Superintendent of Public Instruction

ISSUED MONTHLY

Entered as second-class matter March 21, 1933, at the post office at Frankfort, Kentucky, under the Act of August 24, 1912.

Vol. VIII ● April, 1940 ● No. 2

FOREWORD

This bulletin contains considerable information regarding high schools in Kentucky. Some data are given regarding every high school in operation.

The official rating given the high schools by the State Board of Education was made on the recommendation of The Commission on Secondary Schools of The Kentucky Association of Colleges and Secondary Schools. This Commission is composed of the following members:

W. J. Baird	T. A. Hendricks	Charles O. Ryan
Sister Casselda	J. H. Hewlett	Edgar K. Smith
J. M. Deacon	O. E. Huddle	W. H. Vaughan
Carl Fields	R. E. Jagers	S. S. Wilson
Paul Garrett	M. E. Ligon	Sister Agatha
Mark Godman	J. F. McWhorter	Young
Herbert C. Hazel	Julia J. Poynter	

The material in this bulletin has been prepared by Mark Godman and L. N. Taylor of this Department.

J. W. BROOKER,

SECONDARY EDUCATION IN KENTUCKY

Schools and Types of Organization. There are 758 high schools of various types in Kentucky. This number is in contrast to 783 high schools operating last year and 808 operating two years ago. Of the 758 high schools now organized, 679 are complete organizations, i. e., they offer a program of studies through the twelfth grade. More than one half (395) of these complete high schools are organized as six-year schools (grades 7-12). So continuous has been the development of this type of high school organization in Kentucky that we may now consider it the standard rather than just another form of high school organization. This appears to be true in both county and independent districts.

The following table presents data regarding the number of the various types of high school organizations that are found in Kentucky:

TABLE I
Types of High School Organizations and Number of Each

Types of Organizations	County Districts	Independent Districts	Private Secondary	State and Municipal	Total
Grades 7-12 -----	264	107	17	7	395
Grades 9-12 -----	144	74	56	1	275
Grades 10-12 -----	0	8	1	0	9
Grades 7-9 -----	15	17	0	0	32
Grades 9-11 -----	6	1	0	0	7
Grades 9-10 -----	13	3	1	0	17
Grades 7-11 -----	2	0	0	0	2
Grades 7-10 -----	17	4	0	0	21
Total -----	461	214	75	8	758

The above table not only shows the number of different types of high school organizations but it also gives the number of high schools under different types of control—county districts, independent districts, private, state, and municipal. It will be noted that 461 high schools are operated by county boards of education, while 214 are maintained by boards of education in independent school districts. Seventy-five are private secondary schools. The other eight represent high schools operated in connection with state teacher training institutions, the state-supported high schools for colored at Paducah and Lincoln Ridge, the state school for the blind at Louisville, and Ormsby Village School in Jefferson County, which is maintained by the municipality of Louisville.

Size of High Schools. The following table gives a picture of the size of the various types of high school organizations found in the state:

TABLE II
Size and Number of High Schools

Size Based on Enrollment	County Districts		Independent Districts		Private Secondary		State and Municipal		Total
	White	Colored	White	Colored	White	Colored	White	Colored	
Below 50	45	11	0	12	17	0	1	0	86
50-99	143	7	23	17	25	1	0	0	216
100-199	166	2	54	14	23	0	2	1	262
200-499	78	1	49	8	7	0	3	1	147
500 and above.....	8	0	33	4	2	0	0	0	47
Total	440	21	159	55	74	1	6	2	758

The above table shows that 86 high schools enroll fewer than 50 pupils. Last year, 112 high schools enrolled fewer than this number—a decrease of 26 in the number of these very small high school organizations. Of the 86 high schools enrolling fewer than 50 pupils, 17 are private schools and 23 are high schools for Negroes. This table also discloses that there are 302 high schools enrolling fewer than 100 pupils. Last year, this number was 348. Two years ago there were 407 high schools enrolling fewer than 100 pupils. Of the 302 high schools enrolling fewer than 100 pupils, 47 are public high schools for Negroes and 43 are private secondary schools. This table also shows that 194 high schools enroll 200 or more pupils. This number is in contrast to 182 high schools which last year enrolled 200 or more pupils and 151 high schools year before last. It is apparent that the day is passing when we shall think in terms of small thirty-, forty-, or fifty-pupil high schools. We are definitely headed in the direction of high schools that enroll 100 or more pupils.

The number of small, struggling high schools which continue to exist are not continuing because of conviction of their worth, but rather because of such factors as sparseness of population in areas where they are located, inadequate financial ability of certain counties to operate a better system of schools, or poor road conditions for transportation to larger and better high school centers. In some sections it has been a question whether to have a very small high school or no high school at all. In counties where the population is fairly dense and roads are good, one expects to find consolidated

high schools with enrollments large enough to justify a fairly rich and broad program of work.

As has been pointed out, the percentage of small high schools is decreasing. More and more county boards of education and taxpayers are becoming convinced that small high schools should be regarded as concessions to untoward conditions rather than as things to be desired.

