was earnestly prosecuted. The actual investment having reached about \$100,000, it was deemed expedient to organize one of the Colleges of the University. Accordingly, the College of Arts was opened in September, 1859, under the presidency of R. Milligan, assisted by an able corps of Professors. Nearly two hundred students were in attendance the first session. This Department of the University having thus been successfully inaugurated, Mr. Bowman next addressed himself with renewed

energy to the work of supplying the Institution with the necessary apparatus, buildings, etc. He soon raised a sufficient sum for the purchase of a fine suit of Chemical and Philosophical Apparatus, which he secured for the Institution on most favorable terms. He also made an earnest effort to secure grounds and buildings adapted to the demands of a great University.

One of the most beautiful and healthful sites for an institution of learning in the state of Kentucky was the famous Harrodsburg Springs, for many years one of the most popular resorts in the West. These grounds, with their elegant and extensive buildings, had been purchased by the United States Government as the site of the Western Military Asylum; but they were now abandoned, for fire had consumed the main edifice. This place, containing about two hundred acres of land, Mr. Bowman determined, if possible, to secure. After repeated visits to Washington City, he finally obtained the passage of a bill ordering it to be sold. In anticipation of the day of sale, he went to work and raised the sum of fifty thousand dollars for the specific purpose of buying it. But through the interference of parties who desired to secure the property as a fashionable summer resort, his efforts to purchase it were defeated, and the notes of the subscribers were surrendered. He thus had the mortification to see the spacious, eligible grounds and buildings, on which he had long set his heart as the site of a great University, pass, by means of an opposing and inferior interest, forever from his hands.

To increase his embarrassments as the founder and financier of the University, the war, with all its social and commercial distractions, came on. The work of increasing the endowment was necessarily suspended; but his labors as Treasurer were more delicate and onerous. He continued to collect and invest the funds subscribed; he received and disbursed the interest thereon; and kept all the accounts of the Institution. He watched with a vigilant eye every pecuniary interest through all the crushing storm of war. Not a dollar was lost, and not a week's suspension of College exercises occurred during this period, although opposing armies were encamped around, and

the buildings were finally taken as hospitals for the sick and the wounded. It is proper to add that all this labor was performed by him, as indeed all other labor from the beginning, not only without charge, but at the sacrifice of his own pecuniary interests.

But the necessity for buildings grew daily more and more urgent. The failure to obtain those at Harrodsburg created a lively sympathy abroad, and all the necessary grounds and buildings were offered if the Institution could be removed. But it was suggested that the old edifice at Bacon College could be repaired and enlarged, and made to meet all the *reasonable* wants of the University. This idea the friends at Harrodsburg generally favored, when a spark from a defective flue fell upon the roof of the building, and, fanned by a dry February wind, it soon wrapped the pile in flames, and all that remained of the building, apparatus, and library was a heap of smouldering ruins. This disaster imposed upon the Board of Curators the necessity for immediate action. They were forthwith convened, and all eyes were turned to Mr. Bowman.

The Trustees of Transylvania University, at Lexington, at this crisis intimated a willingness to convey the grounds and buildings of that institution to the Curators of Kentucky University, on the condition of its removal to Lexington. Citizens of Louisville also manifested a desire to have the Institution located in that city. Covington likewise presented a claim. The Board, however, not agreeing in this exigency, resolved to leave the whole question of removal and location to a Committee, with Mr. Bowman as Chairman. It was ordered, however, that if the Committee should decide to remove the Institution, an act authorizing the removal should be first passed by the Legislature, that every thing might be done legally. The Board in the mean time resolved that the institution ought to be removed from Harrodsburg.

Accordingly, Mr. Bowman called the Committee together at Frankfort in January, 1865. While there, the proposition of Congress to grant to Kentucky 330,000 acres of land for the purpose of agricultural and mechanical education unexpectedly

came up for consideration. The state, with a heavy debt upon her, in the midst of the war, was not prepared to accept the grant with the conditions imposed, and the munificent provision of Congress seemed likely to be lost to Kentucky. Propositions to accept the grant and furnish the necessary grounds and buildings, and thus meet the conditions of this new and difficult educational problem, were invited by the Legislature. But a favorable response was not received from any quarter. At this juncture Mr. Bowman, believing that his own plans and efforts in behalf of education were in strict harmony with the highest interests of the state, came forward, and on his own individual responsibility proposed to consolidate into one great institution the University at Harrodsburg, Transylvania University, and the Agricultural College, and to locate the whole at Lexington. He further proposed, if this consolidation could be effected, to provide an experimental farm and all the requisite buildings, and to furnish gratuitous instruction to three hundred students, to be selected by the state; and he furthermore guaranteed that the Board of Curators would carry out, in the Agricultural Department, the intent of the act of Congress encouraging the education of the industrial classes.

A bill to this effect was accordingly drawn up, and after a long and animated discussion in the General Assembly it was passed by a large majority; and Kentucky University was removed to Lexington; the grounds, buildings, and endowment of Transylvania University were formally transferred to the Board of Curators; and the State Agricultural College was made a part of the University. The capital of the Institution now exceeded half a million dollars.

In order to perfect his scheme, Mr. Bowman had obligated himself to raise one hundred thousand dollars with which to purchase an experimental farm and a site for the buildings requisite for the several Colleges of the University. He at once removed to Lexington and began his work, and before the Legislature adjourned he reported to that body that he had secured from the citizens of Lexington over one hundred thousand dollars.

At their annual meeting in June, 1865, the Curators formally ratified his action, and ordered that Kentucky University be opened in Lexington in October following.

