Work is conducted.**

THIRD SESSION

OF

Kentucky State
Summer School for Teachers

STATE COLLEGE

LEXINGTON, KENTUCKY

June 7th to July 20th, 1905

JAS. K. PATTERSON, Ph. D., LL. D.,

President.

MILFORD WHITE, M. S.,

Director.

TRANSYLVANIA PRESS
LEXINGTON, KY.

Special Features

1. A Faculty composed of instructors of long experience and of recognized ability.
2. Thorough and searching reviews of all subjects on which teachers are examined for certificate of any kind or grade.
3. A comprehensive course in pedagogy, including special lectures by some of the most prominent educators in Kentucky.
4. Nature study in its most interesting phase. Practice in the propagation and culture of plants in the green-house.
5. A course in Free-hand Drawing, under an expert artist, will be given without extra cost.
6. Best buildings and equipments in the State.
7. Special examination for State Certificate to be held at close of term for the accommodation of students in the Summer School.
8. Attendance at Summer School accepted by County Superintendents in lieu of attendance at County Institute.
9. Rooms in College dormitories free of rent. Good table board from \$2.00 to \$3.00 per week.
10. A single fee of six dollars pays for entire course of instruction.
11. Rates on all railroads in Kentucky one and one-third fare for the round trip. Tickets sold on certificate plan.

Patterson Hall—Dormitory for Women.

Object

THE Kentucky State Summer School for teachers was established by the Trustees of the State College at their annual meeting in December, 1902.

The sole object of this school is to offer to teachers in the public schools of the state an opportunity to prepare themselves for more effective work in the calling in which they are engaged.

Although the Summer School for Teachers has existed during only two summers, yet it points with pleasure to quite a large number of teachers who by their faithful, earnest work here have merited and secured substantial promotions.

Some have been promoted from the primary and grammar grades to the high school, others have come from the ungraded rural schools to the graded schools of cities, and still others have been promoted from second or third class rural schools to first class ones. Also some who had never taught before coming here were prepared in the Summer School to pass successfully their first examination for certificate and have started on successful careers as teachers.

That which students in former years have accomplished should likewise be accomplished by scores of others in the Summer School of 1905.

Every teacher who desires to equip himself better and to earn a better salary is cordially invited to attend this school.

Courses of Study.

I. For County Certificate.

Searching reviews of all the common school branches will be made, and extensive drills will be given in order to make sure that all who take this course shall be prepared to pass successfully any county examination. Classes in Arithmetic, Grammar, Composition, U. S. History, Civil Government, Geography, Physiology, and Theory and Practice of Teaching will meet and recite every day during the term. A class in miscellaneous work comprising drills in diacritics, principles of reading and of writing will be organized and will meet as often as may be necessary to accomplish the desired results. The term will close just in time for those who study here to go home and take the county examination on July 21st and 22nd.

II. For State Certificate.

Classes in Higher Arithmetic, Algebra, English and American Literature, and Psychology will be organized on the first day of the term and pushed with the utmost vigor until the close. Teachers who hold first class County Certificates and have some knowledge of Algebra and Literature can prepare for State Certificate in one term of the Summer School. Arrangements have been made with the State Board of Examiners to hold a special examination for State Certificate at the close of the Summer School. The date of this special examination will be fixed at a time such that it will not interfere with the regular county examination in July. Any person can take both if he desires to do so.

III. For State Diploma.

Review classes in Plane Geometry, Elementary Physics, and Latin, will be organized to accommodate those who desire to prepare for examination for State Diploma. Teachers who hold State Certificates and in addition have some knowledge of Latin and Geometry are advised to enter this course.

IV. Course in Free-hand Drawing.

The importance of this subject to teachers is becoming more and more recognized every year. All first-class graded schools now require Drawing to be taught in every grade. Rural schools are beginning to follow the example. For this reason we have added Free-hand Drawing to the curriculum this year. Miss Elizabeth Lee McCann, an accomplished artist, has been engaged to instruct this class.

Miss McCann's preparation was received partly in Lexington, where she had the best advantages offered by this city, and partly in Brooklyn, N. Y., where she studied for some time in Pratt Institute. Her work is highly praised by all who know her.

V. Course in Nature Study.

The green-house and the scientific laboratories of the College offer a most excellent opportunity for Nature Study.

The particular line of work decided upon for this summer is that which pertains to the propagation and culture of a large number of plants.

Mr. L. D. Moore, a practical horticulturist, will give instructions in this subject and many interesting and important lessons will be given. The work will be done in the College green-house and will be exceedingly practical.

