

KENTUCKY ALUMNUS

FOOTBALL NUMBER

Volume 1

SEPTEMBER, 1929

Number 3

WILL ED COVINGTON

Ball carrier, field general, punter and all 'round backfield man are a few of the many gifts of Covington who will lead the University of Kentucky Wildcats on the gridiron this year. Covington threw a surprise and scare into the followers of the Wildcats when he announced his marriage last spring. However, he is back this fall and going strong. Covington comes from Mayfield. The number that will adorn his sweater this year will be 27.

Football Outlook Is Bright

Strong Nucleus of Letter Men From Last Year Fortified By Wealth of Good Looking Material in Sophomore Class Causes Optimism Among Wildcat Camp Followers

(By Wayman Thomasson)

Coach Harry Gamage may find a pot of gold at the end of his football rainbow next Thanksgiving when Kentucky culminates a prospective brilliant season.

A beautiful rainbow followed showers and hovered over Stoll Field the first day of practice when 38 seasoned Wildcats reported to the "young master." A wonderful omen! It was succeeded by a few days of hot weather to "sweat out" the candidates, and then, a week of glorious, cool football weather which put "zipper" in the practice. I have a superstitious, but well-founded, belief that it is KENTUCKY'S YEAR.

Twelve lettermen returned from the great defensive team of last season. Pete Drury, all-southern tackle, Captain Will Ed Covington, Max Colker, Warner Ford, Olly Johnson, Tom Walters, Conny Rose, Carey Spicer, Red Thompson, Howard Williams, Floppy Forquer, and Lewis Toth, the little Hungarian. Lost to the fold are Al Portwood, Claire Dees, Elmer Gilb, by graduation; George Trieber by injuries, Bull Brown and Sandy Nowack.

Now two weeks have passed. The fat has disappeared, a familiar limp is visible among the players, and skinned faces have become red with meurochrome. The men are in shape to play but the old coordination of a seasoned team has not made its appearance. The forward pass has not been pulled from the bag of tricks. Two weeks remain until the first night game with Carson-Newman, Saturday, October 5.

The players and the sports writers, everybody, except, perhaps, Coach Gloomy Gamage, who sometimes wears a smile these days, are puzzled. No one has any idea WHO will make the football team. One thing certain—somebody by the name of Phipps will play fullback. What Phipps? Who knows?

"Old Phipps is the hardest worker I've ever seen in a football uniform," said Mr. Gamage. "He may beat Young Phipps out of his job."

News of this statement must have reached Jack Phipps, the younger, because, the next day, the first and second teams played a game. Jack glowered at Brother Tom over the second team

line. He caught a ball and plunged with terrific force at his right tackle. Deacon Forquer was plugging the hole and the impact bent him double. The sound of contact was audible in the stands. Young Phipps trotted back to his place. He plunged again, finding a hole this time which lead right through to Brother Tom. The boys met with all the force of two young bulls charging. Smiling, they helped each other up from the heap of players. Jack had gained 10 yards and Coach Gamage was relenting. The Phipps brothers exchanged places. Tomorrow they will change again, and then, the next day—

Will Ed Covington, experienced triple-threat expert, is a cinch for quarterback, and four sophomores remain to fight it out with Carey Spicer and Lewis Toth for the other two backfield berths.

Shipwreck Kelly is the greatest potential player of the lot, weighing 176 pounds and being the fastest man in the University. He is tall, shifty, elusive, cocky, and raring to play football.

Carey Spicer is the most dependable star on the team. He is even better than last season. No one will soon forget Spicer tipping the pass from McEver's hands on the goal line and saving the Tennessee game for Kentucky. The same Spicer who scored on Vandy with a brilliant play which put Kentucky in a position to tie the score. Spicer has developed as a runner and is one of the best blockers on the field.

Dick Richards is the more powerful runner, the straight, hard-driving type. He has size.

Lewis Toth is experienced with one year on the varsity. He is a good blocker.

Cecil Urbaniak is the "Stumpy" Thomasson type of player—short, squatty. He is a clever ball-carrier.

Bo Meyers is a shifty, elusive little man. He was the star of the 1928 frosh eleven.