At the same meeting Mr. Bowman presented a plan of organization for the University, embodying his own conceptions of an enterprise for which he had been laboring ten years, and for the perfection of which he proposed to give his remaining years. This plan, which embraces the best features of the leading Colleges and Universities of the country, besides those which are peculiar to itself, was thoroughly discussed and fully adopted by the Board, and in accordance therewith four of the Colleges have been fully organized, and are now in successful operation.

During the year 1866 Mr. Bowman purchased for the permanent site of Kentucky University with its various Colleges "Ashland," the homestead of Henry Clay, and the adjoining estate of "Woodlands," which extends within the limits of the city of Lexington. The entire tract contains four hundred and thirty-three acres of land, unsurpassed for beauty and fertility. It is now the seat of the Agricultural and Mechanical College.

Under these favorable circumstances the University has entered upon its career of usefulness with greatly increased facilities, and with the assurance that its founder, now its Regent, will labor on for the full development and perfection of his plan. It is confidently believed that, with its superior advantages of location, its splendid basis in the way of endowment and real estate, its able Faculties, and its moral and social surroundings, Kentucky University is destined, under Providence, to exert a mighty influence upon the educational interests of the Valley of the Mississippi.

MISCELLANEOUS.

REQUISITES FOR ADMISSION.

Every candidate for admission into any of the Colleges of the University must present satisfactory evidence of good moral character; if he shall have been connected with any other College, he must produce a certificate of honorable standing from the authorities of that College.

A candidate for admission into the College of Arts must be at least fourteen years of age; and for admission into any other College of the University he must be at least sixteen years of age; and, as a general rule, no one will be admitted to advanced standing without a corresponding increase of age. A candidate for advanced standing must also sustain an examination in all the previous studies of the course on which he proposes to enter.

For the benefit of young men found on examination but partially prepared for the studies of the Freshman class, facilities for preparatory instruction, without additional expense to the student, have been provided. Any Professor may also, at his discretion, admit into his School a student on probation for a reasonable length of time, upon condition that if he shall fail to exhibit a satisfactory degree of diligence or proficiency his connection with the School shall cease.

The requisites for admission into the various Schools of the several Colleges will be found prefixed to the respective Courses of Instruction.

MATRICULATION.

I. A student upon arrival at the University will report promptly to the *Regent*, with his testimonials of character and standing, and will designate the College which he may wish to enter; whereupon, on payment of his fees to the Treasurer, he will receive a session-bill, referring him to the Presiding Officer of that College for consultation.

- 2. He will as early as practicable secure suitable boarding; and any unnecessary delay in doing this, or in reporting to the Regent or Presiding Officer, will be regarded as sufficient evidence of his unfitness for admission.
- 3. Having presented his session-bill to the Presiding Officer, the student will be referred by him for examination to the Professors into whose Schools he seeks to be admitted.
- 4. After successful examination he will report to the Secretary of the Faculty; and, having received from that officer a copy of the Laws of the University, he will, after reading them, be entitled to matriculate by signing the following declaration: "I enter the University with a sincere desire to enjoy the benefits of its instruction, and with a determined resolution to conform to its laws."
- 5. After signing the declaration, the matriculate will at once enter upon his studies in the Schools to which he has been admitted. The number of his recitations must in all cases amount to at least three a day, unless, at the request of the student's parent or guardian, he may for satisfactory reasons be permitted by the Faculty to attend a less number.

PUBLIC WORSHIP.

Every student is required to attend the chapel exercises at such an hour each day as may be designated by the Faculty of the College to which he belongs; and also to attend such other public religious exercises as may be ordered on National Thanksgiving-day or the Lord's-day, unless excused for special reasons by the proper Faculty.

LIBRARIES.

There are good Law, Medical, and Miscellaneous Libraries belonging to the University, which comprise about ten thousand volumes of valuable books, and which are open to all the students of the University. The Law Library is perhaps one of the best in the West.

PUBLICATION OF THE SOCIETIES.

The five societies connected with the various Colleges of the University have undertaken the publication of a society paper, entitled "The Collegian of Kentucky University." It is issued semi-monthly, and is conducted by a Committee of Editors composed of one member from each society, and an editor-in-chief chosen by this Committee from the members of the University.

It is designed by its managers not only to make this paper interesting to the students as a repository of College news, but also a means of improvement in English composition to those students who may prepare articles for its pages.

MUSEUMS.

Through the energy and liberality of Regent Bowman, a Museum of Natural History has been created, and it already contains about *twenty thousand* specimens, including a large number of the birds and mammals of North America.

The friends of the Institution throughout the country will render valuable service to the cause of science by their continued contributions of geological and mineralogical specimens, and of animals, birds, fishes, reptiles, insects, relics, curiosities, etc., all of which can be sent *free of cost* by *express*. Such articles will be duly credited to the donors, and a list of them published in the Annual Catalogue.

The *Anatomical Museum* is also large, and was originally secured at great cost. It contains many valuable wax models, natural skeletons, and arterial and alcoholic preparations, illustrative of Anatomy and Physiology.

APPARATUS.

There is a valuable collection of Chemical, Philosophical, and Astronomical Apparatus belonging to the University, adapted to the purposes of illustration and instruction in the various Schools of Science.

ENDOWMENT AND REAL ESTATE.

The endowment and real estate of the University amounts to about \$800,000. The property formerly belonging to the Transylvania University embraces a spacious and beautiful campus of twenty acres, lying within the limits of the city of Lexington, and containing Morrison College, with its large and commodious lecture-rooms, chapel, library-rooms, and society-halls, and also dormitories and boarding-houses.

