

THE KENTUCKY KERNEL

UNIVERSITY of KENTUCKY

VOL. XI

LEXINGTON, KY., OCTOBER 1, 1920.

NO. 1.

SEVENTY-THREE MEN FIGHTING FOR PLACES ON WILDCAT TEAM

Juneau, New Coach, is Working Hard to Whip Squad into Shape For First Game, October 2

12 LETTER MEN ARE BACK

In a couple of weeks, more or less, the entire student body, men and women, squabrels and chickens, will be on Stoll field "rah-rahing" at the opening game of what promises to be the greatest season in the history of the University.

In several years we will look back and say, "Old Alma Mater sure turned out a great team in 1920." That is, our prospects indicate such at present.

To begin with, our coach, William J. Juneau, of Wisconsin and Texas, who is one of the best coaches in the country, arrived on the lucky thirteenth. Assistant coach George C. Buchheit, also came that day.

Coach Myers, of Centre, speaking of our coach and team says, "We expect a game on November 12, at Lexington as hard as anything we have. If Wildcats get harmony, they ought to do wonders. Even the Harvard game will not be as interesting in this State as will the contest with Kentucky. We struck the University of Kentucky last year when that team was very unfortunate. Juneau is a mighty capable man and he has handled teams under all kinds of conditions. If we don't play football and Kentucky does, they'll beat us with the same men they had last year."

In addition to Juneau and Buchheit the Wildcats have the advice of "Daddy" Holes who has forgotten more about football than most coaches ever knew. The Wildcats have twelve letter men who are out scrapping for positions on the team, namely: Thompson, guard; Colpitt, guard; Server, tackle; Heber, end; Zerk, end; Paulson, halfback; Muth, fullback; Pribble, fullback; and Lavin, quarterback. Thornton, quarter; Grant, guard; and Haydon, halfback. Letter men from Transylvania who were not eligible last year because of the "one year" rule are also out. Post, center, from Marietta, has served his required time, at the University.

In all Coach Juneau and his staff have seventy-three applicants from which to pick a team. A goodly number of men who played on the class teams and many high school graduates, who made a name for themselves last year in the inter-scholastic football world are out on the field working hard.

Much new equipment has been purchased and there are uniforms enough to equip 150 men. The grandstand has been rebuilt and already several of the prospective cheer leaders have equipped themselves with gaily bedecked, yet unusually sonorous megaphones. The schedule follows:

- Oct. 2—Southwestern Presbyterian University, here.
- Oct. 9—Maryville, here.
- Oct. 16—Miami, Oxford.
- Oct. 23—Sewanee, here.
- Oct. 30—Vanderbilt, Nashville.
- Nov. 6—Cincinnati, here.
- Nov. 13—Centre, here.
- Nov. 20—Tennessee, Knoxville.
- Dec. 2—Football banquet.

MISS CRANE RETURNS

Miss Adelaide E. Crane, former house steward of Patterson Hall, and for the past year and half engaged in relief work with the American committee for relief in the near East, has returned to take complete charge of the girls' dormitories, assisted by Mrs. Brown in Maxwell Hall, and Miss Berkeley in Gordon Hall.

"LITTLE SISTER MOVEMENT"

Prospective Students Sent Letters by Girls of the Upper Classes

The "Little Sister Movement" instituted by the co-eds of the University last year, now holds sway in the dormitories and on the campus, each new girl being provided with a "big sister," who helps her become adjusted to the new surroundings.

The work of this movement has been going on during summer. Each prospective student was assigned in July to an upper classman, whose duty it was to write to the new girl, informing her of all University affairs, answering her questions as to conditions here, and giving general advice. In this way each new girl will have the personal attention of some upper classman, and it is hoped will be the means of eliminating much of the homesickness of the first few weeks.

Adelle Slade is general chairman of the movement and has the assistance of about ninety girls, as "big sisters."

W. L. BRONAUGH DIES IN CHICAGO

Prominent Alumnus Drops Dead in Private Office

The following account of the death of Will Logan Bronaugh appeared in the Lexington Herald, July 27:

"Will Logan Bronaugh, former Lexingtonian, president of the W. L. Bronaugh Manufacturing Company, Chicago, and one of the most prominent University of Kentucky graduates dropped dead in his private office in Chicago at noon Monday according to a telegram received here late last night.

"Mr. Bronaugh was graduated from the College of Engineering, University of Kentucky, in 1899. He was 42 years old at his death. He founded the manufacturing company which bears his name. It is one of the leading heating and ventilating manufacturing companies of the West.

"He was born and reared in Nicholasville. Besides his widow, who was formerly Miss Mabel Taibles, of Chicago, and one daughter, Mary, 7 years old, he is survived by his mother, Mrs. Kate Logan Bronaugh, of Lexington, and a sister, Miss Anne Bronaugh, of New York, a well known actress.

"Mr. Bronaugh was three times president of the Chicago-Kentucky Alumni Club and one of the most active members of the Alumni Association of the University of which he was president one term. He was a member of Sigma Chi fraternity and of Lamp and Cross.

"The following committee was named to draw up resolutions on behalf of the Alumni Association: Professor T. T. Jones, chairman; Misses Marguerite McLaughlin and Lullie Logan, J. D. Turner, Headley Shouse and Herbert Graham. A committee from Lambda Lambda chapter of the Sigma Chi fraternity also was appointed to draft resolutions on his death."

REPAIRS AND CHANGES

Department of Journalism Has New Rooms

Many repairs and changes have been made on the campus during the vacation, but now new buildings have been erected. New rooms are being erected on Stoll field, and a gas engine laboratory is to be built this year. The University cafeteria has been enlarged, and the three rooms formerly occupied by the Department of Journalism, in the basement of the administration building, will be used as dining rooms. The old dining room will be used as a serving room.