It is not hard now to reach the conclusion that after all these years Kentucky is to have a varied, deceptive, and powerful offense. Kelly, Covington, and Jack Phipps will handle the punting. Cavana, a substitute end, is the best choice for the point after touchdown. He is a drop-kicker who

Football Squad

John Sims Kelley, Springfield, Ky., Sophomore. Weight 176, halfback.

Tom Phipps, Ashland, Ky., Sophomore. Weight 180 pounds, fullback.

Jack Phipps, Ashland, Ky., Sophomore. Weight 185 pounds, fullback.

Carey Spicer, Lexington, Ky., Junior. Weight 165 pounds, halfback.

Cecil Urbaniak, Clarksburg, W. Va., Sophomore. Weight 160 pounds, halfback.

Dick Richards, Denver, Colo., Sophomore. Weight 175 pounds, halfback.

Lewis Toth, South Bend, Ind., Junior. Weight 160 pounds, halfback.

Vernon Meyer, Louisville, Ky., Sophomore. Weight 160 pounds, quarterback.

Hays Owens, Lexington, Ky., Senior. Weight 140 pounds, quarterback.

George Yates, Elizabethtown, Ky., Sophomore. Weight 180 pounds, end.

Ken Andrews, Lexington, Ky., Sophomore. Weight 185 pounds, end.

Ross Morgan, Hopkinsville, Ky., Sophomore. Weight 175 pounds, end.

Milton Cavana, Iowa Falls, Ia., Junior. Weight 175 pounds, end.

Jake Bronston, Lexington, Ky., Junior. Weight 170 pounds, end.

Harold Abley, Covington, Ky., Sophomore. Weight 175 pounds, end.

Pete Drury, Lexington, Ky., Senior. Weight 195 pounds, tackle.

Babe Wright, Sturgis, Ky., Senior. Weight 195 pounds, tackle.

Roger Baughman, Stanford, Ky., Junior. Weight 195 pounds, tackle.

Anthony Gentile, Williamson, W. Va., Junior. Weight 180 pounds, tackle.

John Drury, Lexington, Ky. Sophomore. Weight 190 pounds, tackle.

Robert Kipping, Carrollton, Ky., Sophomore. Weight 180 pounds, tackle.

Tom Walters, Lexington, Ky., Senior. Weight 175 pounds, utility man. Plays any position.

Conrad Rose, Evansville, Ind., Junior. Weight 190 pounds, guard.

L. G. Forquer, Newcastle, Ky., Junior. Weight 200 pounds, guard.

Joe Thompson, Lexington, Ky., Junior. Weight 210 pounds, guard.

Otho McElroy, Morganfield, Ky., Junior. Weight 195 pounds, guard.

Ollie Johnson, Lexington, Ky., Junior. Weight 160 pounds, guard.

Max Colker, Newport, Ky., Junior. Weight 175 pounds, center.

Howard Williams, Lexington, Ky., Junior. Weight 203 pounds, center.

William Kleiser, Lexington, Ky., Sophomore. Weight 175 pounds, center.

Freshman Team Is Large

More Than 100 Report to Coach Birkett Pribble On First Day

The mud on Stoll Field has been trampled by the cleats of more than 100 wearers of the green jerseys, candidates for the 1929 freshman football team. The freshmen have made quite a splash, and from all indications, Birkett Lee Pribble, head frosh coach, is in for plenty of trouble in sorting the men out in teams to be first, second, third, etc.

Vague rumblings from the camp of the Wildcats seem to have it that the first scrimmage between the Big Green and their seniors will take place on Saturday of this week. The frosh have seen only one week of practice and the kinks and rusty joints are just being ironed out. If past years serve as a criterion, the frosh squad will dwindle to some 50 or 60 men as the season ages and the going becomes harder.

Ohio, Wisconsin, Virginia, Missouri, and several other states have contributed to the freshman flock, and the sons of Kentucky.

Coach Pribble has begun the task of introducing the yearlings to the Gamage system of football and to the general conditioning grind. Tackling, blocking, passing, kicking, running signals, and all that goes with it, has made up the week's program.