Ashland, the home of Henry Clay, and the Woodlands adjoining, containing in one tract four hundred and thirty-three acres, with the elegant improvements, making one of the most magnificent estates in America, have been secured as the permanent site of the University. It is the purpose of the Regent to procure, at an early day, ample funds for the erection of many additional buildings, and for the improvement of the grounds on a scale commensurate with the magnitude of the general plan. The united grounds of the University, in which every citizen of the state has an interest, and which are rendered almost sacred by the historical associations of old Transylvania, and are endeared to every patriot as the home of Henry Clay, will thus be improved and adorned by all the appliances of art and taste, as the site of a University that we fondly hope will continue to preserve the honor and reputation of the one, and will be an imperishable monument to the memory of the other.

THE ALUMNI OF TRANSYLVANIA UNIVERSITY.

It may be gratifying to the numerous Alumni of this, the first established and most venerable institution of learning in the Mississippi Valley, to learn that, in its consolidation with Kentucky University, its historic character and associations have been sacredly cherished and its records faithfully preserved. By a statute of the Board of Curators, the graduates of Transylvania are recognized as Alumni of Kentucky University. It is the desire of the authorities to recognize the Alumni

Association of the two Institutions, and to this end to obtain a complete roll of all those who have ever graduated in the various departments of Transylvania University. An earnest appeal is hereby made to all such to report by correspondence or otherwise to the Regent, with a view to the complete organization of the Association.

THE CONDUCT OF STUDENTS.

It is presumed that every one qualified to enter the University as a student will have some acquaintance with the first principles of morality, propriety, and decorum, and that it will therefore be unnecessary to prescribe a full and complete code of specific rules and regulations. But it will be expected and required of every student—

I. That he be diligent in study; punctual in his attendance upon worship, recitations, examinations, and all other University exercises; and that he promptly render a valid and satisfactory reason to the proper officers for any delinquency on his part.

2. That having entered any class, he will not leave it without the permission of the Faculty; and that he will engage in no new study without their consent and approbation.

3. That he treat all persons, and especially the officers of the University, with becoming decorum and respect.

4. That he do not trespass on the premises of any other person, and that he in no way deface or injure the property of the University.

5. That he attend no exhibition of immoral tendency; no race-field, theater, circus, billiard-saloon, bar-room, or tippling-house.

6. That he neither introduce upon the premises of the University, nor use there or elsewhere, any kind of intoxicating beverages; and that he abstain from the use of tobacco in the buildings of the University.

7. That he neither keep in his possession nor use fire-arms, a dirk, a bowie-knife, nor any other kind of deadly weapon.

8. That he abstain from profanity, the desecration of the Lord's-day, all kinds of gaming for a reward or prize of any

kind, and from card-playing even for amusement; and also from whatever else is inconsistent with good order, good taste, and good morals.

9. That he attend public worship every Lord's-day, and prayers in the Chapel every morning.

10. That he go not beyond the immediate precincts of Lexington or Ashland during the session without permission of the Faculty; or, in cases of emergency where this can not be obtained, without the consent of the Presiding Officer of the College to which he belongs.

11. That he do not leave the University until he is regularly dismissed at the close of the session, without the special permission of the Faculty.

12. That during his connection with the University he belong to no secret College Society, nor any association, except such as shall have been approved by the Faculty.

13. That he do not change his place of boarding without the permission of the Faculty.

14. That he faithfully observe and respect all the by-laws adopted by the Faculty for the discipline and government of the students.

15. That he shun and discountenance all disorderly combinations and associations of students or citizens; and that he co-operate with the Faculty in every honorable way that he can to promote the interest and reputation of the University.

16. That he cause no unnecessary noise in or about the University buildings, nor play on the grounds before the time appointed by the Faculty for recreation, nor in the vicinity of the dormitories or other college buildings at any time.

17. That he sign no petition or other paper to the Board or Executive Committee in regard to the government of the University, or to the appointment or dismissal of Professors or Officers; and that he do not attend or give countenance to any meeting to criticise the government of the University.

KENTUCKY UNIVERSITY.

ANNUAL REPORT OF THE REGENT.

1872-73.

ANNUAL REPORT OF THE REGENT.

CURATORS OF KENTUCKY UNIVERSITY:

I have the honor to submit to you my sixteenth annual report. During the past year five distinct Colleges have been in successful operation, as follows: the *College of Science*, *Literature*, and the Arts; the Agricultural and Mechanical College of Kentucky; the College of the Bible; the College of Law; and the Commercial College.* Each of these Colleges has its distinct Faculty and Presiding Officer, its peculiar course of study and discipline, its separate buildings or rooms for instruction, and its own roll of matriculates.

In these several Colleges twenty-seven professors and instructors have been engaged in daily work. Instruction has been given to regular classes in the following schools: English Literature, Mathematics, Civil History, Sacred History, Moral and Mental Philosophy, Physics, Chemistry, Natural History, Physical Geography, Civil and Political Economy, Latin, Greek, French, German, Hebrew, Homiletics and Hermeneutics, Sacred Literature, etc., Common and Statute Law, Constitutional and International Law, Evidence, Pleading and Practice, Penmanship, Book-keeping, Commercial Arithmetic, Commercial Law and Ethics, Military Science, Meteorology, Telegraphy, Music, Practical Agriculture, Horticulture, and Mechanic Arts.

