## F O R E W O R D

This bulletin has been prepared by the staff of the Division of Instructional Services, Bureau of Instruction, primarily for the purpose of presenting significant information relating to the program of secondary education in Kentucky, and the classification of high schools for the 1956-57 school year.

It is regrettable in a sense that some of our high schools must be given emergency classifications; however it should be fully recognizable that standards of accreditation must be met if we are to provide the kind of educational opportunity that will enable our youth to meet the challenges of this age. With the financing of the Foundation Program Law, improvements are already apparent in our secondary education program.

I acknowledge with much appreciation, the efforts that have been put forth in the compilation of the material and data contained in this bulletin both on the part of the Department of Education and local school personnel. I trust that members of the profession and others will find it useful and informative.

## KENTUCKY HIGH SCHOOLS—1956-57

Kentucky public and private high schools are classified and accredited by the State Board of Education. This requirement is set forth in the law which requires that each school district in the state provide an **approved** twelve-grade school service and that rules and regulations be adopted governing the quality of this service. The law also provides that the "Superintendent of Public Instruction shall annually prepare or cause to be prepared and submit for approval and publication by the State Board of Education a list of all public and private high schools or other secondary schools in the state, showing their classifications." The classifications are given on recommendation of the Commission on Secondary Schools of the Kentucky Association of Colleges, Secondary, and Elementary Schools.

This year, there are 549 public and private high schools in the state. Last year, the number was 570. Of the 549 high schools now operating, 494 are complete organizations in that they offer work through the twelfth grade. The remaining 55 high schools are approved as incomplete feeder schools. Of the 55 incomplete high schools, 45 are separate junior high schools organized as one distinct unit offering work exclusively in grades seven, eight, and nine. The remaining nine high schools are incomplete organizations that offer work only through the tenth or eleventh grades.

Of the 494 complete high schools, 292 are operated by county boards of education while 128 are maintained by boards of education in independent school districts. The remaining complete organizations are either private secondary schools or schools that are maintained entirely by the state.

This year, the six-year high schools (grades seven to twelve) number 157. Last year, they numbered 202. This year, the traditional four-year high schools (grades nine to twelve) number 292. Last year, they numbered 271. The remaining 45 complete high school organizations represent modifications of the six-year and the traditional four-year plans.

The following table presents data regarding the various types of high school organizations to be found in the state.

**TABLE I**  
**TYPES OF HIGH SCHOOL ORGANIZATIONS AND NUMBER**  
**OF EACH**

Types of Organizations	County Districts	Independent Districts	Private Schools	State or Regional	Total
Grades 7-12 .....	87	59	5	6	157
Grades 9-12 .....	182	53	56	1	292
Grades 8-12 .....	19	7	6	0	32
Grades 10-12 .....	4	9	0	0	13
Grades thru 11 .....	4	1	1	0	6
Grades thru 10 .....	3	0	0	0	3
Grades thru 9 .....	16	29	1	0	46
Totals .....	315	158	69	7	549

The foregoing table not only shows the number of different types of high schools that are found in the state, but also indicates the number of such schools that operate under different types of control.

1955-56	439	60	71	570
1956-57	480	—	69	549

Table IV shows that there was a continuous growth in the number of high schools from 1915 to 1935. In 1935 there were 848 public and private high schools in the state. This represents the largest number of high schools that the state has ever had. Now that we have 549 high schools, public and private, it is clear that there has been a decrease in the number of high schools of 299 since 1935. This decrease has come about very largely through the merging of small high schools into larger school centers.

1955-56	148,119	12,485	14,649	175,253
1956-57	163,715	-----	15,078	178,793

\* Beginning with the school-year 1932-33, the enrollment of the seventh and eighth grades of six-year high schools and of junior high schools are included.

Table V presents an interesting picture in total high school enrollments in different types of high schools since 1915. High school enrollments increased rapidly until around 1941, then enrollments began to decrease on account of the second World War. The lowest total high school enrollment was for the school-year 1943-44. Today, the total high school enrollment is 178,793. This enrollment includes

seventh and eighth grade enrollments in schools that incorporate these grades in their organizations.

There are 143,758 pupils enrolled in grades 9-12. The total high school enrollment for the current school year is 3,540 more than the total enrollment last year. An increase in enrollment of 4,867 took place in county high schools while there was a decrease in enrollment of 1,760 in independent school districts. There was an increase of 429 in private secondary schools and four in high schools operated by the state.

E,  
s  
Table VII shows the situation as regards the number of accredited high schools by years since 1910. When we use the expression "accredited high school," we think of an organization that offers a program of work through the twelfth grade. High schools that do not give work through the twelfth grade should be looked upon as incomplete feeder schools for the regularly organized, complete high schools of the district.

Accreditation of high schools is primarily a means to an end. This end is that of stimulating growth and improvement in the schools. Originally, accreditation of high schools came about as a result of the need of institutions of higher learning for some satisfactory basis for admission to college. In recent years, however, as a result of increasing numbers of young people continuing through elementary school into high school, the emphasis upon accreditation as a basis for college admission has been shifted to that of better education for all youth. The rapidly changing social, industrial, and economic world and the marked increase in high school enrollment is challenging the schools to provide for a diversity of needs and capacities.

To better provide for these needs and capacities, a broader and more varied high school program is demanded. High schools should not only prepare some pupils for work in higher institutions, but they should also prepare a larger proportion of the pupils for direct entrance into business, industry, agriculture, and homemaking. It is at once apparent that small high schools cannot possibly offer an enriched program to meet the needs and capacities of all high school pupils unless it is done at excessive cost, hence the justification of requiring increased enrollment for accreditation of high schools.

†Interpretation of High School Ratings:

A—Accredited through the entire high school course (through grade twelve).

B—Accredited through the entire high school course (through grade twelve).

11 Gr.—Accredited through grade eleven.

10 Gr.—Accredited through grade ten.

9 Gr.—Junior high school—recognized through grade nine.

T—This initial when attached to the designation of any rating indicates that such rating is given in the face of some deficiency and that the accredited rating of the school should be terminated at the close of this school year.

E—This initial suggests that an emergency is recognized to exist that may justify the operation of the school even with an observed shortage in the number of pupils or of teachers.

U—Unaccredited.

\*Indicates schools advised as to deficiencies.

and that the accredited rating of the school should be maintained in the future.  
 E—This initial suggests that an emergency is recognized to exist that may justify the operation of the school even with an observed shortage in the number of pupils or of teachers.  
 U—Unaccredited.

\*Indicates schools advised as to deficiencies.