Among the likely looking candidates are Groggin, of Danville; Aldridge, of Benham; Seay, Big Stone Gap, Va.; Johnson, Montgomery, Darby and Blevins, of the Ashland delegation; Cutler, of Missouri; Miles, Owensboro; Bickel, of Louisville Male High; Vonderheide, of St. Xavier, at Louisville, and Boardman, of Eminence.

Dean F. Paul Anderson, Engineer

"Little Paul" as Seen Through the Eyes of Our Interviewer Gives Insight Into Life of the Man Who Makes Engineers of "His Boys"

(By Helen King)

An engineer with vision and an appreciation of living, is F. Paul Anderson, dean of the College of Engineering at the University of Kentucky since 1891, the man who established engineering training as a part of University curriculum at that time and who has infused into men under his tutelage a breadth of training and a sympathy for the beautiful, which, combined with the basic training of engineering, has made "his boys" leaders of men in the world of affairs.

Dean Anderson was born in South Bend, Ind., and received his public training in that city, later entering Purdue University where he received his engineering degree in 1890. He accepted a fellowship to Purdue in 1890-91 at which time he put in some work on his master's degree, which he completed in 1894.

While a fellow at Purdue, Dean Anderson worked out the details of a locomotive testing plant which was the first devices of its kind, and made possible the study of the locomotive under all conditions of speed and power in the laboratory. He was trained primarily for the position of superintendent

of Studebaker Brothers manufacturing company at South Bend, a position which his father had held for 52 years, and came to the University of Kentucky with the idea of teaching for one year

and later returning to Studebaker. However, his work here became so fascinating that he has devoted his life to the development of the University of Kentucky College of Engineering.

This man who has done so much for the potential engineers of Kentucky is himself a romantic figure, having woven into the fabric of his life work a spirit of companionship and brotherly love that has inspired his men to leadership and high courage. Small in stature, with the jovial spirit of fellowship forever twinkling in his keen eyes, he impresses the writer with the dynamic force of his personality, in the short but interesting course of this interview.

Seated in his comfortable office, which, more than

any other one thing, breathes the personality of the man at the big desk, Dean Anderson talked of engineering as a mother would speak of her favorite child. He believes that the objectives of

F. PAUL ANDERSON

a university should be to inject into every student "the desire to be useful, with the ability to love the beautiful," and his own creed is to "Send young men into the world in a humble attitude to learn somebody's business."

Basing his training on this creed, Dean Anderson has built up around his boys an atmosphere of comfort, one that will encourage companionship and the exchanging of confidences and ideas. The convocation room in Dicker Hall has recently been made into a room of luxury and beauty, yet maintains a ruggedness and masculine air that will make it seem "home" to the boys.

This room opens off of the new Percy Johnston sun laboratory, a laboratory for testing the effect of sun and light on flowers, animals and plants, recently completed and made possible through a gift from Percy Johnston, a former Kentuckian and president of the Chemical Bank and Trust Company of New York. The new lounging room is enhanced by a stained glass window which faces the laboratory and is inscribed fittingly with the name of Mr. Johnston. Under the stained glass is a fountain which plays over rough hewn rocks and small moss flowers, and opposite the fountain on the far side of the room, is a great stone fireplace which reaches to the ceiling and on which is inscribed these words, "With high companionship of books, or slippers talk of friends."

The room is full of birds, and plants, and the great tables therein are made from the wood of the historic "big tree" recently cut down from its place on the Richmond road in Lexington; each table is intended to bear the carving of the many engineers who have come and studied, and gone forth and conquered under the guidance of this human companionship.

In 1896 Dean Anderson and his colleagues in the College of Engineering did the first experimental work with the X-Ray in America, completing an experiment in the morning of the day that Yale completed the same experiment in the afternoon. Dean Anderson had obtained a large induction coil from Major McClelland at Sayre College and tried some exposures that night. They obtained definite and satisfactory results about 2 o'clock in the morning, and for six months afterward public exhibitions of the experiment were made at the University. Henry Ford has asked for the original pictures of the experiments to hang in his museum. The pictures now hang in Dicker Hall.