In these Colleges, with their various schools, five hundred and fifty-eight young men have been enrolled, from the following states and countries: Kentucky, Missouri, Arkansas, Louisiana, Oregon, Kansas, Nevada, Idaho, Texas, Mississippi, Tennessee, Alabama, Florida, Georgia, Virginia, West Virginia, Maryland, Delaware, South Carolina, North Carolina, Massachusetts, New York, Pennsylvania, Ohio, Indiana, Illinois, Iowa, New Zealand,

^{*}The Transylvania Medical College has also been organized.

Australia, and Canada; showing a patronage co-extensive with the continent, and still leading all other institutions in the South and West.

The decrease in the patronage since the years succeeding the war results from the fact that every state in the Union except Kentucky is now moving forward with great liberality, on the part of their legislatures and private citizens, in adding to the national grant of land given them by the United States Government for the endowment of their industrial colleges and universities, and are creating within their own borders educational centers which of course are retaining their patronage at home. Besides, a large number, as indicated by letters received from all parts of the country, were deterred from attending the Institution on account of the prevalence of small-pox for several months in the city, several cases having occurred among the students; and subsequently the appearance of meningitis in the Institution, which dreadful disease proved fatal in the cases of three fine young men-Mr. Flowers, of the Agricultural and Mechanical College, from Mississippi, and Mr. Dabney and Mr. Lusk, of the College of Arts, from Kentucky. During the prevalence of these diseases it required all the prudence and judgment of the officers of the Institution to prevent a general panic and demoralization. The session has been one of unusual prosperity and quiet, harmony and good feeling prevailing generally among both officers and students.

The handling of so large a number of young men with such satisfactory results is owing to the faithfulness of the officers and instructors of the Institution, the general good character of the students, and especially to the plan of organization of this University (peculiar to itself), in which there is but little of the usual machinery of legislative and judicial formalities, yet the largest division of labor and fullest individual responsibility and freedom among the various professors in carrying out their work, and in exercising their own plans and methods of instruction and discipline. In the arrangement of our Colleges, each with its own independent schools and professors, while they are all open

and accessible to all students in the whole University, we guard against any great massing of them together at any one time or place, and we secure the greatest professional results from men who are selected with reference to their specialties, and who have an opportunity of verifying that it is best "to be a whole man at one thing at a time."

Hence, during the session, we have occasion for but few formal meetings of the Faculties, the Senate, or the Executive Committee. Yet with all this individuality and segregation of Colleges there is such unity of purpose and spirit pervading the Institution that there are no unholy rivalries or jealousies among either professors or students, but a generous feeling with all to accomplish the greatest results in their respective spheres.

Under this *régime* it is not strange that citizens of Lexington constantly wonder at and praise the quiet good order of the students, and their general invisibility on the streets, and at the same time they observe that apparent seclusion of officers and professors from intercourse with the community which would be desirable, and which is somewhat prejudicial to their influence among the people. But we have no drones or idlers among them. They are generally live, earnest men, and faithful workers.

I submit herewith the reports of the several presiding officers, with the accompanying reports of the professors and assistants of the various schools in their respective Colleges, showing the number of classes taught, the attendance, deportment, and scholarship of the students, the reading of which shows a full average standing compared with previous years. Examination of these reports by the proper committees will show the wants of the various departments, which I commend to your consideration.

There have been no changes in the corps of professors since your last meeting, and there is but one vacancy in the schools already established—viz., that of Natural History, caused by the resignation of Professor Henry James Clark. The importance of filling it with an able and experienced Professor has induced the Executive Committee to look around with care for the right man, whom they hope to secure before the opening of the next

session. In the mean time the duties of the chair have been performed temporarily and chiefly by Professor Swigert.

THE COLLEGE OF ARTS.

The condition of this College, under the management of Professor White, the Presiding Officer, is shown by his report. which is herewith presented. There has been a falling off of matriculates in this College under the increasing tendency of the age to avoid the long and severe course of ancient languages which is prescribed in it, and to substitute in lieu thereof a broader course in the practical sciences and modern languages. So many new professions of life are opening up, so many inviting fields of enterprise are spreading out before the visions of the restless young men of America, that they seek the shorter road to wealth and fame rather than to linger by the Pierian spring or climb the lofty, rugged heights of Parnassus. I must say, however, that I believe there is not a College in our whole country where more thorough work is done by the professors, or where more thorough scholarship is attained than by those young men who persevere in the long and thorough course prescribed in this College, and as is well attested by the high position which many of its graduates have already attained in professional life.

THE AGRICULTURAL AND MECHANICAL COLLEGE OF KENTUCKY.

The law of Congress establishing these industrial institutions provides that a report upon their condition shall be made annually to the Secretary of the Interior, and copies sent also to all the other colleges similarly organized. Instead of preparing a separate report for that purpose, I have generally embodied it in my annual report to you, and consequently it becomes necessary that I shall go more minutely into the details of its operations than that of the others.

I submit herewith the report of the accomplished Presiding Officer of this College, showing the general results of the educational work performed during the year. These results have been more satisfactory than in preceding years. There was a much larger average attendance of old students than hitherto, a larger number pursuing the regular course, and a higher standard of scholarship and deportment than formerly.

SIGNAL SERVICE STATION.