The Department of Journalism has been transferred to the basement of the Science building, where the room of the Strollers, the University dramatic organization, will also be located.

SEVENTEEN REPRESENTED KENTUCKY AT BLUE RIDGE

Y. M. C. A. Sends Large Delegation to Annual Conference

Three faculty members, six men and eight women represented the University of Kentucky at the Y. M. C. A. conference at Blue Ridge this summer. Many prominent men spoke during the session which is considered one of the most successful ever held in the beautiful North Carolina mountains.

President Frank L. McVey, Dr. P. P. Boyd and Dr. Charles L. Shull were the faculty members present. Students representing the University were: Gilbert Smith, George Baumgarten, Flexnor M. Heath, F. L. McVey, Jr., C. V. Watson and George H. Gregory. Women who represented the University at the Women's Conference were: Margaret Ford, Lucile Moore, Jessie Fry Moore, Esther Harria, Katherine Herring, Adeline Mann, Lucille Hendrix, and Orena McMahan.

Dr. Harry Anderson Fosdick, New York, noted minister and lecturer, spoke at the Women's Conference.

Mr. R. W. Owens, retiring secretary of University Y. M. C. A. was registrar at the conference. Karl Zerfoss, an alumnus

of the University and State student secretary of the Y. M. C. A., represented the State organization.

Dr. O. A. Brown, W. W. Alexander, Dean Kestler, and Eddie Mimms were speakers at the Men's Conference. Dr. E. S. Hall, of Australia, and Dr. Fletcher Brockman, returned missionary from China, were among the most noted lecturers who appeared before the conference.

Miss Nellie Stow, a graduate of Logan College, Russellville, was the only Kentucky girl who remained to attend all the summer conferences. She will enter the University this year.

The morning hours of the conference were given over to classes in Bible study and kindred courses. The most able speakers available were procured to address these classes. The afternoons were devoted to athletics and hikes. The University of Kentucky, represented by seven men, took second place in the athletic meet. Georgia Tech, with fifty-two men in the field, was first.

The more socially inclined of the men were given efficient instruction in dishwashing by some of the fair co-eds. Montreat bathing beach seemed to be the favorite objective of the men hikers. Other hikes to High Top, Beacon's Pasture and other places of interest were enjoyed.

BART PEAK IS NEW Y. M. C. A. SECRETARY

Former Quarterback Returns to the University Campus

Bart Peak, of Grange, graduate of the University of Kentucky and Y. M. C. A. secretary during the war, has assumed the office of Secretary of the University Y. M. C. A., succeeding Mr. Ralph E. Owens, who resigned to become Associate Pastor at the Second Presbyterian church of Lexington.

Mr. Peak attended the University from 1918 to 1917. He is a K man, having played quarterback on the football team. He is a member of the local chapter of A. T. O. Following his graduation, Mr. Peak enlisted in the army as a private. He served at Camps Taylor, Jackson, Knox and Lewis. He was commissioned in June, 1918. When the war was over he became a student at the Southern College of the Y. M. C. A. and later at Vanderbilt University.

Mrs. Peak was Miss Lavinia McDowell, of Warsaw, a former student at the University.

NEW STROLLER ROOM IN SCIENCE BUILDING

Attractive Studio For Dramatic Organization

Keeping step with the general progress of the University, the Strollers, the dramatic organization of the University, has occupied a large room in the remodeled basement of the Science Building.

The new room provides the Strollers with an attractive studio suitable for all occasions. Many old Strollers are back on the campus, and members of former casts can get their pins by seeing Herndon Evans.

Many entertainments are planned for the year, and the prospects for an all-star cast in this year's production are unusually bright.

A large number of new students have already signified their intention of "going out" amateur night, which will be held in the chapel as usual, on Halloween.

ENROLLMENT IS MORE THAN 1000

Large Number of Women Students This Year

Student enrollment had broken all records when the books in the Registrar's office were closed Thursday evening. Because of the heavy registration an extra day was required for enrollment and matriculation. The enrollment was 1120 at noon Thursday and a number of students had not registered at that time.

A feature of the present enrollment was the large number of out of state students. It is estimated that approximately one-fourth of those enrolled are from New Jersey, Texas, Delaware, Oklahoma, California and other states.

The large number of women students, is also of interest. There are approximately one-third more co-eds than were enrolled last year.

Dean Simrall says that some women have returned home, being unable to find accommodations and that a number of others have not been placed as yet but that every effort is being made to get them satisfactory rooms.

Kernel Is Published Under Difficulties

Owing to difficulties in the office of the printer, the Kernel was forced to make its initial appearance in altered form.

The trouble was in no way due to the negligence of the Kernel staff. In fact, much credit is due the staff for getting out this issue as the work was done under unfavorable conditions.

All subsequent issues will appear in the regular form which the Kernel has used for so many years.

THE KENTUCKY KERNEL

Published every Friday throughout the College year by the student body of the University of Kentucky, for the benefit of the students, alumni and faculty of the institution.

The Kentucky Kernel is the official newspaper of the University. It is issued with a view of furnishing to its subscribers all the college news of Kentucky, together with a digest of items of interest concerning the Universities of other States and Canada.

SUBSCRIPTION, ONE DOLLAR AND FIFTY CENTS A YEAR, FIVE CENTS THE COPY.

Entered at Lexington Postoffice as second-class mail matter.