In 1893, under Dean Anderson's direction, there was prepared for the Columbian Exposition, an

exhibit of drawing and shop work from all the Land Grant College technical schools, and in 1894 Dean Anderson served on the International Jury of Awards at the St. Louis Exposition of which Doctor Steinmetz was also a member. In 1896, besides doing the experimental X-Ray work, he developed a hauling chart for the loading of locomotives.

For twenty-five years Dean Anderson was Engineer of Tests for the Southern Railway Company, and during that time developed the stereoptical method for instructing trainmen, a logical method for loading long timber extending over two or three cars, and a method of firing engines with bituminous coal without making smoke. He also defined a set of specifications outlining the physical character of all materials used by a railroad, and made a study of the hydraulics of fire streams for the purpose of preparing a fire protection clause for the City of Lexington.

In 1921 Dean Anderson was appointed director of the research laboratory of the American Society of Heating and Ventilating Engineers, located at the Bureau of Mines, Pittsburgh. That year he spent away from the University of Kentucky, but during the next three years, although acting in the same capacity, he directed the work from his offices at the University. During the four years that he was director of this laboratory, a total of 62 scientific papers was prepared under his guidance, relative to heating, ventilating and air conditioning.

Dean Anderson was for three years a member of the Engineering division of the National Research Council, and in 1927 was president of the American Society of Heating and Ventilating Engineers. He is a member also of the American Society of Mechanical Engineers, of Tau Beta Pi honorary engineering fraternity, of Sigma Chi, social fraternity, and the Lexington Club.

As a small boy in South Bend, Dean Anderson knew James Whitcomb Riley, then a sign painter, and in later years, when he attended Purdue and became a close friend of Booth Tarkington, he was invited to the Tarkington home in Indianapolis for the Thanksgiving holidays, where he met Riley again, also a guest in the house, who read to these college boys his famous "Poems of Childhood" and no doubt inspired them with an appreciation of the beautiful which has lasted through life.

College life gave Dean Anderson many fine friendships, including such men as Tarkington, George Ade, and John T. McCutcheon, all of whom

(Continued on Page Twenty-one)

Registration Largest In History

Approximately 2,700 Students Registered In Six Colleges and Graduate School; Officials Expect Increase of More Than 500 Over That of Last Year

When the registration division of the University for this semester closed for the day at 4:00 o'clock Thursday afternoon, Sept. 19, it was found that a total of 2,623 students had matriculated. This number represents the largest enrollment ever recorded at Kentucky and a marked increase over that of last year at a corresponding time. It is expected that many more will register during the next eight days which remain for enrollment.

Last year at this time, the number of students registered totaled 2,376, a number which had broken all previous records. This year's mark exceeds that high mark by 247 enrollments and is expected to reach a total of 500 more than the number registered last fall. Officials yesterday estimated that the number of students attending the University this term would exceed former totals by approximately 20 per cent, thus showing the rapid expansion of the institution in all departments.

"Freshman Week" was held for the third time in the history of the University, taking place over a period extending through September 12-17, at which time a smaller number of Freshmen registered than was anticipated by University authorities.

The Freshmen assembled at Memorial Hall Thursday morning to begin a week of orientation before starting class work. Immediately upon assembly, they were divided into sections of 40 each and registration was under way.

New students first reported to headquarters in McVey Hall, where they filled out freshman week enrollment cards and received programs, badges and instructions. Throughout the day, sections registered and reported to the dispensary for physical examinations, which were held until 5 o'clock.

Dean C. R. Melcher was first to address the new students. At the meeting in Memorial Hall, he set down the rules for the week, also giving instructions to fraternity representatives advising that no "rushing" be undertaken until the conclusion of the week.

All members of the freshman week committee were present at the morning session. They in-

cluded: Dr. Jesse Adams, professor of Education; Miss Sarah Blanding, dean of women; Prof. W. E. Freeman, assistant dean of the College of Engineering; L. J. Horlacher, of the College of Agriculture; and Dean Melcher, chairman.

Friday morning from 8 o'clock to 9:50 the Freshmen met in Memorial Hall to hear a lecture on "Organization of the University," which was written by Dr. Frank L. McVey and read by one of the section leaders. English and Psychology tests were given during the rest of the day.