The enlargement of the sphere of operations of the National Signal Service Bureau, extending its benefits to the interests of agriculture as well as of commerce, enabled the Chief Signal Officer to organize, at my request, a station at Ashland, in connection with the Agricultural and Mechanical College, and in the heart of this perhaps the finest agricultural region on the continent. Mr. W. S. Jewell, a very efficient officer, was detailed to take charge of the station, and furnished with a fine set of meteorological instruments by the Government, and rooms and outfit were furnished him by the Executive Committee. He has faithfully discharged his duties, sending his daily reports to the Bureau at Washington, besides furnishing them to our farmers through the papers of the city, and thereby creating a decided interest in meteorological science, and furnishing at the same time practical results of great value to the agriculturists and horticulturists of the country. In addition to this an interesting class was formed by him for the study of Meteorology, and he has given to it very thorough instruction, admirably illustrating the value of this growing science by the practical operations of his station.

TELEGRAPHY.

A class of more than twenty young men has been organized in Telegraphy, at the Agricultural and Mechanical College. The results have been very satisfactory to the students, and highly creditable to the instructor, Mr. Clements. The success of these classes in practical science and art, together with the very large attendance on the Commercial College and the interest with which these young men take hold of the work, illustrates the fact that the times and the people demand a broader curriculum of collegiate study than the old and narrow course of the

trivium and quadrivium, in order to meet the demands of our wonderfully expanding civilization.

MILITARY DEPARTMENT.

The Military Department of this College has been under the skillful management of Colonel Swigert, the Commandant, who has enforced, as far as practicable, the West Point discipline, the effect of which has been to produce a fine *esprit de corps*, and a manly and honorable bearing among the cadets. Under this strict military *régime* the system of boarding in clubs has worked more satisfactorily than heretofore, and a much larger number of students have availed themselves of this cheap yet healthy mode of living. Under this system the expense of a year's education is reduced to about one half the usual cost of education in many colleges. The United States Government has furnished ample arms and accouterments for practice in both infantry and artillery drill.

THE LABOR SYSTEM.

The labor of students belonging to the two-hour, uncompensated class has been limited to the care of the ornamental gardens and grounds at Woodlands, and very light drafts have been made on them for that purpose.

The students laboring from four to five hours per day for compensation have been a much better class than usual, and the results of their labor have been more satisfactory to themselves and the Institution than last year. For the want of means to defray the expenses of the labor system (nothing having been furnished me by the Legislature or the Curators) we have been compelled to limit the number of applicants in both the Agricultural and Mechanical Departments. Such, however, as have been admitted have generally defrayed the expense of boarding and tuition by their labor. The entire work upon the estate of four hundred and thirty-three acres has been performed by the students, except the breaking of the crop of hemp and the dairy work. The number of students employed in the shops and the amount of work done have been limited, from the fact that there

is no working capital at my disposal for operating extensively. A considerable amount of repairs and improvements upon the University property, both in the city and country, has been made by the students working in the shops.

THE FARM.

The farm is in a high state of cultivation and will, I think, invite the favorable criticisms of either practical or scientific farmers. We specially invite the attention of your committee to it.

The growing crop consists of sixty acres of clover, fifty acres of corn, forty acres of hemp, three acres of hemp-seed, sixteen acres of wheat, eight acres of oats, eight acres of rye, ten acres of potatoes, seven acres of beets and carrots for dairy stock, and twelve acres in vegetable garden. The remainder is in bluegrass. I believe I am willing to challenge comparison as to the prospect of the crops with those on any other farm in Kentucky.

The dairy department is still in operation, with an average of thirty cows. The gross proceeds of the sales of milk during the year amounted to over \$2,500.

The horticultural department consists of seven acres of fruittrees, two acres of vineyard, etc., and has been considerably improved during the year.

A number of varieties of seeds have been kindly furnished us by the Department of Agriculture, with which experiments have been made, proving more or less valuable. A report has been furnished the Department upon the results. But little, however, can be done by us in the way of scientific or experimental farming until the endowment is increased either by the State or the National Government. The small sum of \$9,900 a year is the total amount of the income, and this is appropriated exclusively to the payment of the salaries of the officers of the Institution, leaving nothing for experiments or payment of the costly labor of students, except what is made on the farm.

Many members of this Board can judge of the profits of Kentucky farming at this time, yet we have been able to keep it running so far by the closest economy and attention. I will speak more in future of the wants of this State Institution and the means to be adopted for meeting them.

THE BIBLE COLLEGE.

The report of the faithful Presiding Officer of this College is herewith presented, showing its continued prosperity and usefulness. Many of its students and alumni, together with those of the College of Arts, are now devoting themselves to the work of the ministry, and are reflecting honor upon the Institution in many of the states of the Union, and in distant lands.

The great want of this College is an endowment. When it is remembered that more than thirteen years ago this Board unanimously set apart every dollar of the Endowment Fund which was subscribed and paid in Kentucky to the perpetual support of the first six chairs of the College of Arts; that every dollar of this was given long before the Bible College was organized, and when even the suggestion of such a department was received with but little favor; and when you remember that to-day it has no endowment whatever except \$5,000 given by a liberal, warm-hearted citizen of Ohio, and that it draws its support mainly from the funds of the old Transylvania University, we can but congratulate you upon the good which it has accomplished. These facts should at once arouse its friends in and out of Kentucky to raise a liberal endowment for the support of at least the four chairs which are necessary to its complete organization.

THE COMMERCIAL COLLEGE.

This department, under charge of the faithful, laborious Presiding Officer, Professor Horace P. Perrin, attained a great success during the past session. It was deemed wise by the Executive Committee to purchase, at a cost of a few hundred dollars, the good-will and assets of another commercial college in the city, the opposition of which was removed; and we secured thereby the lease on the fine rooms which it occupied, a valuable

lot of furniture, and the services of Professor W. H. MARQUAM as the chief assistant to Professor Perrin. The result was that we had a large addition of students, and the fees have about paid the cost of running it.