Admission.

Teachers and persons preparing to teach will be admitted to the Summer School without examination. Advice in regard to the selection of studies will be given to all who desire it. A person may enter one course and review one or more subjects in another without extra cost. The greatest possible freedom in the selection of studies will be allowed and the schedule of recitations will be so arranged that conflicts will be practically impossible.

Special Lectures.

Arrangements have been made for a number of special lectures by some of the most prominent educators in Kentucky. These lectures will be on subjects of vital importance to teachers and will be free to those who attend the Summer School.

President Patterson will deliver a series of lectures on the more important problems of Political Economy, such as the relation of labor and capital, the law of rent, banking and currency.

Prof. M. A. Cassidy, Superintendent of the Public Schools of the city of Lexington and a member of the State Board of Examiners, will deliver a course of lectures on some of the most important phases of Pedagogy.

The Chemical Laboratory—The old Spanish Cannon.

Business Statement.

Fees.

A single fee of six dollars will be collected from each person at the time of registration. This pays for the full course and no other fee whatever will be charged. No rebates will be made on account of absence.

Lodging and Board.

Ladies who attend the Summer School will be furnished with elegant rooms in Patterson Hall (the College home for ladies), free of charge. This building is one of the best of its kind in the South. It is surrounded by a beautiful lawn and is supplied with electric lights, bath-rooms, and, in fact, every modern convenience, and all is offered *free* by the State College to students in the Summer School. Excellent table board will be served in the dining-room of Patterson Hall at \$3.00 per week.

Gentlemen who attend the Summer School will be provided with comfortable rooms free in one of the dormitories for men on the College campus. They can secure good table board within easy reach of the dormitory at rates varying from \$2.00 to \$3.00 per week.

From the above statement it is easily seen that the total cost of attending the Summer School need not exceed the following:

Fee.....	6 00
Room Rent Free.....	0 00
Board for six weeks at \$2.00 to \$3.00.....	12 00 to \$18 00

Total.....\$18 00 to \$24 00

This does not include cost of laundry or books.

Traveling Expenses

Arrangements have been made with all railroads in Kentucky to sell tickets to persons attending the Summer School at one and one-third fare for the round trip. Tickets will be sold on the *certificate plan*. Mention this to the ticket agent when you buy your ticket and he will give you all the explanation necessary.

Saves Institute Expenses

Nearly all County Superintendents have agreed to excuse from the County Institute those teachers who attend the Summer School and secure a certificate of such attendance from the Director.

Gymnasium, looking from the Lake.

THE STATE COLLEGE OF KENTUCKY

LEXINGTON, KENTUCKY

THE Agricultural and Mechanical (State) College of Kentucky offers the following courses of study, viz: Agricultural, chemical, biological, mathematical, physical, normal school, classical, mechanical engineering, mining engineering, civil engineering, each of which extends over four years and leads to a degree. Post-graduate studies are also provided, leading to a master's degree. Each course of study is organized under a separate faculty. The general faculty number nearly fifty professors and instructors.

County appointees receive tuition, room rent in dormitories, fuel and light, and if they remain ten months, traveling expenses.

The laboratories and museums are large, well equipped, comprehensive and modern.

The Legislature appropriated \$60,000 for a college home for young women and \$30,000 for a drill hall and gymnasium for men. Military tactics and science are fully provided for as required by Congress.

Graduates from the several courses of study readily find excellent positions and liberal remuneration. The demand is largely in excess of the ability of the college to supply. The matriculation for the current year to date is 650.

Specialists with the necessary number of assistants have charge of each department of natural science. Summer schools are provided for pedagogy, engineering and instruction in science and arts.

The State College of Kentucky, though bearing hitherto the title of 'college,' is the only institution in the Commonwealth doing in any proper sense university work.

The completion of the college home for young women provides facilities for good board and lodging. It is equipped with all modern conveniences, including bath rooms and a room for physical culture. It is heated by steam and lighted by electricity.

An opportunity is thus afforded to them of a thorough education in classics, modern languages, literature, science, mathematics, logic, metaphysics, history and political economy. No other institution in the state offers advantages for the education of women at all comparable to those offered by the State College of Kentucky.

For catalogues, method of obtaining appointments, information regarding courses of study, and terms of admission, apply to

JAMES K. PATTERSON, Ph. D., LL. D.

or to D. C. FRAZEE, Business Agent, Lexington, Ky.

Fall Term Begins September 14th, 1905.