BUSINESS STAFF

H. B. Lloyd	Business Manager
J. Burton Prewitt	Assistant Business Manager

TE SALUTAMUS!

New students, we salute you. You are entering upon a year fraught with many trials in national and civic life. New policies, economical and sociological, are being formulated. Progress is the key-word everywhere.

The year is to be one of progress here in our scholastic community, also. New students and new instructors are more numerous than ever. You are entering one of the best universities in the South. It is a university which can offer you all the advantages that a modern American university can offer. You have a choice of various colleges. You have access to a varied campus life of intense activity to which you should add your talents and your co-operation.

Last session we experienced the most successful year in our history in student activities. The football team made an enviable reputation. The baseball team never had a better year. The Y. M. C. A. carried out a pretentious program. The Glee Club, under Professor Lamper's direction, made important trips and advertised the university well in the western part of the State. Academic work was generally satisfactory.

The Kernel, too, became a more integral part of the University last year when the Registrar sent several hundred copies weekly to various high schools of the State. This year with the co-operation of the student body, the Kernel hopes to put a copy of each issue into the hands of every senior in every high school in the State. On the campus, also, the Kernel feels that it has its mission to perform and that it will perform it well if it has the co-operation of the student body. Without co-operation of the students it cannot succeed. The new Kernel home is with the Department of Journalism in the Science Building. Students are invited to visit it at any time or to submit matter for publication by contributions to the Student Forum and leave them in the Kernel box in the postoffice.

The Kernel admonishes its friends to learn to love your college and its traditions which are as old as the verdant ivy which entwines Mechanical Hall, and to make this the greatest, the happiest, the most useful school year of your student lives. Finally, let's all pull together for the honor and glory of "Old Kentucky."

Squirrel Food

Oh Boy, aren't we all happy, now that we are back again.

Freshmen, don't worry, you'll feel at home in a few weeks, all you have to do is to just keep your eyes and ears open, your mouth closed and your brain working. Just remember that every one passes through the Freshman stage, that every one has had that skiddish feeling. With a few years of study, some work, and a little courtship, you will be equipped for life, with a wife or husband, as the case may be. You are on the top of the world, with the knowledge of centuries at your finger tips, all you have to do is to reach out and grasp it.

NOTE—For several weeks the editor will expound, through this column, Helpful Hints to Freshmen.

There will be a meeting of all the Freshmen girls who have never allowed themselves to be kissed, by one of the opposite sex, next Saturday afternoon in the telephone booth in Union Station.

I'll Say He Did

Bill had a bill-board, Bill also had a board bill. The board bill bored Bill, so Bill decided to sell the bill-board to pay his board bill. Bill sold his bill-board and paid his board bill. Thusly after Bill paid his board bill the board bill no longer bored Bill.

Why certainly we all understand English.

ACT I	Maid One
ACT II	Maid Won
ACT III	Maid One

The Knight of Lexington Drug says: "Some persons would think you were talking about the wife of Jupiter if you said anything about Juneau."

Life is like a street car line, if you miss the first car don't go down in the dumps—there'll be another along pretty soon!—Elbert Hubbard.

How about girls or "Squirrels," Mr. Hubbard?

Senior Stuff

Oh, the class of '21,
Best and wisest 'neath the sun!

The post office should advertise, "With every bar of Hershey's bought for seven cents we will give five one cent stamps for a nickel."

FIVE DOLLARS FOR BEST KERNEL HEAD SUBMITTED

The Kernel announces a contest with a prize of \$5.00 for a drawing of a name plate, or title, to be used at the top of the first page of the paper.

The purpose of the contest is to provide a drawing from which a plate can be made.

While the contest is primarily for students in the Department of Art and Design, drawings will be welcomed from anyone.

The drawings should be the width of a regular issue of the Kernel, the height arbitrary.

All drawings should be left in the Kernel postoffice box by October 20.

The winner will be announced as soon as possible.

Alumni Notes

Announcement has been made of the engagement of Leo Joseph Sandman, of Louisville, '14, and Miss Julia De Boer, of Lexington. They will be married early in October.

W. H. McAdams, '18, is assistant professor of Chemical Engineering at Massachusetts Institute of Technology and is one of a firm of consulting chemical engineers in Boston. He was in Lexington recently on a visit to his parents.

Than G. Rice, '17, is an engineer with the Wynn Coal Company, at Providence, Kentucky.

M. J. "Romey" Clarke, '16, is principal of the Frankfort (Ky.) High School. He has four assistants who are "State" alumni, Misses Lois Ammerman, '18, Carolyn Lutkemeler '16, Elizabeth Sergeant, '12, and Nell Crawford, '17.

A daughter christened Dorothy Anne was born to Mrs. E. T. Proctor at Paducah June 29. "E. T." was a member of the class of '14. Mrs. Proctor, formerly Miss Marie Louise Michot, was graduated in '16.

Mrs. Edward Oppenheimer, formerly Miss Goldye Lazarus '07, is living at Mission, Tex.

Presley T. Atkins, ex-'05, is a joint owner of the Pineville (Ky.) Sun. He took charge of the paper last week.

Dr. William C. Hobdy, '96, who was in government service in the Philippine Islands and later was engaged in private practice there, will be living in San Francisco about November 1, where he will be a surgeon. He is hunting now in Alaska.

Professor W. E. Freeman is on leave of absence from the University for a year and is with the educational department of Westinghouse Electric and Manufacturing Company at East Pittsburgh.

Captain John I. Bryan, '96, who has been in the revenue service for twenty-six years, is in charge of the Barge Office, New York City. Captain Bryan served on a destroyer in the Mediterranean for several months during the World War.