At your last meeting the course of study in this College was extended so as to give to its matriculates an opportunity to pursue a very full three-years' course, embracing a thorough practical education, so much demanded at the present time by the young men of the country, and which is evidenced by the fact that about one hundred and fifty young men from a large number of states have availed themselves of the liberal advantages offered in this College.

I invite the attention of the Board to the recommendations contained in the report of the Presiding Officer.

LAW COLLEGE.

This department has continued under the able instruction of the distinguished and honorable professors, Madison C. Johnson, Presiding Officer, James O. Harrison, and John B. Huston. The attendance was about the same as last year. The commencement exercises of this College were held in January, and a class of fifteen young men were graduated. Many of the alumni of the College are reflecting honor upon the Institution in their various localities throughout the country.

I have received no report from the Presiding Officer of the College, and can not speak in detail of its wants, if any. A much larger number of young men should be the recipients of the thorough instruction given by the professors in this College, and it is hoped that in succeeding years the halls will be crowded.

THE LIBRARY, MUSEUM, AND APPARATUS.

The Library has received a considerable addition of valuable publications, which I obtained through the courtesy of the Department of the Interior, the Smithsonian Institution, the Naval Observatory, the Coast Survey, and the Medical Depart-

ment of the United States Government, for all of which the thanks of this Board are due.

We have received also from time to time valuable contributions to the Museum of Natural History from friends throughout the country, which have been duly registered, and are credited as follows:

DONATIONS TO THE MUSEUM.

DOWATIONS TO THE MUSEUM.
P. Wilkerson, Madison County, Ky., White Crane. H. De Walker, Moscow, Texas, Opossum head, Indian pipe. Marcellus Nichols, Midway, Bittern. Dr. C. Douglas, Tecumseh, Neb., . Snake-skin. Gen. J. C. Mrs. Jones,
771 ' 7'

The immediate wants of the Laboratories have been met by the addition of some valuable apparatus.

Such, gentlemen, is a general survey of the operations of all the departments of the University for the closing year. The work performed has cost a vast amount of toil of body and brain and care and anxiety of heart among the varied officers in charge; but the benefits of their labors have flowed without stint to the large class of young men who have crowded our halls from all parts of the continent, and we are not ashamed of the aggregate results for the cause of God and humanity. Five hundred and fifty-eight students, the most of them grown young men, have been the recipients of blessings and opportunities of preparation for the various professions of life at an average cost of about one half what is usual in many of the leading institutions in the land. Many young men have gone through the entire collegiate year on a sum not exceeding \$150—some on much less than this amount—and I claim for this Institution as its crowning glory that in its infancy it has thrown its doors wide open to the youth of every creed and latitude, and extended especially to the poor, at a mere nominal cost, advantages which but few others are offering in our country. True to the principles on which it was founded, and to the trusts committed to you by the donors, whether by individuals, the state, or the national government, it is moving on steadily and successfully in its grand mission of bringing the highest collegiate education, for any laudable business or profession of life, within the reach of the great masses who have hitherto been debarred. For all these opportunities of doing good we should feel profoundly grateful to our Heavenly Father, who has blessed us and the Institution so abundantly in the years that are past. But our work is only begun; and after all our sphere of usefulness is limited by the want of more means to carry out the great purposes in view. I must repeat constantly that our great want is still more money, endowments, buildings, etc. We can go no further at present than where we have been standing for several years without these; and we must go forward, or our sister institutions which are rising up in such magnificent proportions in nearly all the states will outstrip us.

Our civilization is advancing with such wonderful strides, our great country is developing so rapidly in all its material resources, and so many new professions and avenues for business are opening up, that there is an unprecedented demand for educated men—true, live, self-reliant, and self-sacrificing men. Besides, along with our civilization and the great currents of our national life, growth, and greatness, Christianity must plant her standard, and the call is loud and urgent for her thousand missionaries.

To do our part we must have more facilities. A few years ago a few hundred thousand dollars of endowment for a college, with one or two hundred students, seemed to meet the public expectation; but it will not now.

To meet in some degree these increasing wants I have spent the most of my time earnestly and laboriously in efforts to increase our funds. I may say that during the last year, as in all my past score of years, there has not been a day that my mind and heart and energies have not been strained in efforts to accomplish, directly or indirectly, the great results of an humble life-work; and if I failed last winter, for the want of a few hours, and by a mere legislative technicality, to secure the final passage of a bill which placed in your hands an additional million of dollars in trust for the great cause of popular education, I will be stimulated only the more to try and succeed in the future.

What I may accomplish in this and other directions toward realizing the dreams of my young manhood, and carrying forward the great work in which our hearts and hands have been so harmoniously engaged for many long years, will depend, in a large degree, upon the support and confidence you will give in the future.

May God, our Heavenly Father, give us wisdom and knowledge, and abundantly of the spirit of peace and love, in order to the faithful discharge of all the duties and responsibilities which lie before us.

All of which is respectfully submitted.