Major Owen Meredith and Coach Harry Gamage spoke Friday evening in Memorial Hall on military science and athletics. Saturday morning from 8 until 9:50 the Freshmen convened in Memorial Hall to hear a lecture on "How to Study." The rest of the morning Mathematics tests were given. Saturday afternoon classification was held for all of those who had completed all of their tests.

A social hour was given for the Freshmen by the Y. M. and Y. W. C. A. Saturday evening at 7:30 in the Men's gymnasium. Sunday morning students were urged to attend the churches of their choice. At 6:30 vesper services were held on the lawn in front of Patterson Hall.

Monday morning from 8 o'clock until 9:50 there was a continuation of the lecture on "How to Study" in Memorial Hall. At 11 o'clock President McVey addressed the Freshmen students. The program concluded the week when the frosh were taken on a campus trip for the purpose of location of buildings and rooms.

Tuesday morning the week was closed with a convocation in Memorial Hall at which time the subject was "University Customs and Regulations."

Daniel S. Morse, B. S. M. E. 1924, is sales manager for the Bloomingdale Rubber Company, of Chester, Pa., where his address is 330 West Mowry street.

Every Alumnus who pays his dues for this year will get a copy of the new Alumni Directory free.

THE PRESIDENT'S PAGE

The summer of 1929, at least according to the calendar, is over and activities at the University of Kentucky are beginning to get under way. The administrative staff and faculty of the University have accomplished much during the past few years and we of the Alumni Association applaud the success and progress they have made in developing the campus and the collegiate systems of learning. We also feel that the moral life and sportsmanship among the students at the University are much higher than in former years.

Only a short time has elapsed since President McVey congratulated our Alumni Association on the progress it has made in recent years in developing college spirit and interest among the Alumni, or at least in developing a physical and personal way of expressing their admiration, respect and love for their Alma Mater.

President McVey's recognition of the efforts made by the Executive Committee of the Alumni Association and those loyal Alumni who have shown a willingness and desire to use their influence in developing a real college spirit and support is deeply appreciated.

It is indeed true that the Alumni Association has made a sincere effort to be of real service to the University. We sometimes feel that the average alumnus does not realize the obligation he owes to his Alma Mater or of the service he can exert in developing the University and he must indeed be ignorant of the pleasures he is losing by not taking an interest and active part in the Alumni Association.

Primarily a university is judged by the graduated product, the alumni. This estimation cannot be avoided by the average alumnus because he is the pattern developed by the university.

The executive committee of the Alumni Association of the University of Kentucky has worked hard during the past few years to bring about a certain degree of independence and value in their affairs which can only be accomplished by a relatively large number of persons who are

drawn to their Alma Mater by bonds of affection and esteem, and by financial independence.

The Alumni Association of our University has a small membership compared to those of other institutions of like size and its power and prestige are limited in like measures.

The Alumni Association has planned a certain program which it hopes to accomplish before June 30, 1930.

Our immediate attention will be directed to what we believe to be our most important problem, and that is the development of a unified college spirit of the highest type among our Alumni. We have several plans to develop as time passes and we hope that they will be fruitful. As a

corollary to this we hope to increase the membership of our Alumni Association. At present there are about 600 members who receive this magazine and our aim is to have 1,000 members receiving it by next June.

We of the executive committee are gladly giving a considerable portion of our time and energy to the affairs of the Alumni Association. From time to time we will call on the Alumni as a whole, sometimes in groups and at other times as individuals to aid us in our undertakings. You may rest assured that we will not ask for financial aid and yet such aid will not be declined if offered.

This issue of the Kentucky Alumnus is being sent to you this month, and to every living Alumnus and maybe to a few dead ones (use your judgment) as a compliment from the Alumni Association. We hope that it will encourage your interest in our rapidly developing University and we further hope that now or at a later date you may want it to come to you regularly every month, bringing reports of football games and athletics in general, fraternal news, news of graduates; and in other words our secretary will give in an interesting form the news of our University life.