Major John Scott is at the General Service School, Ft. Leavenworth, Kas. He spent twenty months in France during the World War, on the staff of combat divisions. He was with the First near

Solssons in the drive of July 18, 1918. He was awarded the Legion of Honor and Croix de Guerre.

Dr. Paul I. Murrill, '05, is living at Plainfield, N. J.

J. G. Stewart, '18, is a farmer and stockman at Crittenden, Ky.

Rufus L. Weaver, '95, who is a leading lawyer in New York, is taking active interest in alumni affairs and in the Memorial Building Campaign.

Henry N. Marsh, '15, who is with Hercules Powder Company at Wilmington, Del., writes that he saw Mr. and Mrs. Maury Crutcher, Mr. and Mrs. Alex Hall and Mr. and Mrs. "Jimmie" Hedges on a recent trip to Detroit.

Jack Wadsworth '12, is at Norwood, O., "prosperous, married and happy."

NEW PLAN MARKS DEPARTURE

This issue of the Kernel marks a departure from the old policy of the paper and of the Alumni Association. The Alumnus, hereafter, will be published annually and will include a directory. A section of The Kernel will be devoted to Alumni news weekly.

The Alumni Association decided upon this step in the belief that it would result in reviving a more intense and more active interest in affairs of the University. This is your section. It will carry news of your friends and classmates. Suggestions as to things to be accomplished by the alumni and methods to be employed will be welcome always.

Alumni of the University are reaching the point now in their march to success where they can do something for the University. Joined in a strong and vigorous organization we can accomplish infinitely more than by individual action.

Great strides forward have been taken by our Alma Mater in the last few years. But it must do more. You can aid in many ways to reach this end. Let us count on you to carry on.

ALUMNI NOTICE

Dues to the Alumni Association include subscription to The Kernel. See that one of your classmates also is in good standing. Mail your check to Herbert Graham, Secretary-Treasurer, University of Kentucky, Lexington.

SAMSON AND DELILAH—MODERN VERSION

"Some persons are born bald, some achieve baldness, and some have baldness thrust upon 'em."
—Apologies to Bill Shakespeare.

As unsuspecting as Samson, the mighty hunter of old, come the freshmen, strong in the pride of youth, bursting with self-importance and glorying in the luxuriance of their unshed locks. Pompadours of patent leather sleekness vie with clustering curls that shade an intellectual brow the military haircut that bespeaks a man is next in line to the latest "parted-in-the-middle" mode. Alas—all in vain!

As cunning as Delilah, the fair enchantress, the sophomores lie in wait for their victims. Under a mask of feigned friendship each soph underneath the "Scandal of the Blue Card," gives the Freshie the once over and hastens homeward to sharpen his clippers. From that time forth the freshman is a marked man—and great is the fall thereof.

A reign of terror is on. The hair flies with the falling leaves and like them lie in brown and withered drifts about the campus. 'Tis then that freshmen math and chem classes assume a bleak and unprotected look as to surface. However this is soon lost in a haze of down reminiscent of a baby chick; the next stage is a bristle that quite properly reminds one of a chestnut burr.

Watch the hair grow!
You tell 'em, chimpanzee, Darwin was right!

MEMORIAL BUILDING CAMPAIGN PROGRESS

Loyal Fayette County Citizens have Underwritten the Bond Issue

The Memorial Building campaign is progressing steadily. Approximately \$170,000 has been raised including the \$75,000 bond issue by the City of Lexington and the appropriation of \$25,000 by the fiscal court of Fayette County. Validity of the bond issue has been questioned. It is now before the Court of Appeals. One hundred citizens of Fayette county have underwritten the bond issue, however, each pledging himself to pay \$1,000 to the fund if the question is decided unfavorably.

"We must count more on the support of the alumni and former students of the University in raising the remaining \$180,000," says Herbert Graham, the Campaign Manager. "In every county in which we seek to effect an organization for carrying on the work the value of the University is questioned. Many persons say 'If your alumni are for it and will work I will do my share.' Before these local drives are resumed an effort will be made to have every former student in these respective sections of the State talk in favor of the campaign and explain the value of the University. We need active loyalty such as this not the passive kind."

Military News

Personnel—The season opens this year with a substantially increased U. S. Army personnel which will place the instruction on a better basis than ever before. Two regular army field officers are now on duty and four regular non-commissioned officers have reported.

Uniforms—Uniforms are on hand ready to issue and each cadet enrolling will be provided with a complete uniform including shoes. It must be remembered that the title to all government property issued to students remains with the United States and any loss or damage to same, other than fair wear and tear, must be made good by the individual or his parents or guardian.

New Equipment—Since the close of the last term, the following new ordnance and engineering equipment has been obtained; entire new set of Springfield rifles; Browning machine guns; Browning automatic rifles and Stokes mortar gun. Fifteen excellent sketching boards complete with all accessories for topographical sketching.

Course—The unit of the Reserve Officers' Training Corps established in the University offers the following courses.

1.—Basic course of two years for all freshmen and sophomores who are citizens of the U. S., over fourteen years of age, and who conform to the required physical standards.

2.—An elective advanced course, leading to a commission in the Reserve, for students who have successfully completed two years R. O. T. C. work in a senior division, or graduate of a junior division, and who may be selected by the President of the University and the Professor of Military Science and Tactics for further training. Credits for R. O. T. C. work accomplished at other institutions may be granted upon presentation of authenticated copies of records from former institution. It is desired to enroll in the advanced course selected men who are interested in pursuing the course to completion with the purpose of gaining a reserve commission.

Obligation
1.—To pursue the course to completion as a prerequisite to graduation.