J. B. BOWMAN,

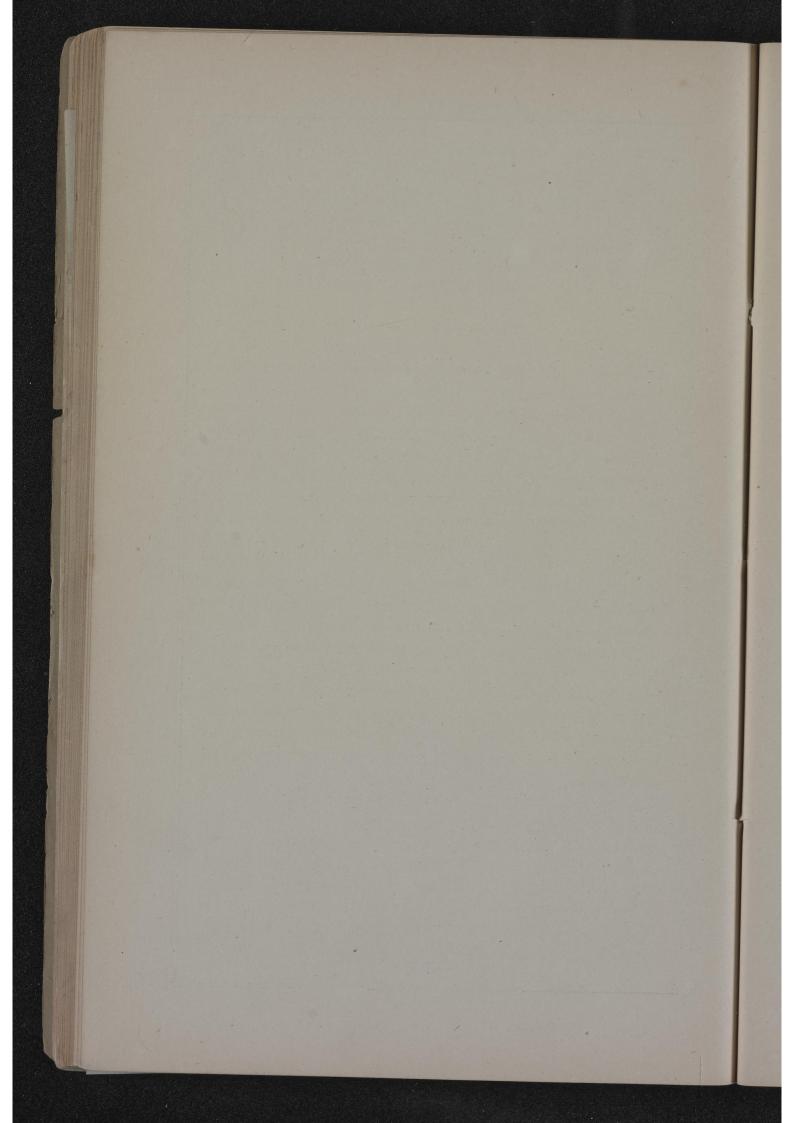

ASHLAND, June 10, 1873.

Regent Kentucky University.

KENTUCKY UNIVERSITY.

ANNUAL REPORT OF THE TREASURER.

1872-73.

ANNUAL REPORT OF THE TREASURER.

CURATORS OF KENTUCKY UNIVERSITY:

In obedience to the requirements of the organic laws of the Institution, I beg leave to submit my annual report as Treasurer.

It is well perhaps occasionally, in consideration of the large trusts committed to our hands, that we review our duties and relations to the donors whom we represent. In the charter it is prescribed that "all lands, money, or other property which may by donation, devise, deed of gift, or otherwise be contributed to said University, shall be strictly applied according to the instructions given by the donor or testator." In view of this law it is well that we look very narrowly into the nature of the trusts committed to us, and inquire who are the "donors or testators," and what were the "instructions" given by them. These donors and testators embrace a number of individuals, the States of Virginia and Kentucky, and the Government of the United States. The instructions given by them cover a variety of interests, running through a period of nearly a century, and embracing trusts which we have voluntarily assumed, and are legally and sacredly bound to guard and carry out. These trusts have come down to us by a peculiar combination of events, which makes the history of the Institution an interesting one. The consolidated funds and property controlled by this Board have come to us from the following sources: First, Bacon College; second, some eight hundred individual donors, whose notes were given to the Endowment Fund, the Real Estate and Building Fund, and the Apparatus Fund; third, Transylvania University, representing Virginia, Kentucky, and individual donors; fourth, the United States Government, through its trustee, the State of Kentucky. A brief sketch of the history of these funds and

property will be appropriate at this time, taking them in the order in which they have come into our hands.

THE BACON COLLEGE FUND.

In 1836, owing to a disagreement between the Trustees of the present Georgetown College and Thornton F. Johnson, S. G. Mullins, and one or two other members of the Faculty of that College, these gentlemen dissolved their connection with that Institution, and the two above named, being members of the Christian Church, gathered around them the sympathies of their brethren, and organized without a charter Bacon College. The writer, at that time a boy of twelve years of age, responded to the call of the first bell that summoned students to its halls, and having been connected with it and its successor through all its varied fortunes from that day to this, either as a student or officer, has a personal knowledge of its history and affairs. Its friends obtained for it a simple charter, with a self-perpetuating Board of Trustees, without any very extended or well-defined scope or plan of organization. Under the excitement of the denominational war which sprung up over its birth, it suddenly grew up with a full faculty and a large number of students, who were attracted mainly by the peculiar advantages which Professor Johnson offered in it as a civil-engineering school. For three years it was successfully supported by the fees and the liberal contributions of a few friends. In 1839 a proposition was made for its endowment, and a tender of its location was made to the town or county which would give the largest bonus. It was awarded to Mercer County, a number of citizens of all churches and of no church having promised to give \$50,000 for its endowment. It was removed to Harrodsburg in the fall of 1839. The pledges made for the \$50,000 were not redeemed. But a small portion of it was realized, and it soon became embarrassed. Other funds were raised from time to time for it throughout the state by L. L. PINKERTON, A. G. TALBOTT, and others, which were absorbed in the payment of its debts. After a series of

years of varied success and misfortune it finally went down, having been suspended in 1848, and lingered along until 1855 as an academy, with a moderate building, and with the small endowment (all that was left) of \$9,500 in depreciated stocks.