If you consider this magazine worthwhile and desire to receive it each month, then join the

(Continued on Page Twenty-one)

Kentucky Alumnus

Published by and for the Alumni of the University of Kentucky monthly, except July and August, on the Campus of the University, at Lexington.

Vol. 1

SEPTEMBER, 1929

No. 2

THE NEW YEAR BEGINS

BACK to the campus more than twenty-five hundred students of the University have trooped and the walks and buildings are again crowded with the youth of our state eagerly in search of that higher learning which our Alma Mater offers. With the first cool crisp September mornings, delightful as they can be only in Kentucky, there comes to every loyal Alumnus of the University of Kentucky an urge to be more closely in touch with the University of Kentucky. In the afternoon the distant thud of toe against pigskin comes from the now closed gates of Stoll Field. The football squad is hard at it. A great institution has again aroused itself and swings into step.

We know that every one of you is anxious to know of the University and of the activities of the different departments. For this reason this first issue of the Kentucky Alumnus is being sent to every graduate and former student whose address we have in our files. We have given a great deal of space to football in this issue because it is that which interests the greatest number right now. We hope that you will enjoy this copy of the Alumnus so much that you will want it for the year. As the University welcomes those young men and young women into its colleges, the officers of the Association extend to each of you an invitation to get more closely in touch with your Alma Mater by becoming an active member of the Alumni Association.

CHANGES

YOU will notice that this issue of the Alumnus has appeared in a new cover. This time it is blue because of the blue and white of our University. It is the plan of the editors to have it a different color each month. The work of publishing a magazine still is somewhat of a novelty to us, but it is our desire and hope to improve it each month so that you Alumni who receive it will look forward to its appearance at your door. Any suggestions, any articles or any material that you wish to send in will be gladly received.

A SERIES OF ARTICLES

IN THIS issue will be found the first of a series of articles on the members of the faculty of the University of Kentucky. The deans of the different colleges will be taken first and a short biographical sketch of each of them will appear in the Alumnus from month to month. This month we present Dean F. Paul Anderson of the College of Engineering. It is the plan of the editors to ask each of the deans to prepare an article on his college. Through these sketches we hope to make every Alumnus better acquainted with the University of Kentucky and bring about a better understanding of the work that is being done and planned. These are men who are guiding and shaping the lives of the students of the University of Kentucky. They are men of vision and men of ideals. To know them more intimately will benefit all who are even remotely interested in the University of Kentucky.

DUES ARE DUE

A GREAT many of you Alumni who receive this issue of the Alumnus have not been active in the Association for a number of years. One of the aims of our Association is to bring together the graduates of the University of Kentucky for their mutual benefit and for the benefit of our Alma Mater. We are not contemplating any sort of drive for funds. Our immediate aim is to bring about a better understanding of our University among the Alumni and to sell the University to the Alumni and to Kentucky at large. To do this we need your cooperation. A check for \$3.00 makes you a member for the year 1929-1930, brings to you each month the Alumnus, alive with the news of your fellow Alumni and the University, and brings you also the newly published Alumni Directory.

University on the Air

Daily Programs Are Broadcast Over Direct Wire to Station WHAS in Louisville; Hour of Music Each Wednesday Night Is Feature of Radiocast

Through special arrangement with the owners of WHAS, the Courier-Journal and Times radio station at Louisville, the University of Kentucky is "on the air" at regular intervals, sending their programs through that station. On the University campus are two well equipped studios. From these the programs are radiocast through one of the latest model 10,000 watt broadcast transmitters, located near Jeffersontown, twelve miles from Louisville. The 10,000 watt station enables WHAS to deliver a strong, consistent signal over a far wider range than is now possible, even with its present high power.

The University programs are brought to Louisville by means of especially engineered telephone lines directly connecting the University studios with the control room at the WHAS studios in the Courier-Journal and The Times building, where they are modulated, amplified and sent by special lines to the transmitter, and, after amplification, they are put on the air.

WHAS is one of less than a score of radio stations authorized to operate full-time on a nationally cleared channel, and the only one within a wide radius of Louisville which does not have another station on the air the same time it is in operation. This cleared channel, authorized by the Federal Radio Commission, is one of the choicest in the broadcast spectrum, being heard near the center of the dial of the average receiving set, thus assuring listeners of an undistorted signal. The station operates on 820 kilocycles, or 365.6 meters.