2.—To devote 5 hours a week to the work prescribed.

3.—To attend one summer camp, normally between junior and senior year, at which the student will not only receive pay, but all expenses while at camp and en route to and from camp.

A system of demerits will be substituted for the Squad Drill formerly in vogue.

Instruction during first week will be held at the 5th hour, on September 23rd, 24th, and 25th. Thereafter, Drill hours will be as follows:

Freshmen—Monday, Friday, Saturday.
Sophomores—Monday, Wednesday and Thursday.

Chapel on Tuesday at 5th hour.
Schedules for the Advanced course will be announced later.

Any information desired regarding the Military Department will be gladly answered at the office of the Commandant.

Benefits

1. Commutation of subsistence amounting to approximately \$16.00 per month.

2. Allowance of two credits per semester or a total of eight credits toward graduation for the advanced course. Work: This is addition to the 4 credits given for the basic course.

3. A complete uniform.

4. A commission in the Reserve upon successful completion of the course and graduation, if recommended for same.

5. A training that will prove of benefit in later years not only to the individual, but to the Country.

NEW COMMANDANT

Colonel Freeman Has Arrived to Command R. O. T. C. Unit

Lieut. Colonel George D. Freeman, new commandant at the University, has arrived, and is in his office daily to answer all questions concerning military training.

Special inducements are offered to men in the advanced course this year, including \$16 a month commutation and \$1 a day at the summer camp, which is usually attended during the Junior and Senior years.

CADETS MAY DISCARD OLIVE DRAB UNIFORMS

Blue or Grey Attire With White Trousers Proposed

University cadets may discard the olive drab army regulation uniforms after this year for a "snappy" blue or gray attire, with which white trousers may be worn on parade or on dress occasions.

Instead of the tight-fitting collars, the blouse of the new uniform would have lapels and one the left shoulder of the blouse would be a patch in the University colors, similar to the divisional patch worn by soldiers overseas.

The trousers would be straight and the elimination of the leggings would give the battalion a more uniform appearance. Instead of furnishing uniforms for the R. O. T. C., the government will allot money and the matter of changing the dress is being considered by the University authorities, it was stated by Major A. S. J. Tucker.

During the coming year one of the proposed new uniforms will be on display at the University and Major Tucker plans to have it worn by some cadet at a military hop, being sure it will completely "knock 'em cold."

NEW RULES CONCERNING ABSENCE FROM DRILL

Demerit System Has Been Installed in Military Department

The following ruling concerning absences from drill has been issued by the military department:

1. All instructions previously issued and not in conformity with the provisions contained herein are rescinded.

2. Hereafter delinquent students will be awarded demerits on a basis as described below. Award of demerits in special cases will be determined according to circumstances and necessities of the case.

3. As a guide in the awarding of demerits the following will obtain:

Unexcused absence 10

A cadet not in proper uniform will not be allowed to fall in at military formations, and will be marked absent.

Late at formations 3 to 9

Minor breaches of discipline: (Inattention; trifling, laughing or talking in ranks or class room) ... 5

Neglect of rifle or equipment 10

Failure to render properly the military courtesies 5

Serious breaches of discipline will be considered according to the circumstances. Demerits in the above list may be increased in the case of repeated violations.

4. Any student receiving 20 demerits in a semester will be called before the Commandant. A student receiving 40 demerits in any semester will be reported to his Dean. Any student receiving 50 demerits in any semester will be sent before the Discipline Committee, and the semester's work will be regarded as unsatisfactory, and a grade of "E" entered on his record.

ALBERT S. J. TUCKER,

Major Infantry, P. M. S. & T.

RED CROSS LOOKS FOR SUPPORT IN COLLEGES

Annual Roll Call Will Be Held November 11-25

When America went into the war there was an immediate rush of college men to take their places on the firing line. By fall 150 institutions reported that 18,820 students were in the army or navy, and 1,650 had gone into non-military activities. The undergraduates for the most part went into active service, the alumni, or those of them who for one reason or another were unfitted for army or navy, went into the service of the relief organizations.

Hundreds of college men and women went into the Red Cross. This organization was made up largely of college men and women. They went into it because it was constructive, because it gave them a chance to apply practically those ideals which are the ideals of America, and which the training they have received in colleges and universities has taught them to honor and cherish.

When the war ended, many persons thought the Red Cross would end too. But disease and suffering did not end with the war. Health, good citizenship are as important today as they were two years ago. So the Red Cross work goes on. It still stands for the ideals of America.

It is the duty and the privilege, therefore, of every college student to stand back of the Red Cross, to aid it in every way possible in its after-war campaign for a healthier and happier America. The Annual Red Cross Roll Call will be held November 11-25. Ten million Americans joined or renewed their membership last year. The Red Cross counts on its college friends to join again, this year, says a recent bulletin.

SUCCESS IN PROMISE FOR ARTIST SERIES

Miss Goff Arranges a Pretentious Program for Season

Miss Goff and her assistant, Mrs. Frank Gentry are meeting with success in their undertaking to procure for Lexington the Artist Concert Series, which will consist of four notable events in the history of this part of the country:

At Woodland Auditorium, Cincinnati Symphony Orchestra, Eugene Ysaye, director. Soloist, Miss Jessie Christian. Matinee and evening of October 6.

Geraldine Farrar (one concert only) Assisting artists: Ada Sassoli, harpist, Edgar Scofield, baritone; Claud Gotthelf, accompanist. Date to be announced.

New York Philharmonic Orchestra, Joseph Stranski, director. Soloist: Frease Green, soprano. April 4, 1921, one concert only.