THE KENTUCKY UNIVERSITY FUND.

During the year 1855, viewing with deep sympathy and regret the prostrate fortunes of my Alma Mater, and feeling a desire to dedicate an humble life to the advancement of the cause of education and Christianity in my native state, I conceived the plan of an institution whose foundation should be laid upon a modern, American, and Christian basis; a University in the full sense of the term, broad and liberal in all its provisions for education both general and technical, and unsectional and unsectarian in its character and plan of organization. These aims and purposes were fully set forth and approved by donors and Curators for fifteen years. Gathering up the wreck of Bacon College, with its small assets as above enumerated, as a nucleus with which to begin the work, and operating under its charter until a better one could be obtained, with the approval of its Board of Trustees, and after assisting in the raising of the sum of \$33,000 in Mercer County from citizens of all parties, I went abroad, raising money for its endowment upon terms, conditions, and stipulations of my own with the individual donors, whom I found chiefly in Central Kentucky, and which were accepted and ratified by the Board. In a short time I succeeded in raising some \$160,000, which I reported to a meeting of donors held in May, 1857. At that meeting I made my first report, setting forth the work then accomplished, the manner of raising the funds, and the character of my future plans and purposes, all of which were unanimously approved by this large meeting of donors, and a committee was appointed to draft a charter in harmony with the great objects in view. I subsequently increased the amount of those subscriptions to the sum of \$203,200, including the Bacon College Fund of \$9,500. Of this amount

(\$203,200) \$164,639.44 has been paid in to present date, leaving a balance unpaid amounting to \$38,560.56, a considerable portion of which sum may yet be collected. Of the \$164,630.44 which has been paid, the sum of \$14,024.98 has been refunded to citizens of Mercer County under the act of the legislature removing the Institution to Lexington, leaving the net balance of this fund \$150,614.46, which was set apart some thirteen years ago, by unanimous vote of the Board, to the perpetual endowment of the first six chairs of the College of Arts, as it should be collected from time to time. There are about \$3,000 of Mercer County claims yet unadjusted, the most of which we hope to set aside as not coming under the provisions of the act of the legislature. This endowment added to the Transylvania and Agricultural College funds makes the total amount of available endowment \$381,114.46. The whole amount of these subscriptions was secured prior to 1865, the time when the Institution was removed to this place. All the subscriptions raised since that time have been made to the Real Estate and Building Fund, which at the present amounts in the aggregate to \$207,012.16. Of this amount \$175,428.08 have been collected and expended in the purchase and improvement of the Estates of Ashland and Woodlands. In addition to these funds I also raised \$7,965 of subscriptions for an Apparatus and Museum Fund, the most of which was paid and expended for the purchase of the apparatus of P. S. Fall. These are the whole of the Kentucky University funds which were secured by myself.

THE TRANSYLVANIA UNIVERSITY FUND.

A statement of the transfer of the funds of that institution to this Board was given in my report as Treasurer for the year 1866. A copy of the same was made by WILLIAM A. DUDLEY, Treasurer, and put on record in the Fayette County clerk's office. The sum of \$65,500 of endowment was turned over to us in the way of stock securities, which we still hold, and also the sum of \$4,725.67 of accrued interest, rents, etc., which, by

order of the Board, was expended in the repairs of Morrison College for the reception of the Institution from Harrodsburg, and the vouchers for which were examined and approved by the Executive Committee. In addition to these funds, property to the value of \$100,000 was turned over by the Trustees of Transylvania University; all of which property and funds, under the act of consolidation, are "bound by the trusts and conditions to which said Trustees (of Transylvania) were subject. In case of the removal of Kentucky University from Fayette County all said property and the principal are to be surrendered to said Trustees." These funds and this property are the remnant of the munificent donations and bequests which were made to that institution during the several periods of its history by the States of Virginia and Kentucky, and by James Morrison and others, running down from 1780 to 1840, a minute history of which I can not now give.

THE AGRICULTURAL AND MECHANICAL COLLEGE FUND.

The history of this fund is well known to the Board, and amounts to the sum of \$165,000, invested in six per cent. state bonds, the interest amounting to \$9,900 a year, which is sacredly set apart for its specific use, and which, with the fees and the products of the farm, constitute the entire available fund for the support of the State Institution.

These are the entire funds of the University, except a Prize Fund, which is proposed to be created by the sale of coupons donated for that purpose by E. D. Sayre, F. K. Hunt, and James C. Stone.

A general summary of the condition of these funds, together with all the receipts and disbursements for the fiscal year, is herewith presented, accompanied by the vouchers which have been examined and approved by the Executive Committee, and whose certificate is hereto appended.

All of which is respectfully submitted.

ASHLAND, Ky., June 9, 1873.

The Executive Committee met this day at Ashland to examine the books and accounts of the Treasurer, in accordance with the laws of Kentucky University; and after a full and careful examination of the same hereby certify that they are correct, and sustained by proper vouchers.

Jos. S. Woolfolk, Joseph Smith, Benj. Gratz, Joseph Wasson.