The University of Kentucky radiocasts five fifteen minute periods a week, Monday to Friday inclusive from 12:30—12:45 p. m. Central Standard Time. In addition, the University presents a musicale for an hour each Wednesday night. The time for this presentation is 9-10 p. m., while New York is employing daylight saving time. Upon their change to regular time in the fall the Wednesday night program will be presented from 10-11 p. m.

October Program

October 1. "Art Appreciation," No. 1, by Miss Ann W. Callihan.

October 2. Agricultural Program.

October 3. "Studies in the Retail Field," by Prof. R. D. McIntyre.

October 4. "What Farm Folks Are Asking," by Prof. N. R. Elliott.

WILL BROADCAST GAME WITH WASHINGTON & LEE

Alumni! The Washington & Lee-Kentucky football game, scheduled for Saturday afternoon, October 12, will be broadcast play by play from the press box on the University of Kentucky stadium, through remote control connection with station WHAS of the Courier-Journal and Louisville Times at Louisville.

Think of it! One of the two big games of the 1929 football season at the University of Kentucky will be sent out over WHAS' 10,000-watt station, and all Kentuckians, whether in the state or far beyond its borders, will be able to follow the big blue Kentucky team up and down its own Blue Grass gridiron in the annual battle with the Generals of Washington & Lee.

Rollie Guthrie of Lexington, together with M. E. Potter, instructor of intra-mural athletics at the University of Kentucky, will be joint announcers for the game, and a microphone will also be stationed in front of the University's crack 90-piece band so that followers of the Wildcats may thrill to the strains of Kentucky's fighting "pep" song, between halves.

The Washington & Lee-Kentucky game is always a red-letter day on the Wildcat's schedule, and the tilt this year gives promise of being the greatest combat ever staged by the two old rivals. "Kentucky is right" and unless old man Jinx visits the Kentucky camp, Alumni far and near will be able to tune in on the victory.

October 7. Agricultural Program.

October 8. "Animal Friends and Enemies," No. 1, by Dr. W. D. Funkhouser.

October 9. Agricultural Program.

October 10. Monthly Book Review by Dr. Geo. K. Brady.

"Daddy" Boles Promoted

Will Be Athletic Director at University; Office Recently Created

S. A. "Daddy" Boles, who for many years has been head of the Department of Physical Education, recently resigned that post and now is devoting his entire time to directing athletics at the University.

For the last several years he has been doing

both jobs and doing them well, but recently the work attached to the office of Director of Athletics has become so strenuous and complicated that it became necessary for the Athletic Council to have his entire time. Consequently the new office was created and "Daddy" became the first full-time Director of Athletics. The new position carries with it great responsibility in that financial management and ticket sales are included under the new office.

"Daddy" Boles is one of the best known and loved persons on the campus of the University of Kentucky. More than half the Alumni have come in contact with him during their years at the University and to all of them he still is "Daddy."

During the time that he has been in charge of athletics at the University he has brought about many important changes and improvements. The sale of tickets to the different athletic contests has been placed on a new foundation and is now carried on in a most efficient manner. Through his excellent management a good portion of the debt on the stadium and basketball building, which the Athletic Council assumed, has been

paid off. Through his efforts the University of Kentucky is recognized throughout the South and contests with our teams are eagerly sought by other universities and colleges.

The creation of the office of Athletic Director

WILDCAT CAPTAIN BECOMES FATHER

Captain Will Ed Covington of the Wildcat football team of this year has joined the ranks of "fond fathers." He was awakened early Wednesday morning, September 25, by a long distance telephone call and informed that his wife, formerly Miss Charlene Davis, had given birth to a bouncing baby daughter, weight seven pounds. Mrs. Covington is making her home with the parents of her husband in Mayfield, Ky. Will Ed's mother, who broke the glad news to her son, said that both mother and daughter were doing splendidly and that there was no necessity for him to visit them at the present. Covington said that he would postpone his visit to the new member of his family until it was agreeable to Coach Gamage, since he did not want to miss any practice sessions until after the season opened. When told of the birth of his captain's daughter, Gamage said: "Well I'll be doggone! Will Ed and I ought to get along fine." Coach Gamage has a baby daughter.

fills a long felt need at the University and the selection of "Daddy" Boles as director is meeting with the undivided approval of Alumni from all over the United States.