Madame Schuman-Heink during week of April 25, 1924.

One thousand season tickets must be sold before the series may be procured and one-half of these have been purchased by the music lovers who are delighted with the opportunity promised.

A special price has been made University students for the series.

Engineering

WIRELESS STATION WILL BE IN MECHANICAL HALL

University Will Receive News of World This Year

Students can this year receive the news of the world through the wireless station which the College of Engineering has installed and fully equipped. A permanent station will be established in Mechanical Hall.

One member of the Aerial Club will be on duty each night at the wireless station and will "listen in" on messages traversing the Atlantic and those crossing this country.

The receiving station will be able to pick up messages within a radius of several thousand miles. The messages received will be recorded in a log.

The sending apparatus will be strong enough to transmit messages for 200 miles.

STUDENT FORUM

EDITOR'S NOTE—The Kernel will be glad to print under this caption any communications received from students that are of general campus interest.

SOCIAL SERVICE COURSES TO BE OFFERED THIS YEAR

Miss Pauline Wherry of American Red Cross Will Instruct Community Welfare Subjects

The Social Service Courses to be offered by the University this year are listed as Applied Sociology in the Department of Economics and Sociology. They will be taught by Miss Pauline Wherry of the Lake Division, American Red Cross.

The work of the year has been arranged in two parts; the first semester will be devoted to the study of Family Welfare, and the types of social service that may be rendered for the family. This course catalogued as Applied Sociology 159 and 160 includes three hours lectures and six hours laboratory work a week, giving credit for five hours.

The second part of the course has been named Community Welfare or Community Organization and deals with the principal problems of health, recreation, education and organization in small towns and rural communities. This course is catalogued Applied Sociology 161 and 162, including three hours lecture and six hours field work a week, giving credit for five hours.

The registration for courses in Social Service has been limited in order that more time can be given to each student and more thorough work can be done by the group. The prerequisites are courses in Psychology and Sociology, and senior standing.

Students desiring to register for the course should be recommended by Miss Simrall, Dean of Women.

The Berean Bible Class
OF
Calvary Baptist Sunday School

This class is organize for young women, and you will find here a lively, congenial company of girls who will be happy to meet you and make your visit a pleasant one.

Engineering
WIRELESS STATION WILL BE IN MECHANICAL HALL
University Will Receive News of World This Year
Students can this year receive the news of the world through the wireless station which the College of Engineering has installed and fully equipped. A permanent station will be established in Mechanical Hall.
One member of the Aerial Club will be on duty each night at the wireless station and will "listen in" on messages traversing the Atlantic and those crossing this country.
The receiving station will be able to pick up messages within a radius of several thousand miles. The messages received will be recorded in a log.
The sending apparatus will be strong enough to transmit messages for 200 miles.

Republican Club Meeting
Little Theatre
8 p. m. Thursday

Notes of Colleges

ARTS AND SCIENCE

A Department of Hygiene and Public Health has been added to the College of Arts and Science. Dr. P. K. Holmes, A. M., M. D., a graduate of Ohio Wesleyan University, will be at the head of it. Dr. A. G. Ireland, formerly resident physician at the International Y. M. C. A. College at Springfield, Mass., and foot ball coach at Bates College, will be associate professor.

Dr. Eva M. Locke, practicing physician of New York, will be associate professor of hygiene and public health and will be resident physician for women. Dr. Holmes and Dr. Ireland will have in their care the health of members of the athletic teams, will give physical examinations to students, oversee the work of the dispensary, and give free medical advice to all students.

They will also conduct courses in hygiene, first aid and public health; and will give a normal course to prepare teachers of public health for the public schools, according to the act of the last legislature. The Department will work in cooperation with the State Health Department.

Painter and Lecturer

An important addition to the College will be Carol M. Sax, painter and lecturer of note, who will succeed Miss Miina McLeod Beck as head of the Art department. Mr. Sax is a graduate of St. Johns school, was a student at the Chicago Art Institute, the New York Art Students' League, the National Academy of Design, and holds a diploma vase studio in Baltimore and teaching in Maryland Institute, while acting as supervisor of the Yagabond Theatre, Baltimore's community play-house.

Mr. Sax is well remembered in Lexington, where he came to deliver a series of lectures on the Little Theatre and assist the dramatic organizations of the University several years ago.

Courses in practical music are also to be introduced this year, and practice rooms for the girls are being constructed in the basement of Patterson Hall. Courses in piano and violin will be offered. Professor Carl Lampert, director of music, having charge of the latter.

Others on Faculty

W. J. Juneau, a graduate of Wisconsin and formerly football and track coach at the University of Texas, is assistant physical director this year.

E. D. Hull, who won his master's degree at the University of Chicago, was assistant professor in botany there and at Mt. Morris College, will be assistant professor of botany.

Miss M. H. Politt, who formerly taught at the University, will return as assistant professor of ancient languages. Miss Margaret Hornefield, a graduate of the University of North Carolina and former student at Columbia University, will be instructor in Romance languages.

Miss Ethel Anderson, a graduate of Mt. Holyoke, who had her master's degree at Cornell, will be assistant in zoology, and W. E. Payne will be instructor in mathematics. He is a University of Utah graduate and has studied in the University of London, England, the University of Chicago and the University of California.

Miss Flora Le Hurgoon, who received her doctor's degree at the University of Chicago and taught at Centre College, will be an assistant in mathematics, and W. H. Mikesell will be assistant in public speaking. He received his master's degree from Harvard, and was instructor at the University of Texas. H. N. Patterson, Guilford College, will be instructor in English. N. M. Williams will be an instructor in chemistry, and Dr. Charles Berkenbus an associate professor in chemistry.