It is hoped that county school authorities and those who support the schools will see the wisdom of abandoning many of their small, expensive and usually inefficient high schools through transporting their pupils to larger community centers where a broader and more enriched program of work is provided. Every county superintendent and every county board in counties where small high schools are operated should carefully survey the possibility of providing the boys and girls of these little schools with the opportunities that are offered pupils in larger centers. It is only in this way that secondary education in rural areas, especially, can provide boys and girls with a program of work that better fits them for college or for passage directly into life activities.

In this connection it should be pointed out that beginning with the next school year (1940-41), the State Board of Education will impose the following requirements in reference to the number of teachers employed and the number of pupils in membership in the various types of accredited high schools:

Class A High Schools

(1) Four-year high schools (grades 9-12) and three-year senior high schools (grades 10-12) shall employ at least five full-time teachers and have a bona fide enrollment of at least one hundred pupils.

(2) Six-year high schools (grades 7-12) shall employ at least seven full-time teachers and have a bona fide enrollment of at least one hundred and fifty pupils, one hundred of whom shall be enrolled in grades 9, 10, 11, and 12.

Class B High Schools

(1) Four-year high schools (grades 9-12) shall employ at least three full-time teachers and have a bona fide enrollment of not fewer than sixty pupils.

(2) Six-year high schools (grades 7-12) shall employ at least four full-time teachers and have a bona fide enrollment of not fewer than eighty-five pupils, sixty of whom shall be enrolled in grades 9, 10, 11, and 12.

Local school authorities have been notified from time to time during the past three years that these new regulations were to go into effect with the beginning of the coming school year. The Division of Supervision of the State Department of Education will continue to cooperate with local school authorities in their efforts to adjust their high school program to meet these requirements.

1939-40	121,204	10,342	9,999	141,545

* Beginning with the school year 1932-33, the enrollments of the 7th and 8th grades of six-year high schools and of junior high schools are included in the totals.

Table V presents an interesting picture of the increase in high school enrollments in the different types of high schools since 1915 to the present day. In this increase in high school enrollments, one finds an increase that is many times greater than the increase in the state's population during the same period. Only one conclusion can be drawn from these figures and that is the growing success of the idea of high school education for all boys and girls of high school age in the state. In this connection it is interesting to note that along with this increase in enrollment has gone a decrease in the number of high schools. This is a fact which proves that there is a very definite movement throughout the state in the direction of fewer and larger high schools.

The character of our high school population has changed greatly since 1915. Then the high school was thought of only as a school for the few rather than an institution for the many. In fact prior to 1908, there were fewer than 50 high schools in the state. They were small, enrolling fewer than 5,000 pupils and all were located in cities. Practically all boys and girls who lived in rural areas were

without high school advantages except in so far as private schools were organized. Many of these private schools did not offer work beyond the eighth or ninth grades. It was not until 1908 that the counties were legally bound to establish high schools and it was not until 1914 that districts independent of the county system were required by law to provide high school education for their boys and girls. Since the date of these legal demands on county and independent districts, the growth in numbers of high schools and enrollments has been phenomenal.

The above has been written for two purposes; first, to show that the idea of public secondary education is of comparatively recent date in this state, and, second, that the phenomenal development of this idea has within it significant implications for those who administer public secondary schools in both county and independent districts. It was once thought that the public high school was intended for select economic and social groups and that preparation for college was its chief aim. Today, however, when one notes that only thirty per cent of those who finish high school enter college, one is conscious of the fact that our secondary schools are attracting not only the select, but every other group of our economic and social life. As boys and girls of all groups of our population continue in increasing numbers to find their way into high school, then those who

1939-40	529	59	73	661

administer secondary education will be called upon more and more to reorganize high school work so as to better meet the varied interests, needs, aptitudes and abilities of those who attend. This calls for and will continue to call for greater adaptation of instruction and subject matter courses to the economic and social life of today as well as to the individual differences of pupils.

The above table shows the situation as regards the number of accredited high schools by years since 1909. When one thinks of a high school in its true sense, one thinks of an institution that offers a program of work through the twelfth grade. High schools that are organized to give work which does not extend through the twelfth grade, excepting junior high schools (grades 7-9) should be looked upon as incomplete, feeder schools for regularly organized high schools, i. e., schools that offer pupils a complete high school program through the twelfth grade.

* Interpretation of High School Ratings.

A—Accredited through the entire high school course (through grade twelve).

B—Accredited through the entire high school course (through grade twelve).

11 Gr.—Accredited through grade eleven.

10 Gr.—Accredited through grade ten.

9 Gr.—Junior high school—recognized through grade nine.

T—This initial when attached to the designation of any rating indicates that such rating is given in the face of some deficiency, that it is temporary for this year only, and that the school should be discontinued at the close of this school year or reorganized in full compliance with regulations for accrediting.

E—This initial suggests that an emergency is recognized to exist that may justify the operation of the school even with an observed shortage in the number of pupils or of teachers.

U—Unaccredited.