A. B. Phister, B. M. E. 1911, is a manufacturer of fire extinguishers and has his business at 903 Broadway, Cincinnati, Ohio. He lives at Fort Thomas, Ky., where his address is 115 Tower Place.

Alumni Association and help us build a real spirited association. However, we want your interest even though you do not feel inclined to join the association now. If this latter condition exists then borrow the magazine and follow our doings at the University. If we could afford the expense we would send it each month free of charge to every Alumnus, but alas, we can't.

With this as our primary aim we hope to sing as a song of victory next June—

Doctor Buckner demands of Kirk,
What is the new, my friend?
Mister Kirk replies with a smirk,
Our goal draws to an end.
What was our goal? A breathless pause!
Kirk stammers these words real fast,
Our Association numbers
A thousand members at last.

DEAN F. PAUL ANDERSON, ENGINEER

(Continued from Page Six)

have gained fame in their chosen fields. Dean Anderson recalls now with a smile of reminiscence Booth Tarkington's first story.

So in a small way, the writer has tried to convey to the readers of the Alumnus some insight into the spirit of the man who has builded the College of Engineering at the University of Kentucky on the firm foundation of understanding and human touch. To you, men and women, who have worked with him, studied under his fine leadership and known his affectionately as "Little Paul," this biography will suffice to outline more clearly in your memory, the figure of the man who has for thirty-eight years labored lovingly, with high ideals and young Kentuckians as his finest moulding clay.

FOOTBALL OUTLOOK IS BRIGHT

(Continued from Page Four)

may be called on at a critical moment to add a few points.

Kentucky had a great line last season. Consider that the Wildcats because of a one-man offense, Covington, were on the defense three-fourths of every game, and that the enemy scored only 40 points, never more than 14 in one game.

Lop off the extremities of that line. Trieber

and Nowack, the ends, are gone. Whack off one tackle and cut out the center. Bull Brown and Captain Dees have departed. You have left Pete Drury, the other tackle, Forquer and Rose, the guards. Now shift Max Colker, diminutive little guard, to center. Recruit the terrible Babe Wright for the tackle and hang two tall, stocky sophomores, Ken Andrews and George Yates, at the ends. You have built the answer to a line coach's prayer, and Coach Bernie Shively is the best line coach in the south.

Fortify this aggregation with the veterans, Tom Walters, Howard Williams, Otho McElroy, Swede Johnson, Tony Gentile, Roger Baughman, and Red Thompson. What kind of line do you think that is?

Easy now, not too loud!

Alumni Warned of Fraud

Several Have Been Victims of Clever Money Raising Scheme

During the past summer a young man, representing himself to be either the son or relative of some Alumnus of the University of Kentucky and in some instances a student or graduate of the University as well, has fraudulently obtained money from several of the members of the Alumni Association. In each case those approached were members of the classes of 1898, 1899, or 1900.

According to all reports the man is about 22 years of age, with dark hair and eyes, and about five feet and seven inches in height. He weighs about 135 pounds. He makes an excellent appearance and is a good talker. He seems to be well acquainted with Alumni of the University of Kentucky of the classes mentioned. In one instance he represented himself to be the son of Alexander Bonnyman, of Knoxville, Tenn., former student of the University. In another he was the nephew of Charles Bradley, also a former student of the University.

Alumni are warned to investigate all requests for loans or checks to be cashed from such men. This same scheme is being used all over the United States at this time and often the young men represent themselves as classmates of sons as well as sons of classmates.

Subscribe for the Alumnus and become a member of the Alumni Association. A check for \$3 will prove your loyalty.

1916

John R. Marsh, B. A., 1916, is assistant manager of the Public Relations Department of the Georgia Power Company, and is located in Atlanta, Georgia. He has offices at 463 Electric Building and his residence address is 979 Crescent avenue, N. E.