New teachers in the Model high school on the campus will be: Miss Molly Ross Hayes, University of Missouri, 1918, history; Miss Viola Kerrick, a graduate of Transylvania College and for three years a teacher at Hamilton, English; and Casey Smith, science.

Prof. J. Garrett Kemp, formerly head of the department of physics at Oklahoma A. & M. College, will succeed Prof. C. D. Killebrew as associate professor of physics.

Simon E. Leland, student of law at Yale University last year, A. B. from DePauw and A. M. from the University of Kentucky, will succeed Prof. J. E. Cleland as assistant professor of economics.

Miss Gladys M. Love, a graduate of the University of Tennessee, has been selected as instructor in psychology. Miss Tillie B. Greathouse will be resident nurse.

Edward A. Warren, who holds a bach-

elor of arts degree from Wesleyan University, will be an instructor in English. Professor J. C. Jones, of Columbia University, has been appointed assistant professor in political science. He is a graduate of Transylvania, having taken his A. B. in 1911 there, and his Master's degree at Columbia in 1915. He has completed the requisite work for his Doctor's degree. Professor Jones has occupied a number of teaching positions in Kentucky. He served in France with the Seventy-seventh Division and was cited for bravery under fire. After the war he studied at the University of Kentucky.

AGRICULTURE

The College of Agriculture and the Kentucky Experiment Station will both have increased facilities for service to the farmers of Kentucky, and indications point to the largest enrollment of students in the history of the college.

The courses in agriculture have been materially strengthened, and additions have been made to the equipment of all laboratories, especially that of the Home Economics Department, which will be enabled to do better work for more girls.

Additional courses in rural sanitation and farm construction will be added to the Department of Farm Engineering, and in the Department of Animal Husbandry the courses in farm animals and judging have been strengthened. Another course in statistics has been added to the Department of Farm Management, and more work will be given in rural sociology and accounting.

The stock judging pavilion has been completed, and before November 1 a steel frame building for the courses in tractor engineering and motors will be built on the farm of the Experiment Station.

New Faculty Changes

The college is fortunate in having few changes in the faculty this year. Professor John R. Humphreys, head of the Department of Markets, has resigned to take charge of the new steel company which will begin operations here soon. He will be succeeded by Professor O. B. Jessness, of Washington, D. C. Professor Jessness has been in charge of the Co-operation and Rural Organization Department in the Bureau of Markets in the capital, and is one of the best known experts in that work in the United States. He has made a special study of cooperation of farmers, and his investigations and work along that line have given him a national reputation. He is a member of the National committee on organization to plan for cooperation in marketing the cotton of Southern States, and is an author of note.

Miss Eva Boterf, of the Department of Home Economics, has resigned, but otherwise there will be no change in the teaching staff. Professor G. W. Forrester, who was economics agent, has resigned to take the position of assistant chief of the Bureau of Farm Management in Washington, D. C. His successor has not yet been appointed.

Short Farm Course

The college will offer a short course in agriculture beginning November 1, and ending February 26, with Christmas holidays from December 17 to January 4. The course, which is given annually, is arranged to give farmers an opportunity to attend during the slack season on the farm. All instruction is very practical and the object is to bring about more economical production through all the agencies employed by the modern farmer. The training is offered as the best preparation to enable the farmer to avail himself of the services of the county agricultural agent.

There are now seventy-five county agricultural and home demonstration agents and three district agents carrying out the extension work in the State under the direction of C. A. Mahan, who succeeded Geoffrey Morgan as State agent.

The agents are now engaged in promoting the "better sire—better stock movement" in which Kentucky has taken a recent stand. The results will be seen in future beef, dairy cattle, sheep, swine and poultry. The current problem of the Agronomy Department is the "wildfire" which has attacked Kentucky tobacco for the first time. Investigations will continue throughout the season.

"The College of Agriculture will enter the coming college year with the brightest prospects and, judging from the number of inquiries into the course of study, with the largest enrollment in its history," said Dean Thomas P. Cooper, in a recent interview. "The College has been enabled to add to its equipment and is in better position than even before to give instruction that will fit the student for his future duties."

In further discussion of the work and opportunities for the agriculturalist Dean Cooper said: "The present faculty of the College of Agriculture with the additions made this year is prepared to give the best

possible course of instruction for Kentucky young men and women. The records of the last few classes in the College of Agriculture show that the trained agriculturist is in demand and that the demand for our graduates is greater than the supply.

The States in the South are looking to us for men and women to assist in building up their institutions. Industries are taking the men and women who do not care to enter the professions or return to the farms, while the Smith-Hughes schools, the teaching of vocational agriculture, county and home demonstration agent work can absorb a larger number of graduates than are at present available.

Development of Home

"The home has come in for its share of development. Courses in home economics have grown somewhat slowly but with the new application as to the part that women have been called upon to play and the work that they must do in these days and times demands a provision by which they may be taught the use of the simplest, most accurate, most economical and most satisfactory methods, in short that they may have scientifically and practically the home economics way in the care of the home. It is comparatively easy to add to such courses of study so that the graduates are in demand for positions as visiting housekeepers, dietitians in hospitals and institutions, cafeteria managers, costume designers, interior decorators, milliners, and other similar duties which after all are only the development of the home and the home requirements on a large scale. Young women graduates of the Department of Home Economics, College of Agriculture, are prepared to teach in these subjects and to fill places making these requirements in the business world.

"The practice house has proved so beneficial the past two years that it will be continued and will be in the same location as last year. Provision has been made so that each student will spend a period of four weeks in the practice house and during this period will be in charge of the operations of the housekeeping, including the marketing.

