Dr. Fred W. Rankin
1561 Lakewood Dr.
Lexington, Kentucky

Dear General:

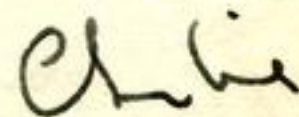

The heartiest congratulations to you for your masterly performance in conducting the convocation. Your speech was really wonderful. I particularly enjoyed the quotation from Agnew.

The blood test was splendid. The total protein was 6.666 gm. The NPN was 30 mg.; acid phosphatase 2.0 units; alkaline phosphatase 5.4. The phosphatase values are in King and Armstrong units. The upper limits which we obtained for these values are 4.5 acid phosphatase; for alkaline phosphatase 10.0.

Better reserve tickets for England right away. We would love to hear from you in three or four weeks.

From a surgeon who cares,

Yours faithfully,

Charles Huggins