"The short course in agriculture which was initiated last year along new lines is exciting a great deal of interest. A very large number of inquiries have been received from every section of the State and many young farmers have decided to attend the short course. In practicability and the fact that it may be attended at a time when farm work is usually light, appeals to young men who desire to procure further education in agriculture. Every effort is made to make this course practical and to fit it directly to Kentucky farm conditions. The classes are in charge of the leading professors in the College of Agriculture, and the entire equipment of the College is made available for the students during the four months.

Experiment Station

"The work of the Experiment Station continues to increase in popularity. Farmers are giving more attention to its teachings. A great number of inquiries have been received during the past summer and a larger correspondence carried on than in any previous year for this period. The work of the Experiment Station on soil, live stock, plant and animal diseases, farm management, and chemical research has become recognized and farmers realize that work of the Experiment Station is carried on for the purpose of saving them in time, money and labor and to prevent them from making mistakes. The greater the use that is made of the Experiment Station, the greater will be the progress of agriculture in the State.

"The Extension division is carrying the message of better agriculture and better homes to every section of the State through the county agents. Counties jointly employing agents are continually finding new possibilities in the work and an increasing development through the employment of the agent. Thus, through the work of the county agent, the home demonstration agent, the scientist in the Experiment Station of the University of Kentucky actually becomes the State. Through the activities of the various divisions of the College of Agriculture, service is directly and indirectly rendered to every citizen of the State. With increased confidence in the work of the institution and the greater use of its teachings we may be assured of a rapidly increasing growth."

ENGINEERING

The last Legislature appropriated \$40,000 for new machinery and apparatus. In the Civil Engineering department there has been added a new supply of very superior surveying instruments, making the equipment for the work in surveying very satisfactory. In the Department of Metallurgy, associated with the Department of Mining, apparatus has been installed pertaining especially to the investigation of natural resources of Kentucky, such as coal, refractory substances, oil, building and road material and oil shale.

An engineering library and assembly room has been fitted up in the old wood-

shop of Mechanical Hall. This will be used for addresses to the engineering students, a study hall and a library. It will serve as a sort of club for students. In this room the pictures of all the classes in engineering will prove of great interest to the graduate and an inspiration to the under-graduate. The room is provided with a moving picture machine. The portrait of Joseph Dickel, presented to the University by the Alumni, has been put in this engineering library. War posters, recalling the days when the "fighting mechanic" was trained at the University of Kentucky, form an interesting part of the wall decorations of the new assembly room.

The large shop built during the war, for training the automobile mechanics has been converted into a modern machine and woodshop. New tools have been purchased throughout with the exception of tools formerly in the machine shop that have been arranged for motor drive.

The new automobile quarters will be at the North end of the Experimental laboratories and consist of a shop and display room for automobile essentials and lecture room for automobile instruction. The new electrical laboratory will occupy the space formerly used by the machine shop. The most modern electrical apparatus has been secured and a new switchboard of particular value in training students in electrical science.

Two New Assistants

There are two new assistant professors in the College of Engineering. Brinkley Barnett will be assistant professor of electrical engineering and in charge of the electrical laboratories. Mr. Barnett, after graduating from college, spent several years with the General Electric Company, Schenectady, New York, and is especially well qualified to handle the work that he undertakes. I. S. O'Bannon will be assistant professor of steam engineering laboratories. Mr. O'Bannon graduated in 1915, and since that time has been in the employ of the Illinois Steel Company and the National Tube Company, where he has been in contact with the very latest practices of steam engineering.

The Locomotive Superheater Company of New York has presented to the College of Engineering an experimental superheater, especially designed for a series of investigations on the use of superheated steam. N. T. McKee, who is a mechanical engineer for this company now in England, establishing a branch company to handle continental business, is a graduate of the University of Kentucky and was instrumental in securing this apparatus.

The College of Engineering embraces the following departments: Civil Engineering, Collateral Activities, Drawing, Electrical Engineering, Mechanical Engineering, Mechanics of Engineering, Mines and Metallurgy, Practical Mechanics.

KENTUCKY GRADUATES DO RED CROSS WORK

University Girls Make Good In Social Service Agency

Three of the graduates of the class of 1920 of the University will represent the Red Cross in Kentucky this year.

Margaret Woll, A. B., is now employed as Field Representative for twenty-nine Red Cross chapters in the western part of the State. The work of a field representative is to make regular visits through her territory, representing all departments and all phases of Red Cross work. It is reported that since she began work in July, she has made an excellent record and is considered one of the best workers on the staff.

Another Kentucky graduate, Virginia Graham, formerly connected with the department of Psychology, is now assistant in the Bureau of Community Studies for the Red Cross in Cleveland, Ohio. Her bureau makes surveys and studies for communities which are interested in knowing their social resources and which want advice as to how to use these resources for the good of the community. She is to have a large part of the responsibility for an extensive survey to be made of social agencies in Cincinnati.

Mary Van Meter, who was graduate in 1920, and her sister, Miss Anna Van Meter, who was a student at the University for several years, both work for the Red Cross. Mary Van Meter has recently accepted a position as Junior Red Cross Representative in Akron, Ohio. Anna Van Meter is a Field Representative having charge of the Red Cross activities of twenty mountain counties in Eastern Kentucky.

Ema Thorpe, a Junior of the University, held a responsible Red Cross position in Owensboro during the summer months. She was Home Service Secretary for Davies County, working with the soldiers and sailors and their families. She returns to the University this fall to take further work in social service and community problems.
